In witness whereof the undersigned have hereunto placed their hands on the day first hereon before written, James F. Smith, acting secretary of finance and justice, having been authorized to execute this contract by virtue of a resolution of the United States Philippine Commission, adopted on the 10th day of July, 1903, reading as follows:

"Be it resolved by the United States Philippine Commission, That the acting secretary of finance and justice be hereby authorized to contract with the United States of America for furnishing ice to the United States of America from the insular cold storage and ice plant for the period of one year, from the first day of July, 1903, to the thirtieth day of June, 1904, inclusive, upon such terms and conditions as shall seem to the said acting secretary of finance and justice expedient."

Witness:

W. H. ELDRIDGE,
Manila, P. I.

HENRY G. SHARPE,
Colonel, A. C. G., U. S. Army,
for and in behalf of the United States of America.

LEON S. ROUDIEZ,
Captain, 25th Infantry.

INSULAR GOVERNMENT OF THE
PHILIPPINE ISLANDS,
By JAMES F. SMITH,
Acting Secretary of Finance and Justice.

HEADQUARTERS DIVISION OF THE PHILIPPINES,
Manila, P. I., July 13, 1903.

Approved:

GEO. W. DAVIS,
Major-General, U. S. Army, Commanding.

INSULAR COLD STORAGE AND ICE PLANT,
OFFICE OF THE SUPERINTENDENT,
Manila, P. I., April 15, 1903.

MR. JOHN ROSS MARTIN,
Paymaster, U. S. Navy, Cavite, P. I.

SIR: I have the honor to invite your attention to a copy of your letter of July 29, 1902, in connection with our agreement relating to the storing of the navy beef and mutton in the insular cold storage and ice plant, and to respectfully request to be informed as to the intention of your department in connection with this matter for the year ending June 30, 1904.

I believe it is of some importance that the matter should be satisfactorily settled before the expiration of the present fiscal year. This office has no objection to a renewal of the agreement under which we are working at present.

Very respectfully,

LEON S. ROUDIEZ,
Captain of Infantry, U. S. Army, Superintendent.

UNITED STATES NAVAL STATION, *Cavite, P. I., April 22, 1903.*

SIR: In reply to your favor of April 15, I am directed by the commandant to inform you that it is his desire to continue for fiscal year 1904 the present arrangements for storing beef and mutton, i. e., 3 cents per cubic foot per month.

Respectfully,

JOHN ROSS MARTIN,
Pay Inspector, U. S. Navy.

THE SUPERINTENDENT INSULAR COLD STORAGE AND ICE PLANT,
Manila.

INSULAR COLD STORAGE AND ICE PLANT,
OFFICE OF THE SUPERINTENDENT,
Manila, P. I., June 23, 1902.

PAYMASTER JOHN ROSS MARTIN, U. S. Navy,
Cavite, P. I.

SIR: I have the honor to invite your attention to copy of correspondence herewith inclosed. This formed the basis of an agreement covering the keeping of beef and mutton

for the Navy by the insular cold storage and ice plant. At the time this agreement was made the Subsistence Department, United States Army, although paying for the entire cold storage space then available, used only about two-thirds of it, and it was thought that the navy beef could be handled in connection with the commissary beef and mutton, shifting it from room to room as required by the quantity of meat to be kept for the Subsistence Department, all the space being taken by the Subsistence Department. The charge made was intended to cover the cost of handling the meat, without any charge for refrigeration or storage. Early this year it was found, however, that the amount of fresh meat to be kept for the Subsistence Department would take up the entire available space, and in order to carry out our agreement with the Navy I found it necessary to fit up a small room for the special use of the meat kept for that department. This caused an additional expense directly chargeable against this duty, and it will be seen that under the circumstances it was practically impossible to take care of the navy beef at the present rate, which is \$2 per ton. The United States Subsistence Department pays at the rate of $3\frac{1}{2}$ cents per cubic foot for the space it occupies, but for this amount we not only bring the beef from the refrigerating ship to the plant, but also deliver it to transports, etc. As in the case of the Navy these deliveries are omitted I believe that a rate of 3 cents per cubic foot per month or fraction thereof would be a fair charge for the service.

The room now exclusively used for the navy fresh meat contains 9,979 cubic feet, and while it does not quite hold all the meat when first received from the ship, requiring shifting into and from other rooms, a few issues soon relieve the congestion and the room made to accommodate the meat safely and conveniently.

Ice can be supplied as heretofore at the rate of one-half cent per pound.

Kindly give this matter your early attention and oblige,

Yours, respectfully,

LEON S. ROUDIEZ,

Captain, 25th Infantry, U. S. Army, Superintendent.

UNITED STATES NAVAL STATION, Cavite, P. I., July 29, 1902.

SIR: In reply to your esteemed favor of June 23, I have the honor to inform you that the commandant of this station has instructed me to advise you that he accepts the terms contained in your kind letter, viz, 3 cents per cubic foot per month for the cold storage of beef and mutton for the Navy for the fiscal year 1903.

Very respectfully,

JOHN ROSS MARTIN,
Paymaster, U. S. Navy.

Capt. LEON S. ROUDIEZ,

Twenty-fifth Infantry, U. S. Army,

Superintendent Insular Cold Storage and Ice Plant, Manila.

The foregoing are true copies.

Recapitulation of earnings, expenditures, and reductions for the fiscal year 1904.

Earnings.....	P 602, 948. 81
Expenditures.....	395, 622. 18

Excess.....	207, 326. 63

EXHIBIT 6.

REPORT OF THE CHIEF OF THE DIVISION OF CURRENCY.

TREASURY BUREAU, DIVISION OF THE CURRENCY,
Manila, P. I., September 1, 1904.

SIR: In accordance with the provisions of section 11 of Act 938, United States Philippine Commission, which provides that "the chief of the division of the currency shall be required to make to the insular treasurer an annual report covering the affairs and business of the division in detail," I have the honor to submit the following report covering the period from October 10, 1903, the date of the enactment of the Philippine gold-standard act (United States Philippine Commission, No. 938), to September 1, 1904.

CERTIFICATES OF INDEBTEDNESS.

Since the last annual report of the Philippine Commission two additional series of certificates of indebtedness have been issued, pursuant to section 6 of the Philippine coinage act of Congress, approved March 2, 1903. These series were issued upon the same terms and conditions as the two series of last year, and the proceeds therefrom were used in paying off the two former series upon the dates of their respective maturities. The terms and results of the four series so far issued may be briefly summarized as follows:

Philippine certificates of indebtedness.

	Date of series.	Denomination.	Amount issued.	Rate of interest.	Maturity.	Rate of premium.	Net interest paid.
				<i>Per ct</i>			
I.....	May 1, 1903	\$1,000	\$3,000,000	4	May 1, 1904	2.513	1.487
II.....	Sept. 1, 1903	1,000	3,000,000	4	Sept. 1, 1904	2.24	1.76
III.....	May 1, 1904	1,000	3,000,000	4	May 1, 1905	1.181	2.819
IV.....	Sept. 1, 1904	1,000	3,000,000	4	Sept. 1, 1905	1.41	2.59

Under the Philippine gold-standard act provision is made that a considerable part of the gold-standard fund, which fund is constituted principally from the proceeds of certificates of indebtedness, shall be kept on deposit in New York City. In speaking of the proceeds of the above certificates of indebtedness it should therefore be added that a considerable part of the proceeds realized therefrom has been kept on deposit in New York City, and that up to April 1, 1904, the Philippine government realized upon the average daily balance of this fund in New York an interest of $3\frac{1}{2}$ per cent. Since April 1, 1904, the rate has been 3 per cent.

COINAGE OF NEW PHILIPPINES CURRENCY.

Any statement of the expenses connected with the coinage of the new currency requires that the money coined should be separated

into two distinct parts, (1) that coined from bullion purchased, (2) the recoinage, or that coined from local currency collected in the islands and shipped to the San Francisco mint for recoinage.

No complete and detailed report has yet been received by this office with reference to the cost of money coined from bullion purchased. On the basis of the data so far available, however, and on the assumption that expenses of minting, transportation, etc., in the case of coins upon which detailed returns have not yet been received will be the same as those for similar services in the cases already reported, the following figures have been prepared by the chief of the division of the currency, which, although subject to revision, are believed to represent an approximation sufficiently close for practical purposes.

Seventeen million three hundred and thirty-four thousand five hundred pesos, Philippines currency,^a in silver coins have been coined from bullion purchased. The total cost of the bullion used in their coinage has been ₱14,745,981.30, giving an average of \$0.5453 per ounce fine. The mint charges for the coinage of this sum have been approximately ₱419,673.60, and the expenses connected with its transportation to the islands, including packing, freight, and insurance, have been approximately ₱45,114.41, which gives a gross seigniorage (face value of coins, less cost of bullion) of approximately ₱2,588,518.70, a net seigniorage (face value of coins, less cost of bullion and mintage expenses) of approximately ₱2,168,845.10, and a net seigniorage, less transportation charges, of approximately ₱2,123,730.69.

Four hundred and ninety-nine thousand two hundred and fifty pesos, Philippines currency, in nickels, have been received, the cost of the bullion consumed in the making of which was approximately ₱119,293.10, the mintage charges approximately ₱5,391.90, the transportation expenses approximately ₱3,734.89, giving a gross seigniorage on the nickels of approximately ₱379,956.90, a net seigniorage of approximately ₱374,565.70, and a net seigniorage, less transportation expenses, of approximately ₱370,830.11.

Three hundred and thirty-six thousand seven hundred and seventy pesos, Philippines currency, in copper coins (inclusive of ₱44,000 received September 2, 1904) have been received. The cost of bullion was approximately ₱217,616.65, the mintage charges were approximately ₱9,092.79, the transportation expenses were approximately ₱12,436.91, giving a gross seigniorage on the copper coins of approximately ₱119,153.35, a net seigniorage of approximately ₱110,060.56, and a net seigniorage, less transportation expenses, of approximately ₱97,623.65.

The above figures give a total gross seigniorage of ₱3,087,628.95, a total net seigniorage of ₱2,653,470.66, and a total net seigniorage, less transportation expenses, of ₱2,592,184.45.

The process of recoinng local currency is still being continued at the San Francisco mint, and it is as yet impossible to give any comprehensive statement concerning the results of the recoinage. It is safe to say, however, that in view of the relatively small amount of silver contained in the Spanish-Filipino money, and of the rates at

^aAn executive order, dated August 3, 1903, makes \$ the official designation for United States currency, pfs. for Mexican and Spanish-Filipino currency and P for the Philippines currency.

which that money has been redeemed by the government, the recoinage will involve the government in a considerable loss.

The reports so far received concerning the weight and fineness of the local currency sent to the San Francisco mint seem to show that the coins have been remarkably well preserved, as the following figures will bear witness:

Mint reports of Spanish-Filipino currency shipped for recoinage.

Character of money.	Amount.	Average discrepancy from legal fine silver content. ^a
	<i>P/s.</i>	<i>Per cent.</i>
Pesos	90,000	0.31
Do	200,000	.30
Do	500,000	.32
Half pesos	510,000	.43
Do	110,000	.25
Do	446,670	.35
Pesetas (20 cents)	90,000	1.70
Do	52,000	1.70
Media pesetas (10 cents)	4,000	3.40

^aA few old Spanish pesos were included among the Spanish-Filipino pesos (alfonsinos) shipped, and being heavier than the alfonsinos would make the discrepancy in the weight and fineness of the latter appear slightly less in the table than it actually was.

PHILIPPINES CURRENCY RECEIVED.

The new Philippine coins began to arrive in Manila from the United States mints the fore part of June, 1903, and were first placed in circulation on July 23, by means of deposits in certain Manila banks and payments for salaries and other government obligations. The total amounts of Philippines currency received from the United States up to June 30, 1904, and August 31, 1904, respectively, are given in the following table:

Philippines currency received.

Date.	Coins.				Silver certificates.
	Pesos.	Subsidiary coins.	Minor coins.	Total.	
To June 30, 1904	P 15,583,000	P 3,497,500	749,020	P 19,829,520	P 12,040,000
To August 31, 1904	17,053,000	3,497,500	792,020	21,342,520	15,030,000

PHILIPPINE GOLD-STANDARD ACT.

On October 10, 1903, the Philippine gold-standard act was passed by the Commission. This act filled in the details of the new currency system provided by Congress and created the necessary administrative machinery for its maintenance.

The act placed the new currency upon what is commonly known as the "gold-exchange standard." Its principal provisions may be summarized briefly as follows:

(1) The establishment in the insular treasury of a separate and trust fund, to be known as the "gold-standard fund," this fund to be composed of all the proceeds of the certificates of indebtedness previously referred to, of all seigniorage profits realized in the coinage of

the new currency, of all profits from the sale of exchange, and of "all other receipts in the insular treasury inuring to the insular government in the exercise of its functions of furnishing a convenient currency for the islands." The fund must be used exclusively for the maintenance of the parity of the new currency with the theoretical gold peso established by Congress as the unit of value and the expenses incident thereto, including the purchase of bullion for new coinage, its transportation, mintage, etc. The law provides that part of the fund shall be held in Manila and part in New York.

(2) "For the purpose of facilitating the more efficient discharge of the functions of the insular government with respect to the circulation of the new currency * * * and for the purpose of maintaining the parity," there was created in the bureau of the insular treasury a division known as the "division of the currency," presided over by an officer known as the "chief of the division of the currency."

(3) For the maintenance of the parity of the new currency and regulating its supply, three forms of redemption were provided in the law, the principal one being mandatory on the part of the government and the other two optional: (a) The insular treasurer was authorized and directed to sell on demand for Philippines currency or United States currency "drafts on the gold-standard fund in the United States or elsewhere * * * charging for the same a premium of three-quarters of one per cent for demand drafts and of one and one-eighth per cent for telegraphic transfers," when said Philippine currency is "offered in sums of not less than ten thousand pesos" or said United States currency "in sums of not less than five thousand dollars." The depositories of the gold-standard fund in the United States were likewise directed to sell exchange on the gold-standard fund in Manila, charging therefor the same premium rates. (b) On the approval of the secretary of finance and justice, the insular treasurer was authorized to exchange United States paper currency^a for Philippines currency and Philippines currency for United States paper currency at the rate of 2 pesos Philippines currency for \$1 United States currency. (c) On the approval of the secretary of finance and justice, the insular treasurer was authorized to exchange for Philippines currency United States gold coin or gold bars, charging a premium sufficient to cover the expenses at commercial rates of transporting United States gold coin from New York to Manila.

The premium rates charged by the government for exchange on the gold-standard fund were fixed to represent as nearly as possible the actual commercial expense of shipping gold bars between New York and Manila. All money presented to the insular treasury for redemption or for the purpose of exchange on the United States pursuant to the above provisions of the law must be immediately withdrawn from circulation and not paid out again except in response to similar counter demands or for the purchase of bullion to provide an increase in the coinage. Philippines currency presented to the insular treasury for the purchase of exchange on New York is thus as effectually withdrawn from trade channels in the Philippines as are gold coins or gold bars in the United States when shipped out of the country.

^aUnited States silver, nickel, and copper coins are not recognized in the law. Their circulation in the islands has been found undesirable on account of their liability to be counterfeited and of the fact that they are easily confused with similar Philippine coins of half the value.

SUBSIDIARY AND MINOR COINS.

During almost the entire period of the Spanish régime in the islands there were continual complaints of the scarcity of small coins in circulation. To remedy this difficulty and to assure at all times throughout the islands an ample supply of small coins, section 8 of the gold standard act declares that the treasurer of the Philippine Islands and the treasurers of the several provinces are authorized and directed to exchange Philippine pesos on demand for Philippine subsidiary and minor coins, and Philippine subsidiary and minor coins for Philippine pesos, provided the exchanges requested are for sums of 10 pesos or any multiple thereof.

GOLD STANDARD FUND.

Pursuant to section 3 of the Philippine gold standard act, all funds in the insular treasury properly belonging to the gold standard fund were duly segregated on November 1, 1903, and the total balance to the credit of the fund on that date was found to equal ₱13,240,732.39. It was decided, upon the recommendation of the chief of the division of the currency, concurred in by the insular treasurer and the insular auditor, to divide this sum by means of exchanges and transfers with other funds, on the basis of placing to the credit of the gold standard fund in Manila on November 1, 1903, \$1,250,000 and ₱2,500,000, and to the credit of the fund in the Guaranty Trust Company at New York the balance, or \$4,120,366.19. The actual division of the fund so determined upon it was found impracticable to make until May 14, 1904, on account of the difficulty of obtaining the necessary transfers with other funds in New York.

The condition of the fund at the end of each month since November 1, 1903, as shown by the records of the division of the currency, has been as follows:

Date.	Fund in Manila.		Fund in New York, United States currency.	Total fund (\$1=₱2), Philippines currency.
	United States currency.	Philippines currency.		
1903.				
November (balance Nov. 1)				₱ 13,240,732.39
November				12,889,168.25
December				13,411,538.13
1904.				
January				13,361,920.03
February				a 11,948,520.08
March				11,095,829.00
April				10,018,283.78
May	\$1,796,273.08	₱ 3,215,542.71	\$1,316,003.96	9,441,296.81
June	799,527.09	3,450,782.48	2,106,877.27	9,263,591.20
July	1,019,244.53	608,443.74	2,008,562.85	6,754,058.50
August	917,203.09	2,316,194.54	b 1,247,816.47	4,301,775.70

a The rapid decline in the total fund since February is due to heavy purchases of local currency for coinage, the proceeds of which enter the fund as soon as received.

b This debit balance in New York on August 31 was merely nominal. The proceeds of the fourth series of certificates of indebtedness were received in New York on the same day on which the second series were paid off. The apparent overdraft is due merely to the lapse of time between the issue of the warrant in Manila for the payment of the latter and the arrival in Manila of the receipt for the proceeds of the former.

The account of the gold standard fund since November 1, 1903, the date of its segregation, upon the basis of the division of the fund between Manila and New York then determined upon (although not

the new currency, of all profits from the sale of exchange, and of other receipts in the insular treasury inuring to the insular government in the exercise of its functions of furnishing a convenient currency for the islands." The fund must be used exclusively for maintenance of the parity of the new currency with the then gold peso established by Congress as the unit of value and the expense incident thereto, including the purchase of bullion for new coin, its transportation, mintage, etc. The law provides that part of the fund shall be held in Manila and part in New York.

(2) "For the purpose of facilitating the more efficient discharge of the functions of the insular government with respect to the circulation of the new currency * * * and for the purpose of maintaining the parity," there was created in the bureau of the insular treasury a division known as the "division of the currency," presided over by an officer known as the "chief of the division of the currency."

(3) For the maintenance of the parity of the new currency with the United States currency, three forms of redemption were provided by law, the principal one being mandatory on the part of the insular government and the other two optional: (a) The insular treasurer was authorized and directed to sell on demand for Philippines currency United States currency "drafts on the gold-standard fund in the United States or elsewhere * * * charging for the same three-quarters of one per cent for demand drafts and one and one-eighth per cent for telegraphic transfers," when said currency is "offered in sums of not less than ten thousand United States currency" "in sums of not less than five hundred United States dollars." The depositories of the gold-standard fund in the United States were likewise directed to sell exchange on the gold-standard fund in Manila, charging therefor the same premium as on the approval of the secretary of finance and justice. The insular treasurer was authorized to exchange United States paper currency for Philippines currency and Philippines currency for United States currency at the rate of 2 pesos Philippines currency to 1 United States currency. (c) On the approval of the secretary of justice, the insular treasurer was authorized to exchange United States gold coin or gold bars for Philippines currency sufficient to cover the expenses at commission.

That the gold-standard fund in the United States was likewise directed to sell exchange on the gold-standard fund in Manila, charging therefor the same premium as on the approval of the secretary of finance and justice. The insular treasurer was authorized to exchange United States paper currency for Philippines currency and Philippines currency for United States currency at the rate of 2 pesos Philippines currency to 1 United States currency. (c) On the approval of the secretary of justice, the insular treasurer was authorized to exchange United States gold coin or gold bars for Philippines currency sufficient to cover the expenses at commission.

"United States currency is the value of the gold-standard fund in the United States."

The above exchange sold on the gold standard fund in New York was paid for almost entirely in Philippines currency, and the same withdrawn from circulation as provided for in section 7 of the gold standard act.

The balance of trade ever since the passage of the gold standard act has been strongly against the islands, and no exchange has been sold during this time in New York on the gold standard fund in Manila. The fund in New York was maintained, in spite of the heavy drafts made upon it, by means of transfers with the Army and Navy, and without the necessity of the government's making any shipments of money to New York for the purpose of replenishing the fund there on deposit.

The figures show that the new Philippine silver certificates have proven remarkably popular. While it is true that in some sections of the islands there is a strong prejudice on the part of the natives in favor of metallic money, experience so far seems to justify the conclusion that, taking the islands as a whole, that prejudice is nothing like as strong as has heretofore been supposed.

WITHDRAWAL OF LOCAL CURRENCY FROM CIRCULATION.

The most serious problem presented to the Philippine government during the past year, with reference to the introduction of the new currency, was that of the withdrawal of the old currency from circulation. This currency commonly known as "local currency" consisted of (1) Mexican pesos, (2) Spanish-Filipino pesos, (3) Spanish-Filipino medio pesos and small silver coins, (4) a miscellaneous assortment of coins, consisting of old Spanish dollars, many of them dating back into the eighteenth century, subsidiary silver coins from various Chinese mints, and copper coins from nearly every country in the Orient. No reliable data was obtainable with reference to the quantity of these coins in circulation. Mexican dollars have been in circulation in the islands since early in the last century. From 1877 to August, 1898, their importation was prohibited, although during that period considerable sums were smuggled into the islands by the connivance of Spanish customs officials. The Spanish-Filipino pesos, commonly known as "alfonsinos," contained about 8 per cent less silver than the Mexican dollar. The quantity in circulation was known to be about five and one-half millions. The Spanish-Filipino medio pesos and smaller silver coins contained about 12 per cent less pure silver to the peso than the Mexican dollar. While the amount of this money coined was shown in the official Spanish records, it was impossible to obtain any reliable information with reference to the amounts exported.

On November 1, 1903, the chief of the division of the currency estimated the amount of the Spanish-Filipino subsidiary money in the islands at about 10,000,000 pesos, the estimate having been made by taking the proportion of "alfonsinos" to Spanish-Filipino subsidiary coins held by the insular treasury and four of the principal banks of Manila upon a certain day believed to be typical, and assuming that the proportion held by these institutions was fairly representative of the proportions of the two classes of coins in general circulation. The amount of "alfonsinos" in circulation being fairly accurately known, it was a simple task to estimate the amount of the subsidiary coins. An estimate of the amount of Mexican currency was made in the same manner by the chief of the division of the currency on October 22, 1903, two different dates during previous years having been taken as the basis of the estimate. All importations and exportations since those dates respectively were taken into account. The results for the two different dates closely agreed, and on the basis thereof the chief of the division of the currency estimated the total amount of Mexican currency in the islands on October 20, 1903, to have been not less than 15,000,000 pfs. This estimate was generally believed by the banking community to have been too large.

The Spanish-Filipino money was in a peculiar sense the money of the country, and the Philippine government felt itself bound to make

careful provision for its redemption. Toward the Mexican currency and other foreign coins in circulation in the islands, the government did not feel the same degree of moral obligation. As previously noted, the importation of these coins had been prohibited from 1877 to 1898, and a large proportion of those in circulation had been smuggled into the islands. The Mexican dollar, moreover, was an important article of merchandise throughout the Orient, regularly circulated at about its bullion value, and was believed to be well capable of taking care of itself.

Considerable pressure was brought to bear upon the government by the business community to induce it to redeem all the local currency in the new currency at par. Among the many arguments advanced in favor of this plan the strongest were (1) that it would greatly expedite the transition to the new currency basis, and thereby materially reduce the unsettlement of business which always characterizes such a transition period, and (2) that to the great masses of the natives who bought and sold only native produce, the new peso would not for some time possess any more purchasing power than the old, and that to compel them to exchange the old money for the new at any rate less than par would involve them in a material loss.

Despite the force of these arguments there were certain fundamental difficulties in the way of redeeming the old currency at par. The amount of this currency in the islands was unknown. Its redemption at par would have meant its redemption at a price far above its bullion value, and above the values at which it would otherwise have circulated. Later computations have shown that the premiums paid on Mexican dollars would have varied from something like 2 to 16 per cent above their bullion value, and that the net loss, inclusive of seigniorage, which the government would have suffered by redeeming the Spanish-Filipino currency at par during the year would have varied from something like 16 to 30 per cent, according to the variations in the market price of silver. Such prices would certainly have led to the smuggling of large quantities of Mexican currency into the islands, as most of the surrounding countries are fairly saturated with that money, and the Philippines have an enormous unprotected coast line. The expense involved in redeeming the old currency at par would have been an enormous burden upon the entire people, while the profits would have been realized not so much by the masses as by the smugglers, and by the wealthy classes of the population in whose hands the bulk of the local currency was believed to be held.

It was finally decided by the Commission that the circumstances did not justify the great expense which the redemption of the old currency at par would necessitate.

The Philippine coinage act of Congress provided that local currency should be legal tender in the islands until January 1, 1904, and that it should "be receivable for public dues at a rate to be fixed from time to time by the proclamation of the civil governor * * * until such date, not earlier than the first day of January, nineteen hundred and four, as may be fixed by public proclamation of said civil governor, when such coins shall cease to be so receivable." Soon after the receipt of the first new coins from the United States, the insular treasurer adopted the policy of withdrawing from circulation

The figures show that the new Philippine silver certificates have proven remarkably popular. While it is true that in some sections of the islands there is a strong prejudice on the part of the natives in favor of metallic money, experience so far seems to justify the conclusion that, taking the islands as a whole, that prejudice is nothing like as strong as has heretofore been supposed.

WITHDRAWAL OF LOCAL CURRENCY FROM CIRCULATION.

The most serious problem presented to the Philippine government during the past year, with reference to the introduction of the new currency, was that of the withdrawal of the old currency from circulation. This currency commonly known as "local currency" consisted of (1) Mexican pesos, (2) Spanish-Filipino pesos, (3) Spanish-Filipino medio pesos and small silver coins, (4) a miscellaneous assortment of coins, consisting of old Spanish dollars, many of them dating back into the eighteenth century, subsidiary silver coins from various Chinese mints, and copper coins from nearly every country in the Orient. No reliable data was obtainable with reference to the quantity of these coins in circulation. Mexican dollars have been in circulation in the islands since early in the last century. From 1877 to August, 1898, their importation was prohibited, although during that period considerable sums were smuggled into the islands by the connivance of Spanish customs officials. The Spanish-Filipino pesos, commonly known as "alfonsinos," contained about 8 per cent less silver than the Mexican dollar. The quantity in circulation was known to be about five and one-half millions. The Spanish-Filipino medio pesos and smaller silver coins contained about 12 per cent less pure silver to the peso than the Mexican dollar. While the amount of this money coined was shown in the official Spanish records, it was impossible to obtain any reliable information with reference to the amounts exported.

On November 1, 1903, the chief of the division of the currency estimated the amount of the Spanish-Filipino subsidiary money in the islands at about 10,000,000 pesos, the estimate having been made by taking the proportion of "alfonsinos" to Spanish-Filipino subsidiary coins held by the insular treasury and four of the principal banks of Manila upon a certain day believed to be typical, and assuming that the proportion held by these institutions was fairly representative of the proportions of the two classes of coins in general circulation. The amount of "alfonsinos" in circulation being fairly accurately known, it was a simple task to estimate the amount of the subsidiary coins. An estimate of the amount of Mexican currency was made in the same manner by the chief of the division of the currency on October 22, 1903, two different dates during previous years having been taken as the basis of the estimate. All importations and exportations since those dates respectively were taken into account. The results for the two different dates closely agreed, and on the basis thereof the chief of the division of the currency estimated the total amount of Mexican currency in the islands on October 20, 1903, to have been not less than 15,000,000 pfs. This estimate was generally believed by the banking community to have been too large.

The Spanish-Filipino money was in a peculiar sense the money of the country, and the Philippine government felt itself bound to make

careful provision for its redemption. Toward the Mexican currency and other foreign coins in circulation in the islands, the government did not feel the same degree of moral obligation. As previously noted, the importation of these coins had been prohibited from 1877 to 1898, and a large proportion of those in circulation had been smuggled into the islands. The Mexican dollar, moreover, was an important article of merchandise throughout the Orient, regularly circulated at about its bullion value, and was believed to be well capable of taking care of itself.

Considerable pressure was brought to bear upon the government by the business community to induce it to redeem all the local currency in the new currency at par. Among the many arguments advanced in favor of this plan the strongest were (1) that it would greatly expedite the transition to the new currency basis, and thereby materially reduce the unsettlement of business which always characterizes such a transition period, and (2) that to the great masses of the natives who bought and sold only native produce, the new peso would not for some time possess any more purchasing power than the old, and that to compel them to exchange the old money for the new at any rate less than par would involve them in a material loss.

Despite the force of these arguments there were certain fundamental difficulties in the way of redeeming the old currency at par. The amount of this currency in the islands was unknown. Its redemption at par would have meant its redemption at a price far above its bullion value, and above the values at which it would otherwise have circulated. Later computations have shown that the premiums paid on Mexican dollars would have varied from something like 2 to 16 per cent above their bullion value, and that the net loss, inclusive of seigniorage, which the government would have suffered by redeeming the Spanish-Filipino currency at par during the year would have varied from something like 16 to 30 per cent, according to the variations in the market price of silver. Such prices would certainly have led to the smuggling of large quantities of Mexican currency into the islands, as most of the surrounding countries are fairly saturated with that money, and the Philippines have an enormous unprotected coast line. The expense involved in redeeming the old currency at par would have been an enormous burden upon the entire people, while the profits would have been realized not so much by the masses as by the smugglers, and by the wealthy classes of the population in whose hands the bulk of the local currency was believed to be held.

It was finally decided by the Commission that the circumstances did not justify the great expense which the redemption of the old currency at par would necessitate.

The Philippine coinage act of Congress provided that local currency should be legal tender in the islands until January 1, 1904, and that it should "be receivable for public dues at a rate to be fixed from time to time by the proclamation of the civil governor * * * until such date, not earlier than the first day of January, nineteen hundred and four, as may be fixed by public proclamation of said civil governor, when such coins shall cease to be so receivable." Soon after the receipt of the first new coins from the United States, the insular treasurer adopted the policy of withdrawing from circulation

The figures show that the new Philippine silver certificates have proven remarkably popular. While it is true that in some sections of the islands there is a strong prejudice on the part of the natives in favor of metallic money, experience so far seems to justify the conclusion that, taking the islands as a whole, that prejudice is nothing like as strong as has heretofore been supposed.

WITHDRAWAL OF LOCAL CURRENCY FROM CIRCULATION.

The most serious problem presented to the Philippine government during the past year, with reference to the introduction of the new currency, was that of the withdrawal of the old currency from circulation. This currency commonly known as "local currency" consisted of (1) Mexican pesos, (2) Spanish-Filipino pesos, (3) Spanish-Filipino medio pesos and small silver coins, (4) a miscellaneous assortment of coins, consisting of old Spanish dollars, many of them dating back into the eighteenth century, subsidiary silver coins from various Chinese mints, and copper coins from nearly every country in the Orient. No reliable data was obtainable with reference to the quantity of these coins in circulation. Mexican dollars have been in circulation in the islands since early in the last century. From 1877 to August, 1898, their importation was prohibited, although during that period considerable sums were smuggled into the islands by the connivance of Spanish customs officials. The Spanish-Filipino pesos, commonly known as "alfonsinos," contained about 8 per cent less silver than the Mexican dollar. The quantity in circulation was known to be about five and one-half millions. The Spanish-Filipino medio pesos and smaller silver coins contained about 12 per cent less pure silver to the peso than the Mexican dollar. While the amount of this money coined was shown in the official Spanish records, it was impossible to obtain any reliable information with reference to the amounts exported.

On November 1, 1903, the chief of the division of the currency estimated the amount of the Spanish-Filipino subsidiary money in the islands at about 10,000,000 pesos, the estimate having been made by taking the proportion of "alfonsinos" to Spanish-Filipino subsidiary coins held by the insular treasury and four of the principal banks of Manila upon a certain day believed to be typical, and assuming that the proportion held by these institutions was fairly representative of the proportions of the two classes of coins in general circulation. The amount of "alfonsinos" in circulation being fairly accurately known, it was a simple task to estimate the amount of the subsidiary coins. An estimate of the amount of Mexican currency was made in the same manner by the chief of the division of the currency on October 22, 1903, two different dates during previous years having been taken as the basis of the estimate. All importations and exportations since those dates respectively were taken into account. The results for the two different dates closely agreed, and on the basis thereof the chief of the division of the currency estimated the total amount of Mexican currency in the islands on October 20, 1903, to have been not less than 15,000,000 pfs. This estimate was generally believed by the banking community to have been too large.

The Spanish-Filipino money was in a peculiar sense the money of the country, and the Philippine government felt itself bound to make

careful provision for its redemption. Toward the Mexican currency and other foreign coins in circulation in the islands, the government did not feel the same degree of moral obligation. As previously noted, the importation of these coins had been prohibited from 1877 to 1898, and a large proportion of those in circulation had been smuggled into the islands. The Mexican dollar, moreover, was an important article of merchandise throughout the Orient, regularly circulated at about its bullion value, and was believed to be well capable of taking care of itself.

Considerable pressure was brought to bear upon the government by the business community to induce it to redeem all the local currency in the new currency at par. Among the many arguments advanced in favor of this plan the strongest were (1) that it would greatly expedite the transition to the new currency basis, and thereby materially reduce the unsettlement of business which always characterizes such a transition period, and (2) that to the great masses of the natives who bought and sold only native produce, the new peso would not for some time possess any more purchasing power than the old, and that to compel them to exchange the old money for the new at any rate less than par would involve them in a material loss.

Despite the force of these arguments there were certain fundamental difficulties in the way of redeeming the old currency at par. The amount of this currency in the islands was unknown. Its redemption at par would have meant its redemption at a price far above its bullion value, and above the values at which it would otherwise have circulated. Later computations have shown that the premiums paid on Mexican dollars would have varied from something like 2 to 16 per cent above their bullion value, and that the net loss, inclusive of seigniorage, which the government would have suffered by redeeming the Spanish-Filipino currency at par during the year would have varied from something like 16 to 30 per cent, according to the variations in the market price of silver. Such prices would certainly have led to the smuggling of large quantities of Mexican currency into the islands, as most of the surrounding countries are fairly saturated with that money, and the Philippines have an enormous unprotected coast line. The expense involved in redeeming the old currency at par would have been an enormous burden upon the entire people, while the profits would have been realized not so much by the masses as by the smugglers, and by the wealthy classes of the population in whose hands the bulk of the local currency was believed to be held.

It was finally decided by the Commission that the circumstances did not justify the great expense which the redemption of the old currency at par would necessitate.

The Philippine coinage act of Congress provided that local currency should be legal tender in the islands until January 1, 1904, and that it should "be receivable for public dues at a rate to be fixed from time to time by the proclamation of the civil governor * * * until such date, not earlier than the first day of January, nineteen hundred and four, as may be fixed by public proclamation of said civil governor, when such coins shall cease to be so receivable." Soon after the receipt of the first new coins from the United States, the insular treasurer adopted the policy of withdrawing from circulation

as far as possible all Spanish-Filipino coins received. An executive order issued by the civil governor on July 30, 1903, authorized the exchange by the insular treasurer of Philippines currency for Mexican and Spanish-Filipino currency, at the official rate of exchange, with the various provincial treasurers of the islands, directed that "all obligations or contracts for labor or materials hereafter executed shall be made payable only in Philippines currency or the legal equivalent thereof in United States currency at the option of the government," and declared that "all such obligations or contracts now existing which are payable only in Mexican or local currency will be readjusted to the new basis as soon as practicable." The order further directed that "payments from provincial funds should be made when practicable in Philippines or United States currency," and that "all Mexican or Spanish-Filipino currency not absolutely required for current use should be reserved for exchange for Philippines currency."

The reception given to the new currency by the public was at first not a hearty one. The new peso was no larger than the Mexican peso upon the basis of which prices had been adjusted for generations, and the Chinese and the natives could not see why it should be worth any more. During the period from August 1 until the end of the year a Philippine peso could be exchanged at the banks or the Chinese exchange shops at anywhere from 1 peso and 4 centavos to 1 peso and 18 centavos local currency. The great majority of merchants and shopkeepers, however, accepted the new peso simply as the equivalent of the old. It was but natural, therefore, that the old money should be preferred to the new by all persons who had money to spend in the islands. It cost less and went as far. Being the cheaper money, it tended quickly to drive the new money out of circulation, in accordance with the principles of Gresham's familiar law. Persons receiving the new money from the government promptly exchanged it at the banks or the shops of the Chinese money changers for the old currency, and thereby realized a profit of from 4 to 18 per cent. The banks and money changers in turn brought the new currency so received to the insular treasury and exchanged it for United States currency or for drafts on the gold standard fund in New York, to be shipped out of the country in settlement of the heavy unfavorable trade balance existing at the time. The Philippines currency paid into the government in this way was immediately withdrawn from circulation in accordance with the provisions of the gold-standard act. Almost as rapidly as the new currency was paid out during August, September, and October, 1903, it came back to the government through these channels.

The situation was somewhat relieved in the city of Manila by an ordinance passed by the municipal board at the suggestion of the chief of the division of the currency, requiring all merchants in the city to post conspicuously in their places of business placards stating in the English, Spanish, and Tagalog languages in what currency their prices were fixed and at what rates they received the various other currencies circulating in Manila. Over 5,000 of these placards were distributed by the government free of charge to the merchants of Manila.

From the beginning of the year 1903 until November each month had witnessed a heavy net exportation of Mexican currency from

the islands. In November the tide began to set in the other direction, and between November 1 and February 1, 1904, there was a net importation of local currency into the islands of over 600,000 pesos.^a Heavy demands were at the same time being made upon the gold-standard fund for exchange on New York,^a while the month of December, 1903, exhibited an actual decrease in the Philippines currency circulation of the islands.^b The situation at the end of the year was not encouraging.

Local currency ceased to be legal tender on December 31, 1903, and the Philippine government was from that time free to discontinue its receipt for public dues.

On December 31, 1903, the government, pursuant to an announcement made several months before, discontinued receiving Mexican currency in payment of government dues, and on January 1, 1904, the civil governor issued an order providing for the redemption of Spanish-Filipino money by the insular treasurer and the various provincial treasurers until July 1, 1904, at such official rates as should be fixed from time to time by executive order, and further directed that said currency should be receivable by the government in settlement of all government dues until October 1, 1904, after which date it was to cease to be so receivable, and thereafter to be redeemable, at the option of the government, only at its bullion value.

On January 26, 1904, the Commission passed a resolution to the effect that—

Whereas the treasurer of the Philippine Islands has made arrangements with the four banks in Manila which have government deposits whereby said banks will return to him Spanish-Filipino coins in payment of his checks upon the government deposits, irrespective of the question as to whether the deposits were made in Spanish-Filipino coins or Mexican; and

Whereas this furnishes a convenient and feasible method of converting all the local currency received by the government into Spanish-Filipino coins, which may be transmitted to San Francisco for recoinage * * *: Be it therefore

Resolved, That it is the sense of the Commission that the retirement of the Spanish-Filipino coins would be facilitated by affording means for the replacement of the Mexican pesos in the provinces by the new Philippines currency through the agency of the provincial treasurers and the disposition of the Mexican in the manner above provided, and that the civil governor be requested to authorize and direct the provincial treasurers to receive Mexican dollars in exchange for Philippines currency at the authorized rate of exchange between Spanish-Filipino coins and Philippines currency and transmit the coins so received to the insular treasurer, such order to continue in force so long as the treasurer is able to continue the arrangements that he has made with the banks for withdrawing Spanish-Filipino coins for recoinage in lieu of all deposits of local currency in the banks.

The above order was in force until July 1, 1904, when the government discontinued the redemption of Spanish-Filipino currency.

On January 14, 1904, a law was passed prohibiting the further importation of local currency into the islands, and there was placed before the public on the same day a draft of a supplementary bill which provided for the heavy taxation of transactions in local currency after a certain date. This bill in an amended form became a law on January 28, 1904. It imposed an ad valorem tax upon contracts or other written instruments payable in local currency and drawn or negotiated after September 30, 1904, and upon bank deposits of local currency held after December 31, 1904, and exacted a special license tax of all merchants doing business in local currency

^a See table on page 500.

^b See table on page 502.

after the latter date. Numerous exceptions were made in the law for the protection of persons having local-currency contracts made prior to September 30 and of persons wishing to dispose of local currency for the purpose of exportation. Bank deposits were exempted from the tax when maintained for the purpose of keeping funds to meet local-currency contracts made and properly registered prior to October 1, 1904. Careful provisions were made in the act to assure the equitable adjustment of contracts calling for payment in local currency which should mature when that currency should be no longer available.

The taxation provisions of the law do not begin to become operative until October 1, 1904, and the law does not come into full effect until January 1, 1905. The public, it was believed, were thus given ample time to "set their houses in order."

Section 12 of the above law made it the duty of the chief of the division of the currency "to prepare and have published in the principal languages and dialects of the Philippine Islands an announcement explaining the new Philippines currency and the more important laws and regulations pertaining to the use of that currency and the methods provided for the withdrawal of local currency from circulation," and to have the announcement posted and advertised as widely as possible throughout the islands. Pursuant to this provision of law a proper announcement was prepared and translated into twenty-four different languages and dialects. Nearly 100,000 copies of the announcement were posted throughout the islands, and it was extensively proclaimed by "bandillo," or town crier.

On March 23 the Commission passed a resolution authorizing the treasurer of the Philippine Islands and the various provincial treasurers to exchange Philippine copper and nickel coins for the copper coins of various countries which circulated in the Philippine Islands, "in the same manner and on the same conditions as they are at present authorized to exchange Philippines currency for Spanish-Filipino currency, said exchange to be continued up to and inclusive of June 30, 1904, and to be made at the official rate for the redemption of Spanish-Filipino currency, or at a rate as near the official rate as the redemption of said copper coins in small amounts will render possible." The resolution also authorized the establishment of exchanges in the various markets of Manila for the redemption of these local copper coins. The efforts of the government to withdraw these copper coins from circulation have so far proven practically futile, and there still continues in circulation in the small trade of the islands a vast number of these coins.

LOCAL CURRENCY EXCHANGES.

The following table shows the local currency purchased and sold by the insular treasurer each month since the passage of the gold-standard act:

Philippines currency and local currency exchanges.

Fiscal year.	Sold, Philip- pines currency.	Bought, local currency.	Bought, Philippines currency.	Sold, local currency.
1903-4.		P/s.		P/s.

August.....	.463	.452	Aug. 1, 1904	2.20	.454

In view of the fact that the market price of silver and the local bank rate of exchange varies almost daily, while notice of every change in the official rate must be telegraphed to all the provinces, and by the provincial treasurers sent to all the municipal treasurers of the islands, thus necessitating the loss of considerable time before the new rate can become effective, and requires a considerable amount of extra work on the part of those who handle government money, and keep and audit government accounts, it is obviously impracticable for the government to change its official rate except in the case of material alterations in the local market rate, which give prospects of persisting for a reasonable length of time.

LOCAL-CURRENCY SHIPMENTS.

The progress of the process of eliminating local currency from the circulation of the islands may be seen from the following table:

Fiscal year.	Commercial.		Governmental.	
	Imports.	Exports.	Imports.	Exports.
1903-4.	<i>P/s.</i>	<i>P/s.</i>	<i>P/s.</i>	<i>P/s.</i>

1904-5.				
July.....		837,100		1,102,000
August.....		10,000		430,000
Total.....		847,100		1,532,000
Grand total.....	2,168,703	10,210,450		9,218,000

The exportations made by the government all refer to shipments of Spanish-Filipino money to San Francisco for recoinage. From January 1, 1903, to June 30 there was a net commercial exportation of Mexican currency from the islands amounting to approximately eight and a half million dollars. On August 31, 1904, the insular treasurer held 933,395.06 pfs. in the treasury vaults, and 853,582.87 pfs. on deposit in the Manila banks, for the shipment of which to San Francisco for recoinage preparations were being made as rapidly as possible.

UNITED STATES CURRENCY SHIPMENTS.

Throughout the year there have been heavy exportations of United States currency from the islands. The custom-house authorities reported net exportations of United States currency from October 10, 1903, to August 31, 1904, of over \$2,250,000. These figures, however, give no adequate idea of the United States currency shipments to and from the islands, inasmuch as importations of United States currency by the military authorities are not included in the custom-house returns; and further, that the principal method of shipping United States currency from the islands is by registered mail, and complete data concerning the amounts so shipped are obviously unavailable. From the evidence available it is safe to say that the amount shipped by registered mail during the fiscal year 1903-4 considerably exceeded that shipped by express and included in the custom-house returns given above.

PHILIPPINES CURRENCY CIRCULATION.

The total circulation of Philippines currency in the islands at the end of each month since November 1, 1903, as estimated by the chief of the division of the currency, is given in the following table.

On account of inadequate vault room in the insular treasury the government has often found it necessary to make larger deposits of the new currency in local banks than would probably otherwise have been thought desirable. As a result it has frequently happened that the local banks which act as depositories of government funds have had on hand Philippines currency considerably in excess of the amounts necessary to meet trade demands. It is generally considered here that a reserve representing one-third of a bank's demand liabilities is ample to meet all probable demands. In estimating the Philippines currency circulation at the end of each month the chief of the division of the currency has considered as in circulation all money outside the treasury vaults, except that held by depository banks in Manila in excess of one-third of their Philippines currency demand liabilities.

Fiscal year.	Amount in circulation.	Increase or decrease.

THE NEED OF LARGER DENOMINATION SILVER CERTIFICATES.

The chief of the division of the currency wishes again to call your attention to the need of some Congressional action of the kind called for in section 12, of Senate bill 5328, Fifty-eighth Congress, authorizing the issue of silver certificates of larger denominations.

Section 8 of the Philippine coinage act of Congress authorizes the issue of silver certificates "in denominations of not less than two nor more than ten pesos." This limitation of the size of the certificates to 10 pesos has proven a great inconvenience to the trade of the islands, and is a source of frequent complaint on the part of the business community. The export business of the islands, especially the hemp, tobacco, and sugar business, involves many large transactions. The banking business of the islands represents principally large transactions, while small accounts and other small banking transactions are here insignificant as compared with what they are in the United States. The three large exchange banks of the Philippines, for example, are averse to opening or maintaining credit deposits for a less sum than P500. Cash, moreover, as contrasted with checks, is used much more extensively in the large business of the Philippines than it is at home. A reference to the table of silver certificates in circulation on August 31, 1904 (p. 493), shows that of a total circulation of P7,230,000, P5,070,000, or 70 per cent, were certificates of the denomination of 10 pesos.

At the time the limitation of the size of the certificates to 10 pesos was made by Congress it was generally supposed that the introduction of United States currency of the larger denominations would supply the need for money of larger denominations in the circulation of the islands. Experience, however, has failed to bear out this supposition. The balance of trade with gold-standard countries has been strongly against the islands throughout the year, and bids fair to continue so for some time to come. About the cheapest method the banks have been able to employ during the year of meeting an unfavorable trade balance with England and the United States has been the exportation of United States paper currency of large denominations, whenever they could find that currency available. A reference to the figures for United States currency shipments given on page 501 will show how rapidly this money has been drained from the islands during the past year, and to what extent the business of the islands will be at the mercy of exchange fluctuations for its

money of the larger denominations if it is compelled to depend upon United States currency to supply that need. Gold coin will not at present circulate in the islands. In spite of the fact that many million dollars in gold coin have been placed in circulation here by the military authorities since the American occupation, it is very seldom that one sees a gold coin in circulation to-day. The gold paid out has either been melted down, hoarded, or shipped to China and other neighboring countries for similar purposes. It should also be added that section 13 of the Philippine coinage act of Congress denies to United States paper currency the quality of legal tender in the islands, and that the difference in the units of value of United States currency and Philippines currency render the use of the two side by side a source of confusion in effecting and recording business transactions.

All of which is respectfully submitted.

E. W. KEMMERER,

Chief of the Division of the Currency.

THE TREASURER OF THE PHILIPPINE ISLANDS,
Manila, P. I.

EXHIBIT 7.

REPORT OF THE COLLECTOR OF CUSTOMS FOR THE PHILIPPINE ISLANDS.

THIRD SPECIAL REPORT.

SIR: The second report of this office covered the period from September 1, 1902, to October 8, 1903. The narrative portion of this report will cover the period from October 8, 1903, to September 1, 1904; the financial statements and general statistical data will cover the entire period of American occupation of these islands by fiscal or calendar years, as stated in each case, so far as the data itself extends.

A number of regulations have been provided during the past year, among them being rules for licensing and governing of customs brokers, for a complete set of coastwise statistical reports, and for signal letters, official numbers of vessels in the coastwise trade, and governing the treatment of articles imported into the Philippine Islands through the mails.

On December 16 the Philippine Commission passed Act No. 1025, amending Act No. 780, authorizing the board on Philippine marine examinations therein created to recognize the licenses issued by the Spanish Government and to grant licenses thereon without written examination. Act No. 1025 also provided for the renewal of licenses already granted.

By Act No. 1026 of the Philippine Commission, passed December 16, 1903, the annual tonnage tax upon cascoes and other vessels not decked over and not propelled by their own steam, sail, or other similar motive power, and constructed in the Philippine Islands, was reduced to 1 peso, Philippine currency, per gross ton, section 135 of the Philippine customs administrative act being amended accordingly.

On January 12, 1904, the Philippine Commission passed Act No. 1037, authorizing merchants and others in the Philippine Islands to export for a limited period food products which had paid duty, and in lieu thereof to import like food products, for a limited period, without the payment of customs duty. This action was taken to meet certain special commercial conditions here arising from the declaration of war between Russia and Japan. The act expired on the 1st day of May, 1904.

Act No. 1066 of the Philippine Commission, passed on February 26, 1904, exempts steam vessels of less than 100 tons burden, and sailing

vessels of less than 150 tons burden, from the requirements of Act No. 780 as to carrying licensed officers, provided, however, that all vessels propelled wholly or in part by steam shall be compelled to carry and employ the licensed engineer or engineers provided in said Act No. 780.

On May 10, 1904, the Philippine Commission, by Act No. 1149, amended section 26 of the Philippine customs administrative act by providing that whenever in the opinion of the civil governor any public wharf, landing place, street, or land is necessary or desirable in loading and unloading ships, or for any proper customs purpose at any port of entry, he is given power and authority, by executive order, to declare that such wharf, landing place, street, or land shall be under the exclusive control and jurisdiction of the collector of customs at the port of entry, provided that the exercise of such jurisdiction shall in no wise affect the general police powers of the municipality in which the said wharf or other landing is situated.

On May 19, 1904, by Act No. 1160, the Philippine Commission authorized the insular collector of customs to clear foreign vessels for the port of Isabela de Basilan under proper regulations.

On June 20, 1904, the civil governor promulgated an act of Congress, approved April 15, 1904, entitled "An act to regulate the shipping and trade between ports of the United States and ports or places in the Philippine Archipelago, between ports or places in the Philippine Archipelago, and for other purposes."

The important sections of that act are as follows:

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That on and after July first, nineteen hundred and six, no merchandise, except supplies for the Army or Navy, shall be transported by sea, under penalty of forfeiture thereof, between ports of the United States and ports or places in the Philippine Archipelago, directly or via a foreign port, or for any part of the voyage, in any other vessel than a vessel of the United States. But this section shall not be construed to prohibit the sailing of any foreign vessel between any port of the United States and any port or place in the Philippine Archipelago: *Provided,* That no merchandise other than that imported in such vessel from some foreign port which has been specified on the manifest as for another port, and which shall not have been unloaded, shall be carried between a port of the United States and a port or place in the Philippine Archipelago.

SEC. 2. That on and after July first, nineteen hundred and six, no foreign vessel shall transport passengers between ports of the United States and ports or places in the Philippine Archipelago, either directly or by way of a foreign port, under penalty of two hundred dollars for each passenger so transported and landed.

SEC. 3. That sections one and two of this Act shall not apply to the transportation of merchandise or passengers between ports or places in the Philippine Archipelago. Until Congress shall have authorized the registry as vessels of the United States of vessels owned in the Philippine Archipelago, the Government of the Philippine Islands is hereby authorized to adopt, from time to time, and enforce regulations governing the transportation of merchandise and passengers between ports or places in the Philippine Archipelago.

* * * * *

SEC. 6. That on and after the passage of this act the same tonnage taxes shall be levied, collected, and paid upon all foreign vessels coming into the United States from the Philippine Archipelago which are required by law to be levied, collected, and paid upon vessels coming into the United States from foreign countries: *Provided, however,* That until July first, nineteen hundred and six, the provisions of law restricting to vessels of the United States the transportation of passengers and merchandise directly or indirectly from one port of the United States to another port of the United States shall not be applicable to foreign vessels engaging in trade between the Philippine Archipelago and the United States: *And provided further,* That the Philippine Commission shall be authorized and empowered to issue licenses to engage in lighterage or other exclusively harbor business to vessels or other craft built in the Philippine Islands or in the United States and owned by citizens of the United States or by inhabitants of the Philippine islands.

* * * * *

SEC. 8. That the Secretary of Commerce and Labor shall, from time to time, issue regulations for the enforcement of this act, except as otherwise provided in section three: *Provided*, That such of the navigation laws of the United States as are in force in the Philippine Archipelago in regard to vessels arriving in the Philippine Islands from the mainland territory and other insular possessions of the United States shall continue to be administered by the proper officials of the government of the Philippine Islands.

* * * * *

PORT OF MANILA.

The general business of the port of Manila has shown a decrease during the past year. Starting with the month of November, 1903, the receipts of the custom-house have fallen off to a marked degree from those of the corresponding months of the preceding year. This has been due to a variety of causes, most of which, however, are fortunately known to be but temporary in their nature. Among these latter may be mentioned the change of currency (which has now been entirely effected), the internal-revenue law (which has caused a certain amount of conservatism among local industries pending the practical demonstration of its workings), and the indirect but doubtless tangible effect of an election year in the United States. These items, together with the general derangement of all commercial enterprises, especially those dependent upon foreign trade consequent upon a state of war in the vicinity, have doubtless had their effect upon the commercial situation in the Philippines.

By far the greatest factor in the present industrial depression, however, is the decreased purchasing power of the people as a result of agricultural misfortunes and lack of draft animals. This condition is at once felt in the customs revenues, which may, in fact, be regarded as a fairly accurate barometer of business conditions in the islands.

The general impression prevails that a substantial increase in the rice crop, year by year, would greatly tend to improve general business conditions in the islands. Where it is necessary for the people to spend millions of dollars each year for importing one of the absolute necessities of life, which could well be produced in the islands under normal circumstances, their power to purchase the articles on which general business largely depends must suffer in proportion.

MANILA HARBOR WORK.

The harbor works at Manila, as originally planned, are nearing completion, and the construction of an additional breakwater, stretching out from the shore of Pasay and making an absolutely land-locked bay for shipping, has already been commenced.

During the past year all vessels have been discharged under the "running-check" system, with generally satisfactory results.

HARBOR LAUNCHES.

The following tables show the actual entire expense of operating the customs harbor launches at this port during the past two fiscal years, including salaries and wages, coal, engine room, and other supplies, and extensive repairs and alterations:

Expenses of operating customs harbor launches.

FISCAL YEAR 1903.

Name of launch.	Salaries.	Coal and supplies.	Repairs, alterations, etc.	Total.
For six months ending Dec. 31, 1902:				
Harbor No. 1.....	\$4.86	\$448.03	\$24.39	\$477.28

Harbor No. 6.....	793.88	248.89	699.46	1,742.23
Harbor No. 8.....	519.99	93.91	223.02	836.92
Harbor No. 9.....	458.88	95.26	147.75	701.89
Harbor Skimmer.....	150.00	825.00	1.75	976.75
Total.....	6,147.96	11,733.95	4,454.28	22,336.19
Grand total.....	11,833.01	14,412.92	7,068.44	33,314.37

RECAPITULATION.

Fiscal year—				
1903.....	\$8,997.97	\$5,962.61	\$6,208.23	\$21,168.81
1904.....	11,833.01	14,412.92	7,068.44	33,314.37
Total.....	20,830.98	20,375.53	13,276.67	54,483.18

NOTE.—These tables do not agree with the items of expense of launches in the financial reports of this bureau, since such items as coal and other supplies included herein are obtained from the insular purchasing agent on requisition and do not appear therefore in the purely fiscal records as a disbursement of this bureau.

From the above it will be seen that the "average" cost of operating one of the Manila Harbor launches during the last two fiscal years was about \$3,400 United States money per year, although these launches

vary so in size that this is not, strictly speaking, an average, and does not represent the cost of operating any particular launch.

These launches are daily subjected to most severe usage, they being compelled to go alongside large vessels in all kinds of weather and to be hammered and rammed by a miscellaneous collection of lighters, cascoes, and other launches.

PORTS OF ILOILO AND CEBU.

The trade at both of these ports showed a decided decline during the last fiscal year, the gross customs receipts at Cebu being \$194,669.06 and at Iloilo \$98,033.97 less than those of the fiscal year of 1902-3, respectively.

PORTS OF JOLO AND ZAMBOANGA.

The customs receipts at the port of Jolo show a slight increase, amounting to \$1,810.48 during the fiscal year 1904, over the receipts for the previous fiscal year, and this is the only entry port of which that can be said.

At the port of Zamboanga there has been the usual falling off, due to the commercial depression throughout the islands and to certain local conditions, such as the reduced yield of copra as a result of the long drought in the latter part of 1903, and the fall in the selling price of gutta-percha.

PORTS OF BONGAO, BALABAC (CAPE MELVILLE), AND PUERTO PRINCESA.

The receipts at these ports have been inconsiderable, though they were not created with the expectation that the general revenues would be substantially increased thereby for some time to come.

On February 25, 1904, the entry port of Cape Melville was changed to Balabac, in the island of the same name.

On July 30, 1904, this office, under the authority of section 5 of Act No. 898 of the Philippine Commission, published notice that the port of Puerto Princesa would be closed for foreign business on October 15, 1904. This step was taken as a measure of economy during the present business depression.

COLLECTION DISTRICTS.

The collection districts which will go into effect on October 15, 1904, after the reorganization of the coast district inspection service is accomplished, will be as follows:

First. The district of Manila, comprising the islands of Luzon, Marinduque, the north coast of the island of Mindoro, extending from Point Calavite to Point Dumali; the northeast coast of the island of Masbate, extending from Point Bugui to and including the port of Alegria; the island of Ticao, and all other islands in the geographical district covering the islands named, in which Manila shall be the port of entry.

Second. The district of Iloilo, comprising the islands of Panay, Tablas, Romblon; the province of Occidental Negros; the southwest coast of the island of Masbate, from Point Bugui to the port of

Alegria; the east and west coasts of the island of Mindoro, from Point Dumali to Point Calavite; and all the other islands in the geographical district covering the same, in which Iloilo shall be the port of entry.

Third. The district of Cebu, comprising the islands of Cebu, Bohol, Samar, Leyte, Dinagat; the coast line of the provinces of Misamis and Surigao, from Point Balato on the north coast to Point Tambog on the east coast of the island of Mindanao; the province of Oriental Negros, and all the islands in the geographical district covering the same, in which Cebu shall be the port of entry.

Fourth. The district of Zamboanga, comprising the southeastern, southern, and western coast line of the island of Mindanao, from Point Tambog on the east coast, near the eighth parallel of north latitude, to Point Balato on the north coast; the island of Basilan; and all other islands contiguous thereto; in which Zamboanga shall be the port of entry.

Fifth. The district of Jolo, comprising the islands of Jolo, Siasi; in which Jolo shall be the port of entry.

Sixth. The district of Balabac, comprising the islands of Balabac, Paragua, Dumuran, Cuyo, and all other islands adjacent thereto; the Calamianes Islands, and all other islands in the geographical district covering the islands named, in which Balabac shall be the port of entry.

Seventh. The district of Bongao, comprising the islands of Bongao, Tawi-Tawi, Sibutu, Sangasanga, Cagayan de Jolo, and all other small islands adjacent thereto, known as the Tawi-Tawi Islands, in which Bongao shall be the port of entry.

COAST DISTRICT INSPECTION SERVICE.

Due to the necessity of exercising extreme economy in all branches of the customs service during the present fiscal year, as a result of greatly decreased appropriations, the coast district inspection service has been entirely reorganized, the force reduced by nearly one-half, and the division of the coast line of the archipelago into coast inspection districts has been abolished.

After October 1, 1904, the work will be done, as far as practicable, by one or more inspectors and one deputy inspector in each collection district, under the direct supervision of the collector of customs of the district. A customs cutter will be assigned to each district, with headquarters at the entry port.

The deputy inspector will be permanently located at some central and convenient port within the collection district, but away from the entry port, to assist in the issuance of licenses, admeasurement, and general inspection work.

One inspector will be in charge of each customs cutter, and will make regular tours of each collection district for the purpose of supervising local inspectors, making collections of fees and stamp accounts, and making the disbursements of the district outside of the entry port.

It is hoped that this plan will prove a reasonable success, though the territory to be covered is out of all proportion to the available force and equipment.

The following table shows the receipts and expenditures in all inspection districts during the past fiscal year:

District.	Receipts.	Expenditures.	Excess of receipts.	Excess of expenditures.
Aparri.....	\$4,131.44	\$2,302.43	\$1,829.01	
Batangas.....	2,833.97	3,983.31		\$149.34
Capiz.....	1,950.65	2,972.80		1,022.25
Catbalogan.....	4,025.10	2,732.87	1,292.23	
Cuyo.....	1,040.80	1,388.68		347.88
Cotabato.....	445.11	1,941.51		1,496.40
Davao.....	608.62	774.35		165.72
Dumaguete.....	4,085.94	5,058.02		962.08
Subic.....	1,175.47	2,150.52		975.15
Legaspi.....	4,306.77	4,426.43	119.66	
Romblon.....	787.36	1,318.68		561.32
San Fernando.....	6,231.17	4,706.34	1,524.83	
San José.....	1,267.24	1,708.94		44.70
Sorsogon.....	4,205.19	3,185.98	1,019.21	
Surigao.....	3,787.02	2,589.04	1,197.98	
Siasi.....	25.30	1,962.37		1,937.07
Tacloban.....	7,433.55	5,590.13	1,843.42	
Total.....	49,350.70	48,822.50	8,826.34	7,661.91

It will be noted that in several of the districts the expenditures exceeded the direct receipts, but the coast inspection service is not maintained for revenue purposes, but for protection against smuggling and to prevent violations of the other laws with the enforcement of which this office is charged.

CUSTOMS CUTTERS.

The six cutters belonging to this service have all been in constant operation during the past year, and, though insufficient in number and equipment for the best results, they have maintained a fairly effective patrol of the different collection districts. Two of these cutters have been continuously assigned to the waters of the southern islands and the coast of the island of Paragua, where good work has been done in breaking up smuggling from Borneo and adjacent coasts.

One or two sharp encounters have occurred between customs officers and some armed Moros, but the offenders have been punished in each instance, with the assistance of the military under Major-General Wood.

Each customs cutter is armed with a 1-pounder rapid-fire rifle.

The following table shows their cost, dimensions, and speed:

Cutter.	Cost. ^a	Length over all.	Beam.	Draft.	Horse-power.	Speed.
		<i>Ft. in.</i>	<i>Ft. in.</i>	<i>Ft. in.</i>		<i>Knots.</i>
Skua.....	\$14,500	83 5	14 14	7 0	15.20	9
Sora.....	15,000	86 0	13 8	7 7	16.46	9
Sula.....	18,000	93 14	14 84	6 11	17.86	8½
Scoter.....	26,000	91 6	14 9	8 0	17.86	7
Seagull.....	30,000	87 54	14 3	8 6	15.15	7
Sanderling (by transfer).....		84 10½	14 0	8 5	16.80	7

^a Mexican currency.

Each of these cutters has a total coal capacity of about 16 tons and a water capacity in tanks of 7 tons; their steaming radius varies from 1,000 to 1,250 miles. The figures given in the above column under the head of "speed" show the ordinary speed of the cutters when in average condition. Under pressure this speed can be somewhat increased.

On October 9, 1903, by customs administrative circular No. 243, this office adopted a customs ensign of the following design:

The ensign shall be of woolen bunting, of rectangular form, with 13 gold stars in the upper left hand quarter, grouped around a gold American eagle, upon a white field, with 13 horizontal stripes alternating blue and white, commencing with blue stripe.

A corresponding shield of the following design was adopted for use on customs cutters:

Thirteen gold stars grouped around a gold American eagle, upon a white field, with 13 horizontal stripes alternating blue and white, commencing under the white field with blue stripe.

The following tables show the actual entire expense of operating the customs cutters during the past two fiscal years, including salaries and wages, coal, engine room, and other supplies, and extensive repairs and alterations:

Expenses of operating customs cutters.

FISCAL YEAR 1903.

Name of cutter.	Salaries.	Coal and supplies.	Repairs, alterations, etc.	Total.

Cutter Sora.....	1,792.09	677.79	2,092.85	4,562.73
Cutter Seagull.....	2,157.06	1,114.14	189.13	3,460.33
Cutter Scoter.....	2,157.80	1,363.61	154.47	3,675.91
Total.....	12,487.33	6,179.95	5,332.62	23,999.90
For six months ending June 30, 1904:				
Cutter Sula.....	3,178.71	1,192.15	2,571.28	6,942.17
Cutter Sanderling.....	2,285.96	968.25	113.68	3,367.89
Cutter Skua.....	2,619.56	739.76	1,635.29	4,994.61
Cutter Sora.....	2,753.91	528.17	784.70	4,065.81
Cutter Seagull.....	2,236.91	1,113.72	3,380.63
Cutter Scoter.....	3,082.39	1,438.11	6,338.41	10,858.91
Total.....	16,157.50	6,010.19	11,442.36	33,610.05
Grand total.....	28,644.83	12,190.14	16,771.98	57,606.95

RECAPITULATION.

Fiscal year—				
1903.....	\$29,663.40	\$10,981.06	\$15,693.47	\$56,247.92
1904.....	28,644.83	12,190.14	16,771.98	57,606.95
Total.....	58,308.23	23,081.20	32,468.45	113,857.88

Thus, the average cost per year of operating each one of the six Philippine customs cutters was about \$9,490 United States money, or \$790 per month.

The statements made as to the hard usage to which the harbor launches at Manila are subjected are equally true of the customs cutters, which often encounter weather which would drive the largest steamers to seek shelter.

COASTWISE PORTS.

On September 1, 1904, there were 177 open coastwise ports and sub-ports in the Philippine Islands, a decrease of 25 ports.

This decrease in the number of ports open to trade on the corresponding date of last year is due to the commercial depression hereinbefore discussed.

The following is a complete alphabetically arranged list of the ports open on September 1, 1904, together with the dates of their opening:

Name.	Island.	Date of opening.
A.		
Agno.....	Luzon.....	Nov. 8, 1900

SPECIAL REGULATIONS FOR SMALL VESSELS IN THE MORO PROVINCE.

Pursuant to Act No. 787 of the Philippine Commission, the Moro provincial council on May 4, 1904, passed Act No. 47, as follows:

AN ACT subjecting the use, licensing, and registration of boats of Moro or pagan construction to the provisions of the general customs administrative law.

By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, That the use, registration, and licensing of boats of Moro or pagan construction of less than ten tons' burden shall be governed by the provisions of the general customs administrative law of the Philippine Islands and the regulations of the insular collector of customs: Provided, That collectors of customs may, in their discretion, when they shall have reason to believe that any Moro or other non-Christian making unauthorized use of such boats has acted in good faith and through excusable ignorance of the law, remit the penalty imposed for the first offense.

SEC. 2. The governors of districts, the headmen of tribal wards, and any person who shall be authorized in writing by the governor of the Moro Province, are authorized to seize boats of Moro or pagan construction of less than ten tons' burden found engaged in the coasting trade in violation of law, without warrant, and to deliver the same immediately to the collector of customs at the nearest open port. The headman of each tribal ward shall receive for each boat belonging to a resident of his tribal ward which shall be voluntarily presented for admeasurement and licensing during the year nineteen hundred and four the sum of fifty centavos Philippine currency, to be paid by appropriation from provincial funds, under such regulations as the treasurer of the Moro Province shall prescribe.

SEC. 3. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, May 4, 1904.

By section 6 of Act No. 898 of the Philippine Commission, the size of vessels which might take foreign goods into the ports of Bongao, Cape Melville (now Balabac), and Puerto Princesa was reduced from 30 tons burden to 5 tons, provided that said vessels should be of Philippine construction. The reason for this departure from the general rule in the case of these ports in the southern islands was the peculiar fact that a great amount, indeed most, of the freight carrying in this archipelago, and especially in the southern groups of islands, is done in vessels of 5 tons, and in many instances less, burden. As was stated in the last report of the insular collector of customs, much of the smuggling which has been carried on from Borneo to the southern islands of this archipelago has been done in vessels of less than 5 tons burden.

Recent reports show that even the 5 tons minimum has caused considerable dissatisfaction among the natives trading between Borneo and the ports of Bongao and Balabac. Long-established custom has caused the natives to regard these waters as their legitimate highways, and their boats, of whatever construction and tonnage, as their natural and rightful carriers, so that even the present slight restrictions create strong inducements for them to disregard the law and engage freely in illegitimate trade. It is estimated that fully one-half to two-thirds of the trading between Borneo and these ports is being and will continue to be done in boats of less than 5 tons burden.

The present law also bars the natives of Borneo from employing their own boats in legitimate work, although they have shown some disposition to come to the entry ports with their small cargoes, if the law is changed.

In view, therefore, of the fact that it is impracticable at this time to enforce the law against all or even a majority of the offenders, it

SPECIAL REGULATIONS FOR SMALL VESSELS IN THE MORO PROVINCE.

Pursuant to Act No. 787 of the Philippine Commission, the Moro provincial council on May 4, 1904, passed Act No. 47, as follows:

AN ACT subjecting the use, licensing, and registration of boats of Moro or pagan construction to the provisions of the general customs administrative law.

By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, That the use, registration, and licensing of boats of Moro or pagan construction of less than ten tons' burden shall be governed by the provisions of the general customs administrative law of the Philippine Islands and the regulations of the insular collector of customs: Provided, That collectors of customs may, in their discretion, when they shall have reason to believe that any Moro or other non-Christian making unauthorized use of such boats has acted in good faith and through excusable ignorance of the law, remit the penalty imposed for the first offense.

SEC. 2. The governors of districts, the headmen of tribal wards, and any person who shall be authorized in writing by the governor of the Moro Province, are authorized to seize boats of Moro or pagan construction of less than ten tons' burden found engaged in the coasting trade in violation of law, without warrant, and to deliver the same immediately to the collector of customs at the nearest open port. The headman of each tribal ward shall receive for each boat belonging to a resident of his tribal ward which shall be voluntarily presented for measurement and licensing during the year nineteen hundred and four the sum of fifty centavos Philippine currency, to be paid by appropriation from provincial funds, under such regulations as the treasurer of the Moro Province shall prescribe.

SEC. 3. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, May 4, 1904.

By section 6 of Act No. 898 of the Philippine Commission, the size of vessels which might take foreign goods into the ports of Bongao, Cape Melville (now Balabac), and Puerto Princesa was reduced from 30 tons burden to 5 tons, provided that said vessels should be of Philippine construction. The reason for this departure from the general rule in the case of these ports in the southern islands was the peculiar fact that a great amount, indeed most, of the freight carrying in this archipelago, and especially in the southern groups of islands, is done in vessels of 5 tons, and in many instances less, burden. As was stated in the last report of the insular collector of customs, much of the smuggling which has been carried on from Borneo to the southern islands of this archipelago has been done in vessels of less than 5 tons burden.

Recent reports show that even the 5 tons minimum has caused considerable dissatisfaction among the natives trading between Borneo and the ports of Bongao and Balabac. Long-established custom has caused the natives to regard these waters as their legitimate highways, and their boats, of whatever construction and tonnage, as their natural and rightful carriers, so that even the present slight restrictions create strong inducements for them to disregard the law and engage freely in illegitimate trade. It is estimated that fully one-half to two-thirds of the trading between Borneo and these ports is being and will continue to be done in boats of less than 5 tons burden.

The present law also bars the natives of Borneo from employing their own boats in legitimate work, although they have shown some disposition to come to the entry ports with their small cargoes, if the law is changed.

In view, therefore, of the fact that it is impracticable at this time to enforce the law against all or even a majority of the offenders, it

SPECIAL REGULATIONS FOR SMALL VESSELS IN THE MORO PROVINCE.

Pursuant to Act No. 787 of the Philippine Commission, the Moro provincial council on May 4, 1904, passed Act No. 47, as follows:

AN ACT subjecting the use, licensing, and registration of boats of Moro or pagan construction to the provisions of the general customs administrative law.

By authority of the Philippine Commission, be it enacted by the legislative council of the Moro Province, That the use, registration, and licensing of boats of Moro or pagan construction of less than ten tons' burden shall be governed by the provisions of the general customs administrative law of the Philippine Islands and the regulations of the insular collector of customs: Provided, That collectors of customs may, in their discretion, when they shall have reason to believe that any Moro or other non-Christian making unauthorized use of such boats has acted in good faith and through excusable ignorance of the law, remit the penalty imposed for the first offense.

SEC. 2. The governors of districts, the headmen of tribal wards, and any person who shall be authorized in writing by the governor of the Moro Province, are authorized to seize boats of Moro or pagan construction of less than ten tons' burden found engaged in the coasting trade in violation of law, without warrant, and to deliver the same immediately to the collector of customs at the nearest open port. The headman of each tribal ward shall receive for each boat belonging to a resident of his tribal ward which shall be voluntarily presented for admeasurement and licensing during the year nineteen hundred and four the sum of fifty centavos Philippine currency, to be paid by appropriation from provincial funds, under such regulations as the treasurer of the Moro Province shall prescribe.

SEC. 3. Subject to annulment or amendment by the Philippine Commission, this act shall take effect on its passage.

Enacted, May 4, 1904.

By section 6 of Act No. 898 of the Philippine Commission, the size of vessels which might take foreign goods into the ports of Bongao, Cape Melville (now Balabac), and Puerto Princesa was reduced from 30 tons burden to 5 tons, provided that said vessels should be of Philippine construction. The reason for this departure from the general rule in the case of these ports in the southern islands was the peculiar fact that a great amount, indeed most, of the freight carrying in this archipelago, and especially in the southern groups of islands, is done in vessels of 5 tons, and in many instances less, burden. As was stated in the last report of the insular collector of customs, much of the smuggling which has been carried on from Borneo to the southern islands of this archipelago has been done in vessels of less than 5 tons burden.

Recent reports show that even the 5 tons minimum has caused considerable dissatisfaction among the natives trading between Borneo and the ports of Bongao and Balabac. Long-established custom has caused the natives to regard these waters as their legitimate highways, and their boats, of whatever construction and tonnage, as their natural and rightful carriers, so that even the present slight restrictions create strong inducements for them to disregard the law and engage freely in illegitimate trade. It is estimated that fully one-half to two-thirds of the trading between Borneo and these ports is being and will continue to be done in boats of less than 5 tons burden.

The present law also bars the natives of Borneo from employing their own boats in legitimate work, although they have shown some disposition to come to the entry ports with their small cargoes, if the law is changed.

In view, therefore, of the fact that it is impracticable at this time to enforce the law against all or even a majority of the offenders, it

is recommended that said Act No. 898 be amended so as to permit trade to be carried on with the ports of Bongao and Balabac in vessels of any size or construction, and further, that Act No. 578, amending section 284 of the Philippine customs administrative act, be amended by providing that vessels of less than 10 tons burden clearing at these ports for a foreign port be liable to a fee of only 20 cents Philippine currency. The present fee of ₱4 for each foreign clearance in most instances equals from 5 to 15 per cent of the value of the vessel, and is likewise disproportionate to the values of the cargoes carried.

The collector of customs at Jolo recommends that the minimum tonnage of vessels which may enter his port with foreign goods be reduced at least to 2½ tons, since the number of small Moro boats which enter Jolo exceeds the combined entries of the two ports above mentioned, and because of the well-established fact that these boats, with or without license, of large or small tonnage, will and do go to British North Borneo for trade.

Similar conditions prevail at the port of Zamboanga.

In view of the admitted policy of making special provisions of law to meet the unusual conditions surrounding Moro and other ports in the southern islands of this archipelago, therefore it is recommended that the amendatory act above suggested for the ports of Bongao and Balabac be made to apply also to the two other southern entry ports of Jolo and Zamboanga.

OFFICE WORK.

The office work of the Manila custom-house has shown a steady and decided increase month by month during the past two years, and the regular volume of correspondence is believed to be far greater than that of any other bureau in the islands.

Actual count for several months shows that the correspondence division handled and recorded during the past twelve months over 80,000 letters received and sent, and some 22,500 Chinese certificates of residence. Over 130,000 circulars, notices, and summaries are mailed annually, a considerable portion of the same being mimeographed.

COST OF COLLECTION.

As stated in the first special report of the undersigned, the rate of cost of collecting the customs revenues in the Philippine Islands is considerably less than it is in the United States. The statistics of customs transactions in the United States during the fiscal year 1903, which are the latest available for comparison, show the following figures. The port of San Francisco offers the best comparison with the port of Manila:

At San Francisco the fiscal year ended June 30, 1903, the sum of \$7,850,705.35 was collected, at a cost of \$468,935.04; cost to collect \$1, \$0.060.

At Manila, during the fiscal year 1903, the sum of \$7,861,971.64 was collected, at a cost of \$301,821.51; cost to collect \$1, \$0.0381.

At Manila, during the fiscal year 1904, just ended, a year of great business depression, as hereinbefore shown, the sum of \$7,131,379.86 was collected, at a cost of \$304,476.32; cost to collect \$1, \$0.0426.

These comparisons are made on the basis of the items which are included in determining the cost of collection in the United States, as will be seen by the following table, which shows both the total expenditures at the port of Manila on account of the Philippine customs service and the expenditures which, in accordance with the system employed in the United States, are chargeable to the cost of collecting customs duties at the port of Manila.

As very pertinent to this comparison, attention is invited to the following statement, made in the first annual report of Hon. Henry C. Ide, secretary of finance and justice:

In connection with this statement of comparative expenses it should be remarked that the customs duties in the Philippine Islands are practically one-half of what the average customs duties are at ports of the United States, so that double the amount of business has to be transacted here to collect the same amount of revenues, which makes the showing still more favorable in behalf of economy of the customs administration in the Philippine Islands. These results have been secured in face of the fact that it has been difficult to secure competent and experienced employees.

As is shown by that statement, although the actual and necessary cost of assessing and handling the present volume of imports is unchanged, the cost of collecting \$1 in the Philippine Islands is practically doubled as compared with the cost in the United States, owing to the fact that the return of the duties upon the inspection and appraisal of a given amount of merchandise is only one-half here of what it would be under the present United States tariff.

Putting the rate of cost of collection at the port of Manila on the same basis as the port of San Francisco and the other ports in the United States, the comparison is as follows:

Cost to collect \$1.

San Francisco.....	\$0.060
United States customs service (average).....	.0339
Manila:	
Fiscal year 1903.....	.0190
Fiscal year 1904.....	.0213

The cost of collecting \$1 at some of the other principal ports in the United States during the fiscal year 1903 is shown by the following comparative table:

Port.	Aggregate receipts.	Expenses.	Average number of persons employed.	Cost to collect.
New York.....	\$182,774,815.67	\$3,350,801.12	2,516	\$0.018
Boston.....	24,030,350.53	757,171.31	607	.032
Philadelphia.....	22,973,897.43	501,960.61	522	.024
Chicago.....	9,751,614.72	190,451.70	140	.020
New Orleans.....	8,670,585.07	270,376.75	207	.029
San Francisco.....	7,870,705.35	468,935.04	308	.060
Baltimore.....	5,417,360.70	281,579.25	183	.052
Hawaii.....	1,193,677.38	106,719.90	77	.089
Porto Rico.....	839,298.25	56,001.55	65	.067
Alaska.....	60,960.74	60,814.62	34	.998

The following table shows the detailed expenditures made at the port of Manila during the fiscal years 1903-4 on account of the Philip-

is recommended that said Act No. 898 be amended so as to permit trade to be carried on with the ports of Bongao and Balabac in vessels of any size or construction, and further, that Act No. 578, amending section 284 of the Philippine customs administrative act, be amended by providing that vessels of less than 10 tons burden clearing at these ports for a foreign port be liable to a fee of only 20 cents Philippine currency. The present fee of ₱4 for each foreign clearance in most instances equals from 5 to 15 per cent of the value of the vessel, and is likewise disproportionate to the values of the cargoes carried.

The collector of customs at Jolo recommends that the minimum tonnage of vessels which may enter his port with foreign goods be reduced at least to 2½ tons, since the number of small Moro boats which enter Jolo exceeds the combined entries of the two ports above mentioned, and because of the well-established fact that these boats, with or without license, of large or small tonnage, will and do go to British North Borneo for trade.

Similar conditions prevail at the port of Zamboanga.

In view of the admitted policy of making special provisions of law to meet the unusual conditions surrounding Moro and other ports in the southern islands of this archipelago, therefore it is recommended that the amendatory act above suggested for the ports of Bongao and Balabac be made to apply also to the two other southern entry ports of Jolo and Zamboanga.

OFFICE WORK.

The office work of the Manila custom-house has shown a steady and decided increase month by month during the past two years, and the regular volume of correspondence is believed to be far greater than that of any other bureau in the islands.

Actual count for several months shows that the correspondence division handled and recorded during the past twelve months over 80,000 letters received and sent, and some 22,500 Chinese certificates of residence. Over 130,000 circulars, notices, and summaries are mailed annually, a considerable portion of the same being mimeographed.

COST OF COLLECTION.

As stated in the first special report of the undersigned, the rate of cost of collecting the customs revenues in the Philippine Islands is considerably less than it is in the United States. The statistics of customs transactions in the United States during the fiscal year 1903, which are the latest available for comparison, show the following figures. The port of San Francisco offers the best comparison with the port of Manila:

At San Francisco the fiscal year ended June 30, 1903, the sum of \$7,850,705.35 was collected, at a cost of \$468,935.04; cost to collect \$1, \$0.060.

At Manila, during the fiscal year 1903, the sum of \$7,861,971.64 was collected, at a cost of \$301,821.51; cost to collect \$1, \$0.0381.

At Manila, during the fiscal year 1904, just ended, a year of great business depression, as hereinbefore shown, the sum of \$7,131,379.86 was collected, at a cost of \$304,476.32; cost to collect \$1, \$0.0426.

These comparisons are made on the basis of the items which are included in determining the cost of collection in the United States, as will be seen by the following table, which shows both the total expenditures at the port of Manila on account of the Philippine customs service and the expenditures which, in accordance with the system employed in the United States, are chargeable to the cost of collecting customs duties at the port of Manila.

As very pertinent to this comparison, attention is invited to the following statement, made in the first annual report of Hon. Henry C. Ide, secretary of finance and justice:

In connection with this statement of comparative expenses it should be remarked that the customs duties in the Philippine Islands are practically one-half of what the average customs duties are at ports of the United States, so that double the amount of business has to be transacted here to collect the same amount of revenues, which makes the showing still more favorable in behalf of economy of the customs administration in the Philippine Islands. These results have been secured in face of the fact that it has been difficult to secure competent and experienced employees.

As is shown by that statement, although the actual and necessary cost of assessing and handling the present volume of imports is unchanged, the cost of collecting \$1 in the Philippine Islands is practically doubled as compared with the cost in the United States, owing to the fact that the return of the duties upon the inspection and appraisal of a given amount of merchandise is only one-half here of what it would be under the present United States tariff.

Putting the rate of cost of collection at the port of Manila on the same basis as the port of San Francisco and the other ports in the United States, the comparison is as follows:

Cost to collect \$1.

San Francisco.....	\$0.060
United States customs service (average).....	.0339
Manila:	
Fiscal year 1903.....	.0190
Fiscal year 1904.....	.0213

The cost of collecting \$1 at some of the other principal ports in the United States during the fiscal year 1903 is shown by the following comparative table:

Port.	Aggregate receipts.	Expenses.	Average number of persons employed.	Cost to collect.
New York.....	\$182,774,815.67	\$3,350,801.12	2,516	\$0.018
Boston.....	24,030,350.53	757,171.31	607	.032
Philadelphia.....	22,973,897.43	561,960.64	522	.024
Chicago.....	9,751,614.72	190,454.70	110	.020
New Orleans.....	8,670,585.07	250,376.75	207	.029
San Francisco.....	7,850,705.35	468,935.04	308	.060
Baltimore.....	5,417,360.70	281,579.25	183	.052
Hawaii.....	1,193,677.38	106,719.90	77	.089
Porto Rico.....	839,298.25	56,001.55	65	.067
Alaska.....	60,960.74	60,814.62	34	.998

The following table shows the detailed expenditures made at the port of Manila during the fiscal years 1903-4 on account of the Philip-

pine customs service, including all other duties and branches under the charge of the insular collector of customs:

Expenditures at the port of Manila for the fiscal year ended June 30, 1903.

CUSTOMS EXPENSES PROPER.

1. Salaries of officials and employees, except janitors and night watchmen..	\$274, 187. 28

^cOf this amount \$1,000 was omitted from the report on Form No. 1 of the monthly expenditures for the port of Manila.

16. Chinese registration.....	\$24,436.02
17. Consular and statistical division.....	21,045.32
18. License division (navigation).....	1,390.00
19. Purchase and maintenance of arrastre division.....	18,127.06
Total.....	174,396.96

NOTE.—The items under the head of "Customs expenses proper" are the ones employed in ascertaining the cost to collect \$1 pursuant to the practice in the United States.

STATISTICS.

To the end that the statistical reports of these islands may be a complete and accurate record of all goods entering or leaving the same through any channel, it is earnestly recommended that a law be passed authorizing collectors of customs to demand and exact full data as to all Government supplies, for the army, navy, and other departments, brought into or exported from the islands, whether on regular commercial vessels or on Government vessels of any description.

To be serviceable, this data must be detailed and complete, and be such as to enable classifications to be made under the prescribed statistical schedules. The law should also cover data as to all passengers arriving in and departing from the islands on Government vessels.

The value of accurate statistics to the commerce of the world fully justifies the passage of such a law.

This office transmits to the Secretary of War at Washington 768 regular statistical reports each year, not including special reports called for from time to time.

Since July 1, 1903, the more important statistical reports for entry ports outside of Manila have been prepared from the original entries transmitted to this office. The results have been very satisfactory in the way of obtaining uniform classifications and fewer errors.

Since January 1, 1904, statistics have been kept of all merchandise shipped from or received at all coastwise ports, showing the classes of articles shipped or received and their destinations or points of precedence. These reports are compiled from the inward and outward coastwise manifests.

Statistics are kept also of the detailed receipts and disbursements at all coastwise ports and subports in the islands, and of all passengers leaving the islands.

The following table shows the gross receipts and expenditures of this service during the past two fiscal years.

^a Of this amount \$1,283.73 was omitted from the report on Form No. 1 of the monthly expenditures for the port of Manila.

Gross customs receipts, by sources, fiscal years ended June 30, 1903 and 1904, at all ports in the Philippine Islands.

[Amounts expressed in United States currency.]

Sources of receipts.	1903.	1904.
Import duty	\$7,678,837.18	\$6,740,117.56
Export duty	1,367,843.31	1,253,507.67
Harbor improvement tax	145,005.89	137,424.17
Coastwise license fees	118,741.99	108,575.21
Tonnage tax, foreign trade	70,058.24	70,641.36
Sale of customs stamps	50,293.78	38,993.00
Fines and seizures	20,529.41	30,843.00
Immigration dues	11,983.95	20,454.00
Chinese certificates of residence	14,820.85	19,275.37
Chinese certificates of registration	1,642.02	23,502.53
Certificates of protection, ownership, other	12,250.36	17,207.06
Admeasurement fees	7,632.13	8,718.32
Auction sales	12,233.91	6,873.49
Sale of blank forms	2,677.71	1,819.81
Sale of rolls, coastwise trade	430.63	1,258.50
Storage charges	15,500.36	12,650.58
Various other sources	10,216.20	2,006.63
Total	9,510,706.92	8,493,868.26

Gross customs expenditures for the Philippine Islands.

Nature of expenditures.	1903.	1904.
Salaries and wages	\$417,312.45	\$447,792.15
Rent and supplies	31,066.42	19,083.12
Permanent repairs	31,476.14	29,324.51
Miscellaneous expenditures	8,231.65	67,264.01
Total	488,086.67	563,463.79

The item of "miscellaneous expenditures" for the fiscal year 1904 includes the following:

Purchase and maintenance of arrastre plant	\$18,127.06
Chinese registration expenses	23,152.29
Contingent fund expenditures (secret service)	16,919.48
Total	58,198.83

The receipts from the arrastre plant are kept as a special fund and do not enter into the report of customs receipts.

A complete set of comparative statistical summaries for the fiscal year ending June 30, 1904, and previous periods, with explanatory notes, is hereto attached, marked "Appendix A."

Credit is due the chief of the statistical division of this office for the preparation of these summaries and notes, as well as for the continued excellent work of that branch of the service.

HEMP SHIPMENTS AND REFUNDABLE DUTIES.

The following table shows the exports of hemp from the Philippine Islands to the United States direct, by months, covering the period from April 1, 1902, to the end of the fiscal year, together with the amount of export duties refunded thereon under the act of Congress of March 8, 1902:

Hemp exported to the United States and refundable duties collected thereon.

Date.	Tons.	Value.	Refund-able duty collected.
1902.			
April.....	1,336	\$238,798.00	\$5,737.50
May.....	5,856	1,245,972.00	34,002.35

The total refundable export duties collected on hemp to June 30, 1904, was \$1,060,426.62.
Total exports of hemp to all countries, 1903, 129,984 tons; in 1904, 128,752 tons.

Considering customs receipts from the standpoint of insular revenues, the amount of duty paid by the insular government and the amount of refundable export duty collected on hemp shipped direct to the United States for consumption there, under the provisions of the act of Congress approved March 8, 1902, should be deducted from gross receipts.

Refundable export duties have been collected at only two ports, as follows:

Port.	1902.	1903.	1904.	Total.
Manila.....	\$35,316.83	\$110,616.43	\$378,213.07	\$824,206.33
Cebu.....	35,717.86	116,281.67	84,220.76	26,220.29
Total.....	71,064.69	526,928.10	462,433.83	1,060,426.62

During the fiscal years 1902 and 1903 the collection of export duties was greatly increased at Cebu in consequence of the cholera epidemic at Manila, which caused much hemp to be exported direct from Cebu, which, under normal conditions, would have been shipped coastwise to Manila and exported from this port.

HULL AND BOILER INSPECTION SERVICE.

The unsatisfactory conditions set forth in the last report of this office in regard to this work still prevail to a great extent, and while the limited appropriation available has served to retard inspections, especially outside of the Manila district, the principal reason for the unsatisfactory state of this most important service to the public lies in the peculiar physical conditions surrounding the work.

At the present time, of the entire number of steam and sailing vessels of such size as to make their inspection a matter of moment to the safety of the traveling public perhaps two-thirds are types of marine architecture of some decades past; their hulls and machinery, tackle, and equipment are of more or less antiquated model, and under the laxly enforced regulations of the former government of these islands few of the passenger-carrying vessels have been maintained and equipped in the way demanded by the regulations and public sentiment in the United States. As a result, any attempt to-day to subject these vessels to rules approaching some of the United States steamboat-inspection regulations is followed by severe complaints on the part of the vessels' owners. Steamship lines claim, and their views are by no means unnatural or unreasonable from their standpoint, that it is unjust to impose upon an industry already suffering from great commercial depression additional expenses and losses through delays, in order to make their steamers conform to standards and equipment for which they were never constructed, which were not required by the former government of these islands, and to which the public are not accustomed, for which they do not pay, hence do not expect to receive. There is undoubtedly great force in these arguments, and the statements of conditions contained therein are substantially true; yet how far would these arguments and conditions serve to free the insular government and its officials, charged with protecting the lives and property of the inhabitants of these islands from heavy moral responsibilities, if, in case some terrible marine disaster should occur with a vessel permitted to carry passengers, it developed that the condition, equipment, and life-saving appliances of the vessel were far below the standards set in the United States, and that American officials were cognizant of their inferiority and insufficiency? The situation merits most serious consideration on the part both of the government and the owners of vessels in these islands. The recent accidents to the *General Slocum* in New York Bay and to the Danish steamer *Norge* have been severely visited on the heads of those charged with seeing to the adequacy of the equipment, construction, and appliances of those vessels, and the insufficiency of post-mortem inquiries to save lives has been again fully demonstrated.

For the purpose of giving this situation all the study and attention which its importance warrants, this office has appointed a board of officers belonging to different departments of the insular government, under the chairmanship of the insular surveyor of customs, with directions to consult freely with the different shipping interests here and to recommend such regulations as will give the maximum amount of protection to the public without unduly interfering with an industry which is vitally important to the progress and development of the islands. There is much to be said between those extremes.

From the beginning of the present fiscal year the service has consisted of one supervising inspector, two inspectors of boilers, and one inspector of hulls, a total of four officials to supervise some thousands of vessels distributed throughout the archipelago. That this force is utterly inadequate to properly carry out this important work is patent, and it is earnestly recommended that, as soon as the condition of the treasury will permit, the force proposed in the last report of this office be provided, to wit, one supervising inspector, with two boiler inspectors and one hull inspector at Manila, one boiler inspector and one hull inspector at Cebu, and a corresponding force at Iloilo. Under that plan the inspectors at Cebu and Iloilo would be required to cover between them the collection districts of Jolo, Zamboanga, Balabac, and Bongao.

During the period from July 1, 1903, to September 1, 1904, 230 vessels have been inspected and granted certificates at the port of Manila. A list of said vessels, showing their names, gross tonnage, and class, is hereto attached, marked "Appendix B."

It is believed that the reconciling of the numerous vital questions arising under this branch of the service is one of the most important works still before this office.

ADMEASUREMENT.

There has been considerable improvement in the work of admeasurement all the vessels of the Philippine Islands during the past year, due to the increased number of officials who have become familiar with the duties of that service.

Admeasurement work accomplished throughout the islands during the past fiscal year.

SIGNAL LETTERS AND OFFICIAL NUMBERS FOR PHILIPPINE VESSELS.

The system of signal letters and official numbers for vessels of the Philippine Islands, as outlined in the last report of this office, has been carried out, and up to the present time 2,801 documented vessels have been assigned official numbers, 334 of which have also received signal letters.

If, therefore, at any time Congress shall admit Philippine vessels to American registry, as it has done in the past for vessels owned in other territories acquired by the United States, the existing signal letters and official numbers may be confirmed, at a great saving of time, expense, and confusion.

Lists of the vessels to which these assignments have been made up to July 1, 1904, have been published in Customs Administrative Circular No. 338, a copy of which is attached hereto, marked "Appendix C."

INTERNAL-REVENUE COLLECTIONS.

On August 1, 1904, this office was designated to collect the taxes imposed by the internal-revenue law of 1904 on all matches imported into these islands, and the insular collector of customs was authorized to designate customs officers to perform this duty at the various other ports of entry.

Pursuant to above designation and authority, this office, on August 5, 1904, published in Customs Administrative Circular No. 334, a copy of which is hereto attached, marked "Appendix D," certain temporary rules for the collection of the tax imposed on imported matches.

BOARD OF PROTESTS AND APPEALS.

The board of protests and appeals at Manila was appointed by the insular collector of customs to assist in the reconsideration of classifications and valuations of all imported merchandise arriving in the islands which becomes the subject of protest, as well as in the imposition and remission of pecuniary penalties.

The board reports that the total number of protests received at the port of Manila during the past year (September 1, 1903, to September 1, 1904) is 1,106.

The following statistical tables are given of all protests and appeals at the port of Manila, and the amounts of duties refunded thereunder, from July 1, 1902, to June 30, 1904, the end of the last fiscal year:

HULL AND BOILER INSPECTION SERVICE.

The unsatisfactory conditions set forth in the last report of this office in regard to this work still prevail to a great extent, and while the limited appropriation available has served to retard inspections, especially outside of the Manila district, the principal reason for the unsatisfactory state of this most important service to the public lies in the peculiar physical conditions surrounding the work.

At the present time, of the entire number of steam and sailing vessels of such size as to make their inspection a matter of moment to the safety of the traveling public perhaps two-thirds are types of marine architecture of some decades past; their hulls and machinery, tackle, and equipment are of more or less antiquated model, and under the laxly enforced regulations of the former government of these islands few of the passenger-carrying vessels have been maintained and equipped in the way demanded by the regulations and public sentiment in the United States. As a result, any attempt to-day to subject these vessels to rules approaching some of the United States steam-boat-inspection regulations is followed by severe complaints on the part of the vessels' owners. Steamship lines claim, and their views are by no means unnatural or unreasonable from their standpoint, that it is unjust to impose upon an industry already suffering from great commercial depression additional expenses and losses through delays, in order to make their steamers conform to standards and equipment for which they were never constructed, which were not required by the former government of these islands, and to which the public are not accustomed, for which they do not pay, hence do not expect to receive. There is undoubtedly great force in these arguments, and the statements of conditions contained therein are substantially true; yet how far would these arguments and conditions serve to free the insular government and its officials, charged with protecting the lives and property of the inhabitants of these islands from heavy moral responsibilities, if, in case some terrible marine disaster should occur with a vessel permitted to carry passengers, it developed that the condition, equipment, and life-saving appliances of the vessel were far below the standards set in the United States, and that American officials were cognizant of their inferiority and insufficiency? The situation merits most serious consideration on the part both of the government and the owners of vessels in these islands. The recent accidents to the *General Slocum* in New York Bay and to the Danish steamer *Norge* have been severely visited on the heads of those charged with seeing to the adequacy of the equipment, construction, and appliances of those vessels, and the insufficiency of post-mortem inquiries to save lives has been again fully demonstrated.

For the purpose of giving this situation all the study and attention which its importance warrants, this office has appointed a board of officers belonging to different departments of the insular government, under the chairmanship of the insular surveyor of customs, with directions to consult freely with the different shipping interests here and to recommend such regulations as will give the maximum amount of protection to the public without unduly interfering with an industry which is vitally important to the progress and development of the islands. There is much to be said between those extremes.

From the beginning of the present fiscal year the service has consisted of one supervising inspector, two inspectors of boilers, and one inspector of hulls, a total of four officials to supervise some thousands of vessels distributed throughout the archipelago. That this force is utterly inadequate to properly carry out this important work is patent, and it is earnestly recommended that, as soon as the condition of the treasury will permit, the force proposed in the last report of this office be provided, to wit, one supervising inspector, with two boiler inspectors and one hull inspector at Manila, one boiler inspector and one hull inspector at Cebu, and a corresponding force at Iloilo. Under that plan the inspectors at Cebu and Iloilo would be required to cover between them the collection districts of Jolo, Zamboanga, Balabac, and Bongao.

During the period from July 1, 1903, to September 1, 1904, 230 vessels have been inspected and granted certificates at the port of Manila. A list of said vessels, showing their names, gross tonnage, and class, is hereto attached, marked "Appendix B."

It is believed that the reconciling of the numerous vital questions arising under this branch of the service is one of the most important works still before this office.

ADMEASUREMENT.

There has been considerable improvement in the work of admeasuring all the vessels of the Philippine Islands during the past year, due to the increased number of officials who have become familiar with the duties of that service.

Admeasurement work accomplished throughout the islands during the past fiscal year.

SIGNAL LETTERS AND OFFICIAL NUMBERS FOR PHILIPPINE VESSELS.

The system of signal letters and official numbers for vessels of the Philippine Islands, as outlined in the last report of this office, has been carried out, and up to the present time 2,801 documented vessels have been assigned official numbers, 334 of which have also received signal letters.

If, therefore, at any time Congress shall admit Philippine vessels to American registry, as it has done in the past for vessels owned in other territories acquired by the United States, the existing signal letters and official numbers may be confirmed, at a great saving of time, expense, and confusion.

Lists of the vessels to which these assignments have been made up to July 1, 1904, have been published in Customs Administrative Circular No. 338, a copy of which is attached hereto, marked "Appendix C."

INTERNAL-REVENUE COLLECTIONS.

On August 1, 1904, this office was designated to collect the taxes imposed by the internal-revenue law of 1904 on all matches imported into these islands, and the insular collector of customs was authorized to designate customs officers to perform this duty at the various other ports of entry.

Pursuant to above designation and authority, this office, on August 5, 1904, published in Customs Administrative Circular No. 334, a copy of which is hereto attached, marked "Appendix D," certain temporary rules for the collection of the tax imposed on imported matches.

BOARD OF PROTESTS AND APPEALS.

The board of protests and appeals at Manila was appointed by the insular collector of customs to assist in the reconsideration of classifications and valuations of all imported merchandise arriving in the islands which becomes the subject of protest, as well as in the imposition and remission of pecuniary penalties.

The board reports that the total number of protests received at the port of Manila during the past year (September 1, 1903, to September 1, 1904) is 1,106.

The following statistical tables are given of all protests and appeals at the port of Manila, and the amounts of duties refunded thereunder, from July 1, 1902, to June 30, 1904, the end of the last fiscal year:

Since the inception of the Philippine customs administrative act decisions have been rendered by this office on 2,955 protests, 1,815 of which raised constitutional questions, and 1,140 questions of classification, valuation, etc.

All protests on constitutional questions have been overruled and denied, the legality of the collection of duties on imports and exports having been affirmed by the court of customs appeals (Tariff Decision Circular No. 179) and by the United States Court of Claims (Tariff Decision Circular No. 436.)

Of the 1,140 protests on other questions decided by this office, principally classifications and valuations, 404 were sustained and 736 were overruled and denied.

During this same period 580 appeals from the decisions of this office on protests were decided by the court of customs appeals, of which number 443 were on constitutional questions. The decisions of this office were affirmed on all appeals on constitutional questions. Of the 137 appeals on other questions, the decisions of this office on 60 were modified, and on 77 the decisions of this office were affirmed.

Appeals from decisions of collectors of customs at subports of entry to the insular collector of customs were filed and decided as follows:

Appeals filed and decided.

Month.	Decisions filed.	Decisions affirmed.	Decisions reversed.	Total decisions made.
1903.				
July.....			1	1
August.....		1		1
September.....				
October.....				
November.....	1	3		3
December.....	2			
1904.				
January.....		1		1
February.....	1	2		2
March.....				
April.....	1	1		1
May.....	1	2		2
June.....	1	1		1
Total.....	7	11	1	12

During the year but three appeals to the court of customs appeals were received from subports of entry, one in September, one in March, and one in May. One of these appeals was decided in June, 1904, the decision of the collector of customs being affirmed. Refunds on protests sustained by collectors of customs at subports of entry, and on appeals to the insular collector, have been ordered in the sum of \$1,359.63 United States currency, as follows:

Refunds on protests sustained by collectors of customs at subports of entry and on appeals to the insular collector.

Month and year.	Iloilo.	Zambo-anga.
December, 1902.....	\$718.95	
February, 1903.....		\$11.03
July, 1903.....	65.76	
February, 1904.....	451.25	
April, 1904.....	17.01	
May, 1904.....	65.63	
Total.....	1,318.60	41.03

NOTE.—In the preparation of the above tables all protests have been considered as sustained and all appeals reversing the decision of the collector of customs, on which refunds were ordered by the decisions, without regard to whether or not other questions in the same protest or appeal were overruled and denied or the decision of the collector of customs thereon affirmed.

There has been a notable decrease in the number of appeals to the court of customs appeals during the past year, which is partly due to the fact that practically no appeals are now filed where the protester bases his claim on constitutional grounds, and partly owing to the fact that protests are now so decided as to permit of but one appeal on one question.

The amount of refunds ordered at the port of Manila has greatly increased during the past fiscal year. Up to July 1, 1903, refunds ordered amounted to but \$5,972.37, while during the past year they amounted to \$20,576.29, both amounts being in United States currency.

DUTIES ON SUPPLIES FOR INSULAR GOVERNMENT.

Under Act No. 875 of the Philippine Commission, passed September 9, 1903, which provides for the collection of duties on goods, wares, and merchandise imported into these islands for the use of the insular, provincial, or municipal governments, the following duties have been collected up to the close of the last fiscal year:

	United States currency.
October, 1903.....	\$4,606. 57
November, 1903.....	6,204. 04
December, 1903.....	5,985. 48
January, 1904.....	4,042. 03
March, 1904.....	25,000. 00
April, 1904.....	30,000. 01
May, 1904.....	6,499. 55
June, 1904.....	25,000. 45
Total.....	107,338. 13

Prior to the operation of Act No. 875 all merchandise imported by the insular government was entered free of duty and included in the report of government free entries.

Of the duty paid by the insular government all except \$75 was paid at the port of Manila. The \$75 excepted was paid at the port of Zamboanga in December, 1903.

By Act No. 1230, passed September 9, 1904, the Philippine Commission amended Act No. 875 so as to allow the free importation of merchandise by the insular government when the articles imported are of such character that local competition therefor is impracticable and orders for the same must be placed abroad.

This latter legislation is in line with the original purpose of Act No. 875.

PECUNIARY PENALTIES.

In the enforcement of the tariff and navigation laws at the port of Manila, pecuniary penalties were collected during the fiscal year ended June 30, 1903, amounting to \$19,030.76 United States currency, and during the fiscal year ended June 30, 1904, amounting to ₱50,361.26 Philippine currency.

The greater number of these fines were for underdeclarations and undervaluations of merchandise, the remainder consisting of fines imposed under the navigation laws and of fines imposed by order of the court of customs appeals and paid into this office under the head of miscellaneous collections.

PHILIPPINE MARINE EXAMINATIONS.

Since the passage, on May 29, 1903, of Act No. 780 of the Philippine Commission, a thorough system of examinations for persons desiring to obtain licenses to act as masters, deck officers, patrons, and engineers has been maintained under the supervision of this office.

Pursuant to section 17 of that act the "board on Philippine marine examinations" has been regularly convened, and is in session at this port at the present writing.

Up to September 10, 1904, the following licenses had been issued by this office as a result of examinations held by said board:

Rank.	Citizens of the—		Total.
	Philip- pine Islands.	United States.	
Masters.....	50	41	91
First mates.....	6	11	17
Second mates.....	11	13	24
Third mates.....	12	2	14
Patrons.....	229	1	230
Chief engineers.....	130	6	136
Do. ".....			27
First assistant engineers.....	81		81
Second assistant engineers.....	84		84
Do. ".....	7		7
Third assistant engineers ".....	63		65
Total.....	702	74	776

^a Limited to rivers and bays.

Up to the same date the following certificates of service had been issued to persons not entitled to licenses:

Rank.	Citizens of—					Total.
	Spain.	Great Britain.	Ger- many.	Sweden.	China.	
Masters.....	78	5		1		84
First mates.....	16	1	1			18
Second mates.....	3					3
Patrons.....	5					5
Chief engineers.....	42	2	1		2	47
First assistant engineers.....	9				1	10
Second assistant engineers.....	4				1	5
Total.....	157	8	2	1	4	172

Upon September 10, 1904, there were 136 applicants awaiting the results of the examination now in progress, as follows:

Masters.....	3
First mates.....	1
Third mates.....	1
Patrons.....	25
Chief engineers.....	9
First assistant engineers.....	23
Second assistant engineers.....	50
Do. ".....	24
Total.....	136

From the above tables it will be seen that there are 948 persons in these islands competent to serve as merchant marine officers, including engineers, at the present time. Of these 702 are Filipinos, 74 are citizens of the United States, and 172 are foreigners entitled to act under "certificates of service."

PERSONNEL.

As was intimated in the first special report of this office, rendered two years ago, one of the unusual difficulties to be overcome in the

^aLimited to lakes, bays, and rivers.

conduct of general office work in these islands is the scarcity of a permanent, trained personnel.

Due to a variety of causes, the clerical force of this bureau in former years practically changed every fifteen months, and the difficulty of giving satisfactory services along the lines of more or less technical work under such circumstances can be better imagined than described.

Practical experience with the office work of this bureau leads to the conviction that in the Tropics the year around more work can be accomplished in a single session of, say, six and a half hours, than in two sessions a day, amounting to nominally an hour more of work. With a double session there is always loss of time in getting under way and stopping, and the long journeys to and from lunch, such as are necessarily made by many of the employees, are extremely fatiguing in the heat of the day, especially in bad weather, and rob the afternoon working hours of their best results.

This bureau operates at present under the single-session rule, and so far as can be ascertained the plan is generally acceptable.

The following table of changes in the personnel of the Manila custom-house during the past fiscal year shows a decided improvement over the average term of service two years ago, when the entire personnel was changing in about one year and three months:

Separations.

Month.	Resigned.	Discharged.	Transferred.	Died.	Number of employees during month.	Number of separations monthly.
1903.						
July.....	9	5	1	1	555	16
August.....	13	11	1	2	579	27
September.....	15	5	1	579	21
October.....	14	7	5	600	26
November.....	21	1	1	591	23
December.....	15	8	3	1	589	27
1904.						
January.....	12	9	2	587	23
February.....	11	9	1	592	21
March.....	12	10	2	599	24
April.....	5	6	3	580	14
May.....	5	7	3	591	15
June.....	19	3	4	1	590	27
Total.....	151	81	24	8	7,032	264

The monthly average of employees for the fiscal year 1904 was 586. During that period the number separated from the service through resignation, discharge, transfer, or death was 264, or 45 per cent of the average monthly force. The entire personnel at this rate would change in about twenty-six and one-half months.

In this connection it is deemed proper to repeat a statement made in the first special report of this office regarding the qualifications necessary in good customs employees:

It is perhaps safe to say that in no other large branch of either the insular or the home government, except, perhaps, the judiciary, do the personal responsibility, loyalty, and integrity of all grades of officers and employees play such an important part as in the customs service, or a similar large revenue-collecting agency. There are many branches of the government in which quite as much, and perhaps more, technical knowledge is required of the ordinary classes of employees, but in hardly any other service is the general combination of skill and integrity so vitally essential as in customs work. In the United States this fact has been recognized by making the customs branch the best paid and best equipped one in the Federal service.

The question of "vacation leaves" under Act No. 1040 of the Philippine Commission, passed January 12, 1904, is one warranting serious consideration by the heads of offices, especially those employing large numbers of persons belonging to the classified civil service.

Said act provides, in substance, that after at least six months' continuous, faithful, and satisfactory service the civil governor or proper head of a department may, in his discretion, grant each officer or employee entitled to the accrued leave provided in section 2 of this act, in addition to such accrued leave, vacation leave of absence with full pay, inclusive of Sundays and of days declared public holidays by law or executive order, for each calendar year of service, at the rate of twenty-one days for employees receiving less than \$1,000 per annum and twenty-eight days for officers or employees receiving \$1,000 or more per annum. Vacation leave must also be taken within the calendar year in which it is earned. Absence of regularly and permanently appointed officers and employees (except teachers) in the Philippine civil service on account of illness shall be charged first against vacation leave and then against accrued leave, until both are exhausted, when further absence is without pay.

In the practical application of the above law in this bureau, especially at the port of Manila, the following situation has arisen:

Since "vacation leave" has replaced "sick leave on pay," officers and employees are naturally loath to request and take their vacation leaves, unless required so to do by illness, until near the end of the calendar year, when the chances of their falling sick during that year are minimized. For instance, the majority of officers and employees who desire to preserve intact their "accrued leave," with a not unnatural foresight, reason that if they take their vacation leave in the first quarter or first half of the calendar year they are still liable to fall sick during the last half or latter months of the year, in which case they would have to draw upon their accrued leave. They therefore continue on duty during the first nine or ten months of the year and count upon getting their vacation leave during the last quarter of the calendar year, when the period during which they might fall sick has been greatly reduced.

The following table, showing the vacation leaves requested and granted to customs officers and employees at Manila up to September 1 of the present calendar year, illustrates the above statements:

	Days.
Maximum allowance of vacation leave during calendar year 1904.....	10, 248
Vacation leaves requested and granted up to September 1, 1904:	
January.....	173
February.....	178
March.....	347
April.....	453
May.....	604
June.....	557
July.....	589
August.....	398
	3, 299
Leaving a total "earned" vacation leave to be taken (if possible) during the remaining four months of the year.....	6, 949

From this it will be seen that over two-thirds of the "earned" vacation leaves is still to be taken, if granted at all, during the remaining one-third of the calendar year. This is an impossible situation

conduct of general office work in these islands is the scarcity of a permanent, trained personnel.

Due to a variety of causes, the clerical force of this bureau in former years practically changed every fifteen months, and the difficulty of giving satisfactory services along the lines of more or less technical work under such circumstances can be better imagined than described.

Practical experience with the office work of this bureau leads to the conviction that in the Tropics the year around more work can be accomplished in a single session of, say, six and a half hours, than in two sessions a day, amounting to nominally an hour more of work. With a double session there is always loss of time in getting under way and stopping, and the long journeys to and from lunch, such as are necessarily made by many of the employees, are extremely fatiguing in the heat of the day, especially in bad weather, and rob the afternoon working hours of their best results.

This bureau operates at present under the single-session rule, and so far as can be ascertained the plan is generally acceptable.

The following table of changes in the personnel of the Manila custom-house during the past fiscal year shows a decided improvement over the average term of service two years ago, when the entire personnel was changing in about one year and three months:

Separations.

Month.	Resigned.	Discharged.	Transferred.	Died.	Number of employees during month	Number of separations monthly.
1903.						
July.....	9	5	1	1	555	16
August.....	13	11	1	2	579	27
September.....	15	5	1	579	21
October.....	14	7	5	600	26
November.....	21	1	1	591	23
December.....	15	8	3	1	589	27
1904.						
January.....	12	9	2	587	23
February.....	11	9	1	592	21

April.....	5	6	3	580	14
May.....	5	7	3	591	15
June.....	19	3	4	1	590	27
Total.....	151	81	24	8	7,032	264

The monthly average of employees for the fiscal year 1904 was 586. During that period the number separated from the service through resignation, discharge, transfer, or death was 264, or 45 per cent of the average monthly force. The entire personnel at this rate would change in about twenty-six and one-half months.

In this connection it is deemed proper to repeat a statement made in the first special report of this office regarding the qualifications necessary in good customs employees:

It is perhaps safe to say that in no other large branch of either the insular or the home government, except, perhaps, the judiciary, do the personal responsibility, loyalty, and integrity of all grades of officers and employees play such an important part as in the customs service, or a similar large revenue-collecting agency. There are many branches of the government in which quite as much, and perhaps more, technical knowledge is required of the ordinary classes of employees, but in hardly any other service is the general combination of skill and integrity so vitally essential as in customs work. In the United States this fact has been recognized by making the customs branch the best paid and best equipped one in the Federal service.

The question of "vacation leaves" under Act No.1040 of the Philippine Commission, passed January 12, 1904, is one warranting serious consideration by the heads of offices, especially those employing large numbers of persons belonging to the classified civil service.

Said act provides, in substance, that after at least six months' continuous, faithful, and satisfactory service the civil governor or proper head of a department may, in his discretion, grant each officer or employee entitled to the accrued leave provided in section 2 of this act, in addition to such accrued leave, vacation leave of absence with full pay, inclusive of Sundays and of days declared public holidays by law or executive order, for each calendar year of service, at the rate of twenty-one days for employees receiving less than \$1,000 per annum and twenty-eight days for officers or employees receiving \$1,000 or more per annum. Vacation leave must also be taken within the calendar year in which it is earned. Absence of regularly and permanently appointed officers and employees (except teachers) in the Philippine civil service on account of illness shall be charged first against vacation leave and then against accrued leave, until both are exhausted, when further absence is without pay.

In the practical application of the above law in this bureau, especially at the port of Manila, the following situation has arisen:

Since "vacation leave" has replaced "sick leave on pay," officers and employees are naturally loath to request and take their vacation leaves, unless required so to do by illness, until near the end of the calendar year, when the chances of their falling sick during that year are minimized. For instance, the majority of officers and employees who desire to preserve intact their "accrued leave," with a not unnatural foresight, reason that if they take their vacation leave in the first quarter or first half of the calendar year they are still liable to fall sick during the last half or latter months of the year, in which case they would have to draw upon their accrued leave. They therefore continue on duty during the first nine or ten months of the year and count upon getting their vacation leave during the last quarter of the calendar year, when the period during which they might fall sick has been greatly reduced.

The following table, showing the vacation leaves requested and granted to customs officers and employees at Manila up to September 1 of the present calendar year, illustrates the above statements:

	Days.
Maximum allowance of vacation leave during calendar year 1904.....	10, 298
Vacation leaves requested and granted up to September 1, 1904:	
January.....	173
February.....	178
March.....	347
April.....	453
May.....	604
June.....	557
July.....	589
August.....	398
	<hr/> 3, 299
Leaving a total "earned" vacation leave to be taken (if possible) during the remaining four months of the year.....	6, 999

From this it will be seen that over two-thirds of the "earned" vacation leaves is still to be taken, if granted at all, during the remaining one-third of the calendar year. This is an impossible situation

from the standpoint of an office head charged with maintaining the efficiency of his bureau. In this office, at least, it thus becomes absolutely necessary to refuse the greater part of the vacation leaves still due for this year, especially in view of the reduced personnel provided by the appropriation bill for the present fiscal year. It is true that the law does not give officers and employees an absolute right to vacation leave, but it states that "vacation leave must be taken within the calendar year in which it is earned," and as the understood purpose of Act No. 1040 was to provide for a yearly vacation for employees on the grounds that their health and efficiency demand the same, it is extremely difficult for the head of an office to refuse a request, especially when it is coupled with the statement that the applicant is not feeling well and needs the rest and change to prevent possible serious illness.

This latter question, indeed, makes the proper control of vacation leaves by the head of a large office an especially trying task, since officers and employees who naturally believe themselves entitled under the law to twenty-one or twenty-eight days' leave each year may in many instances (with more or less good faith) remain away from the office on the grounds that they are sick, indisposed, or feeling unfit for duty within the meaning of the expression "absence * * * on account of illness" in section 4, letter (b), of Act No. 1040, which section provides that such absence shall be charged first against vacation leave and then against accrued leave.

Under the former law granting "sick leave with pay," under certain limitations, any alleged illness on the part of an employee was very strictly inquired into, and unless full proof of the same was presented the absence was charged against the employee's accrued leave or his pay was withheld for the time he was absent from work.

Unless, therefore, the same rigid rules as to investigation and proof of illness which were enforced prior to Act No. 1040 are continued in force and applied to persons who have "earned" vacation leave but who have been necessarily refused the same, nevertheless fail to report for duty on the grounds that they are sick or unable to work, it can readily be seen that an office can be seriously crippled, especially during the latter part of the calendar year, by employees who, believing themselves morally entitled under the law to take their vacation leave, will present one reason or another for staying away from duty for varying periods up to the total amount of their vacation leave, thus practically defeating the control and discretion intended to be vested in the head of an office by the terms of Act No. 1040.

Under the present rules an employee entitled to vacation leave may at any time remain away from the office for a period not exceeding the amount of vacation leave due him, and upon his statement that he was ill or otherwise unfit for duty it is necessary for the head of the office to either overlook the absence or to institute an investigation for the purpose of proving that the said employee was not really ill or unfit for duty, but that he was using said statement for an excuse to take his vacation leave.

Viewing the matter even from its most favorable standpoint, the necessity of adopting the latter course certainly interferes with the discipline of a large office and consumes a lot of valuable time which should be devoted to other work.

This office hesitates to recommend any specific remedy to meet this state of affairs, but unless it is deemed advisable to provide that all cases of alleged illness chargeable against vacation leave shall be substantiated in the same thorough way as were cases of alleged illness chargeable to sick leave on pay, in accordance with the law prior to Act No. 1040, it will become necessary for this office to devise some plan to apportion vacation leave by months and to compel employees to whom each particular month is assigned to take their vacation leave within that month or to understand that their failure to do so will deprive them, in all probability, of any vacation leave within the calendar year.

In a large office, however, which employs several hundreds of classified persons entitled to vacation leave, even this system is open to the objections above stated, to wit: Its purpose can be defeated in a number of instances by employees who claim to be ill or otherwise unfit for duty, unless the same full proof of alleged illness is to be exacted in all such cases as was formerly required in cases arising under the "sick-leave" law.

It is believed that this subject is a most important one, and that the maintenance of a high standard of efficiency in any large bureau of the insular government requires that some uniform course be adopted to meet the situation above discussed.

SPECIAL AGENTS.

This division has the fiscal supervision of customs accounts and property; the investigation of the methods of business, conduct, and capacity of customs officers, and all similar matters pertaining to the other work of the customs service throughout the islands. Special agents are authorized and directed to make recommendations to the insular collector of customs regarding all matters coming within the line of their work.

The supervising special agent is stationed at Manila, and the entire archipelago is covered from that office through agents stationed permanently or temporarily in the different collection districts.

A complete set of rules for the guidance of special agents was issued by this office on September 1, 1903, in Manila Custom-house Special Order No. 104, a copy of which is hereto attached, marked "Appendix E."

During the last fiscal year 22 regular detailed inspections of the officers and accounts of coast districts have been made. The entry ports of Cebu, Iloilo, and Jolo have also been examined and checked up. Weekly, monthly, and quarterly inspections of the work and accounts of the various divisions of the Manila custom-house have been made as the occasions required. The special agents have also conducted numerous investigations concerning reported irregularities and the capacity and comportment of customs employees.

This division has also made a number of successful investigations of fraudulent practices resorted to by importers, resulting in the recovery of evaded duties amounting to \$4,728.59 United States money, and the collection of penalties imposed on account of said fraudulent evasions amounting to \$16,593.31 United States money.

One case of frauds perpetrated on the revenues by means of undervalued invoices is now pending at the port of Cebu, the importer being

under bond to appear before the court of first instance of that district at its next regular session.

The division is of great assistance to the insular collector of customs in maintaining uniform compliance with laws and regulations.

SECRET SERVICE WORK.

The work of the secret service division of this bureau has been very effective and valuable during the past year, and a number of seizures of silks, diamonds, oil of anise, and tobacco, which it has been sought to smuggle into the islands, have been made. This division has also assisted in the detection and deportation of illegally landed Chinese persons, and in the detection and arrest of thieves on customs premises.

The maintenance of this division enables the insular collector of customs to reach and minimize a class of offenders which it would be extremely difficult to detect and punish in any other way.

LABOR.

The question of labor in the Philippine Islands has ceased to be a critical one. Despite the gloomy predictions of many thoroughly sincere investigators and writers on the subject, the Filipino laborer has conclusively demonstrated that he is a practicable and dependable element in the industrial development of these islands. In the past two years several immense enterprises have been successfully carried on solely with the aid of Filipino laborers. All goods arriving at or leaving the port of Manila are handled by natives. During the past year the operation of the customs "arrastre plant" has been entirely in the hands of native labor, including the steam tramway and four large steam cranes.

The Filipinos make good clerks, copyists, typewriters, subinspectors, guards, checkers, and, in some instances, excellent fiduciary officers. In the handling of cash, in subordinate positions, they have shown a high degree of accuracy and integrity.

As marine officers and engineers, especially in the latter positions, they have exhibited a skill, fidelity, and courage which entitle them to unstinted admiration.

The chief of the statistical division, who employs a number of native clerks in that most difficult work, has the following to say of the work of the Filipinos:

The native clerks are punctual in attendance, exceptionally observant of office rules, industrious, and painstaking, and never in the least degree insubordinate. They always follow directions to the best of their ability without a murmur of complaint, and it is seriously doubted if the equals of some of them as copying clerks can be found in the Philippine Islands, taking all essentials—neatness, accuracy, and speed—into account. More rapid copyists can be found, but as a rule they fail in other essentials.

Five years' practical experience has served to convince the undersigned that among no other class in the Philippine Islands can one find so satisfactory copying clerks as are the experienced Filipinos under proper treatment.

There are, of course, some difficulties in the handling of native laborers to which those in the United States and Europe have not been accustomed, and to get the best results in this, as in every other class of work, it is necessary to understand the nature of the tools with which the work is to be done. Given, however, reasonable wages, fair treatment, and intelligent supervision, the Filipino laborer has

responded and will respond to predictions which two years ago would have been considered ridiculously optimistic, if not chimerical.

Labor is not yet all that is to be desired, either here or elsewhere, but in the Philippine Islands it has ceased to be an insurmountable obstacle to rapid development.

CHINESE AND OTHER IMMIGRATION.

The Chinese and other immigration into these islands has been regular during the past fiscal year, with the exception of a rather marked increase in the number of Japanese arrived here over those arrived during the fiscal year 1903.

The following table shows the increase in question:

Fiscal year—	Manila.	Philippine Islands.
1903.....	1,072	1,123
1904.....	2,744	2,770

From this it is seen that the number of Japanese immigrants into these islands during the past fiscal year was more than double that of the fiscal year 1903, in spite of the war in which Japan is involved.

From a study of the statistical tables appended to this report it appears that during the period of American occupation of these islands there has been a gain of 8,624 Chinese persons in the population here by reason of excess of arrivals over departures. This is due to the fact that many Chinese left the islands during the insurrection prior to the Spanish-American war and returned when the serious local disturbances terminated after the American occupation.

REGISTRATION OF CHINESE.

The registration of all Chinese persons in the Philippine Islands has been made the subject of a separate report to the honorable secretary of finance and justice, and is hereto attached, marked "Appendix F."

UNIFORMITY OF APPRAISALS.

For the purpose of securing all possible uniformity in classifications and valuations at all entry ports in these islands where an appraiser is permanently stationed, the plan is now being prepared under which all appraisers at subports of entry will be rotated through the port of Manila, appraisers from this port being sent to relieve them for periods ranging from six months to a year.

This plan, together with the continuance of the Weekly Price Current Report described in the last report of this office, will bring the work of appraisers in these islands to a high standard of uniformity and efficiency.

CONSULAR INVOICES.

The advisability of requiring consular invoices on all shipments of merchandise subject to an ad valorem duty or to a duty in any way affected by the value of the goods has been seriously urged upon this

office, especially in case there is any extension of the system of ad valorem duties in the Philippine tariff. Although the requirement of consular invoices would undoubtedly be of great assistance in the appraisal of many classes of goods, it is believed that any plan to exact the same would meet with decided opposition on the part of importers here, and it is believed that the question can well be left in abeyance for the present.

SUPERVISION OF GOVERNMENT VESSELS.

This office most earnestly repeats its recommendation made under this heading in its last report.

The present unsatisfactory status of this matter is the same as at this time last year.

This office desires to reiterate its former statement that—

It is believed, and evidence in the past has substantiated the fact, that good administration demands that all naval transports, colliers, and supply ships be subjected to the same supervision and regulations as are enforced in the case of United States army transports. The efficient administration of the revenue laws, and the credit and reputation of those charged with their enforcement, can not be maintained so long as there is a generally recognized weak link in the chain of supervision. This is especially true in a country like the Philippines, where an absolutely impartial and uniform administration of those laws is not yet freely admitted as a fact.

Opposition to a reasonable supervision by the proper officers of the government over all vessels arriving in the islands from outside ports can not be justified on any known grounds.

INSPECTION OF IMPORTED HOG PRODUCTS.

Complaint has been made to this office against the decided discrimination which actually exists against the hog products of the United States imported into these islands as compared with those imported from China and other countries.

In the United States a meat-inspection law is in force, whereas in China, whence the great bulk of hog meat and lard brought into these islands comes, there is absolutely no inspection or sanitary control, so far as is known.

Comparative statistics show that, roughly speaking, for every pound of ham, shoulders, and lard that comes to these islands from the United States 5 pounds are brought here from China.

It is believed that this state of affairs is extremely unfair to the American industry, and it is earnestly recommended that a law be passed covering a thorough sanitary inspection of all hog products imported into these islands which do not have a satisfactory inspection certificate similar to those issued in the United States.

This inspection could well be made before the products are permitted to enter consumption, but it should be conducted purely as a sanitary measure, by the bureau regularly in charge of such work and not by or under the jurisdiction of the customs service.

Although it may not be deemed advisable to have a "reciprocity treaty" cover United States products coming into these islands, it would seem that mere justice demands that all American goods should be at least on an equally favorable basis with those of other countries.

GOVERNMENT CONTROL OF DISCHARGING ("ARRASTRE") PLANT AT MANILA.

In the last report of this office, under the caption "Government unloading and warehousing of imported goods at Manila," a brief statement was made of the conditions leading up to the determination of the government to purchase and operate the discharging or "arrastre" plant at the Manila custom-house.

Pursuant to that determination, on September 23, 1903, the Philippine Commission appropriated the sum of ₱39,000 for the purchase of the plant and for commencing the operation thereof. On October 16, 1903, this office assumed actual control of the plant, it having already issued a full set of regulations in Manila custom-house General Order, No. 48, published October 12, 1903, and contained in Appendix H of last year's report of this office.

As was also stated in that report, the "running check" which had been in operation for the discharge of many general cargoes arriving in Manila prior to that date, had almost entirely removed the bad conditions which formerly existed at Manila in regard to delays, expense, and difficulty in the unloading of imported merchandise from vessels arriving here.

As a result of the operation of the "arrastre" plant by the government during the past year, it may now be said with equal truth that the bad conditions which formerly existed here in regard to the discharge of lighters, the handling of goods between the wharves and the warehouses, the storage of the goods in the warehouses, and the delivery of same to importers in this city have likewise disappeared.

On taking over the operation of the "arrastre" plant this office fixed a tentative charge to the public for the work equal to that ostensibly charged by the private company formerly operating the plant, but in reality not only was the real proportionate charge collected by that private company for the "arrastre" work actually lowered by a considerable amount, but the public has been given a far superior service in every way, resulting in a saving to the importers of this city of not less than ₱108,000 per year. A conservative estimate shows that the "pasé" charge exacted by the former company amounted to about ₱37,000; that the direct amount saved by the lowering of the wharf delivery rate, on the basis of the present business, amounts to ₱8,300; that the amount saved importers through the present system of wharf deliveries, handling, opening, and packing of sample cases of merchandise, all of which is done by the arrastre division without additional charge, has resulted in a saving of some ₱41,000 per year. Furthermore, on July 1, 1904, this office, by Manila Custom-house General Order, No. 77, reduced the then existing rate of ₱1.50 per ton for warehouse deliveries of merchandise to ₱1.25, a decrease of over 16 per cent, and from ₱1 per ton to ₱0.90 per ton for wharf deliveries of merchandise, resulting in a further actual saving to the importers of this city of ₱22,300 per year.

In addition to the above there have been many indirect savings to the importers and the general public which can not be accurately estimated, due to improved methods of business, the great increase in the amount of goods given wharf delivery, saving various rehandlings thereby, in the abolishment of all discrimination in regard to

the discharge of lighters, cascoes, etc., at the custom-house wharf, and a great saving in the demurrage formerly charged on the lighters and cascoes, which often amounted to more than the actual lighterage bills themselves. It has been estimated that before the government began to operate the "arrastre" plant, lighters and cascoes consumed from three to five days on an average in discharging their goods at the custom-house wharf. Under the present management the average time for the discharge of a lighter is one and a half days.

In spite of the above savings to the public and the immensely superior service which has been given during the past year by the government, the surplus collections, after paying all current expenses, due to the excellent management of the chief of the arrastre division, has been sufficient to reimburse the insular treasury for the entire amount of ₱36,368.39 originally appropriated by the Philippine Commission for the purchase of the plant and commencement of the work thereon. This refundment has been made in less than one year from the date of the appropriation by the government for the purchase of this plant, and in less than eleven months from the date when this office actually commenced the operation of the plant.

Such surplus as may accrue within the next year will, in all probability, be expended for the acquisition of one or two additional high-power, quick-moving cranes and for the gradual replacement of worn-out cars and other equipment.

Attention is invited to the statement made in the first and second annual reports of the honorable secretary of finance and justice as to the conditions formerly existing in regard to the discharge and handling of imported merchandise at Manila.

Great credit is due Mr. Clifford D. Ham, the deputy surveyor of customs in charge of the arrastre plant, who, under the general supervision of the insular surveyor of customs, has had entire charge of this most important work. Attention is invited to his very complete report, which is hereto attached marked "Appendix G."

FISCAL RECORD.

It is considered to be a matter of note that despite the peculiar conditions which have existed in these islands, in the combined collection and disbursement of nearly 50,000,000 pesos by customs officers during the past three years, not one cent has been lost through absconding or defaulting officers.

There have been but two cases of misappropriation of public funds, one of a minor character, and in each instance the offender was promptly detected, prosecuted, and sentenced, and restitution secured of the misappropriated funds.

Former Deputy Collector Stuart, of the port of Iloilo, disappeared on February 22, 1902, taking with him certain retained papers in regard to his disbursing accounts. A special agent of this office was promptly sent to investigate the case, in company with an agent of the auditor's office. These officers reported that Stuart could be prosecuted on several charges, principally for the falsification of public documents. This office promptly took steps to locate Stuart, who was last heard of in Baton Rouge, La., and to secure his extradition.

As a result of this course the civil governor of the Philippine

Islands made requisition for Stuart on the governors of Texas, New Mexico, Arizona, California, and Louisiana.

He was captured in San Antonio, Tex., in June of this year by a United States secret service agent. He was returned to these islands in custody and sent to Iloilo, where his trial for falsification of public documents—one of the counts against him—has just been concluded. No decision has yet been rendered.

In the trial it developed on his own testimony that Stuart was an ex-convict, he having served a term in California for embezzlement. Prior to his last arrest he had again enlisted in the United States Army.

Evidence tends to show that Stuart also misappropriated a small amount in connection with his disbursing accounts, which loss, however, if proved, is amply secured by his official bond.

PROPORTION OF FILIPINO EMPLOYEES.

Pursuant to the policy of employing Filipinos as far as practicable in the different branches of work belonging to this bureau, the following table, showing the port of Manila by fiscal years from the date of American occupation, is of interest:

Fiscal year ending June 30--	Classified.						Total employees.	
	Salaries, over \$1,200.		Salaries, \$1,200 and under.		Total.		Unclassified (Filipino).	
	Ameri-can.	Fili-pino.	Ameri-can.	Fili-pino.	Ameri-can.	Fili-pino.		
1899.....	4		16	48	20	48		48
1900.....	8		45	92	53	92		92
1901.....	21	1	94	186	115	187	74	261
1902.....	48	2	120	204	168	206	111	317
1903.....	68	2	132	200	200	222	98	320
1904.....	75	2	144	216	219	218	173	391

As will be seen from the above, in the fiscal year 1904 there were 219 American employees and 218 Filipinos belonging to the classified civil service. There were also 173 Filipinos belonging to the unclassified service.

Of the total employees at this port, therefore, in the fiscal year 1904, 219 were Americans and 391 were Filipinos.

CONCLUSION.

As most of the recommendations for legislation or provisions for the betterment of the service are made at the time when the questions to which they pertain arise, it has been considered unnecessary to include or repeat in this report any but the most important matters which require attention.

Respectfully submitted.

W. MORGAN SHUSTER,

Collector of Customs for the Philippine Islands.

Hon. HENRY C. IDE,

Secretary of Finance and Justice,

Philippine Commission, Manila.

APPENDIX A.

**COMPARATIVE STATISTICAL SUMMARIES PREPARED FOR USE IN THE THIRD
SPECIAL REPORT OF THE COLLECTOR OF CUSTOMS FOR THE PHILIPPINE
ISLANDS FOR THE FISCAL YEAR 1904 AND PREVIOUS PERIODS.**

MANILA, *September 1, 1904.*

SIR: In compliance with your instructions, I have the honor to submit herewith a series of comparative statistical summaries showing customs transactions in the Philippine Islands during the period of American occupation—August 20, 1898, to June 30, 1904.

The statistical tables cover receipts and expenditures, imports and exports, navigation, emigration, immigration, and coastwise trade, with explanatory notes of the various tables.

Respectfully,

SETH. P. MOBLEY,
Chief, Consular and Statistical Division.

The COLLECTOR OF CUSTOMS FOR THE PHILIPPINE ISLANDS, *Manila.*

Customs receipts and expenditures by ports for the fiscal years 1899 to 1904.

NOTE.—The foregoing table of imports into the port of Manila during the three fiscal years ending June 30, 1902-1904, showing values and duties by countries, is a summary of monthly reports on Form 3, division of customs and insular affairs.

The summary does not include merchandise imported free of duty by the United States Government or for the use of any of the branches of the insular government. Other duty-free merchandise is included, also gold, silver, and paper currency, shown in detail in a table following, under the head of "Imports by articles."

In all tables showing import values and duties fractions of dollars are omitted.

In the value of imports the United States, as compared with the previous year, rises from fourth to second place, French East Indies taking first place on account of the extensive imports of rice therefrom, and England dropping from first place in 1902 to third place in 1904, and the Chinese Empire dropping from third place in 1903 to fourth place in 1904.

Comparative summary of imports into the Philippine Islands, by countries, during the three fiscal years ending June 30, 1904.

NOTE.—The foregoing table, showing value of merchandise imported into the Philippine Islands during the three fiscal years 1902, 1903, and 1904, together with the duties collected thereon, is a summary of monthly reports on Form 3, division of customs and insular affairs for all entry ports in the Philippine Islands, in which fractions of dollars are omitted for each item imported from each of the forty-two countries from which imports are shown.

The values include free-of-duty merchandise and gold, silver, and paper currency, but do not include United States Government nor insular government free entries, which are reported on a separate form.

In the imports for the Philippine Islands the countries hold about the same relative positions as in the table of imports for the port of Manila, East Indies (French) first, United States second, England third, and Chinese Empire fourth place. In 1902 Hongkong held first position on account of the extraordinary imports of silver coin from said port in that year.

Value of merchandise (currency included) entered free of duty during the three fiscal years ending June 30, 1904, by ports.

[Represented in United States currency.]

NOTE.—The foregoing tables do not include merchandise imported free of duty by the United States or insular governments for the use of the Army, Navy, and various branches of the insular government.

A marked decrease in the importation of duty-free merchandise during the fiscal year 1904, compared with previous years, is attributable mainly to the great falling off in importations of Mexican currency. The above shows that the merchandise admitted duty free comes chiefly from the Chinese Empire, the United States, Hongkong, Mexico, and Japan, in the order named. From the Chinese Empire the duty-free imports are chiefly Mexican coin, fresh meat, vegetables, fresh fruit, and produce; from Hongkong, chiefly Mexican coin, vessels, fresh meat, fresh fruit, and vegetables; from Australia, chiefly fresh meat and vegetables; from Mexico, exclusively Mexican silver dollars; from Japan, vegetables, fresh fruit, and produce; and from the United States, United States currency, vegetables, fresh meat, fresh fruit, books, maps, etc.

IMPORTS BY ARTICLES.

The following table, showing the imports into the Philippine Islands by articles by fiscal years during the period of American occupation, affords opportunity for comparison of all articles imported in accordance with the prescribed schedule for the period of six years. The table shows both values and duties in a way to make comparison easy.

For the purpose of facilitating the analysis of the table, the totals of the more important groups are given and each class of articles can be readily compared.

Rice imports.—The leading article of import is rice, the importation of which has shown a steady and remarkable increase year by year since the date of American occupation. The importation during the fiscal year 1899 reached a value of only \$1,938,932; the next year it reached \$3,186,198; in 1901 it reached \$5,490,958; in 1902, \$6,578,481; in 1903, \$10,061,323, and in 1904 it reached the limit of \$11,548,814 (not including the quantity imported free of duty by the United States and insular governments), an amount not only greater than any other article, but greater than any other group of articles, including manufactures of cotton.

This drain upon the resources of the islands for a necessary article of food which in former years was produced not only in quantities sufficient for home consumption, but in considerable quantities for export, must, if the increase of the import be maintained, have a telling effect upon the prosperity of the Philippine Islands.

The aggregate value of rice imported during the period of six fiscal years reached the sum of \$38,804,706 United States currency, not including the value of rice imported free of duty by the government, the said figures representing only the invoice value of the rice in the country from which imported, not taking into account duty, freight, and other expenses incidental to placing it upon the market here. In 1904 the aggregate quantity of rice imported duty free by the government was 7,798,809 pounds.

Cotton manufactures.—Manufactures of cotton stand next in importance to rice, showing a value of \$4,962,354 during the fiscal year 1904 as against \$6,284,370 during the previous fiscal year, a decline of \$1,322,016.

The aggregate value of cotton manufactures imported during the past six years was \$36,384,957, the highest point, \$9,441,047, being reached in the fiscal year 1901, that being almost twice the value imported in the year 1904, which, with the single exception of the fiscal year 1899, is the lowest during American occupation.

Breadstuffs.—The total of breadstuffs imported during the fiscal year 1904 reached \$1,096,332, that being less than one-tenth of the value of rice imported during the same period. Wheat flour imported in 1904 shows a value of only \$842,908, and yet that was the greatest amount imported in any one year, flour having shown a gradual increase year by year. The importation of rice and flour in 1904 was about thirteen to one, whereas in the year 1899 the importation of rice was but a little more than four times the value of flour imported.

Opium importation.—The importation of opium has shown considerable increase during the period of American occupation, the greatest value, \$819,020, being reached during the fiscal year 1902, just prior to the taking effect of the increased tariff on opium. During the past six years the aggregate value of opium imported amounted to \$3,662,059, the said value being \$195,407 greater than the value of flour imported during the same period.

The importation of manufactures of hemp, flax, etc., has been fairly uniform in value during the six years, the greatest value being reached in 1902, there being a gradual falling off since that year.

Hardware.—The importation of hardware increased to a considerable extent from year to year, the value of 1904 being about three times that of 1900. There was also a considerable increase in the importation of machinery of various kinds and in manufactures of iron and steel, the aggregate of which reached the sum of \$2,412,936 in the year 1904, that being the greatest value imported in any one year.

Lard.—The importation of lard has increased from \$15,635 in 1899 to \$262,140 in 1904, the increase having been marked each year.

Beer.—The importation of beer in bottles has fallen off from \$1,030,698 in 1901, the highest limit reached, to \$269,697 in 1904, this being but little more than one-fourth of the 1901 figure.

Wine and spirits.—The importation of distilled liquors has varied but little from year to year, much less than has malt liquors. The highest point was \$411,859 in 1901. Since 1901 there has been a gradual decline until the value reached \$227,578 in 1904, that being the lowest point since 1900. In the importation of wines there has been a gradual decline from \$490,561 in 1899 to \$266,663 in 1904. The total importation of wines, malt liquors, and spirits in 1904 was of the aggregate value of \$804,652, and for the first time during American occupation the aggregate value of liquors imported falls below the value of flour imported, which for said year was \$842,908.

Live animals.—The total value of live animals imported in 1904 was \$918,864, that being the greatest value imported in any one year since the American Government assumed control.

Coal.—In the reports of earlier years the importation of considerable anthracite coal was shown, but as a rule that was the result of improper statistical classification, as very little, if any, anthracite coal is used or has been imported into the Philippine Islands; hence

nearly all of the coal imported, if properly credited, should be placed under the head of bituminous. There were other errors in statistical classification in the earlier part of American occupation.

Since October 1, 1903, merchandise imported by and for the use of the insular government has been included in the regular reports on Form 3, and thus forms a part of the total value of merchandise imported during the fiscal year 1904, as shown in this summary, whereas prior to that date merchandise imported by the government was excluded from said reports, being taken up on separate reports with importations duty free for the United States Government. The value of merchandise imported by the insular government since October 1, 1903, to the close of the fiscal year 1904 was as follows, the duties collected thereon being separately reported elsewhere:

October, 1903. (No value given.)	
November, 1903.....	\$27, 427
December, 1903.....	23, 674
January, 1904.....	19, 313

March, 1904.....	123, 684
April, 1904.....	158, 486
May, 1904.....	38, 057
June, 1904.....	150, 947
Total.....	542, 488

MEXICAN CURRENCY.

The silver currency imported and exported, and the consideration of the effect thereof upon trade, has been the cause of deepest concern to all who were interested in the present and future of the Philippines. It can be safely asserted that no other one agency exerted so much influence toward discouragement of permanent investment in the Philippine Islands as that of the unstable currency. Until the time of the recent substitution of the Philippine peso as a measure of value, the Mexican silver dollar was the coin in general use and the unit measure of value in all business transactions, and as it had in itself no established or fixed value, frequently rising or falling as much as 10 per cent from morning to night, it is not difficult to see that the effect must prove disastrous to permanent business investments and detrimental to the prosperity of the islands. In the early part of American occupation the Mexican silver coin was in general use at a ratio of 2 pesos for \$1 of United States currency, at times falling slightly below and for a short time rising slightly above that point. During the Boxer troubles in China there was an unusual demand for Mexican coin, followed by an unusually heavy exportation thereof to Hongkong, and it was during this period that it was deemed necessary to place an export duty on this silver coin, which was done to check its exportation from the islands, but immediately following the Boxer disturbances in China there came about such a fluctuation in the value of Mexican coin as shattered all business calculations. The Chinese Government required gold-basis currency to settle indemnity obligations and came to this market with its Mexican silver to purchase the United States currency, which found its way here in large quantities through payments to army and navy officers and men and other United States obligations.

The importation of Mexican silver to be used for this purpose reached about \$20,000,000 Mexican in the fiscal year 1902, and the price paid for United States currency varied from \$2 to \$2.70 for \$1 United States currency during the year. The insular government from time to time sought to secure some semblance of stability in the currency by fixing the rate at which it should be received for government exactions, and under ordinary conditions that would have been sufficient and effective, but not so here, the street value being sometimes below and sometimes considerably above the established government rate. When the street rate was higher than the government rate for Mexican silver all duties would be paid in United States currency, and when the reverse was true all duties would be paid in Mexican silver, and cart loads of it would be sent to the treasury daily. During the fiscal year 1902 the volume of Mexican silver became so great in Manila that the banks gave notice that they would no longer receive it on deposit from their customers, and for a time it was necessary to store the same under counters and in out-of-the-way places in boxes and sacks about the business houses much in the same manner as a merchant would store salt or nails. It can well be imagined that such a condition was not conducive to a healthy commercial system, but on the contrary was extremely demoralizing, in that it placed all business ventures upon a gambling basis.

Happily that condition of affairs has terminated in the driving out of the unstable currency and the substitution thereof of the insular currency with a stable and fixed value on a

gold basis, giving assurance to business men that there will be no depreciation of 10 per cent in their capital in a night while they sleep. No similar financial condition has even been witnessed in the United States since the era of the "wildcat" banks in the fifties and the era of the greenback during the civil war, which rose and fell, measured by gold, in accordance with the tenor of the news of the result of important battles. The people who have never passed through similar experiences can scarcely realize the dire effect of such a demoralizing agency. While the government rate for Mexican silver could be changed once in ten days, the street rate could be changed at any moment upon receipt of a cablegram from Hongkong, or at the will of the money changers, and the rate frequently changed two or three times during the day. No ordinary article of commerce, measured by gold, fluctuated to anything like the extent that the Mexican money did. With the exception of rice, most articles of importation were purchased in gold-basis countries, to be paid for in gold or its equivalent, whereas the selling price was invariably in Mexican currency, making it necessary, on account of currency conditions existing here, to change prices almost daily or sell at a loss or exact exorbitant profits, according to the tenor of the fluctuation of the value of the coin in general use here. An article which could be sold at \$2.10 to-day with a reasonable margin of profit would be sold at a loss if sold at that figure to-morrow, and in the very nature of things business men were driven to fix their prices in gold and then accept the local currency at the market price of to-day, and then with no assurance that that currency would not greatly depreciate before to-morrow if not disposed of to-day. With such a financial condition existing for three years, it is a wonder that the influence was not absolutely ruinous to legitimate trade and investments in enterprises of any great magnitude, and it is a source of gratification to all that the financial skies are clearing through the departure of that chief source of disturbance, the Mexican dollar.

EXPORTS AND IMPORTS.

During the period of American occupation the imports into the Philippine Islands, exclusive of the item of currency, have exceeded the exports to the amount of \$16,618,294, thus showing that the islands have been drained to that extent, and in addition the expense of freight and other charges incident to landing the articles imported into the Philippine Islands, as, except the original selling price, the people of the islands receive nothing for the articles of manufacture and produce exported. This drain upon the resources of the islands has, however, been more than compensated by large quantities of money brought in and paid to United States Government troops and expended here, said amount having in fact been much larger than the drain by reason of excess of imports over exports.

Imports, by articles, during period of American occupation, by fiscal years.

Total value of exports, August, 1898, to June 30, 1904.....	168,103,594

Excess of imports over exports..... 11,928,348

NOTE.—The foregoing table, showing, by ports, the value of commodities imported into and exported from the Philippine Islands, by fiscal years, during the period of American occupation, is a summary of monthly reports on Forms 3 and 4, division of customs and insular affairs, fractions of dollars and Government free entry merchandise not included.

The table illustrates the growth of trade and shows the relative proportion of exports to imports.

In order that the table shall not be in a measure misleading, the fact that it includes currency imported and exported must be taken into account. Imports and exports of Mexican currency fluctuated between greater extremes than any other article of merchandise imported or exported, as will be seen by reference to the tables showing imports and exports by articles, and the fluctuation of the total value of exports and imports is chiefly accounted for by this article, which went and came at the money changers' caprice.

To illustrate: The following table shows the value of imports and exports by fiscal years for the period of American occupation, with currency imports and exports excluded:

Export and import values (currency excluded).

	1899.	1900.	1901.	1902.	1903.	1904.

NOTE.—The above table is a summary of monthly reports of exports from the port of Manila, P. I., on Form 4, showing value and duties, by countries, for the fiscal years 1902, 1903, and 1904.

In all export reports fractions of dollars are omitted from the value and duties on each article exported.

Harbor-improvement taxes are included in the item of duties on this report, and on said account the amount of export duties will not agree with that shown in the financial report, which is a summary of monthly reports on Form 1, in which fractions of dollars are entered and harbor-improvement tax separately reported.

Comparative summary of exports from the Philippine Islands during the three fiscal years ending June 30, 1904.

NOTE.—As in the summary of the preceding page, fractions of dollars are omitted in the making up of this export summary, and harbor-improvement tax is included in the statement of duties collected.

EXPORTS BY COUNTRIES.

The foregoing table illustrates the exports by countries from all ports in the Philippine Islands, giving the value and duty collected for each country.

In the value of exports the United States still holds the lead, the value of commodities exported to the United States exceeding the value of the exports to England in the amount of \$849,245. In the year 1903 the United States led England \$5,063,730.

Articles of the growth and produce of the Philippine Islands were exported to forty-five different countries during the fiscal year 1904, but the two countries (United States and England) received a value of \$21,356,475, leaving \$15,676,700 distributed between the forty-three other countries, Hongkong standing in third place and France in fourth. Hemp was the chief article exported to the United States and England. The chief exports to Hongkong comprised shipments of silver coin, United States bank notes, and sugar. The exports to France were chiefly copra and ilang-ilang oil, in the order named.

The total value of exports for the year 1904 shows a falling off from \$39,674,318 in 1903 to \$37,033,185.

Exports from the Philippine Islands during six fiscal years ending June 30, 1904, by articles.

SHIPPING INTERESTS.

As the shipping interests vitally concern the present and future prosperity of the Philippine Islands, the subject has been much more comprehensively treated than heretofore, in the series of tables following, which show in detail the shipping transactions, both coastwise and foreign. The first table shows the number of coastwise and foreign vessels entered and cleared, by ports and fiscal years, during the entire period of American occupation, giving also the tonnage of each class for each year.

Another table shows, by nationality, the vessels doing the carrying trade for six fiscal years ending June 30, 1904, which table will prove of value to shipping interests. There is also an alphabetical list of all vessels entering the port of Manila during the past fiscal year, showing flag and tonnage of each vessel, and a table showing the number of vessels licensed for coastwise trade, giving class of license and tonnage, by years, from January 1, 1900, when the first license was issued, to June 30, 1904; also the number of certificates of protection issued at the various ports to vessels engaged in the coastwise trade during the same period of time.

There is also an alphabetical list of all vessels to which official numbers and signal letters have been given during the past fiscal year, giving the official number, the signal letters, rig, and home port of each.

There is also for the first time, a table showing the shipments and receipts of commodities at all entry ports on coastwise vessels for the first six months of the year 1904, which will not be without interest to local shipping firms. Then follows an alphabetical list of all coastwise vessels to which official numbers have been given up to July 31, 1904, giving rig, tonnage, home port, etc., of each.

Vessels entered and cleared at all entry ports in the Philippine Islands during period of American occupation, with tonnage of same by fiscal years ending June 30, 1899-1904.

Nearly all of the rice received at the port of Manila from coastwise ports was unhusked rice, better known as palay, and chiefly used for horse feed. The rice shipped from the port of Manila, and shipped from and received at all other entry ports, was almost exclusively merchantable husked rice.

The number of ports to which Manila made coastwise shipments was 133, Cebu 153, Iloilo 119, Jolo 13, Zamboanga 17, Puerto Princesa 5, Cape Melville 2, Balabac 1.

The number of coastwise ports from which Manila received shipments was 136, Cebu 90, Iloilo 106, Jolo 8, Zamboanga 18, Bongao 1, Balabac 2.

Receipts and shipments by railroad are not included.

IMMIGRATION AND EMIGRATION.

The tables following illustrate the immigration to the Philippine Islands from January, 1900, when the customs bureau took over from the captain of the port the immigration branch of the service, to June 30, 1904. Reliable data for previous period in regard to immigration are not available. The tables show the various nationalities arriving, and for the first six months of the year 1904 they show, by nationality, the passengers departing for foreign ports. The records are incomplete as to passengers departing on United States army transports, and for the earliest periods also incomplete as to passengers arriving on United States army transports. During the period of American occupation there appears to have been a gain of 8,624 in Chinese population in the Philippine Islands by reason of excess of arrivals over departures. Many Chinese left the Philippine Islands during the insurrection troubles, returning when serious local disturbances terminated. The work of registering Chinese has shown their actual number to be only about one-half the early estimates thereof, which were placed at 100,000, whereas the number actually registered to September 1, 1904, was only 50,313, and the registration is as thorough and complete as is possible.

Statement of Chinese immigrants arrived at and departed from the port of Manila during the period from January 1, 1899, to June 30, 1904, by calendar years.

Year.	Arrived.	Departed.

APPENDIX C-1.

OFFICIAL NUMBERS AND SIGNAL LETTERS OF COASTWISE VESSELS.

The work of assigning official numbers to vessels of over 5 tons capacity began January 2, 1904. During the six months to June 30, 1904, official numbers were assigned to 2,548 vessels and official numbers and signal letters were assigned to 325 vessels, including nearly all of the larger vessels engaged in general coastwise trade in the Philippine Islands.

The list thereof is as follows:

Coastwise vessels having official numbers and signal letters.

Vessel.	Rig.	Ton- nage.	Official num- ber.	Signal letters.	Home port.
Abeja.....	Sail.....	45.97	170309	M. B. J. P.	Iloilo.

APPENDIX D.

PUBLISHING PARTS OF THE INTERNAL-REVENUE LAW OF 1904, WITH TEMPORARY RULES FOR THE COLLECTION OF THE TAX ON IMPORTED MATCHES, AND DESIGNATING CERTAIN CUSTOMS OFFICERS AS INTERNAL-REVENUE COLLECTORS FOR THAT PURPOSE.

OFFICE OF THE COLLECTOR OF CUSTOMS
FOR THE PHILIPPINE ISLANDS,
Manila, August 5, 1904.

CUSTOMS ADMINISTRATIVE CIRCULAR NO. 334.

To all Collectors of Customs:

PARAGRAPH I. The following letter from the insular collector of internal revenue is published for the information and guidance of all concerned:

"AUGUST 1, 1904.

"MR. W. MORGAN SHUSTER,

Collector of Customs for the Philippine Islands, Manila, P. I.

"SIR: Under the provisions of the internal-revenue law of 1904 all matches imported into the Philippine Islands are made subject to the same internal-revenue tax as is imposed on matches of domestic manufacture, and in accordance with the provisions of sections 108 and 109 of the internal-revenue law I would respectfully ask that the taxes imposed in said law be collected by such officers as you may designate in the various ports of entry.

"By the provisions of section 152 of the internal-revenue law the collector of the internal revenue is authorized to make temporary regulations for the collection of the taxes pending the preparation of the invoice books and revenue stamps. In accordance with said provision of law this office has issued a circular to all internal-revenue officers, and I have the honor of sending you herewith a dozen copies of said circular in English, and the same number in Spanish, together with an equal number of copies of the internal-revenue law in both languages.

"The tax should be collected on all matches imported into the Philippine Islands on and after August 1, 1904, and the tax should be paid before the removal of the matches from the customs-house of the port of entry. Matches arriving at any port of entry before August 1, 1904, should not be taxed, even if they are not removed until after that date.

"The internal-revenue stamps will be ready for distribution some time this month, and instructions will then be issued for the affixture and cancellation of a sufficient amount of such stamps on official invoices in payment of the taxes collected up to the time of such issue.

"Very respectfully,

"JNO. S. HORD,

"Collector of Internal Revenue."

PAR. II. The sections of act No. 1189 (The internal-revenue law of nineteen hundred and four), referred to in Paragraph I, are as follows:

"SEC. 108. On all matches, whether safety, sulphur, or friction matches or fusees, of whatever material made or by whatever name known, which are manufactured or partially manufactured in the Philippine Islands, or which are imported from other countries for domestic sale or consumption, there shall be levied and collected a tax of forty centavos on each gross of boxes containing not more than one hundred and twenty sticks to the box; and there shall be levied and collected on each gross of boxes containing over one hundred and twenty sticks to the box a proportionate additional tax.

"SEC. 109. The taxes imposed in this article on matches imported from other countries for domestic sale or consumption in the Philippine Islands shall be collected and the proceeds thereof accounted for by such customs employee or employees as may be designated in the various ports by the collector of customs, and under such rules and regulations as may be prescribed by the collector of internal revenue. The proceeds of such taxes shall be accounted for as internal revenue, and not as customs receipts.

"SEC. 152. Until the collector of internal revenue shall have the proper books, stamps, and forms ready for distribution, the methods provided for the administration of this act shall not be required; and he is empowered to make such temporary regulations and arrangements for the collection of the taxes imposed by this act as will not unduly embarrass or interrupt the business of the persons affected thereby."

PAR. III. The following extracts from the circular of instructions referred to in paragraph 1 (Internal Revenue Circular No. 1) are also published:

"9. (a) The taxes on matches will be assessed on the number of gross manufactured in the Philippine Islands and removed for domestic sale or consumption, using as a basis the average number of individual matches in each box; thus, any number of sticks up to and including one hundred and twenty to a box will be assessed at forty centavos per gross of boxes; one hundred and twenty-one sticks to a box will be assessed at forty and one-third centavos per gross of boxes; one hundred and twenty-three sticks to a box will be assessed at forty-one centavos per gross of boxes; two hundred and forty sticks to a box will be assessed at eighty centavos per gross of boxes.

"(b) Matches imported from other countries for domestic sale or consumption in the Philippine Islands are, under the provisions of sections one hundred and eight and one hundred and nine, made subject to the same taxes as are imposed on matches manufactured in the Philippine Islands for domestic sale or consumption. The taxes on imported matches will be assessed and collected by customs officers, to be designated by the collector of customs for the Philippine Islands. The assessment of this tax will be made in the manner provided in subdivision (a) of this paragraph for the assessment of taxes on matches manufactured in the Philippine Islands, and the taxes on imported matches will be paid before they are delivered to the importer or removed from the customs warehouse."

PAR. IV. Collectors of customs at the ports of entry in these islands are hereby severally designated to act as internal-revenue agents for the collection of internal-revenue taxes on matches imported from foreign countries at their respective ports. At ports having bonded cashiers the actual receipt of internal-revenue taxes on matches shall be in the hands of such cashiers, under the supervision of the collector of customs.

PAR. V. Collections at Manila shall be made under the supervision of the insular special deputy collector of customs.

PAR. VI. As will be noted, the permanent mode of collecting the tax will be by means of an invoice made out by the importer and bearing the requisite amount of stamps. When stamps are available full detailed instructions for their use will be promulgated, pending which date the following temporary rule shall be observed:

PAR. VII. Importers of matches shall present with each customs entry therefor a separate additional statement, in *triplicate*, showing the number of boxes imported, the brand, country of origin, name of importing vessel, and average number of sticks per box. This statement shall be prepared and signed by the importer, and be given a serial number and verified by the appraiser of the port. The verified statement shall be the basis of the assessment of internal-revenue taxes by the liquidating officer.

PAR. VIII. This statement shall be substantially in the following form:

SERIAL NO.

INTERNAL REVENUE STATEMENT.

MATCHES.

The undersigned has imported at the port of.....
the goods described below, upon the S. S., Reg. No.
arriving..... from....., country of origin of the
goods being....., the same being entered (or withdrawn) for con-
sumption on Consumption Entry No., herewith.

Marks.	Number of cases.	Amount and brand.	Gross of boxes.	Average sticks per box.	Rate.	Amount.

Total tax.

The above is in all respects a true and accurate account of said importation, to the best of my knowl-
edge and belief.

Verified and found correct except as follows:

Importer.

Approved:

Examiner.

Liquidated and found correct:

Appraiser.

Received from importer the sum of.....

Liquidator.

in full of the above internal-revenue taxes, this..... day of....., 1904.

Customs Cashier (or Collector).

A duplicate copy of this form, when completed, shall, in every instance, be returned to the importer
as a receipt, and no other receipts for internal-revenue taxes shall be given. The remaining two copies
shall be held by the collecting officer.

PAR. IX. All receipts of money on accounts of internal revenue shall be held as special
deposits in the hands of the receiving officers above designated, and shall not be deposited to
the account of customs funds.

PAR. X. Any importer who is dissatisfied on account of internal-revenue taxes may pay
the same under protest and within ten days thereafter appeal to the collector of internal
revenue. In such cases collectors of customs shall not decide the case, but shall forward the
appeal, together with a detailed statement of the facts in the case, to the insular collector of
internal revenue, through the office of the insular collector of customs. If in one protest
the importers should seek to question both the internal-revenue taxes and the customs
duties, the collector shall: (1) If protest is received within the time for customs protests,
immediately require the importer to make a new appeal on the question of internal-revenue
taxes, to be forwarded as above directed: (2) if the protest is received too late to be con-
sidered as a customs protest, it shall be forwarded as an internal-revenue appeal, and the
importer notified of the action taken and the reason therefor. All statements of facts for-
warded by collectors shall clearly indicate the date on which the internal-revenue payment
was made and the date the appeal was received, and in addition the appeal itself shall be
stamped or marked with the date of its receipt. Payment of the amounts found due by a
collector of customs, acting as an internal-revenue agent, is an absolute prerequisite to the
possession of the goods and the right to appeal.

PAR. XI. No internal-revenue taxes shall be assessed on goods entered for warehouse
unless and until they are withdrawn therefrom for consumption in these islands.

PAR. XII. Philippine customs officers shall give due publicity to the terms of this circular.

W. MORGAN SHUSTER,

Collector of Customs for the Philippine Islands.

APPENDIX E.

REGULATIONS FOR THE DIVISION OF SPECIAL AGENTS OF THE PHILIPPINE CUSTOMS SERVICE.

OFFICE OF THE COLLECTOR OF CUSTOMS
FOR THE PHILIPPINE ISLANDS,
Manila, September 1, 1903.

MANILA CUSTOM-HOUSE SPECIAL ORDER No. 104.

PARAGRAPH I. Special agents of the Philippine customs service are appointed under law for the purpose of making examinations of the books, papers, and accounts of collectors and other officers of the customs, and are to be employed generally under the direction of the insular collector in the prevention and detection of frauds on the customs revenue as contemplated by section 374 of act No. 355 of the Philippine Commission.

PAR. II. Special agents engaged in the investigation of frauds or attempted frauds upon the government, or misconduct on the part of a customs officer, are empowered to administer oaths to witnesses, and they are authorized to make arrest of persons and searches and seizures of property in the prevention and detection of violation of the revenue and collateral laws.

PAR. III. For purpose of ascertaining whether customs business is properly transacted, and the public moneys duly collected and accounted for, the books, papers, and accounts of collectors and other customs officers within each collection district shall be carefully and thoroughly examined, and the balances of collecting and disbursing officers verified by the special agents assigned by the insular collector of customs for the work, according to the provisions of Executive Orders Nos. 21 and 58, as published in Manila custom-house Special Orders Nos. 85 and 96, and as soon as possible after the close of each fiscal year. Special, detailed, and partial examinations shall be made as often as circumstances may require, and collectors and all other officers of customs shall at all times submit their books, papers, and accounts to the inspection of a duly authorized special agent.

PAR. IV. In order to detect and prevent fraud upon the revenue, special agents shall give careful attention:

- (1) To undervaluation in entries of dutiable goods.
- (2) To false declarations of weights and quantities in entries of dutiable goods.
- (3) To the matter of maintaining uniformity in classifications of identical merchandise at the several ports.
- (4) To the smuggling of valuable merchandise.
- (5) To the warehousing of goods.
- (6) To withdrawals in bond from public stores and bonded warehouses.
- (7) To transportation and exportation of goods in bond.
- (8) To the exportation of dutiable merchandise.
- (9) To the certification of refundable export duties.
- (10) To the matter of drawbacks on coal used on board coastwise steamers.

PAR. V. To detect undervaluations they shall frequently examine the entries and invoices of merchandise that bear an ad valorem rate of duty filed in the custom-house, compare them with the price lists, trade circulars, special reports, and other documentary information in possession of the appraisers, and consult appraisers and reputable importers with respect to grades and actual value.

PAR. VI. In the detection of smuggling they shall frequently visit importing vessels, and note the precautions taken against the fraudulent landing of goods, take notice of the manner in which the duties of boarding inbound vessels by inspectors and patrolling districts by customs cutters are performed, make occasional comparisons between vessels' manifests and entries of goods to see that cargoes are accounted for either by entry or sale as unclaimed, and, in conjunction with the postal authorities, examine into the subject of smuggling through the mail.

PAR. VII. With regard to possible fraud in warehousing of goods they shall inspect the warehouses to see whether they are secure against the secret removal of goods, verify the alleged contents of each warehouse as often as once a year, inform themselves as to habitual or gross cases of excessive sampling of goods, examine the method of removing goods to and from the warehouse, and inquire into all cases of alleged destruction of goods in warehouse by fire or other casualty.

PAR. VIII. With reference to withdrawals of goods in bond, they shall frequently compare the entries and landing certificates, and examine any other documents, or make other proper inquiries that may enable them to determine whether goods withdrawn from bond have or have not gone into consumption without payment of duties.

PAR. IX. In investigating the subject of transporting goods in bond, special agents shall personally see what precautions are actually taken to keep goods from leaving the route at any point between the places of departure and destination, and shall detect, if possible any shortage or change of goods, or tampering of any kind with the packages.

PAR. X. As far as is practicable special agents shall aid the local customs and immigration officers in the proper enforcement of the Chinese-exclusion and other immigration laws, and shall make reports to the insular collector of customs of all cases where, in their opinion, immigrants are admitted to these islands in violation of law.

PAR. XI. Special agents shall not interfere with the regular transaction of the customs business by the local officers, but are expected to cooperate with and supplement the labors and vigilance of such officers. Such frauds, abuses, irregularities, or other defects discovered by special agents as are capable of being dealt with by the local customs officers, or other customs agents, shall be immediately brought to their notice, and their action upon them shall be stated in the reports of special agents to the insular collector of customs.

PAR. XII. Special agents are not permitted to give out for publication any information whatever relating to official business, and this rule shall be strictly observed by all special agents and their subordinates.

PAR. XIII. Each special agent shall render to the supervising special agent on the last day of each month a report in detail of his operations and of the manner he has been employed from day to day during the month. He shall likewise make special reports of all cases and investigations which require action by higher authority. An official station shall be assigned to each agent, at which he shall be employed in the line of his duty when not traveling.

PAR. XIV. Agents shall confine their labors within the limits of the districts to which they are assigned, and shall not go beyond such limit without permission from the supervising special agent, unless in case of emergency, when it would be impracticable to obtain permission. All the facts in such cases shall be duly reported. The whole time of special agents during business hours shall be devoted to public service, and private employment interfering with the constant and faithful performance of official duties shall not be allowed.

PAR. XV. The accounts of special agents shall be rendered monthly under oath, embracing such expenses as are actually and necessarily incurred in the discharge of official duties, stating places visited, dates, and the items of expenditures, with vouchers when practicable. The unnecessary use of the telegraph shall be avoided. Each special agent shall hold a certificate of his appointment for his official use, to be surrendered to the insular collector of customs at the close of his term of office for cancellation, prior to the settlement and payment of his final accounts.

PAR. XVI. The work of the force of special agents shall be under the immediate direction of the supervising special agent, to whom all matters relating to alleged violations of the revenue and collateral laws shall be reported for investigation. Communications to and from special agents shall be transmitted through the office of the supervising special agent, who shall be the medium of conveying to the insular collector of customs information relating to the work being pursued and accomplished by his force, unless it is otherwise directed in special instances.

PAR. XVII. The supervising special agent shall maintain full and complete office records, which shall be confidential and shall contain the necessary data of all cases handled, arrests made, convictions secured, seizures made, value of the same, amounts of lawful duties recovered, and any other pertinent matters arising in his division.

PAR. XVIII. Special agents shall carry with them whenever practicable and especially when engaged in official business their respective commissions and badges for the purpose of showing their authority to act whenever necessary.

PAR. XIX. The attention of special agents is also directed to paragraph 374 of the Philippine customs administrative act, whereby they are required to assist the proper insular authorities in the detection of counterfeit money and in the arrest and prosecution of the guilty parties.

PAR. XX. The supervising special agent is hereby authorized to require any or all agents to submit daily reports to him containing a concise statement of the work accomplished by each special agent during the day and with special reference to any important facts discovered. Unless otherwise directed by the supervising special agent, daily reports thus rendered shall be taken in lieu of the monthly report above mentioned.

PAR. XXI. Special agents away from their permanent offices shall as far as possible keep a complete record by means of a press copy book or otherwise of all communications and reports sent by them through the mail or by other means of communication.

PAR. XXII. In addition to the general investigations and examinations above prescribed, special agents shall comply with the following specific instructions:

1. Ascertain by actual count the money on hand. This must be done immediately upon arrival of the agent at the custom-house or inspector's office.

2. Examine the several accounts of the collector or inspector, making comparison of the register of moneys received from all sources, records of accounts-current, of disbursement of moneys received and deposited, and the certificates of deposits to the credit of the treasurer of the Philippine Islands and those to the credit of the collector or inspector.

3. Examine the business of the collector's or inspector's offices, and in the case of entry ports all its bureaus and divisions, and the official records and correspondence connected therewith.

4. At entry ports examine all records connected with the withdrawal of merchandise, whether for consumption, transportation, or export.

5. Examine all records relating to marine business.

The object of these examinations is to furnish the Department with full information respecting the practical operations of the several custom-houses and inspector's offices. Special agents are particularly enjoined to conduct them in a courteous and gentlemanly manner.

In making their inquiries agents are not confined within the limits of the following interrogatories, but will report any infraction which may be observed by them on the part of customs officers of law or the regulations or instructions of the insular collector of customs.

Agents will conclude their reports with such general or special remarks as may be deemed proper for the information of this office; and, for convenient reference, with a summary of the recommendations, if any are contained in the report, for the correction of irregularities and the improvement of the service.

PAR. XXIII. Answers to questions on the blank form shall not be based upon the unsupported statements of customs officers, but shall be made upon the personal knowledge of the agent as to the condition and methods of business at the port examined.

• ENTRY: COASTWISE.

PORT OF....., 190-.

Report of examination of customs business in the district of.....
by Special Agent..... under instructions of.....

1. Money on hand on the close of business hours on the..... day of.....
as ascertained by actual count, \$.....

NOTE.—If any papers or memoranda are found with the cash on hand purporting to represent money, state the character of such papers or memoranda and the several amounts they represent.

2. Amount on deposit upon same date with an insular depository to the credit of the disbursing officer:

Salaries and wages.
Contingent expenses.
Transportation.
Expenses revenue launches.
Extra services of customs employees.
Salaries of storekeepers of bonded warehouses.
Chinese registration.
Special contingent fund (if any).

NOTE.—The agent shall obtain a report from the insular depository of the amount on deposit to the officer's credit.

3. State the balance on the several accounts as they were reported in the last report made to the auditor for the Philippine Islands and date of said report.

Balance per report dated..... on account of.....

Salaries and wages.
Contingent expenses.
Transportation.
Expenses revenue launches.
Extra services of customs employees.
Salaries of storekeepers of bonded warehouses.
Chinese registration.
Special contingent fund (if any).

4. State amounts received, deposited, and on hand on the several accounts since the date of the last report to the auditor for the Philippine Islands on moneys received from all sources, dated.....

Importation.
Exportation.
Tonnage dues, coastwise.
Tonnage dues, foreign.
Fines, penalties, and forfeitures.
Storage.
Wharfage.
Withdrawals from bonded warehouses of imported merchandise.
Export duties refundable.
Extra services of customs employees.
Salaries of storekeepers of bonded warehouses.
Sale of blank forms.
Sale of roll books.
Special licenses.
Auction sales.
Immigration dues.
Chinese certificates of residence.
Admeasurement fees.
Customs stamps.
Chinese registration fees.
Deposits or guarantees.

5. State the result of the comparison of the cash on hand and on deposit with the balance as shown by records.

	On hand.	On deposit.	Total.
Actual.....	\$.....	\$.....	\$.....
As per records.....	\$.....	\$.....	\$.....

6. How often are reports of transactions and remittances of money collections made by the collector or inspector?

7. Are all collections entered on a register of receipts of money from all sources at the time of their receipt?

8. How often are deposits of money collections made with an insular depository?

9. Are disbursements of public funds invariably made by checks payable to the persons who have actually performed the service, or to whom the money is actually due for material furnished or services performed?

10. Are the money collections ever used for payment of salaries or other expenditures or for the collector's or inspector's private purposes?

11. Are the records of daily balances and the record of disbursements properly kept?

12. Are all duties, fees, and other collections paid at the custom-house or inspector's office and at the time entry is dispatched or the service performed, for which the fee is charged?

13. Are drafts, checks, or other representatives of money ever received as money?

14. Are any of the public moneys ever deposited elsewhere than with an insular depository?

15. Are any of the reports prescribed for accounting for moneys received or disbursed overdue?

16. Upon examination of records of the arrivals and clearances of vessels, the manifests, entries, and the register of moneys received from all sources do you find all collections required by these records properly accounted for?

17. Do you find all merchandise unclaimed or seized, either on hand or accounted for, and have sales of such merchandise been made in proper time and manner and proceeds duly accounted for?

18. Are entries properly made of all goods imported whether free or dutiable when such entries are required by law or regulations, and are the proceedings on entry in accordance with the instructions of the insular collector?

19. At entry ports is full record made of the estimated and liquidated duties in the book provided for that purpose?

20. Are duties collected in all cases before the permit is issued or delivery of the imported merchandise?

21. Are all weighable or gaugable goods properly weighed and gauged and return thereof made without delay by the officer performing that duty; and is his dock book properly made up and filed?

22. If there are custom-house labor rolls, state whether the persons borne upon such rolls are actually employed for the full time charged and state the results of comparisons of the rates paid for temporary labor with the rates paid for similar service in private business.

23. State the number of pieces and total weight of merchandise handled by such laborers during the last fiscal year, and the cost of handling same.

24. Are you satisfied that due diligence is exercised in fixing dutiable values? Can you suggest any improvement in the methods of appraising officers at this port?

25. State the amount of duties, original, increased, or additional, found due on entries remaining unpaid, the respective goods having been delivered to importers, giving the date of the entry, the number of the entry, importer's name, entire amount of duties, and amount due on each entry.

26. Are increased and additional duties found due on liquidated entries collected before delivery of examined packages?

27. Does the record of liquidations show that refunds of excess of deposits are promptly paid after liquidation of entries?

28. Are warehouse accounts promptly opened and kept in accordance with the regulations?

29. Are the withdrawal entries entered on the credit side of these accounts as soon as the entries are made, and at the same time are they recorded on the backs of the bonds as required by the regulations?

30. Are the several daily registers of warehousing (if any), transportation, and exportation entries kept and the entries recorded therein as they are made from day to day?

31. Furnish a list of bonded warehouses in the collection district, the location, class, and general condition, names of storekeepers employed, and the warehouses to which they are assigned.

32. Is the compensation of storekeepers promptly collected each month from the proprietors of the several bonded warehouses as prescribed by the regulations?

33. Does the collector's disbursement account show that the moneys received for storekeepers' service are duly accounted for?

34. Do the storekeepers receive any compensation direct from the proprietors of the bonded warehouses?

35. Are the storekeepers' records properly kept, and how often are returns made to the collector of goods received, permitted, and delivered?

36. Are the salaries of the storekeepers paid to them for their own use and benefit?

37. Are the bonded warehouses, while unlocked, ever left by the storekeepers in charge of anyone other than an officer of the customs?

38. How often is an inventory made of goods in warehouses?

39. Are the storekeepers transferred from one bonded warehouse to another at least once a year?

40. Upon a comparison of the goods in a bonded warehouse with the storekeepers' record and the bonds and records at the custom-house is any discrepancy found to exist?

41. Is the lading of bonded goods for export on board the exporting vessel always done under the actual personal supervision of the officer who makes the certificate of lading?

42. Are all requirements of the regulations with respect to the execution and cancellation of customs bonds duly complied with; and are you satisfied that proper care is exercised in taking bonds as to the sufficiency and legality of the sureties thereon?
43. Is a proper record of registration of all vessels to which special licenses are issued, or from which such are taken up, properly kept and indexed up to date?
44. Are bills of sale, mortgages, and other conveyances promptly entered upon the index and recorded in the register for that purpose?
45. Are the current daily transactions of the custom-house or inspector's office recorded in the several records from day to day as they occur?
46. In what condition do you find the customs building and premises?
47. At entry ports in what condition do you find the weighing, gauging, and other implements required for the customs business?
48. Do the collector or inspector and other principal officers give their attention to the business of their respective offices, and are they in daily attendance at the custom-house or inspector's office during office hours?
49. Give the names of all the employees of the district, their compensation, their character for competency and efficiency, and the nature of the duties performed by each.
50. Are there any persons borne upon the custom-house pay rolls who perform little or no actual service, or who are engaged in private business or have outside personal business interests? If so, give their names.
51. What reduction, if any, can be made in the force as now employed without detriment to the public interests?
52. Considering the character of the work performed by the several employees and their efficiency, is the salary in any instance excessive, and is it in any case more than is usually paid for similar services, or is the salary in any case deficient?
53. Are due precautions taken to prevent the improper landing of excessive sea stores found on board vessels from foreign ports, and are entries of such excessive stores required to be made in accordance with law?
54. Furnish a list of rented buildings occupied for customs purposes in the district, the dates when leases expire, and the rental in each case.
55. Are the buildings so occupied for customs purposes as suitable and convenient as can be obtained at the port, and are the rentals as low as are usually paid for similar buildings for private purposes?
56. Is the custom-house or inspector's office used or occupied for purposes other than the transaction of the public business? If so, state by whom, in what manner, and by what authority it is so used or occupied.
57. At entry ports, when warehoused or unclaimed goods are stored in the custom-house or other public building owned or occupied by the Government, are the full rates of storage customary at the port charged and collected upon such goods before delivery?
58. Has any storage been remitted or condoned by the collector or other customs officer at the port?
59. What is the practice of the collector with regard to the imposition of fines for false declarations of imported merchandise?
60. In what condition are the official records of the port?
61. Do the present records cover fully the period of the United States occupation of the port?
62. Describe in a general way the method of handling imported goods, the checks and inspector's reports which are made, and the record of importation which is kept in the custom-house.
63. Investigate the condition and records of all accountable property.
64. Investigate the issuance of Government coal to Government vessels by customs officers in charge of coal piles.
65. Report on the method of issuance of coastwise licenses and the prompt remittance of fees therefor.
66. Special agents shall cause collecting officers to invoice and remit to the insular treasurer, in the presence of the special agent, all funds on hand at the port arising from customs collections immediately after the same have been counted by the special agent.

PAR XXIV. Special agents shall also report to the supervising special agent any other matters pertaining to the conduct of the public business of the port which they may deem advisable.

PAR XXV. Copies of Manila custom-house special order No. 104 shall be furnished to the following officers of the Manila custom-house:

The insular deputy collector of customs, the insular surveyor of customs, the supervising special agent, all other special agents, and the chief of secret agents.

W. MORGAN SHUSTER,
Collector of Customs for the Philippine Islands.

APPENDIX F.

SPECIAL REPORT OF THE INSULAR COLLECTOR OF CUSTOMS ON THE REGISTRATION OF CHINESE PERSONS IN THE PHILIPPINE ISLANDS.

SIR: Herewith I submit a detailed report on the registration of Chinese persons in the Philippine Islands.

This registration was directed by section 4 of the act of Congress of April 29, 1902, a reenactment of the then existing Chinese-exclusion laws of the United States so as to make them applicable to the Philippine Islands, which read as follows:

"SEC. 4. That it shall be the duty of every Chinese laborer, other than a citizen, rightfully in, and entitled to remain in, any of the insular territory of the United States (Hawaii excepted) at the time of the passage of this act, to obtain within one year thereafter a certificate of residence in the insular territory wherein he resides, which certificate shall

entitle him to residence therein, and upon failure to obtain such certificate as herein provided he shall be deported from such insular territory; and the Philippine Commission is authorized and required to make all regulations and provisions necessary for the enforcement of this section in the Philippine Islands, including the form and substance of the certificate of residence so that the same shall clearly and sufficiently identify the holder thereof, and enable officials to prevent fraud in the transfer of the same: *Provided, however*, That if said Philippine Commission shall find that it is impossible to complete the registration herein provided for within one year from the passage of this act, said Commission is hereby authorized and empowered to extend the time for such registration for a further period not exceeding one year."

In order to carry into effect the provisions of this section, Act No. 702 was passed on March 27, 1903, by the Philippine Commission, as follows:

"[No. 702.]

"AN ACT to regulate the registration of Chinese persons in the Philippine Archipelago, and to carry into effect and enforce the provisions of section four of the act of Congress approved April twenty-ninth, nineteen hundred and two, entitled 'An act to prohibit the coming into and to regulate the residence within the United States, its Territories, and all territory under its jurisdiction, and the District of Columbia, of Chinese persons and persons of Chinese descent.'

"By authority of the United States, be it enacted by the Philippine Commission, that:

"SECTION 1. The collector of customs for the Philippine Archipelago is hereby authorized and directed to make the registration of all Chinese laborers in the Philippine Islands as required and prescribed by section four of the act of Congress approved April twenty-ninth, nineteen hundred and two, entitled 'An act to prohibit the coming into and to regulate the residence within the United States, its Territories, and all territory under its jurisdiction, and the District of Columbia, of Chinese and persons of Chinese descent,' and to employ for that purpose the personnel of the Philippine customs service, the provincial and military officers hereinafter provided, and such other persons as may be necessary.

"SEC. 2. The insular collector of customs shall make such rules and regulations as may be necessary for the efficient execution of this act, prescribing the form of certificates of registration required hereby, and making such provisions that certificates may be procured in localities convenient to the applicants.

"SEC. 3. Each certificate of registration shall contain the name, age, date, and place of birth, registry of birth, if any, local residence, occupation, and photograph of the person therein described, and such other data in respect to him as shall be prescribed by the insular collector of customs, and shall be issued by the proper officer upon payment to him of a fee of fifty cents United States currency, said fee to be accompanied by a true photograph of the applicant in triplicate to the satisfaction of such officer.

"SEC. 4. Any Chinese laborer within the limits of the Philippine Islands who shall neglect, fail, or refuse to obtain within the time prescribed by section four of the act of Congress of the United States, referred to in section one of this act, the certificate of registration by this act provided to be issued, and who shall be found within the Philippine Islands without such certificate of registration after such time has elapsed, may be arrested upon warrant issued by the court of first instance of the province or by the justice's court of the municipality returnable before said court of first instance, by any customs official, police, constabulary, or other peace officer of the Philippine Islands and brought before any judge of a court of first instance in the islands, whose duty it shall be to order that such Chinese laborer be deported from the Philippine Islands, either to China or the country from whence he came unless he shall affirmatively establish clearly and to the satisfaction of such judge, by at least one creditable witness other than Chinese, that although lawfully in the Philippine Islands at and ever since the passage of this act he has been unable by reason of accident, sickness, or other unavoidable cause to procure the certificate within the time prescribed by law, in which case the court shall order and adjudge that he procure the proper certificate within a reasonable time, and such Chinese laborer shall bear and pay the costs of the proceeding: *Provided, however*, That any Chinese laborer failing for any reason to secure the certificate required under this law within two years from the date of its passage shall be deported from the islands. If it appears that such Chinese laborer had procured a certificate in due time, but that the same has been lost or destroyed, he shall be allowed a reasonable time to procure a duplicate from the insular collector of customs or from the officer granting the original certificate, and upon the production of such duplicate such Chinese laborer shall be discharged from custody upon payment of costs.

"Any Chinese person having procured a certificate of registration, and the same having been lost or destroyed, shall have a right to procure a duplicate thereof under such regulations as may be prescribed by the insular collector of customs upon the payment of double the fee exacted for the original certificate and the presentation of his true photograph in triplicate.

"No Chinese person heretofore convicted in any court of the States or Territories of the United States or the Philippine Islands of a felony shall be permitted to register under the provisions of this act without special authority from the civil governor.

"Sec. 5. Every Chinese person having a right to be and remain in the Philippine Islands shall obtain the certificate of registration specified in section three of this act as evidence of such right and shall pay the fee and furnish his photograph in triplicate as in said section prescribed; and every Chinese person found without such certificate within the Philippine Islands after the expiration of the time limited by law for registration shall be presumed, in the absence of satisfactory proof to the contrary, to be a Chinese laborer, and shall be subject to deportation as provided in section four of this act. Every Chinese person shall, on demand of any customs official, police, constabulary, or other peace officer, exhibit his certificate, and on his refusal to do so may be arrested and tried as provided in section four of this act.

"Sec. 6. Any person who shall knowingly and falsely alter or substitute any name for the name written in any certificate of registration or forge such certificate, or knowingly utter any forged or fraudulent certificate, or falsely personate the person to whom said certificate was originally issued, or who shall falsely present any such certificate, shall be punished by a fine not to exceed one thousand dollars and imprisoned for a term not to exceed five years.

"Sec. 7. Every Chinese person who may be entitled to come into the Philippine Islands shall upon landing, if he so requests, be given by the collector of customs of the port at which he lands a certificate containing his name, age, photograph, occupation, place of last residence, the date on which he landed, and such other data in respect to him as may be prescribed by the insular collector of customs, and such certificate shall be issued upon payment to the proper officer of fifty cents, United States currency, accompanied by a true photograph of the applicant in triplicate to the satisfaction of such officer.

"Sec. 8. Each certificate issued under this act shall be made out in triplicate, and to each of the triplicate copies shall be attached a true photograph of the person to whom issued. One of such triplicate certificates shall be delivered to the applicant, one filed in the office of the registrar of Chinese for the district within which the application is made, and the third transmitted to the insular collector of customs for permanent record and file.

"Sec. 9. The collector of customs for the Philippine Archipelago is hereby authorized to depute as registrar or deputy registrar of Chinese in each organized province of the civil government, any collector or deputy collector of customs or treasurer of the province, and the officer so deputized shall give the necessary assistance under the direction of the insular collector of customs in the execution of this act.

"Sec. 10. In unorganized provinces the insular collector of customs is authorized to designate, where available, any officer or qualified employee in the customs service for duty as registrar or deputy registrar of Chinese, and in case none such is available, then, by and with the consent of the commanding officer of the division of the Philippines, he is authorized to designate an officer of the United States Army to serve as registrar of Chinese.

"Sec. 11. Registrars and deputy registrars of Chinese, in addition to their compensation as officials or employees of the civil government or officers of the United States Army, shall receive not to exceed the sum of seventy-five dollars, United States currency, per month, and their actual and necessary traveling expenses, not to exceed three dollars, United States currency, per day, incurred under orders of the insular collector and by reason of their being engaged in the work prescribed in this act.

"Sec. 12. The word 'laborer' or 'laborers' wherever used in this act shall be construed to mean both skilled and unskilled manual laborers, including Chinese laundrymen and Chinese employed in mining, fishing, huckstering, peddling or taking, drying, or otherwise preserving shell or other fish for home consumption or exportation.

"The term 'merchant' as employed in this act signifies a person engaged in buying and selling merchandise at a fixed place of business, which business is conducted in his name, and who during the time he claims to be engaged as a merchant does not engage in the performance of any manual labor except such as is necessary in the conduct of his business as such merchant. The definition of 'laborer' and 'merchant' set out in this section shall receive the same construction as that given to it by the Federal courts of the United States and the rulings and regulations of the Treasury Department of the United States.

"Sec. 13. For the purposes of this act the following temporary employees, or so many thereof as may be necessary, are hereby authorized in the office of the collector of customs for the Philippine Archipelago: Six registration clerks and two Chinese translators of class nine and two stenographers and typewriters of class eight.

"Sec. 14. The sum of forty thousand dollars, United States currency, or so much thereof as may be necessary, is hereby appropriated, out of any moneys in the insular treasury not otherwise appropriated, to pay the salaries and expenses of registrars and deputy registrars and necessary clerical assistance, interpreting, translating, printing, advertising, traveling, transportation, stationery, and such other expenses as may be incurred in connection with this registration.

"Sec. 15. It being impossible to complete the registration herein provided for within one year from the passage of the act of Congress approved April twenty-ninth, nineteen hundred and two, the time for such registration is, pursuant to authority granted by section four of said act, hereby extended for a period of six months to date from April twenty-ninth, nineteen hundred and three.

"Sec. 16. This act shall take effect on its passage.

"Enacted, March 27, 1904."

It will be noted that according to the provisions of section 5 of the above-quoted act (section 4 of the act of Congress of April 29, 1902, is amplified and extended so as to include "every Chinese person having a right to be and remain in the Philippine Islands," and it is further provided by section 5 that "every Chinese person found without such certificate within the Philippine Islands after the expiration of the time limited for registration shall be presumed, in the absence of satisfactory proof to the contrary, to be a Chinese laborer, and shall be subject to deportation as provided in section four of this act."

Under the provisions of said act, the collector of customs for the Philippine Islands was authorized and directed to make the registration of Chinese persons, to provide the necessary rules and regulations to carry out its provisions, and to deputize and employ for that purpose the necessary customs, provincial and military officers, as well as to employ the necessary temporary employees.

Pursuant to the provisions of section 2 of the above-mentioned act, this office prepared and published under date of April 13, 1903, Chinese and Immigration Circular No. 85 (see Exhibit A), entitled "Regulations for the registration of Chinese persons in the Philippine Islands."

In addition to the general regulations there was included in this circular a complete set of model forms of applications, certificates, landing certificates, identification cards, etc., which were to be used during the registration period, in order that the registrars and their deputies might familiarize themselves with the purposes of each.

The islands were thereby divided into thirty registration districts. In each registration district a registrar, with one or more deputy registrars, was appointed. The personnel during the entire registration period consisted of 36 registrars and 52 deputy registrars, stationed as follows:

Name.	Title.	Registration district.
REGISTRARS.		
Abrams, Chas. W.	Deputy coast district inspector.	Cottabato.
Allison, A. M.	Coast district inspector.	Union.
Barton, Eugene	Treasurer.	Misamis.
Beatty, Charles L.	Coast district inspector.	Surigao.
Bennett, George	Collector of customs.	Zamboanga.
Bodley, Arthur W.	Deputy coast district inspector.	Cottabato.
Braden, J. Q. A.	Treasurer.	Camarines.
Bryant, William C.	Secretary-treasurer.	Nueva Vizcaya.
Coates, Thomas P.	Coast district inspector.	Union.
Colton, George R.	Collector of customs.	Iloilo.
Corwine, R. M.	do.	Jolo.
Douglass, H. R.	Coast district inspector.	Sorsogon.
Faneuf, Adolph G.	do.	Samar.
Farwell, J. L.	do.	Albay.
Fee, D. E.	Collector of customs.	Paragua.
Frank, Hans.	Lieutenant, Philippine Scouts.	Daritan.
Gimenez, José	Coast district inspector.	Cagayan.
Green, J. B.	Treasurer.	Nueva Ecija.
Hardeman, Thomas	do.	Pangasinan.
Hunter, John W.	do.	Abra.
Jones, Walter E.	do.	Tarlac.
Lamb, C. H.	Supervisor-treasurer.	Mindoro.
McFarland, Archibald	do.	Abra.
McLain, C. C.	Treasurer.	Tayabas.
McNeil, Jacob R.	Coast district inspector.	Batangas.
Owens, G. E.	Secretary-treasurer.	Lepanto-Bontoc.
Palin, Chas. L.	Coast district inspector.	Paragua.
Rafferty, James J.	Collector of customs.	Cebu.
Smith, H. Warren	Treasurer.	Ilocos.
Stark, Benjamin	Lieutenant, Fiftieth Company Philippine Scouts.	Davao.
Stewart, N. B.	Treasurer.	Isabela.
Strattan, Guy	Coast district inspector.	Romblon.
Thornton, William O.	Treasurer.	Tayabas.
Travis, Gideon B.	Acting treasurer.	Lepanto-Bontoc.
Turner, Arthur H.	Deputy coast district inspector.	Zambales.
Willits, Samuel	Lieutenant, Philippine Scouts.	Dapitan.

Name.	Title.	Registration district.
DEPUTY REGISTRARS.		
Amazeen, John B.	Chief of immigration division.	Manila.
Ascher, Alfred.	Deputy treasurer.	Tayabas.
Barclay, W. W.	Treasurer.	Cagayan.
Barnes, W. B.	Clerk.	Jolo.
Blaker, Allan G.	Coast district inspector.	Cebu-Leyte.
Blanchard, R. D.	Treasurer.	Batangas.
Brooks, jr., J. S.	Deputy treasurer.	Tayabas.
Carson, Chas. W.		Camarines.
Casanave, Pedro A.	Treasurer.	Samar.
Casanave, Pedro A.	do.	Iloilo-Negros Occidental.
Chapman, F. S.	do.	Iloilo-Capiz.
Cheney, Edward F.	Deputy coast district inspector.	Iloilo-Cuyo.
Clint, David K.	Treasurer.	Manila-Rizal.
Cole, W. G.	Registration clerk, Manila.	Zambales-Olongapo.
Comdohr, Julius A.	Treasurer.	Sorsogon-Masbate.
Conrow, W. O.	do.	Cebu-Leyte.
Emery, Arthur S.	do.	Zambales.
Fanning, Richard J.	do.	Sorsogon.
Goodhart, Richard W.	do.	Manila-Bulacan.
Grau, G. R.	do.	Rizal.
Greer, James W.	Coast district inspector.	Cebu-Negros Oriental.
Hahn, D. H.	Inspector of customs.	Cebu-Leyte.
Hart, George B.	Coast district inspector.	Iloilo-Antique.
Hill, Edward.	Customs examiner.	Zamboanga.
Hodgson, H. J.	Treasurer.	Albay.
Hollis, Wm. George.	do.	Iloilo-Negros Occidental.
Jumper, David A.	Coast district inspector.	Iloilo-Capiz.
Love, H. K.	Treasurer.	Manila-Bataan.
Love, H. K.	do.	Manila-La Laguna.
Moir, P. M.	do.	Manila-Cavite.
Nash, C. L.	do.	Romblon.
Neuman, Paul.	Coast district inspector.	Cebu-Leyte.
Pack, William F.	Treasurer.	Union.
Peed, Henry.	do.	Cebu-Negros Oriental.
Randall, W. A.	do.	Iloilo-Negros Occidental.
Reamy, B. F.	do.	Iloilo-Antique.
Reinburg, Louis G.	Acting treasurer.	Manila-La Laguna.
Reis, Julius S.	Treasurer.	Romblon.
Reynolds, Charles A.	do.	Albay.
Robinson, H. B.	do.	Iloilo-Negros Occidental.
Roddy, W. F.	Collector of customs.	Paragua.
Scott, Philip H.	Registration clerk, Manila.	Manila-Rizal.
Shaw, Andrew.	Deputy coast district inspector.	Jolo-Siasi.
Shearer, R. M.	Treasurer.	Manila-Pampanga.
Thornton, William O.	do.	Iloilo-Capiz.
Uppington, C. D.	do.	Cebu-Bohol.
Vanderbroek, J. P.	do.	Cebu-Leyte.
Watson, W. R.	Deputy collector of customs.	Iloilo.
Whittier, Arthur G.	Acting treasurer.	Samar.
Wilson, F. L.	Treasurer.	Ilocos Sur.
York, F. G.	Deputy collector of customs.	Cebu.
Yundt, E. R.	Treasurer.	Manila-Bataan.

In addition thereto each registrar and deputy registrar was authorized to employ, whenever the exigencies of the work required it and subject to the approval of this office clerks, Chinese interpreters, etc. There were 41 persons employed as clerks and interpreters at the Manila office during the registration period. No one of them served continuously from the beginning, and several were transferred and reassigned one or more times.

The amount paid the registrars and deputy registrars for services performed was \$10,018.13 United States currency. (See Exhibit B.)

The entire cost of the registration for salaries, by districts, is as follows:

District.	Registrar.	Deputy registrar.	Clerks and interpreters.	Total.
Manila.		\$680.83	\$13,333.66	\$14,013.89
Iloilo.	\$675.00	688.16	445.00	1,808.16
Cebu.	537.50	1,020.00	709.00	2,266.50
Jolo.	340.00	227.00	392.00	959.00
Zamboanga.	490.00	62.50	54.00	606.50
Albay.	241.67	210.83	248.50	701.06
Cagayan.	226.67	80.83	84.67	392.17
Camarines.	378.33	115.00	75.00	568.33
Pangasinan.	450.00		22.65	472.65
Samar.	235.00	89.17	70.00	394.17

United States currency.

Total.....	6,148.15	3,870.16	16,041.72	26,060.03

^a Only 9 certificates issued.^b No certificates issued.

Several weeks were occupied in preparing, printing, and distributing the necessary blank forms, rubber stamps, official seals, etc., the actual operation of registration commencing at Manila on June 1, 1903. The first certificates from outside registration districts were received from Aparri on June 17, 1903, and from Cebu and the Camarines on June 24, 1903.

It being found impossible to complete the registration of Chinese persons within the period stated in the regulations (Chinese and Immigration Circular No. 85)—i. e., from June 1 to September 30, 1903—the period was extended by Chinese and Immigration Circular No. 141 (see Exhibit C) until October 29, 1903, the time originally specified in act No. 702 of the Philippine Commission.

Upon October 29 there had been received at the Manila office approximately 26,000 certificates of residence for approval, and the time was further extended by act No. 989, Philippine Commission, until December 29, 1903. (See Exhibit D.) On this date there had been received for approval approximately 34,000 certificates. Of this number, about 21,000 were from outside registration districts, only 13,000 having been completed at the Manila office.

It then became necessary to still further extend the registration period for two months, which was done by act No. 1035 (see Exhibit E), and again until April 29, 1904, by act No. 1084 (see Exhibit F), during which period there were received for approval approximately 1,500 certificates from outside districts and 14,150 certificates from the Manila office.

The actual number of certificates of residence issued in all the districts in the Philippine Islands during the registration period was 49,659, divided as follows:

Result of Chinese registration, by districts.

District.	Number.	District.	Number.
Manila:		Iloilo:	
City of Manila.....	27,173	Iloilo.....	2,000
Cavite.....	844	Negros Occidental.....	759
Pampanga.....	559	Capiz.....	212
La Laguna.....	533	Antique.....	152
Bulacan.....	347	Cuyo.....	34
Rizal.....	292	Total.....	3,157
Bataan.....	20		
Total.....	29,768	Albay.....	1,419
Cebu:		Cagayan.....	1,055
Cebu.....	1,843	Camarines.....	1,045
Leyte.....	1,791	Pangasinan.....	1,037
Negros Oriental.....	339	Samar.....	1,033
Bohol.....	90	Jolo.....	1,031
Total.....	4,063	Sorsogon.....	1,017
		Zamboanga.....	891
		Tayabas.....	579
		Misamis.....	504

Result of Chinese registration, by districts—Continued.

District.	Number.	District.	Number
Ilocos	472	Dapitan	82
Isabela	435	Paragua	82
Surigao	416	Mindoro	40
Batangas	298	Abra	20
Cotabato	292	Davao	15
Tarlac	281	Lepanto-Bontoc	9
Union	256	Nueva Vizcaya	
Nueva Ecija	168		
Romblon	135	Grand total	49,650
Zambales	113		

It will be seen by the foregoing table that 29,768, or about 60 per cent, of these certificates were issued in the Manila registration district, the city of Manila furnishing all but 2,595 of them. It will also be noted that the Chinese population in some parts of the islands is so scattering that 10 districts out of the 30 furnished only a fraction over 700 certificates.

The result of the registration in the principal islands of the archipelago is shown by the following table:

Result of Chinese registration, by islands.

Island.	Number.	Island.	Number.
Luzon:		Samar	1,033
Manila	27,173	Jolo	779
Balance of the island	10,721	Siasi	252
Total	37,894	Romblon	135
		Bohol	90
Panay	2,364	Masbate	84
Mindanao	2,170	Paragua	52
Cebu	1,843	Mindoro	40
Leyte	1,791	Cuyos	34
Negros	1,098	Grand total	49,650

It will be seen by this table that the island of Luzon furnished 37,894, or 76 per cent, of the certificates issued during the registration period, the islands of Panay and Mindanao following with only 2,364 and 2,170 certificates, respectively.

There were also issued during the registration period 354 landing certificates of residence at the ports of Manila, Cebu, Iloilo, and Jolo. Since the close of the registration period on April 29, up to and including August 31, this number has been increased to 681, as follows:

Manila	551
Cebu	92
Iloilo	27
Jolo	10
Zamboanga	1
Total	681

The majority of the landing certificates of residence issued since April 29, 1903, have been issued to Chinese persons formerly resident in the Philippine Islands who have been absent in China during the registration period and have been recently returning to their homes.

The work of comparing, approving, numbering, and sealing the entire 50,340 certificates in original and duplicate—a most tedious, monotonous, and stupendous task of itself—was carried on in this office, as also was the correspondence connected with receiving and forwarding the certificates, receipting for funds, appointment of clerks, translators, etc. Many certificates had to be returned to registrars and deputy registrars for correction, to secure additional information, or to obtain better photographs, the errors or discrepancies in each case having to be noted on slips attached to the certificates. On some occasions as high as 40 or 50 per cent of a lot of certificates received from a registration district had to be returned in this manner.

A complete check on the certificates, numbers, and fees collected was also kept, in order that no duplication or discrepancies could occur in either the certificates, numbers, or fees received in payment of same.

It is estimated that over 5,000 letters and telegrams passed through this office solely in connection with the registration of Chinese, all of them having been duly recorded in the record division of this custom-house. The payment of salaries to registrars, deputy registrars, clerks, translators, etc., also imposed additional labor upon the disbursing officer of this customs service.

Since the close of the registration period there have been issued 50 duplicate original certificates of residence, the original certificates having been either lost or destroyed. The majority of these certificates were destroyed in the recent extensive fires in the thickly populated Chinese districts of Manila. Authority is had for the issuance of duplicate-original certificates of residence under section 4 of Act No. 702 of the Philippine Commission, which in part reads as follows:

"Sec. 4. * * * Any Chinese person having procured a certificate of registration, and the same having been lost or destroyed, shall have a right to procure a duplicate thereof under such regulations as may be prescribed by the insular collector of customs upon the payment of double the fee exacted for the original certificate and the presentation of his true photograph in triplicate. * * *

Regulations as provided for by the above-mentioned act were published in Paragraph XVII of Chinese Immigration Circular No. 85, and Chinese and Immigration Circular No. 157. (See Exhibits A and G.)

There are at the present time approximately 2,200 certificates of residence remaining on hand undelivered at the various registration offices throughout the islands. Regulations covering the dispositions of these certificates were published in Chinese and Immigration Circular No. 161, dated July 30, 1904. (See Exhibit H.)

An approximate statement of the receipts and expenditures, including the fees collected for duplicate-original certificates issued to September 1, 1904, is as follows:

Receipts.

49,659 certificates of residence, at 50 cents.....	\$24, 829. 50
681 landing certificates, at 50 cents.....	340. 50
50 duplicate-original certificates, at \$1.....	50. 00
Total receipts.....	25, 220. 00

Expenditures.

Salaries of registrars and deputy registrars.....	10, 018. 31
Salaries of clerks, translators, etc.....	16, 041. 72
Printing, stationery, etc.....	7, 284. 25
Transportation and contingent expenses.....	484. 34
Total expenditures.....	33, 828. 62
Excess of expenditures over receipts.....	8, 608. 62

The actual receipts will amount to more than is shown in the statement above, owing to a number of applications having been received and paid for and the certificates not issued on account of deaths, etc.

COST OF WORK.

This statement shows that the entire work of registration has been accomplished with a cost of only \$8,600 to the government, and leaves a balance approximately of \$31,400 of the original appropriation of \$40,000 on hand. The work of indexing, etc., should probably be an additional charge against this appropriation.

Before concluding, this office desires to call attention to the many difficulties and annoyances which were met with in carrying out the work of registration, especially at the Manila office, where nearly 55 per cent of the applications were received and certificates issued.

The want of suitable and adequate quarters, and the general unfitness and inexperience of the force employed, was a constant subject of remark and source of complaint. The work was begun, before the recent addition to this custom-house was completed, through lack of better accommodations, in the temporary quarters of the immigration division in the property department, already insufficient and inadequate for the immigration work alone. The equipment consisted of such cast-off and unused odds and ends in the shape of desks, tables, chairs, and files as could be scraped together.

The registration began with a rush on the opening day, with little or no opportunity on the part of those employed to familiarize themselves with the new and unusual duties at hand. The newly appointed clerks, unacquainted with the laws and requirements and unaccustomed to the situation, grappled with the novel problems presented as best they could. At the end of the first week one clerk resigned and another was temporarily withdrawn, which

was the beginning of a system of rotation in office as unique as it was disastrous. In several instances, owing to the monotonous character of the work, registration clerks were given employment in other divisions of the customs service to prevent their resignation, while other clerks, temporarily unemployed, were assigned to do registration work. Something over fifty changes took place in the force during the succeeding nine months, which, on an average, indicates a complete shifting of the working force about once a month.

Owing to a delay in the completion of the books containing the certificates, about 3,200 applications had been received and a month had passed before any certificates were ready for issuance. This handicap could not be overcome, and for several months continued to increase, owing to the rush of applicants and insufficiency of the force employed, so that at the close of the period as first limited about 17,000 applications had been received and only about 5,000 certificates were ready for delivery. It was not until about March 15, 1904, that the office was up to date with the work.

The numerous difficulties which arose in connection with this work can scarcely be appreciated by anyone not actually engaged in the work. A large percentage of the number registered were from the most ignorant classes of Chinese, unable to write their names, standing mute when the necessary questions were put to them, or giving answers without truth or reason. The determination of the status of Chinese persons "other than laborers" was another matter in which it was most difficult to reach a satisfactory conclusion. It was almost impossible to obtain the correct status of the multitude of alleged partners belonging to a large number of establishments claimed to belong to a person who was apparently a "merchant" within the meaning of the law. Some of the larger firms, supposed to be owned and conducted by the men whose names they bore, developed as many as thirty or forty partners, each one claiming the right to be registered as a merchant (or person other than a laborer) on account of a small alleged share or interest which he might have in the firm, but presenting no proof other than certain certified copies of "partnership articles," and clamoring to have his status promptly investigated. Of the 27,173 Chinese registered at Manila, it is probable that 50 per cent made a demand, in the first instance, to be registered as "persons other than laborers." Hundreds made the claim that they were native born, without any other evidence of the fact than their assertions, and insisted upon having their claims investigated. The usual number of Chinese "attorneys" at law, in fact and otherwise, were on hand.

Another difficulty met with in Manila was the registration of the women and small children. Owing to the seclusion in which the Chinese women are accustomed to live, it was deemed best by the undersigned, after consultation with the Chinese consul, to have the women and children appear at that consulate for registration. This necessitated two trips being made—one for the application and another for signing and delivering the certificate—which occupied the time of two clerks and an interpreter from three to five hours for at least fifteen days, the women being very irregular in their attendance. On some days there would only be seven or eight applications received, while on other days twenty-five or thirty would apply. The same thing occurred in the delivery of the certificates, which occupied the entire time of a clerk and interpreter for a considerable period.

The number of women and children registered in this way was approximately 255. There were also quite a number of women and children registered in the regular manner. The total number of women registered throughout the islands is approximately 400. Upon the completion of the index and record, which is now being prepared, the number can readily be ascertained.

Another of the difficulties met with in securing satisfactory photographs, it having been absolutely necessary to decline to accept many of those presented. This caused delay in finishing the certificates, as in most cases it was several months before the applicants would return with new photographs to replace the ones declined. In many of the more isolated provinces great difficulty was experienced in securing photographs of any description, and in some instances the applicant had to travel several hundred miles to procure them. In one instance (Paragua district) a photographer and clerk were dispatched from Manila on a customs cutter to procure the applications and photographs of the Chinese residents, owing to the fact that no photographer could be obtained in those parts, and the 52 Chinamen in the district who desired to register were scattered over the entire island.

Of the 49,659 certificates of residence issued, only 23 were issued without photographs, as follows:

Davao district.....	14
Lepanto-Bontoc district.....	8
Cottabato district.....	1

Another difficulty was experienced in obtaining the real names of applicants, many of them signing names that could not be interpreted as they had been pronounced. In many instances the signature would not agree on the original, duplicate, and triplicate copies of the certificates, and many Chinese deliberately gave false names. In all of these cases

the certificates had to be held up, causing additional delay. The same difficulty was experienced in getting the proper addresses; often the applicant did not know his proper address, or purposely misstated the same.

The time and labor necessary to properly distribute the certificates after the same were completed must also be taken into consideration. Each applicant had to be carefully compared with the certificate, both with a view of making the necessary alterations and corrections in the certificate and the detecting of any fraud in obtaining same. This task was far beyond the average estimate. The pushing and crowding was at times uncontrollable. Great numbers came every day though their certificates were not ready—sometimes half the number present had to be turned away in spite of the announcements and bulletins posted. Hundreds of applicants claimed to have lost their "identification cards," and in such cases it was necessary to search through several hundred certificates before the proper one could be found. A great number of "identification cards" were presented by friends of the persons described therein, the former trying to pass themselves as the persons named and described in the certificate.

A complete index and record of the registered Chinese in the Philippine Islands is being prepared, and a sufficient supply will be printed to meet the needs of the different branches of the government which require it. Copies will be placed on file at each of the ports of entry in the Philippine Islands, in the immigration division of the Manila custom-house, the executive bureau, the secret-service bureau, the internal-revenue bureau, and probably at the constabulary headquarters, and at such other places as may be deemed necessary. Supplements will then be issued at stated periods giving the additional landing certificates of residence issued at ports of entry, the numbers of certificates canceled and the reasons thereof, etc., thus keeping an accurate record up to date.

Special credit is due to Mr. Cliff C. Barton, special agent, Philippine customs service for his assistance to the insular collector of customs throughout the entire registration work.

Respectfully,

W. MORGAN SHUSTER,
Collector of Customs for the Philippine Islands.

HON. HENRY C. IDE,
Secretary of Finance and Justice, Manila.

EXHIBIT A.

REGULATIONS FOR THE REGISTRATION OF CHINESE IN THE PHILIPPINE ISLANDS

CHINESE AND IMMIGRATION CIRCULAR NO. 85.

Regulations for the registration of Chinese persons in the Philippine Archipelago, promulgated pursuant to section 2 of Act No. 702 of the Philippine Commission.

OFFICE OF THE COLLECTOR OF CUSTOMS
FOR THE PHILIPPINE ARCHIPELAGO,
Manila, April 13, 1903.

To all Collectors of Customs, Provincial Treasurers, and Others Concerned:

PARAGRAPH I. The following regulations for the registration of Chinese persons in the Philippine Archipelago, made pursuant to section 2 of Act No. 702 of the Philippine Commission, are hereby published for the information and guidance of all concerned:

Section 4 of the act of Congress of April 29, 1902, reads, in part, as follows:

"SEC. 4. That it shall be the duty of every Chinese laborer, other than a citizen, rightfully in, and entitled to remain in any of the insular territory of the United States (Hawaii excepted) at the time of the passage of this act, to obtain within one year thereafter a certificate of residence in the insular territory wherein he resides, which certificate shall entitle him to residence therein, and upon failure to obtain such certificate as herein provided he shall be deported from such insular territory: and the Philippine Commission is authorized and required to make all regulations and provisions necessary for the enforcement of this section in the Philippine Islands, including the form and substance of the certificate of residence so that the same shall clearly and sufficiently identify the holder thereof, and enable officials to prevent fraud in the transfer of the same * * *."

PAR. II. *Applications for certificates of residence.*—The collector of customs for the Philippine Archipelago, at Manila, and the collectors of customs at the respective ports of Iloilo, Cebu, Zamboanga, and Jolo, and such provincial treasurers and others officers or persons as may be hereafter designated as registrars or deputy registrars of Chinese, pursuant to sections 9 and 10 of said Act No. 702 of the Philippine Commission, will receive

applications in the following form, at the places hereinafter designated, from Chinese persons residing in the Philippine Islands on April 29, 1902:

Application No. *

PHILIPPINE CUSTOMS SERVICE.

Form No.

Application of Chinese laborer (or Chinese person other than a laborer) for certificate of residence under act of Congress of April 29, 1902.

I,, a Chinese, hereby make application to the registrar of Chinese for the registration district of, P. I., for a certificate of residence, under the provisions of the act of Congress of April 29, 1902, and Act No. 702 of the Philippine Commission passed in pursuance thereof, and declare that I arrived in the Philippine Islands on the day of, 1902, at the port of, ex S. S.; that I was lawfully within the limits of said islands, residing at, on the 29th day of April, 1902; that I have not been convicted of a felony in any court of the States or Territories of the United States or of the Philippine Islands, and that the following descriptive list of myself is true and correct in every particular, viz:

Name	place of birth
date of birth	registry of birth (if any)
occupation	age
color of eyes	height
complexion	weight in pounds
physical marks or peculiarities for identification	
Local residence	

I further declare that the three photographs submitted with this application are true likenesses of myself.

Subscribed and sworn to before me this day of, 1902, at, P. I.

.....
Certificate of residence No., issued in pursuance hereof.

..... Registrar of Chinese,
Registration district of

PAR. III. No application shall be received later than 12 o'clock noon on September 30, 1903, nor shall any certificate of residence be issued to persons failing to present their applications before said hour and date.

PAR. IV. *Photographs.*—Every applicant shall be required to furnish three unmounted photographs of him or herself, one of which shall be firmly affixed with strong glue or paste to the original certificate of residence, one to the duplicate, and one to the triplicate in the book of certificates. Great care shall be taken in receiving the photographs to see that they accurately represent the features of the applicant.

If the registrar or deputy registrar of Chinese is in doubt as to the faithfulness of a photograph presented, he shall refuse to receive the application and require proper photographs.

The photographs shall be sun pictures, such as are usually known as card photographs, of sufficient size and distinctness plainly and accurately to represent the entire face of the applicant, the head to be not less than 1½ inches from base of hair to base of chin. No tintype, or picture other than as above described, shall be received.

PAR. V. *Certificates of residence.*—Certificates of residence, bound in books of one hundred certificates in triplicate, each, and numbered consecutively, in the following form, will be furnished by this office to registrars and deputy registrars of Chinese:

Certificate of residence No.

Form No.

PHILIPPINE CUSTOMS SERVICE.

Certificate of residence issued to Chinese laborer (or Chinese person other than a laborer) under the provisions of act of Congress of April 29, 1902.

This is to certify that, a Chinese, now residing at, P. I., has made application (No.)* of this registration office for a

* Applications shall be numbered consecutively by each registrar or deputy registrar in the order in which they are received at his station, starting in each case with No. 1. Thus, each registrar and deputy registrar will have a separate and distinct series of application numbers running from No. 1 up.

† If the applicant can sign his name in English, he should do so; if he can not sign in English, he should sign in Chinese characters, the registrar or deputy registrar in that case writing the English equivalent beneath the signature. If the applicant can not sign his name at all, he should make his mark in the usual form.

CERTIFICATE OF RESIDENCE

under the provisions of the act of Congress of April 29, 1902, and of Act No. 702 of the Philippine Commission passed in pursuance thereof, and I hereby certify that it appears from the application submitted by the Chinese person above named and from investigation made by me that said was within the limits of the Philippine Islands on the 29th day of April, 1902, and was then residing at, and that he was at that time lawfully entitled to remain in the said islands, and that the following is a descriptive list of the said Chinese person:

Name.....	place of birth.....
date of birth.....	registry of birth (if any).....
occupation.....	age.....
color of eyes.....	height.....
complexion.....	weigh in pounds.....
physical marks or peculiarities for identification.....	
Local residence.....	

And as a further means of identification I have affixed hereto a photographic likeness of the said and his true signature, as follows

Given under my hand and official seal this
day of, 1903, at
P. I.

[PHOTOGRAPH.]

‡[SEAL.]

..... Registrar of Chinese,
Registration District of
Insular collector's number.....

Approved:

[SEAL OF INSULAR COLLECTOR OF CUSTOMS.]

Collector of Customs for the Philippine Archipelago.

PAR. VI. The form of certificate of residence prescribed in the preceding Paragraph V of these regulations shall be issued to all Chinese persons entitled thereto by virtue of their lawful residence in the Philippine Islands on April 29, 1902, whether said persons are actually in these islands and make application therefore before 12 o'clock noon, September 30, 1903, or whether they may be still temporarily absent from these islands with intent to return when the regular registration period expires (September 30, 1903): *Provided*, That in said latter case they return, are duly landed and make regular application (see Par. II hereof) for a certificate of residence within one year from the date of their departure from these islands, or in case their legal period of absence under "Return certificate," issued pursuant to the Chinese exclusion laws in force in these islands since April 29, 1892, has been extended to two years: *Provided*, That such persons return and make said regular application for a certificate of residence within two years from the date of their departure.

In order that this regulation may be fully understood attention is invited to the fact that Chinese persons lawfully resident in these islands on April 29, 1902, who have left the islands in good faith since that date are properly considered as residents of the Philippine Islands, just as if they were actually in the islands: *Provided always*, That they left for a temporary sojourn outside of the islands, with intent to return, and without evident intent to give up their lawful residence in the Philippines. Intent to return would usually be shown by the taking out of a return certificate, except in the cases of merchants, officials, teachers, students, and travelers for curiosity or pleasure, who form the exempt classes and are not required to take out return certificates.

PAR. VII. After signing each certificate of residence in triplicate the registrar or deputy shall affix his official seal thereto, as indicated on the form of certificate, in such manner that part of the seal impression will be made on the photograph which is affixed to the certificate.

The registrar or deputy shall also write across the face of each photograph, in triplicate, with red ink (but not across the features of the photograph), the number of the certificate as given by him and the name of the Chinese person to whom the same is to be issued.

PAR. VIII. All books of certificates of residence shall be kept in the offices of the respective registrars and deputy registrars of Chinese, and all such certificates shall be issued from those offices only.

PAR. IX. *Disposition to be made of applications and duplicate and triplicate certificates of residence.*—In all cases the original, duplicate, and triplicate certificates of residence shall

* Insert number of application made to registrar or deputy registrar issuing this certificate of residence.

† If the applicant can sign his name in English, he should do so; if he can not sign in English, he should sign in Chinese characters, the registrar or deputy registrar in that case writing the English equivalent beneath the signature. If the applicant can not sign his name at all, he shall make his mark in the usual form.

‡ The official seal of the collector of customs, provincial treasurer, provincial deputy treasurer, or other person designated as registrar or deputy registrar of Chinese, shall be firmly impressed here on the original, duplicate, and triplicate of each certificate of residence in such manner as to cover a substantial portion of the photographs, but not to obscure the features.

be filled out in precisely the same way. Upon completion of the forms, including the affixing of photographs, all signatures and seals, the original and duplicate certificates shall be detached from the books and be forwarded, at the earliest practicable date—by registered mail, whenever possible—to the collector of customs for the Philippine Archipelago at Manila. Upon their receipt here the originals and duplicates thus forwarded will be approved and given the insular collector's number, and will then be promptly returned by registered mail, whenever possible, to the forwarding registrar or deputy.

Registrars and deputy registrars, upon receiving the originals and duplicates duly approved and numbered by the insular collector, shall promptly fill in the blank for the insular collector's number on the triplicate certificate, to make the same correspond with the original and duplicate.

All applications and triplicate certificates of residence shall be kept on file in the offices of the respective registrars and deputy registrars until 12 o'clock noon, September 30, 1903, when all of said applications and triplicate certificates (left attached to the books), together with all unused certificates (originals, duplicates, and triplicates, also left attached in the books), shall be promptly transmitted, by registered mail, if possible, to the collector of customs for the Philippine Archipelago.

All duplicate certificates, upon their return from the insular collector of customs, approved and numbered, shall be carefully filed in the permanent records of the offices of the respective registrars and deputy registrars, and shall be regarded as official documents of the government of the Philippine Islands.

PAR. X. Identification cards.—Before forwarding the original and duplicate certificates, as prescribed by the preceding paragraph of these regulations, the respective registrars or deputy registrars shall issue an "identification card" to each Chinese person entitled to an original certificate of residence, informing him that he should call for his certificate and present his identification card at a time to be designated by each registrar or deputy registrar when the return mail might with safety be expected. Care should be taken in this respect to allow ample time for the return of the certificates from the insular collector of customs, in order that the applicants may not be required to make unnecessary trips to the offices of the respective registrars or deputies to obtain their certificates.

The form of said "identification cards" shall be as follows:

No.	PHILIPPINE CUSTOMS SERVICE.	Form No.
<i>Identification Card.</i>		
Issued by me this day of, 1903, to,		
a Chinese residing at		
who presented Application No. of this Registration Office, and for whom Certificate		
of Residence No. has been forwarded to the Insular Collector of Customs for approval.		
The following is a descriptive list of said		
Date of birth	Place of birth	
Registry of birth (if any)	Age	
Occupation	Height	
Color of eyes	Weight in pounds	
Complexion	Physical marks or peculiarities for identification	
This Identification Card is to be presented at this Office on or not exceeding ten days after		
....., 1903.		
..... Registrar of Chinese,		
Registration District of		

PAR. XI. Identification cards shall be taken up and filed upon delivery of the original certificate.

PAR. XII. When "identification cards" are surrendered by holders in order to obtain the original certificates of residence, the registrar or deputy registrar shall write or stamp the word "canceled" in red ink across the face of the card, together with the date of said cancellation.

Each registrar and deputy registrar shall number, consecutively, all identification cards issued by him, starting in each case with "Number 1."

PAR. XIII. Books of certificates of residence.—The books of certificates of residence, containing the triplicate certificates, shall be carefully retained on file in the offices of the respective registrars and deputy registrars until final disposition in accordance with Paragraph IX of these regulations.

PAR. XIV. Delivery of certificates of residence.—None but the original certificates of residence shall under any circumstances be delivered by registrars or deputies, temporarily or otherwise, to any person, except for the purpose of transmitting the same to the insular collector of customs as prescribed by Paragraph IX of these regulations, and neither duplicate nor triplicate certificates in the possession of persons other than the registrars or

deputy registrars, or other duly appointed custodians, shall be valid, lawfully possessed, or be recognized in any way:

Provided, That duplicates of original certificates issued pursuant to section 4 of act No. 702 of the Philippine Commission, as hereinafter prescribed by these regulations, shall be valid, lawful, and recognized as therein set forth.

PAR. XV. All certificates of residence, originals, duplicates, and triplicates, shall be legibly made out, in printing or writing, with black ink not liable to fade. Special ink for this purpose will be furnished by this office to registrars and deputies wherever it is possible to do so.

PAR. XVI. *Certificates of residence for Chinese persons other than laborers.*—The same forms shall be used in issuing certificates of residence to Chinese persons other than laborers as are used for certificates to laborers, by inserting between the words "Chinese" and "laborer," wherever they appear in said form, the words "person other than," a blank space being provided in each form sufficient to admit of writing the four words "person other than laborer."

PAR. XVII. *Issuance of certificates of residence in lieu of others lost or destroyed.*—A duplicate of a certificate of residence may be issued by the collector of customs for the Philippine Archipelago upon the receipt of written application to him therefor, through the registrar or deputy in whose registration district the original certificate was issued, together with evidence satisfactory to him, in the form of an affidavit or affidavits, that the original has been lost or destroyed by unavoidable accident and without fault or negligence on the part of the applicant. All such applications shall be promptly investigated by the registrar or deputy, as the case may be, and shall then be forwarded, together with a recommendation as to the merits of the particular case, to the collector of customs for the Philippine Archipelago. In all such cases the identity of the applicant with the person to whom the original certificate was issued must be assured, and to that end regular photographs in triplicate of the applicant must be presented therewith, which, after comparison and identification with the photograph filed with his duplicate certificate, shall be attached to the certificate of residence issued in lieu of the one lost or destroyed, and the regular duplicate and triplicate certificates on file in the respective offices of the registrar (or deputy) and the insular collector.

PAR. XVIII. *Record of certificates issued.*—Upon the expiration of the time limit allowed for the issuance of certificates of residence, an alphabetical record of all certificates issued under these regulations will be compiled by this office and kept for official reference, and for assistance in connection with the enforcement of the Chinese exclusion laws of these islands.

PAR. XIX. *Definitions of classes of Chinese persons.*—All classes of skilled and unskilled manual laborers, including Chinese employed in mining, fishing, huckstering, peddling, laundering, or those engaged in taking, drying, or otherwise preserving shell or other fish for home consumption, shall be classed as "laborers." A person, in order to be exempted from the operation of law as a "merchant," must be engaged in buying and selling merchandise at a fixed place of business, which business is conducted in his name, and who, during the time he claims to be engaged as a merchant, does not engage in the performance of any manual labor except such as is necessary in the conduct of his business as such merchant. A small shopkeeper shall not be considered a merchant.

PAR. XX. *Landing certificates of residence; application for same.*—Every Chinese person entitled to a certificate of residence by virtue of his or her lawful residence in the Philippine Islands on April 29, 1902, who is not actually in or legally resident in these islands (see Par. VI) and therefore fails to make regular application for the form of certificate of residence prescribed by sections V and VI of these regulations before twelve o'clock noon, September 30, 1903, shall, upon arrival in these islands and being lawfully landed, if he or she so requests, be granted a certificate which, to distinguish it from the regular certificate of residence hereinbefore prescribed, shall be referred to and known as a "landing certificate of residence."

PAR. XXI. Landing certificates of residence shall be issued pursuant to section 7 of act No. 702 of the Philippine Commission, and they, together with the applications therefor, shall be in the following forms:

Application for landing certificate of residence No.^a

Form No.

PHILIPPINE CUSTOMS SERVICE.

Application of Chinese person for landing certificate of residence, under section 7 of act No. 702 of the Philippine Commission.

I, a Chinese hereby make application to the collector of customs of the port of P. I., for a landing certificate of residence, under the provisions of section 7 of act No. 702 of the Philippine Commission, and declare that I arrived in the Philippine Islands on the day of 190.., at the port of ex s. s. that I have not been convicted of a felony in any court of the States or Territories of the United States or of the Philippine Islands, and that the following descriptive list of myself is true and correct in every particular, viz:

Name	Place of birth
Date of birth	Age
Registry of birth (if any)	Height
Occupation	Weight in pounds
Color of eyes	Complexion
Physical marks or peculiarities for identification	

I further declare that the three photographs submitted with this application are true likenesses of myself.

Subscribed and sworn to before me this day of 190.., at P. I.

Landing certificate of residence No.^b
issued in pursuance hereof.

Collector of Customs,
Port of P. I.

^aApplications shall be numbered consecutively by each collector of customs in the order in which they are received at his port, starting in each case with No. 1. Thus, each collector of customs will have a separate and distinct series of application numbers running from No. 1 up.

^bIf the applicant can sign his name in English, he should do so; if he can not sign in English, he should sign in Chinese characters, the collector of customs in that case writing the English equivalent beneath the signature. If the applicant can not sign his name at all, he shall make his mark in the usual form.

Landing certificate of residence No.

Form No.

PHILIPPINE CUSTOMS SERVICE.

PORT OF, P. I.

*Landing certificate of residence issued to Chinese person under the provisions of section 7 of act No. 702 of the Philippine Commission.*This is to certify that a Chinese
recently landed at this port, has made application (No.) at this custom-house for a

LANDING CERTIFICATE OF RESIDENCE

under the provisions of section 7 of act No. 702 of the Philippine Commission, and I hereby certify that it appears from the said application submitted by the Chinese person above named and from investigation made by me that said and that he is now lawfully entitled to land in these islands, and that the following is a descriptive list of the said Chinese person:

Name	Place of birth
Date of birth	Age
Registry of birth (if any)	Height
Occupation	Weight in pounds
Color of eyes	
Complexion	
Physical marks or peculiarities for identification	
Last residence	

And as a further means of identification I have affixed hereto a photographic likeness of the said and his true signature, as follows:

Given under my hand and official seal this
..... day of
190., at the Port of, P. I.

[PHOTOGRAPH.]

[SEAL.]
Collector of Customs,
Port of
Insular collector's number.....

Approved:

[SEAL OF INSULAR COLLECTOR OF CUSTOMS.]

Collector of Customs for the Philippine Archipelago.

^a Insert number of application made to collector of customs issuing landing certificate of residence.^b If the applicant can sign his name in English, he should do so; if he can not sign in English, he should sign in Chinese characters, the collector of customs in that case writing the English equivalent beneath the signature. If the applicant can not sign his name at all, he shall make his mark in the usual form.^c The official seal of the collector of customs shall be firmly impressed here on the original, duplicate, and triplicate of each landing certificate of residence in such manner as to cover a substantial portion of the photograph, but not to obscure the features.

PAR. XXII. The general rules hereinbefore prescribed for the issuance and disposition of regular applications and certificates of residence shall likewise apply to applications for and landing certificates of residence, which will be furnished by this office to collectors of customs bound in books of one hundred certificates in triplicate, each, and numbered consecutively, starting with number 1.

PAR. XXIII. *Landing identification cards.*—Before detaching from the books and forwarding the original and duplicate landing certificates of residence to the collector of customs for the Philippine Archipelago, in the manner prescribed for regular certificates of residence, the respective collectors of customs shall issue a "Landing identification card" to each Chinese person entitled to an original landing certificate of residence, informing him that he should call for his certificate and present his landing identification card at a time to be designated by each collector of customs, when the return mail might be with safety expected. Care should be taken in this respect to allow ample time for the return of the certificates from the insular collector of customs, in order that the applicants may not be required to make unnecessary trips to the offices of the respective collectors of customs to obtain their certificates.

The form of said "Landing identification cards" shall be as follows:

No.

PHILIPPINE CUSTOMS SERVICE.

Form No.

PORT OF....., P. I.

Landing identification card.

Issued by me this.....day of.....1903, to.....
 a Chinese.....last residing at....., who presented
 application for landing certificate of residence No.....at this custom-house,
 and for whom landing certificate of residence No.....has been forwarded to
 the insular collector of customs for approval. The following is a descriptive list of said.....:
 Date of birth.....; Place of birth.....
 Registry of birth (if any).....
 Occupation.....Age.....
 Color of eyes.....Height.....
 Complexion.....Weight in pounds.....
 Physical marks or peculiarities for identification.....

This landing identification card is to be presented at this custom-house on or not exceeding ten days after....., 190.....

Collector of Customs,
 Port of....., P. I.

Landing identification cards shall be taken up and destroyed upon delivery of the original landing certificates of residence.

PAR. XXIV. *Books of landing certificates of residence.*—The books of landing certificates of residence, containing the triplicate certificates, shall be retained securely on file in the offices of the respective collectors of customs until further instructions from this office.

PAR. XXV. Great care shall be taken not to confuse these landing certificates of residence in any way with the regular certificates of residence.

PAR. XXVI. Every Chinese person who is not entitled to a certificate of residence by virtue of his or her lawful residence in these islands on April 29, 1902, but who nevertheless may be entitled to come into these islands, shall, upon arrival, if he or she so requests, be likewise granted a landing certificate of residence, as prescribed by said section 7 of Act No. 702 of the Philippine Commission, which for convenience is herewith quoted:

"SEC. 7. Every Chinese person who may be entitled to come into the Philippine Islands shall upon landing, if he so requests, be given by the collector of customs of the port at which he lands a certificate containing his name, age, photograph, occupation, place of last residence, the date on which he landed, and such other data in respect to him as may be prescribed by the insular collector of customs, and such certificate shall be issued upon payment to the proper officer of fifty cents, United States currency, accompanied by a true photograph of the applicant, in triplicate, to the satisfaction of such officer."

PAR. XXVII. *Responsibility for and loss of certificates.*—All certificates of residence, originals, duplicates, and triplicates, as well as landing certificates of residence, shall be exactly accounted for, and registrars and deputy registrars of Chinese are hereby made officially accountable for all books of certificates or landing certificates of residence, and other forms transmitted to them.

In case any certificate, original, duplicate, or triplicate, should be lost or destroyed, a special report of that fact shall be promptly transmitted to this office, together with an affidavit of the registrar or deputy accountable for the lost or destroyed certificate, showing the cause of and facts in relation to such loss or destruction.

Great care is enjoined upon all registrars and deputies to prevent any occurrence of this kind.

PAR. XXVIII. *Reports.*—Registrars and deputy registrars are hereby directed promptly to report, upon receipt of these regulations, on the following questions, and otherwise comply with the following requests from this office:

(1) Whether they have an official seal.

(2) If so, send three impressions of the same on separate sheets of fairly thick, blank paper

NOTE.—Provincial treasurers and their deputies may draw a square or lines around the impressions to prevent any improper use of the same.

(3) Send three signatures, over official title, as collector of customs, treasurer, deputy treasurer, etc., as the case may be (not as registrar or deputy registrar), on separate sheets of blank paper.

NOTE.—Signatures may be lined in as suggested for seals, in order to prevent improper use of same.

(4) Report estimated number of Chinese persons in their respective registration districts at the present time. This estimate should be made independently by each registrar and deputy registrar for the entire registration district in which he is stationed.

(5) Registrars (only) to report the most conveniently located and easily reached towns

for the purpose of stationing registration officers in their respective registration districts, including the capital of each province forming part of said registration district and at least one other town in each province.

(6) Registrars (only) to report what facilities exist in each of said towns, or at other places in the respective registration districts, for having photographs taken, of the kind prescribed by these regulations.

In replying to these questions, answers should be numbered to correspond to each question.

PAR. XXIX. All official telegrams to this office shall be addressed to the "Collector of customs, Manila," and shall be signed "———, (last name) Registrar," or "Deputy Registrar," as the case may be.

PAR. XXX. *Caution.*—Registrars and deputy registrars of Chinese are hereby cautioned against permitting their subordinates to receive, directly or indirectly, any gratuity or thing of value from Chinese persons or others interested in their behalf, in connection with application for or the issuance of these certificates.

As all persons employed by registrars or deputy registrars in this work become thereby officers or employees of the government of the Philippine Islands, the following portion of section 315 of the Philippine customs administrative act is hereby quoted for the information of all concerned:

"SEC. 315. Any person who * * * shall by threats or demands, or promises of any character, attempt to improperly influence or control any such officer or employee of the government of the Philippine Islands as to the performance of his official duties, shall, on conviction thereof, be fined not exceeding two thousand dollars, or be imprisoned at hard labor not more than five years, or both, in the discretion of the court; and evidence of such giving or offering or promising to give, satisfactory to the court in which such trial is had, shall be regarded as prima facie evidence that such giving or offering or promising was contrary to law, and shall put upon the accused the burden of proving that such act was innocent and not done with unlawful intention."

In this connection section 6 of Act No. 702 of the Philippine Commission is herewith quoted:

"Sec. 6. Any person who shall knowingly and falsely alter or substitute any name for the name written in any certificate of registration or forge such certificate, or knowingly utter any forged or fraudulent certificate, or falsely personate the person to whom said certificate was originally issued, or who shall falsely present any such certificate, shall be punished by a fine of not to exceed one thousand dollars and imprisoned for a term not to exceed five years."

PAR. XXXI. *Accounts of certificates issued and fees collected.*—Collectors of customs, provincial treasurers, and other persons acting as registrars and deputy registrars of Chinese will be debited at the rate of fifty cents United States currency for each certificate of residence in triplicate transmitted to them, and at the end of each month during the period of registration a detailed report, on the form furnished for that purpose, showing the number of certificates received, the number of certificates issued, and the amount of fees collected therefor and transmitted to the insular collector of customs, per invoice (giving the invoice number), with statement of date of transmittal, and of the number of certificates remaining on hand, shall be forwarded to the insular collector of customs within ten days after the close of each month.

Each certificate shall show on the face thereof a notation of the amount, if any, collected in Mexican currency and the authorized rate at which such Mexican currency was received in payment of each certificate.

PAR. XXXII. When ready for the approval of the insular collector of customs the original and duplicate certificates of residence shall be accompanied by a cash remittance in the form of a post-office money order for the total amount due therefor.

PAR. XXXIII. The fee of fifty cents United States currency provided for in Act No. 702 of the Philippine Commission shall be paid by each Chinese person at the time his or her application is received and accepted.

PAR. XXXIV. *No receipts to be issued.*—Registrars and deputy registrars of Chinese shall not issue receipts (other than the identification cards) to Chinese persons paying the fee for certificates, and no accounting for such moneys shall be made except to the collector of customs for the Philippine Archipelago, by whom the money will be accounted for to the auditor.

The fees received under Act No. 702 of the Philippine Commission shall in no wise be confused or commingled with the ordinary office collections of those officials who are acting in the capacity of registrars or deputy registrars of Chinese.

PAR. XXXV. The expression "Chinese person" whenever used in these regulations shall be taken to include both sexes and all ages.

PAR. XXXVI. *Descriptive terms generally employed in certificates.*—For the information of registrars and deputy registrars of Chinese, the following descriptive terms generally employed in certificates granted to Chinese persons are hereby published.

Under the head of "complexion" the words usually employed are: Light; dark; medium; olive; leather colored.

Under the heading of "color of eyes" the following: Dark blue; black.

Under the heading "hair" the following: Gray; thin; bald; black.

The following "physical marks or peculiarities for identification" should also be noted: Scars; moles; pock marks; birth marks; deformities; injuries, such as finger gone, ears pierced or clipped, eye destroyed; large or small feet; sharp nose; thick lips; protruding teeth; prominent ears; prominent cheek bones; long face; round face, etc.

PAR. XXXVII. *Notices to Chinese; time for commencing actual registration.*—Upon receipt of these regulations registrars and deputy registrars of Chinese shall take immediate steps to give notice, through prominent Chinese persons and by posting suitable notices and extracts from these regulations, in English, Spanish, and Chinese, in the Chinese quarters of their respective registration districts, in order that all Chinese persons residing in said registration districts may be apprised of the purport and requirements of Act No. 702 of the Philippine Commission, and further, of the fact that applications for certificates of residence will be received from June 1, 1903, to September 30, 1903, at the place or places to be designated by registrars and deputy registrars, respectively, in such notices.

PAR. XXXVIII. The period for the actual registration as prescribed in the preceding paragraphs of these regulations has been fixed in the belief that the books of certificates of residence and all other necessary blanks and equipment will be in the hands of registrars and deputy registrars by that time. The actual registration period will thus include the months of June, July, August, and September of the present year.

PAR. XXXIX. This registration period, like many of the other provisions of these regulations, is tentative and subject to modification by subsequent instructions from this office.

PAR. XL. *Prescribing Chinese registration districts.*—For the purposes of these regulations the Philippine Archipelago is hereby divided into the following Chinese registration districts:

MANILA.

1. The Manila registration district, which shall include the city of Manila, the provinces of Rizal, Cavite, La Laguna, Bulacan, Pampanga, Bataan, and Infanta; the island of Lubang and adjacent islands.

CEBU.

2. The Cebu registration district, which shall include the city of Cebu, the island of Cebu, the Province of Oriental Negros, and the islands of Bohol, Leyte, Poro, Biliran, and Siquijor.

ILOILO.

3. The Iloilo registration district, which shall include the city of Iloilo, the island of Panay, the province of Occidental Negros, the Cagayan Islands, and the islands of Cuyo and Guimaras.

JOLO.

4. The Jolo registration district, which shall include all of the islands of the Jolo Archipelago, the island of Cagayan de Jolo, and all islands south of the latitude of the southern point of the island of Basilan.

ZAMBOANGA.

5. The Zamboanga registration district, which shall include the province of Zamboanga, the island of Basilan, and all adjacent islands between the latitude of the southern point of the island of Basilan and the seventh parallel of latitude.

PARAGUA.

6. The Paragua registration district, which shall include the island of Paragua, the Calamianes Islands, the island of Balabac, and all islands adjacent thereto.

CAGAYAN.

7. The Cagayan registration district, which shall include the province of Cagayan.

ILOCOS.

8. The Ilocos registration district, which shall include the provinces of Ilocos Norte and Ilocos Sur.

ABRA.

9. The Abra registration district, which shall include the province of Abra.

LEPANTO-BONTOC.

10. The Lepanto-Bontoc registration district, which shall include the province of Lepanto-Bontoc.

ISABELA.

11. The Isabela registration district, which shall include the province of Isabela.

UNION.

12. The Union registration district, which shall include the provinces of Union and Benguet.

NUEVA VIZCAYA.

13. The Nueva Vizcaya registration district, which shall include the province of Neuva Vizcaya.

PANGASINAN.

14. The Pangasinan registration district, which shall include the province of Pangasinan.

ZAMBALES

15. The Zambales registration district, which shall include the province of Zambales.

TARLAC.

16. The Tarlac registration district, which shall include the province of Tarlac.

NUEVA ECUIA.

17. The Nueva Ecija registration district, which shall include the provinces of Nueva Ecija and Principe.

BATANGAS.

18. The Batangas registration district, which shall include the province of Batangas and the islands of Maricaban and Verde.

TAYABAS.

19. The Tayabas registration district, which shall include the province of Tayabas and the island of Marinduque.

MINDORO.

20. The Mindoro registration district, which shall include the island of Mindoro.

ROMBLON.

21. The Romblon registration district, which shall include the province of Romblon and all islands included therein.

CAMARINES.

22. The Camarines registration district, which shall include the provinces of Camarines Norte and Camarines Sur and the island of Catanduanes.

ALBAY.

23. The Albay registration district, which shall include the province of Albay and the island of Burias.

SORSOGON.

24. The Sorsogon registration district, which shall include the province of Sorsogon and the islands of Masbate and of Ticao.

SAMAR.

25. The Samar registration district, which shall include the island of Samar and adjacent islands.

SURIGAO.

26. The Surigao registration district, which shall include the province of Surigao and the islands of Dinagat and Siargao.

MISAMIS.

27. The Misamis registration district, which shall include the province of Misamis and the island of Camiguin.

DAPITAN.

28. The Dapitan registration district, which shall include the province of Dapitan.

COTTABATO.

29. The Cottabato registration district, which shall include the province of Cottabato.

DAVAO.

30. The Davao registration district, which shall include the province of Davao and the islands of Sarangani, Samal, and Balut.

PAR. XLI. The above division of this archipelago into Chinese registration districts shall be considered as tentative only, until the same shall be confirmed or amended by further order of this office.

PAR. XLII. *Appointments of registrars and deputies—Manila.*—The insular collector of customs is hereby announced as the registrar of Chinese, and the treasurers of Rizal, Cavite, La Laguna, Bulacan, Pampanga, Bataan, and Infanta provinces, respectively, are hereby temporarily appointed deputy registrars of Chinese for the Manila registration district, and said treasurers shall be under the jurisdiction and supervision of the registrar of Chinese at Manila.

PAR. XLIII. *Cebu.*—The collector of customs for the port of Cebu is hereby temporarily appointed registrar of Chinese for the Cebu registration district.

The treasurers of the provinces of Oriental Negros and Leyte, and of the island of Bohol, and the coast district inspectors of customs at Tacloban and Dumaguete are hereby temporarily appointed deputy registrars of Chinese for the Cebu registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at the port of Cebu.

PAR. XLIV. *Iloilo.*—The collector of customs for the port of Iloilo is hereby temporarily appointed registrar of Chinese for the Iloilo registration district, and the treasurers of the provinces of Capiz, Antique, and Occidental Negros, the coast district inspectors of customs at the ports of San José de Buena Vista and Capiz, and the deputy coast district inspector of customs at Cuyo, are hereby temporarily appointed deputy registrars of Chinese for the Iloilo registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at the port of Iloilo.

PAR. XLV. *Jolo.*—The collector of customs for the port of Jolo is hereby temporarily appointed registrar of Chinese for the Jolo registration district.

The coast district inspector of customs at Siasi is hereby temporarily appointed deputy registrar of Chinese for the Jolo registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at the port of Jolo.

PAR. XLVI. *Zamboanga.*—The collector of customs for the port of Zamboanga is hereby temporarily appointed registrar of Chinese for the Zamboanga registration district.

PAR. XLVII. *Paragua.*—The coast district inspector of customs at Puerto Princesa is hereby temporarily appointed registrar of Chinese for the Paragua registration district.

PAR. XLVIII. *Cagayan.*—The coast district inspector of customs at Aparri is hereby temporarily appointed registrar of Chinese for the Cagayan registration district.

The treasurer of the province of Cagayan is hereby temporarily appointed deputy registrar of Chinese for the Cagayan registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at the port of Aparri.

PAR. XLIX. *Ilocos.*—The treasurer of the province of Ilocos Norte is hereby temporarily appointed registrar of Chinese for the Ilocos registration district.

The treasurer of the province of Ilocos Sur is hereby temporarily appointed deputy registrar of Chinese for the Ilocos registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese for said district.

PAR. L. *Abra.*—The treasurer of the province of Abra is hereby temporarily appointed registrar of Chinese for the Abra registration district.

PAR. LI. *Lepanto-Bontoc.*—The treasurer of the province of Lepanto-Bontoc is hereby temporarily appointed registrar of Chinese for the Lepanto-Bontoc registration district.

PAR. LII. *Isabela.*—The treasurer of the province of Isabela is hereby temporarily appointed registrar of Chinese for the Isabela registration district.

PAR. LIII. *Union.*—The coast district inspector of customs at San Fernando de la Union is hereby temporarily appointed registrar of Chinese for the Union registration district.

The treasurer of the province of Union is hereby temporarily appointed deputy registrar of Chinese for the Union registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at the port of San Fernando de la Union.

PAR. LIV. *Benguet*.—The treasurer of the province of Benguet is hereby temporarily appointed deputy registrar of Chinese for the Union registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at the port of San Fernando de la Union.

PAR. LV. *Nueva Vizcaya*.—The treasurer of the province of Nueva Vizcaya is hereby temporarily appointed registrar of Chinese for the Nueva Vizcaya registration district.

PAR. LVI. *Pangasinan*.—The treasurer of the province of Pangasinan is hereby temporarily appointed registrar of Chinese for the Pangasinan registration district.

PAR. LVII. *Zambales*.—The deputy coast district inspector of customs at Iba is hereby temporarily appointed registrar of Chinese for the Zambales registration district.

The treasurer of the province of Zambales is hereby temporarily appointed deputy registrar of Chinese for the Zambales registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at the port of Iba.

PAR. LVIII. *Tarlac*.—The treasurer of the province of Tarlac is hereby temporarily appointed registrar of Chinese for the Tarlac registration district.

PAR. LIX. *Nueva Ecija*.—The treasurer of the province of Nueva Ecija is hereby temporarily appointed registrar of Chinese for the Nueva Ecija registration district.

PAR. LX. *Batangas*.—The coast district inspector of customs at Batangas is hereby temporarily appointed registrar of Chinese for the Batangas registration district.

The treasurer of the province of Batangas is hereby temporarily appointed deputy registrar of Chinese for the Batangas registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at the port of Batangas.

PAR. LXI. *Tayabas*.—The treasurer of the province of Tayabas is hereby temporarily appointed registrar of Chinese for the Tayabas registration district.

PAR. LXII. *Mindoro*.—The treasurer of the province of Mindoro is hereby temporarily appointed registrar of Chinese for the Mindoro registration district.

PAR. LXIII. *Romblon*.—The deputy coast district inspector of customs at Romblon is hereby temporarily appointed registrar of Chinese for the Romblon registration district.

The treasurer of the province of Romblon is hereby temporarily appointed deputy registrar of Chinese for the Romblon registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at the port of Romblon.

PAR. LXIV. *Camarines*.—The treasurer of Ambos Camarines is hereby temporarily appointed registrar of Chinese for the Camarines registration district.

PAR. LXV. *Albay*.—The coast district inspector of customs at Legaspi is hereby temporarily appointed registrar of Chinese for the Albay registration district.

The treasurer of the province of Albay is hereby temporarily appointed deputy registrar of Chinese for the Albay registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at Legaspi.

PAR. LXVI. *Sorsogon*.—The coast district inspector of customs at Sorsogon is hereby temporarily appointed registrar of Chinese for the Sorsogon registration district.

The treasurer of the province of Sorsogon and the treasurer of the province of Masbate are hereby temporarily appointed deputy registrars of Chinese for the Sorsogon registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at Sorsogon.

PAR. LXVII. *Samar*.—The coast district inspector of customs at Catbalogan is hereby temporarily appointed registrar of Chinese for the Samar registration district.

The treasurer of the province of Samar is hereby temporarily appointed deputy registrar of Chinese for the Samar registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at Catbalogan.

PAR. LXVIII. *Surigao*.—The coast district inspector of customs at Surigao is hereby temporarily appointed registrar of Chinese for the Surigao registration district.

The treasurer of the province of Surigao is hereby temporarily appointed deputy registrar of Chinese for the Surigao registration district, and shall be under the jurisdiction and supervision of the registrar of Chinese at Surigao.

PAR. LXIX. *Misamis*.—The treasurer of the province of Misamis is hereby temporarily appointed registrar of Chinese for the Misamis registration district.

PAR. LXX. *Cottabato*.—The coast district inspector of customs at Cottabato is hereby temporarily appointed registrar of Chinese for the Cottabato registration district.

PAR. LXXI. Registrars and deputy registrars of Chinese for the Dapitan and Davao registration districts will be announced by a subsequent order.

PAR. LXXII. Philippine customs officers and all registrars and deputy registrars of Chinese shall give due publicity to the terms of this circular.

W. MORGAN SHUSTER,
Collector of Customs for the Philippine Archipelago.

EXHIBIT C.

CHINESE AND IMMIGRATION CIRCULAR NO. 141.

Extending time for registration of Chinese to October 29, 1903.

OFFICE OF THE COLLECTOR OF CUSTOMS,
FOR THE PHILIPPINE ISLANDS,
Manila, September 12, 1903.

To all collectors of customs, provincial treasurers, and others concerned:

PARAGRAPH I. Pursuant to Paragraph XXXIX of Chinese and Immigration Circular No. 85 of this office, the time for the registration of Chinese persons in these islands under the provisions of act No. 702 of the Philippine Commission is hereby extended to October 29, 1903.

PAR. II. Paragraphs III, XXXVII, and XXXVIII of said Chinese and Immigration Circular No. 85, are hereby modified so as to conform thereto.

PAR. III. Philippine customs officers and all registrars and deputy registrars of Chinese shall give due publicity to the terms of this circular.

W. MORGAN SHUSTER,
Collector of customs for the Philippine Islands.

EXHIBIT D.

[ACT No. 989.]

AN ACT amending section fifteen of act numbered seven hundred and two by extending the time for completing the registration of Chinese in the Philippine Islands.

By authority of the United States, be it enacted by the Philippine Commission, That whereas it was impossible to complete the registration of all Chinese persons in the Philippine Islands within the six months ending October twenty-ninth, nineteen hundred and three, in accordance with section fifteen of act numbered seven hundred and two, the time for such registration is, pursuant to authority granted by section four of the act of Congress approved April twenty-ninth, nineteen hundred and two, hereby extended for a period of two months to date from October twenty-ninth, nineteen hundred and three.

SEC. 2. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 3. This act shall take effect on its passage.

Enacted, November 9, 1903.

EXHIBIT E.

[ACT No. 1035.]

AN ACT amending section fifteen of act numbered seven hundred and two, and section one of act numbered nine hundred and eighty-nine, by extending the time for completing the registration of Chinese in the Philippine Islands.

Whereas it was impossible to complete the registration of all Chinese persons in the Philippine Islands within the eight months ending December twenty-ninth, nineteen hundred and three, as provided in acts numbered seven hundred and two and nine hundred and eighty-nine: Therefore,

By authority of the United States, be it enacted by the Philippine Commission, That the time for such registration is, pursuant to authority granted by section four of the act of Congress approved April twenty-ninth, nineteen hundred and two, hereby extended for a period of two months, to date from December twenty-ninth, nineteen hundred and three.

SEC. 2. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 3. This act shall take effect on its passage.

Enacted, January 6, 1904.

CHINESE AND IMMIGRATION CIRCULAR NO. 141.

Extending time for registration of Chinese to October 29, 1903.

OFFICE OF THE COLLECTOR OF CUSTOMS,
FOR THE PHILIPPINE ISLANDS,
Manila, September 12, 1903.

To all collectors of customs, provincial treasurers, and others concerned:

PARAGRAPH I. Pursuant to Paragraph XXXIX of Chinese and Immigration Circular No. 85 of this office, the time for the registration of Chinese persons in these islands under the provisions of act No. 702 of the Philippine Commission is hereby extended to October 29, 1903.

PAR. II. Paragraphs III, XXXVII, and XXXVIII of said Chinese and Immigration Circular No. 85, are hereby modified so as to conform thereto.

PAR. III. Philippine customs officers and all registrars and deputy registrars of Chinese shall give due publicity to the terms of this circular.

W. MORGAN SHUSTER,
Collector of customs for the Philippine Islands.

EXHIBIT D.

[ACT No. 989.]

AN ACT amending section fifteen of act numbered seven hundred and two by extending the time for completing the registration of Chinese in the Philippine Islands.

By authority of the United States, be it enacted by the Philippine Commission. That whereas it was impossible to complete the registration of all Chinese persons in the Philippine Islands within the six months ending October twenty-ninth, nineteen hundred and three, in accordance with section fifteen of act numbered seven hundred and two, the time for such registration is, pursuant to authority granted by section four of the act of Congress approved April twenty-ninth, nineteen hundred and two, hereby extended for a period of two months to date from October twenty-ninth, nineteen hundred and three.

SEC. 2. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 3. This act shall take effect on its passage.

Enacted, November 9, 1903.

EXHIBIT E.

[ACT No. 1035.]

AN ACT amending section fifteen of act numbered seven hundred and two, and section one of act numbered nine hundred and eighty-nine, by extending the time for completing the registration of Chinese in the Philippine Islands.

Whereas it was impossible to complete the registration of all Chinese persons in the Philippine Islands within the eight months ending December twenty-ninth, nineteen hundred and three, as provided in acts numbered seven hundred and two and nine hundred and eighty-nine: Therefore,

By authority of the United States, be it enacted by the Philippine Commission. That the time for such registration is, pursuant to authority granted by section four of the act of Congress approved April twenty-ninth, nineteen hundred and two, hereby extended for a period of two months, to date from December twenty-ninth, nineteen hundred and three.

SEC. 2. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 3. This act shall take effect on its passage.

Enacted, January 6, 1904.

CHINESE AND IMMIGRATION CIRCULAR NO. 141.

Extending time for registration of Chinese to October 29, 1903.

OFFICE OF THE COLLECTOR OF CUSTOMS,
FOR THE PHILIPPINE ISLANDS,
Manila, September 12, 1903.

To all collectors of customs, provincial treasurers, and others concerned:

PARAGRAPH I. Pursuant to Paragraph XXXIX of Chinese and Immigration Circular No. 85 of this office, the time for the registration of Chinese persons in these islands under the provisions of act No. 702 of the Philippine Commission is hereby extended to October 29, 1903.

PAR. II. Paragraphs III, XXXVII, and XXXVIII of said Chinese and Immigration Circular No. 85, are hereby modified so as to conform thereto.

PAR. III. Philippine customs officers and all registrars and deputy registrars of Chinese shall give due publicity to the terms of this circular.

W. MORGAN SHUSTER,
Collector of customs for the Philippine Islands.

EXHIBIT D.

[ACT No. 989.]

AN ACT amending section fifteen of act numbered seven hundred and two by extending the time for completing the registration of Chinese in the Philippine Islands.

By authority of the United States, be it enacted by the Philippine Commission. That whereas it was impossible to complete the registration of all Chinese persons in the Philippine Islands within the six months ending October twenty-ninth, nineteen hundred and three, in accordance with section fifteen of act numbered seven hundred and two, the time for such registration is, pursuant to authority granted by section four of the act of Congress approved April twenty-ninth, nineteen hundred and two, hereby extended for a period of two months to date from October twenty-ninth, nineteen hundred and three.

SEC. 2. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 3. This act shall take effect on its passage.

Enacted, November 9, 1903.

EXHIBIT E.

[ACT No. 1035.]

AN ACT amending section fifteen of act numbered seven hundred and two, and section one of act numbered nine hundred and eighty-nine, by extending the time for completing the registration of Chinese in the Philippine Islands.

Whereas it was impossible to complete the registration of all Chinese persons in the Philippine Islands within the eight months ending December twenty-ninth, nineteen hundred and three, as provided in acts numbered seven hundred and two and nine hundred and eighty-nine: Therefore,

By authority of the United States, be it enacted by the Philippine Commission. That the time for such registration is, pursuant to authority granted by section four of the act of Congress approved April twenty-ninth, nineteen hundred and two, hereby extended for a period of two months, to date from December twenty-ninth, nineteen hundred and three.

SEC. 2. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 3. This act shall take effect on its passage.

Enacted, January 6, 1904.

EXHIBIT F.

[ACT NO. 1084.]

AN ACT amending section fifteen of act numbered seven hundred and two, section one of act numbered nine hundred and eighty-nine, and section one of act numbered one thousand and thirty-five by extending the time for completing the registration of Chinese in the Philippine Islands.

Whereas it was impossible to complete the registration of all Chinese persons in the Philippine Islands within the ten months ending February twenty-ninth, nineteen hundred and four, as provided in acts numbered seven hundred and two, nine hundred and eighty-nine, and one thousand and thirty-five: Therefore,

By authority of the United States, be it enacted by the Philippine Commission, That the time for such registration is, pursuant to authority granted by section four of the act of Congress approved April twenty-ninth, nineteen hundred and two, hereby extended for a period of two months, to date from February twenty-ninth, nineteen hundred and four.

SEC. 2. The public good requiring the speedy enactment of this bill, the passage of the same is hereby expedited in accordance with section two of "An act prescribing the order of procedure by the Commission in the enactment of laws," passed September twenty-sixth, nineteen hundred.

SEC. 3. This act shall take effect on its passage.

Enacted, March 10, 1904.

EXHIBIT G.

CHINESE AND IMMIGRATION CIRCULAR NO. 157.

Regulations governing the issuance of duplicate-original certificates of residence to take the place of certificates lost or destroyed.

OFFICE OF THE COLLECTOR OF CUSTOMS

FOR THE PHILIPPINE ISLANDS,

Manila, March 23, 1904.

To all collectors of customs, provincial treasurers, and others concerned:

The following is hereby published for the information and guidance of all concerned:

"SIR: Your letter of the 23d instant in reference to the issuance of duplicate original certificates of residence has been received. In reply thereto I have to inform you that section 4 of act No. 702 of the Philippine Commission provides for the issuance of duplicate certificates of residence to take the place of original certificates lost or destroyed, under such regulations as may be prescribed by the insular collector of customs, and upon the payment of double the fee exacted for the original certificate.

"Regulations covering the issuance of such certificates are prescribed in Paragraph XVII of Chinese and Immigration Circular No. 85.

"You are requested to forward the necessary affidavits and two photographs, together with the fee of \$1 United States currency, to this office, retaining a copy of the affidavits and one photograph to attach to the duplicate certificate now on file in your office. Upon receipt of same, the affidavits being deemed sufficient, a duplicate of the original certificate will be issued by this office. Affidavits should be obtained in duplicate in order to complete the record in the offices of both the registrar and the insular collector of customs. Respectfully, (signed) H. B. McCoy, Acting Collector of Customs for the Philippine Islands."

H. B. McCoy,

Acting Collector of Customs for the Philippine Islands.

EXHIBIT H.

CHINESE AND IMMIGRATION CIRCULAR NO. 161.

Disposition of certificates of residence remaining on hand undelivered.

OFFICE OF THE COLLECTOR OF CUSTOMS

FOR THE PHILIPPINE ISLANDS,

Manila, July 30, 1904.

To all collectors of customs, provincial treasurers, and others concerned:

PARAGRAPH I. Chinese certificates of residence remaining on hand undelivered in the offices of registrars and deputy registrars of Chinese shall be held in said offices for a period

of one year from the close of the registration period (April 29, 1904), after which time all undelivered certificates shall be canceled, the original copy to be forwarded to this office, and the duplicate copy placed on file with the permanent records of the office where issued.

PAR. II. Chinese merchants returning to the islands after this period who have had their certificates of residence canceled in accordance with Paragraph I of this circular, may be issued a landing certificate of residence at the port in which they enter in lieu of the certificate canceled upon payment of the regular fee therefor.

PAR. III. Philippine customs officers and all registrars and deputy registrars of Chinese shall give due publicity to the terms of this circular.

W. MORGAN SHUSTER,
Collector of Customs for the Philippine Islands.

APPENDIX G.

REPORT OF THE DEPUTY SURVEYOR OF CUSTOMS, IN CHARGE OF ARRASTRE.

OFFICE OF THE DEPUTY SURVEYOR OF CUSTOMS,
IN CHARGE OF ARRASTRE PLANT,
Manila, September 15, 1904.

SIR: I have to submit, pursuant to your directions, the report of the operations of the arrastre plant of the Manila custom-house for the period from October 16, 1903, to September 1, 1904.

"Arrastre" is a Spanish word meaning "transportation of goods from one place to another."

The arrastre system for unloading imported merchandise at the custom-house wharf and conveying it to the custom-house warehouses was purchased by the government and placed under governmental control October 16, 1903, as a remedy for the bad conditions which then and formerly existed at Manila in regard to the delays, expense, and difficulty in discharging imported merchandise, whereby steamships were subjected to great demurrage and importers to exactions and annoyances.

The results accomplished have been, in brief:

- (1) Ships have saved demurrage.
- (2) A better and more expeditious service has been given at the custom-house wharf and warehouses.
- (3) Importers have been saved much expense.
- (4) Breakage of goods due to rough handling has been almost if not quite prevented—a further saving.
- (5) The service has been self-sustaining, and has in addition refunded the entire cost of the plant to the government.
- (6) Importers and ship agents are pleased and satisfied.
- (7) The former bad name of the port of Manila has been wiped out.

REASONS FOR PURCHASE OF ARRASTRE.

The operation by the government of the arrastre system at the custom-house had been considered and recommended almost since the American occupation of the Philippines. One of the leading factors which gave a bad name to the port of Manila, causing steamships and commerce to avoid it, was the unsatisfactory and expensive conditions and delays surrounding the discharge of imported merchandise, created by inadequate landing facilities and the practice of sorting all cargoes on board the steamships regardless of the delay occasioned, and by the delays in landing and warehousing.

In the first report of the secretary of finance and justice, made to the Philippine Commission November 1, 1902, the bad condition then and previously existing was discussed as follows:

"There has been very great complaint in regard to the expense of bringing imported merchandise from steamers in the harbor to the custom-house and wharves and landing them and placing them in proper warehouses, and of the delay in such operations owing to the insufficient character of the lightering and landing facilities and the method of carrying on that business, and from sorting the cargo on board the incoming steamers in such way that each owner might receive his own merchandise in his own casco or lighter or cascos and lighters engaged by him for that purpose. Steamers have been subjected to great demurrage by the delay incident to that process and to the insufficient landing facilities at the custom-house wharves."

In the second annual report of the secretary of finance and justice for the period ending September 1, 1903, it was stated:

"It was considered highly undesirable that the steam cranes and derricks for unloading goods upon the customs wharves and the tramways should belong to private individuals and be operated by them. It was particularly objectionable at Manila, in view of the fact that the owners of the arrastre plant were likewise the largest owners of cascoes, lorchas, and lighters for bringing the goods to the customs wharves from the steamers, and the charge was often made, justly or unjustly, that importers who did not employ the owners of the arrastre plant to do their lightering were discriminated against so that their goods were delayed in landing and their demurrage expenses were made much larger. Under the provisions of act No. 897 the government undertakes to perform the arrastre operations at actual cost, so that importers are furnished the best of facilities and all extortionate charges or discrimination are rendered impossible."

This arrastre system, by which a private contractor possessing a monopoly handled the imported merchandise within the custom-house, was found in existence at the American occupation, and was allowed by tacit consent, but without official sanction, to continue as a temporary solution of a difficult problem. The several collectors of customs called attention to the situation and the bad conditions existing, suggesting various remedies.

PREVIOUS HISTORY.

Previous to 1886 each individual importer of Manila received his merchandise at the ship's side in the bay in his own casco or lighter, and got it ashore and through the custom-house with his own labor as best he could. As importations increased, this system, or rather lack of system, was found more and more impracticable and expensive. In November, 1886, the importers got together on the matter and with consent of the Spanish Government entered into a contract with Ramon Montanez to discharge all vessels from foreign ports, to lighter the merchandise ashore to the custom-house, and to land and warehouse the goods. When delivery was desired the importer would bring his own or hired laborers into the warehouses and take out his goods—an especially obnoxious feature from a custom-house standpoint and considering that many other importers had merchandise in the same warehouse. Montanez placed three steam cranes on the wharf and installed the tramway with its steam locomotives and cars for conveying the merchandise from the wharf on the river front to the custom warehouses. Montanez later sold the plant and contract to Santiago Dominguez & Co., who operated it until after the American occupation, when it was sold to D. M. Carman & Co., December 5, 1898. This firm soon after entered into two new contracts with the importers, surrendering the old, (1) to lighter the foreign merchandise from the ships to the custom-house wharf, and (2) to do the arrastre work proper of conveying the merchandise from the wharf to and storing it in the warehouses. They improved the arrastre plant, added another steam crane in 1901, built additional tracks to the new warehouses constructed in 1901, and added new cars.

PURCHASE BY CUSTOM-HOUSE.

In 1902 the question of governmental operation of the arrastre plant was taken up with more earnestness by the insular collector of customs, and some preliminary negotiations were had with Carman & Co. looking to the purchase of the system. The matter was laid before the Philippine Commission, which on January 28, 1903, passed a resolution authorizing the secretary of finance and justice and the collector of customs to negotiate for the purchase of the plant and to operate it, and on March 7, 1903, a further resolution authorizing the collector of customs to so purchase it.

After an appraisal of the property, consisting of steam cranes, locomotives, cars, railroad tracks, and other machinery and appliances, the purchase was consummated by the Philippine Commission in Act No. 897, passed September 23, 1903, which appropriated P 29,000 for the purpose, and also P 10,000 additional for placing the system in operation. The receipts for the service were made a permanent appropriation to pay its expenses, the intention being to make the charge merely sufficient to cover the cost of operation. The collector of customs was authorized by the same act to operate, maintain, and administer the arrastre system, and to fix and collect charges for the service. In accordance therewith regulations for the organization, government, and operation of the arrastre service were issued. In the main the personnel employed by the former owners was retained, but reorganized and placed under custom-house administration. An office and clerical force were established and provisions made for collecting a charge for all the merchandise handled in the custom-house.

On October 16, 1903, the custom-house assumed control of the arrastre. In the absence of data and experience upon which to fix the rate for the charge, other than that furnished by the former owners, the same rate as charged by them was continued as a tentative

measure, ₱1.50 per ton. The charge of 50 centavos per ton on all merchandise permitted to take delivery in bulk without discharging on the custom-house wharf, known as "pasé delivery," was immediately discontinued, saving to the importers about ₱37,000 a year.

In a month's time it was found that the handling of the merchandise stored upon and delivered from the wharf, instead of the warehouses, could be done at less cost, and the rate for wharf delivery was lowered to ₱1 per ton, effecting a saving of about ₱8,300 a year to the importers. They have been encouraged to take wharf deliveries as not only a saving of expense but a saving of time, and every facility possible has been given them which would effect an economy and do away with bad conditions which had hampered the incoming commerce of Manila. The great majority of importers have appreciated, and cooperated with, these betterments of service, and have been led to institute better business methods of their own, effecting further savings which can not well be estimated, but which do exist.

ADDITIONAL SERVICE GIVEN.

Although the arrastre rate was retained at ₱1.50 per ton, much additional service was at once given for the one charge. Previous to the assumption of the arrastre by the custom-house the service consisted of the conveyance of the merchandise from the custom-house wharf to the warehouses and the storing therein. It ended at that point. The merchandise had been stored more or less indiscriminately, neither a ship's cargo nor individual consignments being kept together, but scattered through two, three, or more warehouses. When delivery was desired, the consignee would go into a warehouse with his cooly laborers, and after vexatious search and much work of piling and repiling boxes would get his goods together, carry them out of the warehouse, and put them on his carts. The consignee was also required to carry the samples selected for examination and appraisal from the warehouses to the appraiser's stores, and also to furnish the laborers for the opening of cases and the unpacking and repacking of the contents. All this work was taken over by the new arrastre division of the custom-house, the service to be included in the charge of ₱1.50 per ton. The storing of merchandise was at once systematized by each ship's cargo being kept together in a warehouse and by each individual consignment being piled together. This did away with one of the bad conditions that existed at the port of Manila, of sorting cargoes on board incoming steamers, delaying their departure and causing great demurrage. When delivery is desired, the arrastre laborers now take the merchandise out of the warehouse, delivering it to the consignee's carts. Arrastre laborers also carry the sample cases to the appraiser's stores and perform all labor required therein, consisting of the handling of the cases for examination and appraisal, the unpacking and repacking, and delivery outside the stores to the consignee. Not only has this reform kept all coolies (except customs employees) and other unauthorized persons out of the warehouses and appraiser's stores, but it has effected another considerable saving to importers estimated at about ₱41,000 a year.

NO DELAY AT WHARF.

By improvements to the plant, adding new facilities and changing methods, a quicker handling of the merchandise has been secured, by reason of which lighters are now discharged one-third or more quicker at the wharf. This enables the lighters to return to the bay for further cargo, and a consequent faster discharge of the incoming steamships, whereby they are enabled to save demurrage. It has done away with the former complaint that there were not enough closed lighters to do the business of the port. It has aided materially in correcting the evils which surrounded shipping and commerce coming to Manila.

Loaded lighters are discharged at the wharf in the order in which they arrive. Thus there is absolutely no discrimination in discharging. Perishable articles, like vegetables, etc., are given a preference, but otherwise without interfering with the order of discharge.

IMPROVEMENTS IN WAREHOUSING.

When the arrastre plant was acquired the merchandise was conveyed into the warehouses from the wharf by running the loaded tramway flat cars into each warehouse on a single track. As the empty cars had to be taken out through the same doorway, which also served as the egress of the coolies taking out merchandise for delivery, much difficulty and confusion was experienced, frequent blockades being caused, which delayed the work of the whole service, being felt on the wharf as well. This bad condition has been remedied by taking up the tracks into the warehouses, replacing them with broad runways, constructing receiving platforms outside next to the main track on the one side and delivery platforms at other doors on the other side and handling the cases of merchandise by hand trucks. The blockades have been prevented and much confusion done away with. Fewer laborers are required—a considerable saving of expense. The better facilities have

lessened the liability of breakage from rough handling. It is a big improvement over old methods. By the changes mentioned the old warehouses have been made as much as possible like the new warehouse "P" under the new wing of the customs building. With its unimpeded wooden floor, plenty of doors, wooden platform outside, of a height of the carts, the handling of the merchandise has been vastly facilitated and the time reduced one-half or more, especially by use of the warehouse trucks introduced by the arrastre division. Quickness of delivery has been the object sought. No complaints are now made of inability to obtain merchandise out of the custom-house as soon as the consignee wants it. On the contrary, complaints have been made that delivery is ready before the consignee is.

SAMPLE PACKAGES.

The sample packages for appraiser's examination were until lately not taken to the appraiser's stores until requested by the consignee, who brought the permit for the samples with him from the appraiser's office. This has been changed by the permits being sent without intervention of the consignee and by the samples being transferred to the stores by the arrastre force without delay. This work has been so systematized that a saving has been effected not only in arrastre labor, but the good effects are felt in the work of appraisal. It has also resulted in a saving to the importers, who need fewer representatives—a saving not readily ascertainable, but a fact.

UNINTENTIONAL PROFITS.

Notwithstanding these enlargements of the service performed by the arrastre system, the expense was kept down by more systematic and better methods, so that in time it was found that the charge of ₱1.50 per ton yielded a considerable profit, even after many improvements had been made to the plant. It was not the intention of the government and the insular collector of customs to conduct the arrastre service for the purpose of making a profit and thus create a revenue, but to do the work for cost and thus make the service as inexpensive as possible to the importer. But a surplus being unintentionally created, the general fund of the Philippine government was reimbursed on June 27 last by ₱22,368.39 being paid back out of the arrastre profits as a partial refund of the ₱36,368.39 expended out of the appropriation by the Commission for the purchase and operation of the plant. Another refund of ₱5,000 was made August 3 and the remainder, ₱9,000, was paid back September 8.

Thus the entire cost of the arrastre plant to the government has been paid back (without expectation) out of its earnings, notwithstanding the greatly increased service and the reduction of the rate, in less than one year from the date of the appropriation for its purchase and less than eleven months from the actual assumption of the service by the custom-house.

The charge of ₱1.50 per ton having yielded net profits larger than expected, on July 1, 1904, the arrastre rate was reduced by 16 per cent—from ₱1.50 per ton to ₱1.25 for warehouse deliveries, and from ₱1 to ₱0.90 per ton for wharf deliveries. This reduction will save the importers of Manila over ₱22,300 a year.

EXPENSE SAVED TO IMPORTERS.

Altogether, therefore, the taking over and operation of the arrastre service by the custom-house has saved to the importers of Manila over ₱108,600 a year of the expense to which they were formerly subjected, as follows:

Pasé deliveries.....	₱ 37, 000
Wharf deliveries.....	8, 300
Warehouse deliveries and handling of sample packages.....	41, 000
Reduction of rate to ₱1.25 and 90 centavos.....	22, 300
Total.....	108, 600

The importers have also saved some other expenditures, especially demurrage on lighters, which can not well be computed, and it is believed have been given a greatly improved and more expeditious service and freer from liability to breakage than they ever enjoyed before.

Moreover the saving of demurrage to steamships coming to Manila has been very considerable. It is not only a saving to the shipping of Manila in actual money, but it is a reform that wipes out an evil which contributed much in former years to giving a bad name to this port and to hampering the commerce of the Philippine Islands.

IMPROVEMENTS TO PLANT.

The plant of the arrastre system has been much improved. The locomotive in use on the tramway, a French engine of old style, being unable to haul the traffic, a new American

locomotive of latest design and double the capacity has been purchased. It has the distinction of being the first American locomotive to be introduced into the Philippine Islands. The light rails of the main line of the tramway have been replaced with heavy steel rails. New tracks and switches have been laid, increasing the trackage 50 per cent and vastly improving the facilities. A firm roadbed paved with cobblestone has been constructed. Board runways with receiving and delivery platforms have been built in five warehouses and a sixth is now being likewise improved. A track has been constructed through the appraiser's stores for the conveyance of samples direct from the warehouses. The warehouses have all been supplied with hand trucks, which the Filipino laborers handle quite well, contrary to the expectation of many. The steam cranes and other machinery have all been repaired and put in good condition. About half the customs wharf has been repaved by the arrastre division, and quite a number of minor improvements have been made to facilitate the work. Altogether P 13,784.42 has been expended on additions and improvements to the plant in materials, besides considerable labor.

FIRE AND POLICE PROTECTION.

The arrastre division maintains and has charge of a system of fire protection of the custom-house grounds, consisting of a reel and fire hose and barrels and buckets. It also provides four policemen and watchmen in the warehouses by day and one on the wharf at night, in addition to the regular custom-house watchmen. The division also cleans the customs wharf and grounds once or twice each day.

OFFICE AND PERSONNEL.

The entire finances of the arrastre are conducted by its own office, the collections for the charges being made by its receiving teller and deposited with the insular treasurer in separate account. The expenditures are made by its disbursing officer under the usual regulations. A complete system of accounts is kept in its office.

The personnel has given excellent service. In the office the chief clerk and two clerks are Americans and the receiving teller, bookkeeper, and three clerks are Filipinos. In the wharf and warehouse force the wharfinger (who has general charge) is an American. The first assistant wharfinger, the warehouseman, and first assistant warehouseman are Spaniards (now Philippine citizens); the second assistant warehouseman a Chinese, and three other assistants Filipinos—all these being old employes of the arrastre retained by the custom-house. The engineers of locomotives and steam cranes, the superintendent of the tramway railroad, the conductors, firemen, machinists, and watchmen are Filipinos, as are also the 12 wharf and warehousemen foremen and the 12 openers and packers. Both Chinese and Filipino carpenters are employed. The laborers are all Filipinos—mostly Pampangas, Visayans, and Ilocanos, only a very few Tagalogs. About one-fourth are steady workers. Another fourth, or a little more, work about three to four days a week. The others come and go, working one to two or three day a week. There has never been any difficulty in obtaining all laborers needed. They do good work if plentifully superintended, but not otherwise. They are paid 90 centavos Philippine currency per day of eight hours, and at the same rate for overtime, and are paid weekly. The average number employed is 125 to 150.

The skilled and semiskilled employees are paid monthly and number 65 to 70. The native assistant superintendents are paid salaries of from P 42 to P 50, the locomotive engineers from P 42 to P 50, the crane engineers P 34, firemen P 20, machinists P 25 to P 50, carpenters P 40 to P 50, wharf and warehouse foremen P 30, and openers and packers P 30.

The whole force of skilled and semiskilled employees and laborers have done good work, being well and liberally superintended.

FINANCIAL STATEMENT.

The following shows the amount of merchandise handled by the arrastre plant from October 16, 1903, to June 30, 1904:

	Tons.
Merchandise delivered from wharf.....	11,511.66
Merchandise delivered from warehouses.....	57,248.44
Total tonnage of merchandise landed at custom-house.....	68,760.10
Merchandise given pass delivery.....	51,579.82

Statement of the finances of the arrastre from October 16, 1903, to August 31, 1904.

DEBITS.

Gross cash receipts.....	₱ 139,489.34
Refunded for pasé and wharf deliveries.....	23,925.60
Arrastre collections, net.....	115,563.74
Appropriation, Act No. 897.....	7,368.39
Exchange of currency and miscellaneous sources.....	91.14
Total debits.....	123,023.27

CREDITS.

Reimbursement to general fund, government of Philippine Islands.....	₱ 27,368.39
Expense:	
Labor.....	₱ 24,824.93
Salaries.....	35,562.75
Supplies.....	7,392.78
Improvements to plant.....	13,784.42
Overtime, customs employees.....	1,743.36
Total expenditures.....	83,308.24
Treasurer's balance, August 31, 1904.....	₱ 8,013.36
Disbursing officer's balance, August 31, 1904.....	3,743.65
Cash balance, August 31, 1904.....	589.63
Total balances.....	12,346.64
Total credits.....	123,023.27

The ₱ 29,000 appropriated and expended for the purchase of the plant is not included in the above statement. As stated above, since September 1, 1904, ₱ 9,000 additional has been reimbursed to the general fund of the government, making the total refunded ₱ 36,368.39, all that was expended out of the appropriation for the arrastre.

The greatest satisfaction of the operation of the arrastre plant by the custom-house is not so much in the favorable financial exhibit as it is in the belief that great relief has been given to the importers and that a bad condition hampering the port of Manila and choking its commerce has been destroyed.

Respectfully,

CLIFFORD D. HAM,
Deputy Surveyor of Customs, in Charge of Arrastre.

The COLLECTOR OF CUSTOMS FOR THE PHILIPPINE ISLANDS.

(Through office of insular surveyor.)

EXHIBIT 8.

ANNUAL REPORT OF THE ACTING COLLECTOR OF INTERNAL REVENUE.

OFFICE OF ACTING COLLECTOR OF INTERNAL REVENUE,
Manila, P. I., October 1, 1904.

The honorable the SECRETARY OF FINANCE AND JUSTICE,
Manila, P. I.

SIR: As the acting collector of internal revenue to date of August 1, 1904, I have the honor to submit herewith my report covering the period from September 1, 1903, to which date the last annual report was brought, to August 1, 1904, when "the internal-revenue law of 1904" went into effect and a complete reorganization of the bureau inaugurated.

As is well known to you, sir, the jurisdiction of the collector of internal revenue was limited to the unorganized provinces. Little by little the field became narrowed down to a part of the island of Mindanao and to the Jolo Archipelago, and not long after the closing of the last annual report all this territory was swept from under our control by the inauguration of the Moro government.

Exhibit A, hereto attached and made a part of this report, shows the internal-revenue collections from September 1, 1903, to date of transfer to the new government above referred to.

The undersigned, as acting collector of internal revenue, continued until August 1, 1904, to collect the fees for the forestry bureau on forestry products coming to and assessed in the city of Manila. Said collections are covered by Exhibit B, hereto attached.

The distribution of revenue stamps to the provincial treasurers, through the insular treasurer, was also continued up to August 1. Exhibit C, attached hereto, shows such distribution and also shows the account balanced by transfer of stock to the city assessor and collector. Such stamps are now handled and distributed by the said city assessor and collector of the city of Manila, in accordance with the provisions of Act No. 527.

Exhibit D, attached hereto, is a complete return of the accountable and expendable property on hand belonging to the internal-revenue bureau, the disposition of which the undersigned awaits your instructions.

Respectfully submitted.

A. W. HASTINGS,
Acting Collector Internal Revenue, Philippine Islands.

Statement of the finances of the arrastre from October 16, 1903, to August 31, 1904.

DEBITS.

ANNUAL REPORT OF THE COLLECTOR OF INTERNAL REVENUE.

BUREAU OF INTERNAL REVENUE
OF THE PHILIPPINE ISLANDS,
OFFICE OF THE COLLECTOR,
Manila, P. I., September 19, 1904.

The honorable HENRY C. IDE,
Secretary of Finance and Justice, Manila, P. I.

SIR: In accordance with the provisions of section 4 of the "internal-revenue law of 1904," and complying with your request of the 6th instant, I have the honor to submit herewith, for transmission to the Philippine Commission, my first annual report of the proceedings in the bureau of internal revenue, including a statement of certain collections and disbursements therein.

The data submitted herewith are necessarily quite incomplete, for the following reasons: First, only a portion of the taxes imposed in the internal-revenue law are now being collected, as by the provisions of that law the taxes imposed on certain persons, objects, and occupations do not become operative until January 1, 1905; second, this bureau has been in existence less than two months, and it has not been possible in so short a period to properly organize the work in the provinces; and third, the time available for the preparation of this report was so brief as to make it impossible to secure complete statistical reports from the provincial treasurers. No exhaustive review of the situation can, therefore, be attempted at this time. The statistics submitted herewith in the accompanying exhibits are for the city of Manila, and for the month of August, 1904, and may be taken as fairly accurate and complete. The only change which the final figures will make in the various statistics will be in the way of increasing the number of registered taxpayers and amount of taxes paid. When complete reports have been received from the provinces the figures of tax collections herein given will be increased very materially.

TAXES NOW BEING COLLECTED.

Act No. 1189 of the Philippine Commission, "the internal revenue law of 1904," enacted July 2, 1904, imposed the following taxes, effective on August 1, 1904: On each proof liter of distilled spirits, containing amyl alcohol or other poisonous substances, removed for use exclusively for industrial purposes and not as beverages, 10 centavos; on each proof liter of distilled and rectified spirits, 20 centavos; on each proof liter of manufactured liquors, 30 centavos;

on each gauge liter of fermented liquors, 4 centavos; on each kilogram of snuff or snuff flour, 32 centavos; on each kilogram of manufactured (smoking or chewing) tobacco, 48 centavos; on each 1,000 cigars, ₱2 when the manufacturer's wholesale price does not exceed 20 pesos per thousand, ₱4 when the price exceeds 20 but does not exceed 50 pesos per thousand, and ₱6 when the price exceeds 50 pesos per thousand; on each 1,000 cigarettes, 67 centavos when the weight per thousand cigarettes does not exceed 2 kilograms, and ₱2 when the weight exceeds 2 kilograms; on each gross of boxes of matches containing not to exceed 120 sticks to the box, 40 centavos, and a proportionate additional tax on each gross of boxes containing over 120 sticks to the box. The taxes on these articles accrue not at the time of their manufacture, but at the time of their removal from the manufactory for domestic sale or consumption. All of these articles manufactured for export are exempted from the payment of these taxes. The only articles of foreign manufacture made subject to the payment of these taxes are matches, on which a tax is levied at the same rate as is levied on the domestic product, and is collected at the custom-house of the port of entry.

In the original figures submitted to the Philippine Commission it was estimated that between ₱8,000,000 and ₱9,000,000 would be collected in a normal year as taxes on the articles enumerated above. The reductions made in the proposed rates before the bill was finally passed reduced this estimate to an amount between ₱6,500,000 and ₱7,500,000, or just about the amount which was collected annually during the last years of the Spanish regime from the one tax known as the *cedula personal*, or poll tax. The *cedula personal* was a direct tax of obligatory payment which none could escape, as it was a tax paid mainly for the privilege of living in these islands, and incidentally for the privilege of owning property. The poll tax imposed in the internal-revenue law will yield but the merest fraction of what was formerly collected on *cedulas personales*.

The taxes imposed on the cigars and other articles enumerated above are indirect taxes and of optional payment, each consumer suiting his own convenience as to the time and measuring his ability as to the amount of his payments. These are taxes which are paid not for the privilege of living here but for the privilege of consuming the cigars and other cheap but good things that these islands afford. Even with the taxes added, the consumer in these islands of cigars, cigarettes, or spirits can still get three or four times as much for his money as can the less fortunately situated resident of the United States or Europe. Careful inquiry made by this office has not demonstrated that the residents of these islands, native or foreign, have failed or are failing to grasp their opportunity, nor that the popular taste for cigarettes and vino has, since August 1, become sated to any appreciable extent.

PRELIMINARY WORK.

It is provided in section 152 of the internal-revenue law:

Until the collector of internal revenue shall have the proper books, stamps, and forms ready for distribution the methods provided for the administration of this act shall not be required, and he is empowered to make such temporary regulations and arrangements for the collection of the taxes imposed by this act as will not unduly embarrass or interrupt the business of the persons affected thereby.

In accordance with these provisions of law, and to carry into effect the announced policy of the government, i. e., that the law should be administered in a liberal spirit, "Circular No. 1, to all internal-revenue officers," was issued from this bureau before the 1st of August and was distributed to every part of the islands (copy of this circular is made a part of this report, marked "Exhibit A"). This circular was printed in English and Spanish and was published in the Official Gazette and in most of the local periodicals. A copy was also delivered to every registered manufacturer of the articles subject to the taxes. Tables and rules for gauging spirits have also been issued (copy inclosed, marked "Exhibit B.")^a

During the months of July and August a preliminary assessment was made in the city of Manila and in the provinces of the various manufactures, with the following result:

Taxpayers.	In Manila.			In the provinces.		
	Number.	Total anticipated output for year ending June 30, 1905.		Number.	Total anticipated output for year ending June 30, 1905.

Matches, domestic.....	1	Gross boxes.....	387,700
Total.....	1,074		

These figures are compiled from the declarations made by the manufacturers themselves, are based largely on the actual output for the year ending June 30, 1904, and are believed to be quite conservative.

During the twenty-nine days grace allowed, between the time these taxes were imposed and the time they became operative, July 2 to August 1, 1904, many of the manufactories in the provinces, and practically all of those in Manila, ran overtime and vastly increased their normal output. In fact, the increase in the output of cigars, cigarettes, spirits, and matches began during the month of June, when it was foreseen that the internal-revenue law would be passed, and when it was generally believed it would become operative on the 1st day of July.

Therefore, when the taxes became effective, on August 1, 1904, the market was overstocked with tobacco and alcohol products and

^a Not printed.

matches on which the taxes had not been paid and could not then be collected, inasmuch as these taxes accrue at the time of the removal of the articles from the place of their manufacture. These cigars, cigarettes, spirits, and matches were purchased by merchants and middlemen, in amounts far in excess of the normal needs of trade, for the purposes of speculation. Consumers of these articles paid during the month of August to these speculators the normal price of the articles, prior to the imposition of the taxes, plus the amount of the tax which had been paid neither by the manufacturer nor the merchant. It can, therefore, be readily seen that the profits derived from their business by the dealers in tobacco and alcohol products increased very materially during the month of August, and that these abnormal profits will continue to be collected from the actual consumers until the stocks removed before the 1st of August are entirely exhausted. It is, of course, not to be expected that as long as the dealers can continue to sell their wares at heretofore undreamed-of profits they will voluntarily resume their purchases of tax-paid articles from the manufacturers. Of course, the consumer is led to believe that the increase in price of his smoke and his drink is due to the internal-revenue tax, and the fact that there has been no serious diminution in the consumption of such articles would seem to indicate that the consuming public in these islands is able and willing to pay the amount of the taxes imposed, even though such amounts, instead of reverting to the insular treasury as taxes, are kept by the dealers as added profits.

Nor can it be doubted for a moment that the immediate effect of this law has been to temporarily increase the profits of the manufacturing industries affected by the taxes imposed. Most, probably all, of these manufactories did a thriving business during the months of June and July, and many of them, especially the distillers, were found on the 1st of August to have scarcely any stock whatever on hand. This is probably an unprecedented condition of affairs in the manufacturing annals of these islands. These manufacturers, therefore, sold during the months of June and July all of their old or normal stock, all of their normal output, and all of their forced output during those two months. Yet, according to some of the local periodicals, they now express surprise and disappointment because their sales during the month of August are not up to the normal level. It is very much like the youth who believed he could both eat his cake and have it.

The opposition to this law, so general at the start, appears now to have simmered down to the question of distilled spirits. It is claimed that this industry is irrevocably ruined. The manager of one of the largest distilleries in these islands, probably the largest distillery in the East, told me that before the end of July he had exhausted all of his sugar and other raw material, and that he was reluctantly obliged to refuse to fill orders for spirits, one of them for about 300,000 liters, even though higher prices were offered than ever before. In a case of this sort the surprise should lie in the fact not that the output for August should have been reduced, but that there was any output at all in August, inasmuch as the normal sales for that month had already been made in June and July.

There is submitted herewith a statement (Exhibit C) in which are given the figures, as returned by the Manila manufacturers

themselves, showing the actual stock on hand of the various alcohol and tobacco products and matches on July 1 and on August 1, 1904, and the total amounts of such articles sold by the manufacturers during the first month's operation of the law. To this statement are also added comparative figures showing the amount of each of such articles sold by manufacturers during an average normal month before the imposition of the taxes.

From these figures it will be seen that on July 1 the various distillers in Manila had on hand 746,420 liters of proof spirits and that on August 1 the stock in the same distilleries was only 171,387 liters of proof spirits. The difference between these two amounts, 575,033 proof liters, plus the amount in which the forced output exceeded the normal output for July, would give with a fair degree of approximation the number of liters of proof spirits with which the local market was overstocked, i. e., above the normal needs of trade, on August 1, 1904, when the tax on distilled spirits became operative.

What the amount of the excess over the normal output was in the month of July can not, unfortunately, now be accurately determined. However, as will be remembered, the leading distillers of Manila stated, at the second public session in which the proposed law was discussed before the Philippine Commission, that there had been a serious fall off in the output of their manufactories during the first five months of 1904. On the invitation of these distillers, and acting under instructions of the Commission, I met them at the office of one of the leading distillers, where the account books or transcripts therefrom were presented to me for examination by all of the leading distillers or by their representatives. This was near the end of June while the bill was still under consideration. At this meeting the fact was conclusively established, by the books and other documentary evidence, that the business done by the various Manila distilleries from January to May, inclusive, of 1904 was on an average equal to only 65 or 70 per cent of the business done by them during the same five months in the year 1903. This fact was admitted by all. I remember it distinctly, because it came as such an agreeable surprise to find that these distillers so kindly refrained from blaming the law for a slackness in business existing for several months before the date of its enactment.

It also appeared of record in some of the leading distillers' books that in the month of May, 1904, their distilleries had been in operation on an average of but five or six hours a day, whereas in 1903 these same stills had worked from eight to twelve hours a day. But the magic effect of the passage of the internal-revenue law changed all this and for a while put an end to dull times. Beginning some time in June and continuing until July 31, or until their sugar or other raw material gave out, the Manila distilleries ran overtime manufacturing and shipping anisado, ginebra, and other liquors.

There are eight distilleries in Manila, but one is not in operation, having been closed temporarily by the department of public health. The remaining seven distilleries during the first five months of this year had been running only a little over half of the normal number of hours a day. But during the month of July and during a part of June most of these distilleries ran the full number of hours, and some of them ran overtime. It would therefore not be extravagant

to estimate that the forced output of spirits during the months of June and July would equal one month's normal output during the first five months of the year. Therefore, if 575,033 proof liters, the old stock disposed of, be increased by 552,250 proof liters, one month's normal output, it would appear that the liquor market was overstocked, i.e., above normal trade needs, on August 1 by 1,127 283 liters of proof spirits, or nearly 2,000,000 gauge liters of the strength at which anisado and the other compounded liquors are commonly sold to the actual consumer.

Now, in the statements of their estimated production of spirits for the fiscal year ending June 30, 1905 (figures given above), as made by the Manila distillers themselves, it would appear that they would produce in that year something over 6,500,000 liters of proof spirits. So, figured on this basis, the local liquor market, as far as the Manila distillers were concerned, was overstocked on August 1, 1904, with liquors sufficient to supply the normal consumption for a period of over two months. Meanwhile a certain amount of spirits are being removed every day from the distilleries for domestic consumption, which adds to an already overstocked market. Therefore, to expect that normal conditions will obtain in the liquor market before the middle or end of next October is to court disappointment, because it would be to hope for a reversal of the universally accepted commercial law governing supply and demand.

Of course these figures and the inferences made therefrom are based on the Manila distilling business taken as a whole, and no attempt is made to explain wherein some of the distillers got more and others less than their normal share of the increased business during the months of June and July. Some of the distillers were quick to take advantage of the twenty-nine days' margin allowed them for the removal of their spirits, whereas others lost their time execrating the law.

OPERATION OF THE LAW DURING THE FIRST MONTH OF ITS ENFORCEMENT.

An examination of Exhibit C, herewith, giving output by articles and comparative figures, and of Exhibit D, showing the tax collections by articles for the month of August, 1904, in the city of Manila, will be found interesting in view of the statements so often made that the imposition of these taxes on tobacco and alcoholic products would prohibit their consumption.

There were removed from the various manufactories in Manila during the month of August, for domestic consumption, 44,248 proof liters of distilled spirits, 196,885 gauge liters of fermented liquors (beer), 6,969 kilograms of manufactured tobacco, 7,289,778 cigars, 106,233,420 cigarettes, and 8,750 gross boxes of matches. Compared with the normal output during an average month before these taxes were imposed, the August output stands as follows: Distilled spirits, 8 per cent; fermented liquors (beer), 66 per cent; manufactured tobacco, 25 per cent; cigars, 80 per cent; cigarettes, 28 per cent; matches, 62 per cent; or a general average of 45 per cent. The taxes collected on these articles during the month were as follows: Distilled spirits, ₱10,890; fermented liquors (beer), ₱9,465.04; manufactured tobacco, ₱2,397.67; cigars, ₱6,715.42; cigarettes,

₱73,414.90; matches, ₱3,500; making a total of ₱106,383.03. This amount is now estimated to be between 20 per cent and 25 per cent of what these taxes may be expected to yield during an average month after normal commercial conditions have been restored. The above total does not include the taxes collected on imported matches, the exact figures for which were not available.

Of the total taxes collected during August, one-half, or ₱53,191.51, was collected during the first twenty-one days and the other half was collected during the last ten days of the month. These figures should be most encouraging to the manufacturers as showing in an unmistakable manner the revival of the various industries even at this early date. For the sake of convenience the tax collections by articles are distributed in Exhibit D in three groups, each covering the collections for a period of ten days. The percentages of increase in the tax collections from period to period are also indicated. Partial returns of collections so far made during September seem to indicate that the output of the Manila manufactories, and therefore the tax collections, during the current month will considerably exceed the output and collections during August.

An analysis and explanation of the figures presented in Exhibits C and D may be made as follows:

DISTILLED SPIRITS.

This subject has been fairly well discussed in the preceding pages of this report. All of the articles subject to excise taxes deteriorate with age, except distilled spirits, which usually improve the longer they are kept. This will explain why dealers and middlemen found it profitable to lay in, before the taxes became effective, very large stocks of liquors and only comparatively large stocks of cigarettes and other perishable articles. It will also explain why the August output, as compared with the normal output, of the distilleries was proportionately so much smaller than the August output of the cigarette and other manufactories whose products are subject to these taxes. Why the output of the distilleries for the second ten days in August fell below the output for the first ten days by 12 per cent is not clearly apparent. The probability, however, is that in the rush of the last days of July certain customers were left unsupplied with liquors, and that these orders were filled after August 1 with tax-paid goods.

FERMENTED LIQUORS (BEER.)

The output of beer from the local brewery during August, 1904, was 66 per cent of its output in August, 1903. The price of this native beer was increased considerably after the American occupation, and on July 1 of this year the price was increased still more by the change made in the previous price in Mexican money to the same figure in Philippine currency. Up to August 1, 1904, the brewery allowed middlemen and dealers a discount on its published prices of 20 per cent on draft and 25 per cent on bottled beer. During the month of July last the brewery announced to its customers that on and after August 1, 1904, they would only be allowed 10 per cent discount on draft beer and from 12 per cent to 19 per cent discount on bottled beer, according to the amount of the purchase.

It is estimated that this cut in the discounts previously allowed the trade was just about equal to the tax, 4 centavos per liter, imposed in the internal-revenue law. Of course many dealers anticipated this cut in the discounts by purchasing more than the usual amount of beer in July, and the result was a drop in the August output from the brewery. The price of a glass of native beer has not increased since August 1, 1904, and the situation appears to be that the manufacturers make the same or greater profits than they did before the imposition of the tax; that the consumer pays no more than he did previously, or at most the difference between Mexican and Philippine currency, and that the middlemen and dealers pay the tax out of their profits. It was feared that after the imposition of the internal-revenue tax on the native beer Japanese imported beer might wage a disastrous competition with the native product, unless such foreign beer was also made subject to this tax. This office has since learned that the Japanese Government pays a bounty of 1 yen and 39 sen on each case of beer, containing 36 liters, exported from that country. This bounty is therefore just about the same per liter as the internal-revenue tax imposed here on the native product. A separate and detailed report will be made on this matter.

MANUFACTURED TOBACCO.

There is little chewing, snuff taking, or pipe smoking done in these islands. The picadura, or fine-cut tobacco, turned out mostly by small manufactories, is used almost exclusively for the making of cigarettes. The tax imposed in the internal-revenue law on this picadura is proportionately higher than the other taxes. The likelihood is that the more strictly the law is enforced with regard to this tax the greater will the output of the cigarette manufactories become. Some 4,000 kilograms of manufactured tobacco exported to other countries, and on which no taxes were collected, are not included in Exhibit D.

CIGARS.

Notwithstanding the fact that large amounts of cigars were removed by dealers from the local manufactories in July to supply the August trade, and that even many of the actual consumers, anticipating an increase in the price in August, made their purchases in July, there was a reduction of only 20 per cent from the normal output in the cigars sold by the Manila manufacturers during the month of August. Cigars require a larger proportion of manual labor in their manufacture than any of the other articles subject to these taxes. For this reason the capacity of a cigar manufactory is largely a question of the number and skill of the cigar makers it employs, and it is not so easy to quickly increase its production and output. For this reason, and also because of large quantities of leaf tobacco which were damaged by the floods early in July, the output of the Manila manufactories was not as large during that month as some of the manufacturers might perhaps have wished. The August output of the cigar manufactories was, therefore, larger than it would otherwise have been. In addition to the 7,289,778 cigars sold for domestic consumption there were exported during August, mostly to China, the Straits Settlements, Australia, and Europe, 6,282,260 cigars.

CIGARETTES.

It is estimated that fully one-half of all the taxes paid on tobacco and alcoholic products will be collected on cigarettes. In view of this fact the movement in the output of cigarettes from the Manila manufactories during the month of August is most satisfactory, as indicating a speedy resumption of their normal output. The taxes collected on cigarettes from the 11th to the 20th of August were more than twice as great as the taxes collected during the first ten days of that month; again, the taxes collected during the last eleven days of the month were more than double the taxes collected between the 10th and the 20th. The increase in the output of tax-paid cigarettes is, therefore, proceeding by leaps and bounds. It was stated at the second public session, in which the proposed law was discussed before the Philippine Commission, that notwithstanding the fact that many cheaper grades of cigarettes were on the market, the vast majority of the consumers of cigarettes voluntarily paid from 2 to 4 centavos more for the better grades. This was before the imposition of the tax. It is not now seriously believed by anyone that the tax imposed, 1 centavo on each 15 cigarettes, will reduce the consumption of these "necessities" to an appreciable extent. That the output from the cigarette manufactories of Manila during August only reached 28 per cent of the normal output during previous months is satisfactorily explained by the well-known fact that all of these manufactories increased enormously their output during July, and that on August 1 (as shown by Exhibit C) their stock on hand was only 16 per cent of the normal stock on hand on July 1. In fact, 7 of the largest of these manufactories were found on August 1, when the tax became effective, to have not a single cigarette on the premises. Besides the 106,233,420 cigarettes sold by the Manila manufacturers for domestic consumption, there were 2,150,825 cigarettes exported to other countries. No tax was collected on these exports, and therefore they are not included in the figures in Exhibit D.

MATCHES.

The statistics on foreign and domestic matches reveal a most interesting state of affairs in the local match market. The average monthly importation of Japanese matches during June and the preceding months in this year was about 38,000 gross of boxes, and the average output of the local match manufactory during the same period was about 14,000 gross of boxes, making a total of 52,000 gross of boxes of matches consumed in a normal month in these islands. Anticipating the effects of the internal-revenue law the local importers brought in from Japan during July 218,401 gross of boxes, and the local match manufactory sold out its entire stock of 47,750 gross and all that it could turn out by forced production during July. There were, therefore, in the hands of the local merchants and speculators on August 1, 1904, an amount considerably in excess of 266,151 gross of boxes, or enough to supply the normal needs of trade for a period of five months from August 1. Under these circumstances it was not to be expected that the importation of foreign matches and the output of domestic matches would be very brisk during August, and when the owner of the local manufactory closed

his books on the 1st of August, and declared that he had not a match in the house, he told an internal-revenue officer that he did not expect to sell any more matches this year. Much to his surprise, however, he paid during August ₱3,500 in taxes on an output of 8,750 gross of boxes, or 62 per cent of the normal output from his manufactory during an average month before the tax on matches was imposed. Only one explanation of this anomalous condition of affairs can be given, and that is that the large stocks of foreign and domestic matches are now in the hands of a limited number of speculators, who hold them at a price equal to that of the tax-paid article. And the smaller merchants and consumers, who had laid in no stocks, finding no choice in the matter as regards price, have continued to trade to a large extent with the local manufacturer, and to whom they paid the taxes on all the matches purchased during August.

DISTILLATION IN THE PROVINCES.

There are 8 well-equipped distilleries in Manila, and about 25 or 30 more in the provinces. The remainder of the 497 distilleries, so far registered in these islands, are primitive affairs, known locally as "cauas." An empty hogshead, a coal-oil can, a tin pan, and a couple of joints of bamboo properly arranged near a stream make a caua. Wherever there are nipa-palm swamps, and no large distilleries cauas abound. In the province of Pangasinan alone there are over a hundred of these cauas, usually attended by a man and a boy. The tuba, or fermented sap from the nipa palm, is put in the can over a fire and under the hogshead. A constant supply of cold water is kept running through the pan at the top of the hogshead. The watery vapor carries the spirits up to the bottom of the pan, where it condenses and falls into the spilt bamboo, arranged gutterwise, and trickles out through the side of the hogshead.

This is the commercial vino de nipa, and it all contains large quantities of amyl alcohol and other poisonous ingredients. It is a very popular drink. Many cases of death or insanity are reported as due to an excessive use of this liquor. Were it not for the fact of the temperate manner in which the natives consume this liquor there would soon be an utter dearth of consumers.

In La Laguna and some other provinces the sap of the cocoanut bud is also distilled into what is known as vino de coco. Some of the cauas used for the distillation of these saps are stone-clay ovens on which is fixed a boiler of iron or copper, in connection with which is used a wooden cylinder and copper coil, called a "toong" by the natives.

The principal nipa districts lie in the provinces of Capiz, Bulacan, Pampanga, and Pangasinan. In all of these provinces are a few large distilleries, and to these the tuba is brought for distillation. Scarcely any of these distilleries, however, are equipped to rectify the crude spirits and remove the amyl alcohol and other poisonous substances. In the past a large proportion of these crude spirits were brought to Manila for rectification. When the provisions of the internal-revenue law regarding the sale of impure spirits for use as beverages are fully enforced very nearly all of these crude spirits will be rectified before they get to the consumers.

About half of the impure spirits produced in these islands comes from the nipa swamps in the province of Bulacan. The tuba is

CIGARETTES.

It is estimated that fully one-half of all the taxes paid on tobacco and alcoholic products will be collected on cigarettes. In view of this fact the movement in the output of cigarettes from the Manila manufactories during the month of August is most satisfactory, as indicating a speedy resumption of their normal output. The taxes collected on cigarettes from the 11th to the 20th of August were more than twice as great as the taxes collected during the first ten days of that month; again, the taxes collected during the last eleven days of the month were more than double the taxes collected between the 10th and the 20th. The increase in the output of tax-paid cigarettes is, therefore, proceeding by leaps and bounds. It was stated at the second public session, in which the proposed law was discussed before the Philippine Commission, that notwithstanding the fact that many cheaper grades of cigarettes were on the market, the vast majority of the consumers of cigarettes voluntarily paid from 2 to 4 centavos more for the better grades. This was before the imposition of the tax. It is not now seriously believed by anyone that the tax imposed, 1 centavo on each 15 cigarettes, will reduce the consumption of these "necessities" to an appreciable extent. That the output from the cigarette manufactories of Manila during August only reached 28 per cent of the normal output during previous months is satisfactorily explained by the well-known fact that all of these manufactories increased enormously their output during July, and that on August 1 (as shown by Exhibit C) their stock on hand was only 16 per cent of the normal stock on hand on July 1. In fact, 7 of the largest of these manufactories were found on August 1, when the tax became effective, to have not a single cigarette on the premises. Besides the 106,233,420 cigarettes sold by the Manila manufacturers for domestic consumption, there were 2,150,825 cigarettes exported to other countries. No tax was collected on these exports, and therefore they are not included in the figures in Exhibit D.

MATCHES.

The statistics on foreign and domestic matches reveal a most interesting state of affairs in the local match market. The average monthly importation of Japanese matches during the preceding months in this year was about 38,000 gross, and the average output of the local match manufactory was about 14,000 gross of boxes, making a total of 52,000 gross of boxes of matches consumed in a normal month on the islands. Anticipating the effects of the inter-island trade, the importers brought in from Japan during July and August 1, 1904, an amount of 266,151 gross of boxes, or enough to supply the islands for a period of five months from August 1. There were, therefore, in the hands of the importers on August 1, 1904, an amount of 266,151 gross of boxes, or enough to supply the islands for a period of five months from August 1. In view of these circumstances it was not to be expected that the output of domestic matches during August, and when the owners of the local match manufactory

gathered in jars and most of it is sold by the owners of the nipa lands to the Chinese distillers, about 12 or 13 in number, who have engaged in the distilling business in that province for many years.

The Manila distillers use a certain proportion of sugar as raw material in the distilling of spirits, but the bulk of their anisado, ginebra, and other compounded liquors is made from crude spirits brought from Bulacan and the other provinces, and rectified in Manila. On August 1, when the Manila and Bulacan distilleries reduced the amount of their output, the demand for tuba ceased. The owners of the nipa lands and a large number of men employed in the swamps gathering the tuba complained bitterly. They blamed not the law alone, but also the owners of the distilleries, who they claimed had of late years been in the habit of putting their own price on the tuba and getting it for a song. The distillers, on the other hand, claimed that they, and not the owners of the nipa lands and gatherers of the tuba, were the ones whom the law injured, for the reason that they, the distillers, had already advanced to the owners of the nipa lands about ₱200,000, which they could not collect until this season's tuba crop was delivered. The situation was aggravated by the fact that, relying on false reports published during June to the effect that the internal-revenue law would not be passed, a number of the owners of nipa lands had cut the nipa buds and, in default of a market for tuba, the sap was running to waste. It was estimated that over ₱50,000 worth of tuba was thus lost in one town.

For a while some anxiety was felt on account of the number of the unemployed in the province of Bulacan. However, the situation has now been relieved, or will soon be relieved. Last week the provincial treasurer of Bulacan telegraphed this office for the detail of an agent to assist in the assessment work in that province, as the distillers were about to resume operations, and a couple of days since he reported to this office as follows:

During the month of August but one of the 14 distilleries of Bulacan was in operation. This distillery was operated continuously during August, but none of the spirits distilled has as yet been disposed of.

On September 12 one of the larger distillers of the province applied for a license to begin operations and another distiller has notified me that he will begin operations before the 24th instant.

If this latter-mentioned distillery resumes operations, I am quite certain that the remaining distilleries, which are the largest in this province, will open up, possibly during the first part of the coming month.

Another distillery is being extensively repaired and new and more modern machinery is being installed. This distillery should resume operations October 1.

A new distillery now in course of construction is being hurried to completion. This distillery should be in operation by the 1st of November.

The balance of the distilleries in the province will be reopened so soon as the operators have disposed of the large stock of spirits distilled during June and July, and no further trouble relative to this industry here is anticipated.

ENFORCEMENT OF THE LAW.

The enforcement of the law and the assessment and liquidation work in Manila has been attended to by the agents of this office, assisted during July and August by the deputy city assessor. Very little friction has been encountered in getting the law into operation in accordance with the temporary provisions contained in "Circular No. 1, to all internal-revenue officers" (Exhibit A, herewith).

The majority of the manufacturers of tobacco and alcoholic products are subjects of Spain and of the Chinese Empire. There has been a cheerful disposition manifested by all of these manufacturers to comply fully with the provisions of the law and the regulations. The Hon. Mun Yew Chung, consul-general of the Chinese Empire, kindly volunteered to aid this office in making the law clear to the Chinese subjects in Manila, and thanks are due him for valuable cooperation.

The stamps in the various denominative values, for use in the payment of the internal-revenue taxes, have now been printed by the bureau of public printing, and, so soon as they have been gummed and perforated, will be deposited in the vaults of the insular treasury. The permanent regulations, to replace the temporary regulations now in force, will be issued as soon as practicable.

The time is now near at hand when a strict enforcement of all of the provisions of the internal-revenue law is imperatively demanded if it is expected to bring the tax yield up to the expected figure and in order to protect the larger manufacturers from illegal competition. It is confidently expected that the affixture of the internal-revenue stamps to the official invoice instead of to the packages of goods will to a large extent protect the bona fide manufacturers and secure a more complete collection of the taxes.

For the purpose of imitating imported and high-priced liquors holes are drilled in the bottom of glass bottles, the contents removed and replaced with inferior spirits, and the hole plugged with a gob of melted glass. To be able to sell on the mainland inferior cigars as the output of well-known Manila manufactories the bottom of the box is dexterously removed, the choice cigars removed and poor ones put in their place, the bottom returned to its place, and the manufacturer's trade-mark and labels on the cover left intact. Of course where such ingenious frauds are practiced internal-revenue stamps on corks and lids would afford but scant protection.

DISBURSEMENTS.

The following is a statement of the appropriations made for this bureau by Act 1225 of the Philippine Commission and of the amounts expended during the month of August, 1904:

	Appropriated.	Expended.	Balance.
Salaries and wages	P75,000.00	P2,354.22	P72,645.78
Contingent expenses	40,000.00	1,808.46	38,191.54
Total	115,000.00	4,222.68	110,777.32

Of the above disbursements for contingent expenses, P1,764.66 were expended for office furniture and supplies through the insular purchasing agent.

The expenses incurred by the provincial treasurers in the enforcement of the law are paid from provincial funds. Many of the provincial treasurers will be unable to properly attend to this work and secure a prompt and complete payment of the various taxes now in force, and those that will become effective on January 1, 1905,

unless they are allowed additional employees or unless agents are detailed from this bureau to assist them in their work in the field. Agents have already been detailed to this work in certain provinces and more will be sent as occasion requires. Further experience will soon demonstrate whether or not a sufficient number of agents have been provided for in the law to properly attend to the inspection and assessment work in Manila and in the provinces.

CONCLUSION.

This office has no recommendations to make at this time as to amendments to the law. There has been a widespread misapprehension as to the effect of the taxes imposed, of the provisions of the law, and as to the manner of their enforcement. The total per annum per capita taxes which will be collected on tobacco and alcoholic products is less than ₱1, or 2 centavos each week. It has been asserted by the manufacturers that in these islands these articles are of universal consumption, even the women and children using their share. If this be so, then the head of an average family of five would pay, as his weekly tax bill for the family smoking and drinking, the sum of 10 centavos. It is not believed that the imposition of so moderate a tax will tend to curtail the consumption of these articles to any appreciable extent.

In Porto Rico the per annum per capita tax on tobacco and alcoholic products is something over \$1, or ₱2. In the United States it is approximately \$3, or ₱6. In England and in most European countries these taxes are imposed in even higher rates. Many countries in Europe have established a government monopoly in the production of these articles and their manufacture by individuals is prohibited. Spain has for many years had a monopoly in the manufacture of tobacco products, and within the last three or four months has very greatly increased the internal-revenue tax rates on distilled spirits.

The opposition of a large portion of the local press, which had subsided during August, was revived during the first days of September. A leading manufacturer of Manila was lamenting this fact in this office a few days since. He said that his business was in a very satisfactory state, and that as dealers' stocks were becoming exhausted there was a notable increase in the purchases from his manufactory. But, he added, the new campaign against the law inaugurated by the press raised the hopes of the merchants and middlemen that these taxes would be abolished or reduced, and that by holding up their purchases for a short while they would get their goods cheaper.

Of course the opposition to this law at this time can retard, but it can not prevent, its final success. The only regrettable feature to this opposition is that the smaller and more ignorant manufacturers of vino, cigars, and cigarettes have been and are being educated to an attitude of unreasoning hostility to this law. Therefore whenever the provisions of the law are strictly enforced, illicit stills and cigar and cigarette factories will begin to operate behind closed doors and in inaccessible regions. Long after the larger manufacturers shall have recognized, with satisfaction, that their opposition to this tax was a mistake and have settled down to the new order

of things, they will have to suffer the illegal competition waged by these "moonshiners" and illicit manufacturers of all kinds.

It will then become the duty of this office and of the provincial treasurers to weed out these lawbreakers and bring them to justice. It is hoped that the existing penal provisions of the internal-revenue law will be found sufficient to meet the case. But should this not prove to be so this office will, at the proper time, recommend that the Philippine Commission reintroduce, by amendment, into the internal-revenue law certain of the harsher of the penal provisions embodied in the original draft of the law and which were eliminated by the Commission because of the indignant objections raised by the large manufacturers of Manila.

Respectfully submitted.

JNO. S. HORD,
Collector of Internal Revenue.

EXHIBIT A.

CIRCULAR }
No. 1. }

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,
DEPARTMENT OF FINANCE AND JUSTICE,
BUREAU OF INTERNAL REVENUE,
Manila, P. I., August 1, 1904.

To all internal-revenue officers:

SUBJECT: *Preliminary instructions as to the assessment and collection of taxes on distilled spirits, manufactured liquors, fermented liquors, manufactured tobacco, cigars, cigarettes, and matches.*

1. By the provisions of section 71 to 109, inclusive, of "the internal-revenue law of nineteen hundred and four," certain taxes, effective on and after August 1, 1904, are imposed on the objects and in the amounts enumerated in the next succeeding paragraph.

TAXES ON DISTILLED SPIRITS.

2. (a) On all distilled spirits manufactured in the Philippine Islands containing amyl or other higher alcohols (fusel oil), aldehyde, or methyl alcohol (wood alcohol) in the proportion of four or more parts in one thousand, when removed from the place of their manufacture for domestic sale or consumption exclusively for manufacturing or industrial purposes, and not for use as beverages, there shall be levied and collected on each proof liter a tax of 10 centavos (sec. 88).

(b) On all distilled spirits containing the poisonous substances in the proportions mentioned in the preceding subdivision removed from the place of their manufacture to a rectifying establishment for the purpose of their rectification and to reduce the amyl alcohol or other poisonous substances to four or less parts in one thousand there shall be levied and collected, when rectified and the poisonous substances removed as aforesaid, an additional tax of 10 centavos on each proof liter of such rectified spirits removed from the rectifying establishment for domestic sale or consumption as beverages (sec. 88).

(c) On all distilled and rectified spirits removed from the place of their manufacture for domestic sale or consumption there shall be levied and collected on each proof liter a tax of 20 centavos (sec. 74).

(d) On all distilled spirits intended for domestic sale or consumption as beverages, which may be changed in form by a liquor manufacturer, by the addition of flavoring extracts, of other kinds of liquors, or of coloring matter (except methylene blue, etc., which is added to impure spirits), there shall be levied and collected on each proof liter of spirits contained in such manufactured liquors, when removed from the place of their manufacture, an additional tax of 10 centavos, which shall be distinct from and in addition to the tax imposed on the spirits used in the compounding of such manufactured liquors (sec. 87).

TAX ON FERMENTED LIQUORS.

(e) On all beer, lager beer, ale, porter, and all other fermented liquors (except the native fermented drinks known as tuba, basi, tapuy, etc.) brewed or fermented in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each gauge liter of such fermented liquor a tax of 4 centavos (sec. 91).

TAXES ON MANUFACTURED TOBACCO.

(f) On all snuff and snuff flour manufactured or partially manufactured in the Philippine Islands, when removed from the place of manufacture for domestic sale or consumption, there shall be levied and collected on each kilogram a tax of 32 centavos (sec. 101).

(g) On all chewing and smoking tobacco manufactured or partially manufactured in the Philippine Islands, when removed from the place of manufacture for domestic sale or consumption, there shall be levied and collected on each kilogram a tax of 48 centavos (sec. 101).

TAXES ON CIGARS.

(A) On all cigars manufactured in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each one thousand cigars a tax at one of the following rates: When the manufacturer's wholesale price does not exceed ₱20 per thousand, ₱2; when the manufacturer's wholesale price exceeds ₱20 but does not exceed ₱50 per thousand, ₱4; when the manufacturer's wholesale price exceeds ₱50 per thousand, ₱6 (sec. 107).

TAXES ON CIGARETTES.

(i) On all cigarettes manufactured in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each one thousand cigarettes a tax at one of the following rates: When the rate per thousand cigarettes exceeds 2 kilograms, ₱2; when the rate per thousand cigarettes does not exceed 2 kilograms, from August 1, 1904, to June 30, 1905, both inclusive, 67 centavos; when the weight per thousand cigarettes does not exceed 2 kilograms, on and after July 1, 1905, ₱1 (sec. 107).

TAXES ON MATCHES.

(j) On all matches manufactured in the Philippine Islands or imported from other countries, when removed from the place of their manufacture or from the customs warehouse of the port of entry, as the case may be, for domestic sale or consumption, there shall be levied and collected on each gross of boxes containing not more than 120 sticks to the box, 40 centavos; and a proportionate additional tax shall be levied and collected on each gross of boxes containing over 120 sticks to the box (sec. 108).

WHEN TAXES ACCRUE.

3. The taxes imposed on the articles enumerated in the preceding paragraphs accrue not at the time of their manufacture but at the time of their actual removal for domestic sale or consumption from the place of their manufacture or bonded warehouse. Articles manufactured prior to August 1, 1904, and which on said date are still in the possession of the manufacturers thereof, whether at the manufactory or elsewhere, are liable to the payment of the taxes imposed, which should be levied and collected at the time of the removal of such articles from the manufactory or other premises. But the taxes imposed shall not be collected on any of the articles enumerated which on August 1, 1904, are outside of the manufactory premises and in the possession of persons who are not the manufacturers of such articles; nor shall the taxes imposed be collected on any of the articles enumerated, whether manufactured before or after August 1, 1904, and which may be removed from the place of their manufacture, bonded warehouse, or other premises for exportation to other countries and not for domestic sale or consumption (secs. 28 (a), 35, and 36).

TAXES, HOW ASSESSED.

4. The taxes on distilled and rectified spirits and liquors manufactured therefrom for use as beverages will be assessed as follows:

(a) A manufacturer who from raw materials distills impure spirits and removes them to a rectifying establishment shall pay at the time of such removal a tax of 10 centavos on each proof liter of impure spirits so removed.

(b) A manufacturer who rectifies impure spirits originally distilled by another manufacturer, and who removes such rectified spirits for immediate domestic sale or consumption or to some other establishment for the purpose of their conversion into manufactured liquors, shall pay at the time of such removal a tax of 10 centavos on each proof liter of rectified spirits so removed.

(c) A manufacturer who changes the form of spirits distilled and rectified by other manufacturers by the addition of flavoring extracts, etc., as to convert such spirits into

manufactured liquors, and who removes such manufactured liquors for domestic sale or consumption, shall pay at the time of such removal a tax of 10 centavos on each proof liter of manufactured liquors so removed.

(d) A manufacturer who distills spirits from raw materials and who on the same premises, at the time of such original distillation or at any subsequent time, separates the pure from the impure spirits by rectification, and who removes such rectified spirits for immediate domestic sale or consumption, or to some other establishment for the purpose of their conversion into manufactured liquors, shall pay at the time of such removal a tax of 20 centavos on each proof liter of rectified spirits so removed.

(e) A manufacturer who distills spirits from raw materials and who on the same premises, at the time of such original distillation or at any subsequent time, separates the pure from the impure spirits by rectification, and who also at the time of such distillation or rectification or at any subsequent time, and on the same premises, changes the form of such distilled or rectified spirits by the addition thereto of flavoring extracts, etc., so as to convert such spirits into manufactured liquors, and who removes such manufactured liquors for domestic sale or consumption, shall pay at the time of such removal a tax of 30 centavos on each proof liter of manufactured liquors so removed.

(f) Proof spirits are defined as follows in section 72 of the law: "Proof spirits shall be held to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of seven thousand nine hundred and thirty-nine ten thousandths at sixty degrees Fahrenheit of temperature." An alcoholmeter and a thermometer will be sent with this circular to all provincial treasurers who have so far reported the existence of distilling or rectifying establishments within their provinces. A table of equivalents with rules for the reduction of gauge to proof liters at all degrees of temperature, and rules for the gauging of spirits, will also be printed and sent as soon as possible to all revenue officers.

● FERMENTED LIQUORS.

5. The taxes of fermented liquors will be assessed on the total number of gauge liters removed for domestic sale or consumption regardless of the percentage of alcohol contained in such liquors.

MANUFACTURED TOBACCO.

6. The taxes on snuff and manufactured tobacco will be assessed on the actual number of kilograms removed for domestic sale or consumption, and when the weight of the wrappers or boxes in which such snuff or tobacco is packed is included in the weight of the snuff or tobacco invoiced, the tax will be assessed on such total weight and no allowance will be made for the weight of such wrappers or boxes.

CIGARS.

7. (a) The taxes on cigars will be assessed on the cigars removed for domestic sale or consumption, using as a basis the price list at wholesale published by each manufacturer, from which should be deducted the discount, if any, allowed by each manufacturer to the trade in general. Where no price list is published, or where different prices are charged different customers for the same kind of cigars, the assessment should be made using as a basis the price charged in each case. Where the price reported in any case by the manufacturer is manifestly too low, and where as a result of such undervaluation the cigars would fall under a lower tax rate than that under which they properly belong, the assessment will be made using as a basis the actual average selling price by manufacturers at wholesale of cigars of the same kind or similar in quality to the cigars which may have been undervalued.

(b) All manufacturers of cigars or cigarettes, whether such cigars or cigarettes are made in manufactories, in stores, or in the homes of the manufacturers, shall pay the taxes imposed in section 107 on all such cigars or cigarettes removed from any locality where made for domestic sale or consumption; but the taxes on cigars or cigarettes made by manufacturers in their homes and delivered to larger manufacturers shall be paid at the time of the removal of such cigars or cigarettes for domestic sale or consumption from such larger manufactories.

CIGARETTES.

8. (a) The taxes on cigarettes will be assessed on the cigarettes removed for domestic sale or consumption, using as a basis the actual weight, under normal conditions of humidity, of 1,000 cigarettes; and there shall be included in such weight the weight of the paper in which each individual cigarette is rolled, but not the box wrapper, or label in which the cigarettes are placed.

(b) The taxes on cigarettes manufactured in their homes by small manufacturers for delivery to the larger manufacturers shall be paid in the manner provided in subdivision (b) of the next preceding paragraph.

MATCHES.

9. (a) The taxes on matches will be assessed on the number of gross manufactured in the Philippine Islands and removed for domestic sale or consumption, using as a basis the average number of individual matches in each box; thus, any number of sticks up to and including 120 to a box will be assessed at 40 centavos per gross of boxes; 121 sticks to a box will be assessed at forty and one-third centavos per gross of boxes; 123 sticks to a box will be assessed at 41 centavos per gross of boxes; 240 sticks to a box will be assessed at 80 centavos per gross of boxes.

(b) Matches imported from other countries for domestic sale or consumption in the Philippine Islands are under the provisions of sections 108 and 109 made subject to the same taxes as are imposed on matches manufactured in the Philippine Islands for domestic sale or consumption. The taxes on imported matches will be assessed and collected by customs officers, to be designated by the collector of customs for the Philippine Islands. The assessment of this tax will be made in the manner provided in subdivision (a) of this paragraph for the assessment of taxes on matches manufactured in the Philippine Islands, and the taxes on imported matches will be paid before they are delivered to the importer or removed from the customs warehouse.

TEMPORARY REGULATIONS FOR THE COLLECTION OF TAXES.

10. The foregoing regulations, until repealed or amended, will govern the manner in which the assessment of the articles referred to shall be made. With regard to the collection of the taxes imposed, attention is invited to the following provision of the law:

"SEC. 152. Until the collector of internal revenue shall have the proper books, stamps, and forms ready for distribution, the methods provided for the administration of this act shall not be required; and he is empowered to make such temporary regulations and arrangements for the collection of the taxes imposed by this act as will not unduly embarrass or interrupt the business of the persons affected thereby."

Therefore, until such time as the stamps, register, and invoice books, bonds, and other forms and the necessary instructions, now being prepared, are issued, the record of articles manufactured and removed shall be kept and the taxes thereon shall be collected in the manner provided in the next succeeding paragraph.

RECORD BOOK.

11. (a) On August 1, 1904, each manufacturer of any of the articles subject to the taxes aforesaid shall provide a record book for each class of articles manufactured by him. The location of the factory by province, barrio, or town and street number, the name of the manufacturer, and the name of the owner and of the manager shall be entered on the first page of each book, together with the name of the article manufactured. The record books shall be ordinary blank books of a convenient size, and shall have on the first page the impress of the seal of the provincial treasurer or his authorized deputy, or by an internal-revenue agent; and such record books shall be used exclusively for the entries provided for in this paragraph.

ENTRY OF STOCK AND ARTICLES MANUFACTURED AND REMOVED.

(b) The second, fourth, sixth, etc., pages in each record book shall be marked "Debit," and the first entry made thereon shall be the total stock of taxable articles on the manufactory premises on the morning of August 1, 1904, and thereafter at the close of work each day the owner or manager of the manufactory shall enter on such "debit" pages the total of taxable articles manufactured during the preceding twenty-four hours. The third, fifth, seventh, etc., pages in each record book shall be marked "Credit," and the owner or manager of the manufactory shall promptly at the time of removal of any articles from the premises make entry of the same on such "credit" pages, if for domestic sale or consumption in black ink and if for export to other countries in red ink. Whenever a "debit" or a "credit" page has been filled both it and the "credit" or "debit" page facing it shall be added up and both totals carried over to the next "debit" and "credit" pages. All blank spaces shall be ruled off and at the foot of each filled page the following certificate shall be entered and signed by the owner or manager of the manufactory: "I certify that the entries contained on this page fully and truly describe all of the taxable articles manufactured or removed from the manufactory premises from the — day of — to the — day of —, and that no articles manufactured or removed have been omitted. — owner or manager."

PAGES OF RECORD BOOK.

(c) The record books for distilled or rectified spirits or manufactured liquors shall have on each page three columns, in the first of which shall be entered the number of gauge (or volume capacity) liters, in the second column the alcoholmeter (Gay Lussac) and thermometer readings (centigrade), and in the third column the equivalent of the total gauge liters shall be expressed in liters of proof spirits. The record books for manufactured tobacco shall have on each page two columns, in the first of which shall be entered the number of kilograms of snuff and in the second column the number of kilograms of smoking or chewing tobacco. The record books for cigars shall have on each page three columns, in the first of which shall be entered the number of cigars valued at ₱20 or less per thousand, in the second column the number of cigars valued at more than ₱20 but not more than ₱50 per thousand, and in the third column the number of cigars valued at more than ₱50 per thousand. The record books for cigarettes shall have on each page two columns, in the first of which shall be entered the number of cigarettes weighing 2 kilograms or less per thousand, and in the second column the number of cigarettes weighing more than 2 kilograms per thousand. The record books for matches shall have on each page three columns, in the first of which shall be entered the number of gross of boxes containing each box 120 sticks or less, in the second column the number of gross of boxes containing each box more than 120 sticks, and in the third column the average number of sticks to each box when it exceeds 120.

ENTRY AND MEMORANDUM SLIP FOR ARTICLES REMOVED.

(d) Manufacturers shall enter on the "credit" pages the date of the removal of each lot of articles, and the name and residence of the purchaser or person to whom consigned, and shall in the proper columns, on such "credit" pages, enter a true description of the articles removed, and shall deliver, at the time of such removal, to the purchaser or carrier a memorandum slip on which shall be copied the entries made in the record book. The entries made on such "credit" pages shall be numbered consecutively, beginning with "No. 1" for the first lot of articles removed on August 1, 1904, from each manufactory. Each memorandum slip given to the purchaser or sent to the consignee shall be given the same number as is given to the corresponding entry in the record book, and all such memorandum slips shall be signed by the owner, manager, or employee in charge of the articles removed from the manufactory.

LIQUIDATION SHEETS AND PAYMENT OF TAXES.

(e) At daily, weekly, or other frequent intervals, in the discretion of each provincial treasurer, a balance shall be struck in the record book in each manufactory and a liquidation of the account showing the taxes due on articles removed for domestic sale or consumption since August 1, 1904, or since the date of the last liquidation, shall be entered in the record book and signed by the provincial treasurer or other internal-revenue officer who strikes the balance, makes the liquidation, and inspects the stock of articles remaining on the manufactory premises. Manufacturers shall from day to day make on loose sheets two copies of all entries made on the "debit" and "credit" pages of their record books, and at the time of each liquidation of a manufacturer's record book the two copies shall also be added up and liquidated and signed by the provincial treasurer or other revenue officer who makes the inspection. The manufacturer shall then sign both such copies and at once deliver, or transmit them to the treasurer or deputy treasurer of the proper province, together with the amount of taxes due. Any internal-revenue officer may make and certify to a liquidation of a manufacturer's account, but only provincial treasurers or their authorized deputies are authorized to receive and receipt for money in payment of taxes.

RECEIPT AND RECORD OF TAXES PAID.

(f) Provincial treasurers and their deputies shall on August 1, 1904, open a ledger account with each manufacturer, of the articles mentioned above, in each locality. They shall debit each such account with the stock of articles on the manufactory premises on August 1, 1904, and thereafter with the articles manufactured as shown from time to time by the liquidation sheets; they shall credit each such account with all articles removed for export and with all articles on which the taxes are paid as shown from time to time by the liquidation sheets. When the liquidation sheets and the money in payment of the taxes due are presented to a provincial treasurer or his deputy, as provided in the next preceding subdivision (e), such officer shall at once enter the totals in the proper ledger account, receipt each copy of the liquidation sheets, return one copy to the manufacturer, send the other by first mail to the collector of internal revenue, and hold the money received as taxes until the stamps, register,

(b) The taxes on cigarettes manufactured in their homes by small manufacturers for delivery to the larger manufacturers shall be paid in the manner provided in subdivision (b) of the next preceding paragraph.

MATCHES.

9. (a) The taxes on matches will be assessed on the number of gross manufactured in the Philippine Islands and removed for domestic sale or consumption, using as a basis the average number of individual matches in each box; thus, any number of sticks up to and including 120 to a box will be assessed at 40 centavos per gross of boxes; 121 sticks to a box will be assessed at forty and one-third centavos per gross of boxes; 123 sticks to a box will be assessed at 41 centavos per gross of boxes; 240 sticks to a box will be assessed at 80 centavos per gross of boxes.

(b) Matches imported from other countries for domestic sale or consumption in the Philippine Islands are under the provisions of sections 108 and 109 made subject to the same taxes as are imposed on matches manufactured in the Philippine Islands for domestic sale or consumption. The taxes on imported matches will be assessed and collected by customs officers, to be designated by the collector of customs for the Philippine Islands. The assessment of this tax will be made in the manner provided in subdivision (a) of this paragraph for the assessment of taxes on matches manufactured in the Philippine Islands, and the taxes on imported matches will be paid before they are delivered to the importer or removed from the customs warehouse.

TEMPORARY REGULATIONS FOR THE COLLECTION OF TAXES.

10. The foregoing regulations, until repealed or amended, will govern the manner in which the assessment of the articles referred to shall be made. With regard to the collection of the taxes imposed, attention is invited to the following provision of the law:

"Sec. 152. Until the collector of internal revenue shall have the proper books, stamps, and forms ready for distribution, the methods provided for the administration of this act shall not be required; and he is empowered to make such temporary regulations and arrangements for the collection of the taxes imposed by this act as will not unduly embarrass or interrupt the business of the persons affected thereby."

Therefore, until such time as the stamps, register, and invoice books, bonds, and other forms and the necessary instructions, now being prepared, are issued, the record of articles manufactured and removed shall be kept and the taxes thereon shall be collected in the manner provided in the next succeeding paragraph.

RECORD BOOK.

11. (a) On August 1, 1904, each manufacturer of any of the articles subject to the taxes aforesaid shall provide a record book for each class of articles manufactured by him. The location of the factory by province, barrio, or town and street number, the name of the manufactory, and the name of the owner and of the manager shall be entered on the first page of each book, together with the name of the article manufactured. The record books shall be ordinary blank books of a convenient size, and shall have on the first page the impress of the seal of the provincial treasurer or his authorized deputy, or by an internal-revenue agent; and such record books shall be used exclusively for the entries provided for in this paragraph.

ENTRY OF STOCK AND ARTICLES MANUFACTURED AND REMOVED.

(b) The second, fourth, sixth, etc., pages in each record book shall be marked "Debit," and the first entry made thereon shall be the total stock of taxable articles on the manufactory premises on the morning of August 1, 1904, and thereafter at the close of work each day the owner or manager of the manufactory shall enter on such "debit" pages the total of taxable articles manufactured during the preceding twenty-four hours. The third, fifth, seventh, etc., pages in each record book shall be marked "Credit," and the owner or manager of the manufactory shall promptly at the time of removal of any articles from the premises make entry of the same on such "credit" pages, if for domestic sale or consumption in black ink and if for export to other countries in red ink. Whenever a "debit" or a "credit" page has been filled both it and the "credit" or "debit" page facing it shall be added up and both totals carried over to the next "debit" and "credit" pages. All blank spaces shall be ruled off and at the foot of each filled page the following certificate shall be entered and signed by the owner or manager of the manufactory: "I certify that the entries contained on this page fully and truly describe all of the taxable articles manufactured or removed from the manufactory premises from the — day of — to the — day of —, and that no articles manufactured or removed have been omitted. — owner or manager."

PAGES OF RECORD BOOK.

(c) The record books for distilled or rectified spirits or manufactured liquors shall have on each page three columns, in the first of which shall be entered the number of gauge (or volume capacity) liters, in the second column the alcoholmeter (Gay Lussac) and thermometer readings (centigrade), and in the third column the equivalent of the total gauge liters shall be expressed in liters of proof spirits. The record books for manufactured tobacco shall have on each page two columns, in the first of which shall be entered the number of kilograms of snuff and in the second column the number of kilograms of smoking or chewing tobacco. The record books for cigars shall have on each page three columns, in the first of which shall be entered the number of cigars valued at P 20 or less per thousand, in the second column the number of cigars valued at more than P 20 but not more than P 50 per thousand, and in the third column the number of cigars valued at more than P 50 per thousand. The record books for cigarettes shall have on each page two columns, in the first of which shall be entered the number of cigarettes weighing 2 kilograms or less per thousand, and in the second column the number of cigarettes weighing more than 2 kilograms per thousand. The record books for matches shall have on each page three columns, in the first of which shall be entered the number of gross of boxes containing each box 120 sticks or less, in the second column the number of gross of boxes containing each box more than 120 sticks, and in the third column the average number of sticks to each box when it exceeds 120.

ENTRY AND MEMORANDUM SLIP FOR ARTICLES REMOVED.

(d) Manufacturers shall enter on the "credit" pages the date of the removal of each lot of articles, and the name and address of the purchaser or person to whom consigned, and shall on the "debit" pages, enter a true description of the articles removed, the date of such removal, to the purchaser or carrier a memorandum which shall be entered in the record book. The entries made on the "debit" pages shall be made consecutively, beginning with "No. 1" for the first lot removed from each manufactory. Each memorandum slip shall be given the same number as is given to the purchaser, and all such memorandum slips shall be signed by the manufacturer, and shall be in charge of the articles removed from the manufactory.

STATEMENT OF TAXES.

(e) The provincial treasurers, in the discretion of each provincial treasurer, shall keep a record book in each manufactory and a liquidation book in each locality. The record book, removed for domestic sale or consumption, shall be entered in the record book by the other internal-revenue officer who strikes the stock of articles remaining on the manufactory to day make on loose sheets two copies of the pages of their record books, and at the time the two copies shall also be added up and signed by the other revenue officer who makes the two such copies and at once deliver, or transmit, of the proper province, together with the proper officer may make and certify to a liquidation of the treasurers or their authorized deputies are payment of taxes.

OF TAXES PAID.

shall on August 1, 1904, open a ledger account as above, in each locality. They shall debit the manufactory premises on August 1, 1904, as shown from time to time by the liquidation of all articles removed for export and from time to time by the liquidation of the payment of the taxes due and in the next preceding sub-per ledger account, record the manufacturer, send the statement received as taxes

and invoice books provided by sections 28 et seq. of the law, are issued, when further instructions will be given regarding the affixture and cancellation of internal-revenue stamps in payment of such taxes. Provincial treasurers and their deputies will in their ledger accounts give each manufacturer a temporary assessment number and will number the liquidation sheets consecutively for each manufacturer; and such assessment and liquidation sheet numbers shall be entered on both copies of the liquidation sheets when presented.

RECORD OF ARTICLES OUTSIDE OF THE FACTORY PREMISES.

(g) A separate record book shall be kept by each manufacturer who on August 1, 1904, has in his possession on any premises other than those of the manufactory any of the taxable articles aforesaid manufactured by him prior to the said date. Such record book shall be kept on the same premises where the articles are stored, and all entries therein, liquidation of accounts, transcripts therefrom, and payment of taxes for articles removed from such premises, shall be made as near as may be possible in conformity with the regulations prescribed in the preceding subdivisions of this paragraph for record books kept on the manufactory premises proper. But in no case shall the payment of taxes be required for articles which on August 1, 1904, had left both the possession and ownership of the manufacturers thereof.

MANUFACTURERS OF CIGARS, ETC., ON A SMALL SCALE.

(h) Persons who manufacture cigars or cigarettes in their homes for sale or delivery to others, and other persons who manufacture on a very small scale, shall be required to submit statements at frequent intervals as to the total of the articles manufactured and sold by them, or delivered by them to the larger manufacturers. Provincial treasurers may, in their discretion, waive the use of record books and liquidation sheets in the cases of such small manufacturers who, on account of their ignorance or of the unimportance of their business are unable to keep such record themselves or to employ some one else to keep it for them. But all such small manufacturers shall be given an assessment number, and a ledger account shall be opened in the name of each such manufacturer in which he shall be debited with all articles he declares, orally or in writing, to have manufactured, and he shall be credited with all articles he shall declare to have removed for domestic sale or consumption or to have delivered to the larger manufacturers. Whenever required, a declaration sheet in duplicate shall be signed and delivered by such small manufacturers to the provincial treasurer or his deputy, together with the taxes due, and the officer shall indorse his receipt thereon, make entry in the proper ledger account, return one copy of the declaration to the manufacturer, and send the other copy to the collector of internal revenue in the same manner as is provided in the previous subdivisions of this paragraph for the handling of the liquidation sheets presented by the larger manufacturers. Whenever a small manufacturer is delinquent in the payment of the taxes due, or whenever he deliberately conceals or fails to report any of the taxable articles manufactured, sold, or removed by him, the provincial treasurer or deputy treasurer shall require such small manufacturer to thereafter keep a record book and present, when required, the liquidation sheets provided for in the previous subdivisions of this paragraph.

DUTIES OF PROVINCIAL TREASURERS AND OTHER INTERNAL-REVENUE OFFICERS.

12. By the provisions of section 26 and other sections of the internal-revenue law the provincial treasurers and their deputies, and, in the city of Manila, the city assessor and collector and his deputies, are charged with the inspection, assessment, and collection of the various taxes. The assist in the enforcement of the law and to supervise and secure uniformity in its administration in all parts of the islands, internal-revenue agents, storekeepers and gaugers will be appointed and detailed from this office for special or general duty in localities where such assistance or supervision may be required.

BANKS, BANKERS, AND INSURANCE COMPANIES.

13. The taxes imposed on banks and bankers in section 111 of the law also become effective on August 1, 1904, but such taxes due for the five months ending December 31, 1904, will not be collectible until February 1, 1905. The taxes imposed on insurance companies in section 126 of the law also become effective on August 1, 1904, but such taxes due for the five months ending December 31, 1904, will not be collectible until April 1, 1905. Provincial treasurers will at once furnish copies of the law to all banks, bankers, and insurance companies and their branch establishments in the various towns, and call the attention of the president or manager of each such bank or insurance company as to the record which should be kept, and report which will be required of its business transactions.

EXISTING STAMP AND INDUSTRIAL TAXES.

14. The stamp taxes imposed by royal decree on May 16, 1886, and the taxes on business imposed by royal decree on June 19, 1890, known as the "industria" tax, and which have been continued in operation since the American occupation, will continue to be collected, under existing regulations, until December 31, 1904.

CIRCULAR TO BE DISTRIBUTED TO TAXPAYERS.

15. Copies of this circular, in English and Spanish, will be furnished provincial treasurers and internal-revenue agents, sufficient in number to supply all taxpayers. In referring to circulars issued by this office, internal-revenue officers should give the number of the circular, of the section, and of the page to which the remark or query applies.

JNO. S. HORD,
Collector of Internal Revenue.

Approved:

HENRY C. IDE,
Secretary of Finance and Justice.

EXHIBIT 10.

REPORT OF THE AUDITOR FOR THE PHILIPPINE ISLANDS FOR THE FISCAL YEAR ENDED JUNE 30, 1904.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,
OFFICE OF THE AUDITOR,
Manila, P. I., December 1, 1904.

SIRS: Pursuant to the provisions of rule 38 of Act No. 90 of the Philippine Commission, I have the honor to submit my annual report of the financial transactions of the government of the Philippine Islands for the fiscal year 1904, showing the receipts and disbursements of the several branches of the government, by departments, bureaus, offices, and provinces, together with such deductions from results obtained and suggestions as to future policy as seem to present themselves.

This report embodies all transactions of the said fiscal year which were included in accounts received to November 1, 1904, for the period ended June 30, 1904, and also settlements pertaining to prior fiscal years which were not included in previous annual reports.

Accounts covering transactions pertaining to the fiscal year 1904, but subsequent to June 30, and all suspended items in the accounts of said fiscal year will be considered in subsequent reports according to the fiscal year in which admitted but on account of the fiscal year to which the transaction pertained.

The organization of the office and the personnel of the executive staff at the close of the fiscal year were as follows: Auditor, A. Lawshe; deputy auditor, William W. Barre; chief clerk, W. H. Gibson; bookkeeping division, W. Y. Handy, chief; customs division, Gibson, chief; postal division, William A. Walsh, chief; military division, C. H. French, chief; provincial division, O. French, chief; property division, C. A. Smith, chief.

The authorized personnel at the close of the fiscal year were: auditor, a deputy auditor, three clerks of class 1, two clerks of class 4, two clerks of class 5, nine clerks of class 6, thirteen clerks of class 8, fourteen clerks of class 10, four clerks of Class A, two clerks of Class B, three clerks of Class D, three clerks of Class E, two clerks of Class G, two clerks of Class H, and five employees at \$180 per annum each, and five employees at \$120 per annum each.

To provide for contingencies and for the better service it has been the policy of the government to maintain a reserve fund of \$100,000.

each division to familiarize himself with the working detail of the division, in order that he could assume the duties of his chief in the event of resignation or permissible absence. During the fiscal year part of the executive staff availed themselves of their accrued leave to visit the United States. In their absence the work of the respective divisions has been carried on by such clerks with efficiency. Favorable mention should be made of Mr. Ora Miller and Mr. F. W. Thornton, acting chief and acting assistant chief, respectively, of the customs division, and Mr. J. H. Hauck, acting chief of the miscellaneous division. During the illness of the chief of the provincial division and several temporary absences on special work his duties were creditably assumed by Mr. H. W. Gangnuss.

The work of this bureau has been somewhat retarded by reason of the resignation of several of its most experienced examiners, while others of long service have availed themselves of their accrued leaves of absence to visit the United States. This has necessarily added to the work of the remaining employees and resulted in considerable overtime work during several months of the year. The acting auditor wishes to express his appreciation for their cheerful acceptance of the circumstances and efficient work thereunder.

Just before the close of the fiscal year the auditor, Mr. A. L. Lawrie, left for the United States to enjoy the benefits of a well-deserved vacation, and shortly after his arrival there was temporarily appointed a member of the Philippine exposition board at St. Louis, where he is now on duty.

AN ACTING DEPUTY AUDITOR.

Act No. 1064 was passed by the Commission on February 24, 1904, with the approval of the Secretary of War first had, amending Act No. 90, and providing that "the chief clerk shall be acting deputy auditor during the absence of the deputy auditor and when the deputy auditor, by virtue of his office, is performing the duties of the acting auditor. In the absence of both auditor and deputy auditor he shall take charge of the bureau as acting auditor. Under this provision of law, Mr. W. H. Clarke has efficiently performed the duties during such absences.

THE BOOKKEEPING DIVISION

regular duties of the bookkeeping division, as per the last report, this division during the year has several special accounts involving numerous public drafts sold on the gold-standard fund, government depositaries in New York, Washington, Mexico and Spanish Philippines treasury for revenue, and all new Philippine United States mints at Philadelphia, etc. The Commission, by Act 1088, on March 1st, 1904, that the auditor prepare the voluminous abstracts of his monthly account-current since opening the accounting system first of the change has been to greatly account without removing any of

as issued may be duly reported to
1, and such accounting be demanded
whom advances were made as will be

the safeguards properly pertaining to the accountability of the treasurer. The combined balance of all funds in the hands of the insular treasurer on June 30, 1904, was ₱52,842,238.50 Philippines currency value.

During the fiscal year just closed there were 1,690 separate settlements declared on which warrants were issued, and 1,673 accountable warrants were issued during the same period. There were 9,176 receipts issued by the treasurer during the year, which were double entried and checked against the invoices accompanying the deposits, after which they were presented to the auditor for counter signature. There were 2,430 certificates of settlements received in this division and these were double entried, the first entries being in the personal accounts and the others in the statistical accounts. On the ledgers for fiscal year 1904 accounts are being carried with 210 collecting officers and 320 disbursing officers, some of whom are acting in more than one capacity, making the total number of collection accounts 247 and the total number of disbursing accounts 426. There are also 93 open accounts with provincial treasurers in their capacities of collecting and disbursing officers.

The more comprehensive double-entry system of bookkeeping introduced in the bureau of auditing at the beginning of the fiscal year affords a better analysis of all accounts settled and a greater security for correctness of compilations. This system makes necessary the consideration of all the factors entering into every phase of the accounting, as also the effect of each upon the general result. The set of books provided for this work consists of a journal and general account ledger and such individual ledgers and records as correspond respectively to the various general ledger accounts. The individual ledgers are distributed among several clerks, who must present the balance shown by their individual ledgers, which in turn must agree with the aggregate balance shown by the several general accounts, the likelihood of counterbalancing errors being thus eliminated. The ledgers and records referred to as now in use are as follows:

LEDGERS OF PERSONAL ACCOUNTS OF ALL COLLECTING AND DISBURSING OFFICERS.

In which are posted the complete data from all certificates of settlement furnished by the auditor, separate accounts being kept with each officer throughout the islands handling insular funds in each official capacity in which he may serve.

SETTLEMENT WARRANT LEDGERS.

In which are recorded all settlements of accounts payable as claims, proper ledger entries being made to preserve a complete record of each settlement. Both the personal and settlement warrant ledgers, however, are considered as ledgers of personal accounts, they being merely elaborations of the general ledger, differing only in that the personal ledgers embrace all transactions entering into the individual accounts of collectors and disbursing officers as settled, while the warrant ledgers carry all direct payments made by settlement warrants issued, whether chargeable to personal accounts for balances due collectors and disbursing officers, to expense account for amounts due individuals and firms having no responsibility to

the government, or to the general accounts concerned in payments from special appropriations, as loans to provinces, payments of revenues ceded or refunded to provinces, return of deposits for export duties refundable, revenues refunded on account of excess collections under conditions prescribed by the Commission, invalid money orders, etc.

TRANSFER LEDGERS.

In which are recorded all transfers of funds between officers when certified in their accounts as settled by the auditor, the amounts credited to transferors being charged to transfer account and amount charged to transferees being credited to transfer account.

POSTAL LEDGERS.

In which accounts are kept with all postmasters throughout the islands in the dual capacity of collectors and disbursing officers. Except in the case of deficiencies in the postal revenues, funds for disbursement are not advanced to postmasters upon duly approved requisitions, as is required with the other classes of accounts, they being authorized by law to pay the expenses of their respective offices, under authority of the director of posts, from revenues coming into their hands. When quarterly settlements of postmasters' accounts are declared by the auditor, however, the total revenues and expenditures are treated by the so-called warrant and counter-warrant process, which is a method of simultaneous deposit and withdrawal of the funds in order that the treasury account may properly record the transactions for credit of postal revenues and that a distribution of the expense may be made under the appropriations chargeable therewith.

APPROPRIATION LEDGERS.

In which are recorded to the credit of each department and bureau, by subheadings and in the order observed by the Philippine Commission in the enactment of appropriation bills, all appropriations as made, charges for withdrawals of funds by accountable and settlement warrants issued, and credits for unexpended balances returned to the treasury. So numerous and varied are the adjustments entering into the account of appropriations that it would be all but impossible to correctly keep this account without the positive check against the balances which the double-entry system affords.

REGISTERS OF WARRANTS.

In which are recorded the date, number, and amount of each accountable and settlement warrant issued, as also the date and number covering each certificate of settlement in which accountable warrants have been charged to payees, so that any failure to account for or properly charge warrants as issued may be duly reported to the auditing division concerned, and such accounting be demanded forthwith from the officers to whom advances were made as will be consistent in all respects.

In the second annual report of the secretary of finance and justice for the period ending September 1, 1903, it was stated:

"It was considered highly undesirable that the steam cranes and derricks for unloading goods upon the customs wharves and the tramways should belong to private individuals and be operated by them. It was particularly objectionable at Manila, in view of the fact that the owners of the arrastre plant were likewise the largest owners of cascos, lorchas, and lighters for bringing the goods to the customs wharves from the steamers, and the charge was often made, justly or unjustly, that importers who did not employ the owners of the arrastre plant to do their lightering were discriminated against so that their goods were delayed in landing and their demurrage expenses were made much larger. Under the provisions of act No. 897 the government undertakes to perform the arrastre operations at actual cost, so that importers are furnished the best of facilities and all extortionate charges or discrimination are rendered impossible."

This arrastre system, by which a private contractor possessing a monopoly handled the imported merchandise within the custom-house, was found in existence at the American occupation, and was allowed by tacit consent, but without official sanction, to continue as a temporary solution of a difficult problem. The several collectors of customs called attention to the situation and the bad conditions existing, suggesting various remedies.

PREVIOUS HISTORY.

Previous to 1886 each individual importer of Manila received his merchandise at the ship's side in the bay in his own casco or lighter, and got it ashore and through the custom-house with his own labor as best he could. As importations increased, this system, or rather lack of system, was found more and more impracticable and expensive. In November, 1886, the importers got together on the matter and with consent of the Spanish Government entered into a contract with Ramon Montanez to discharge all vessels from foreign ports, to lighter the merchandise ashore to the custom-house, and to land and warehouse the goods. When delivery was desired the importer would bring his own or hired laborers into the warehouses and take out his goods—an especially obnoxious feature from a custom-house standpoint and considering that many other importers had merchandise in the same warehouse. Montanez placed three steam cranes on the wharf and installed the tramway with its steam locomotives and cars for conveying the merchandise from the wharf on the river front to the custom warehouses. Montanez later sold the plant and contract to Santiago Dominguez & Co., who operated it until after the American occupation, when it was sold to D. M. Carman & Co., December 5, 1898. This firm soon after entered into two new contracts with the importers, surrendering the old, (1) to lighter the foreign merchandise from the ships to the custom-house wharf, and (2) to do the arrastre work proper of conveying the merchandise from the wharf to and storing it in the warehouses. They improved the arrastre plant, added another steam crane in 1901, built additional tracks to the new warehouses constructed in 1901, and added new cars.

PURCHASE BY CUSTOM-HOUSE.

In 1902 the question of governmental operation of the arrastre plant was taken up with more earnestness by the insular collector of customs, and some preliminary negotiations were had with Carman & Co. looking to the purchase of the system. The matter was laid before the Philippine Commission, which on January 28, 1903, passed a resolution authorizing the secretary of finance and justice and the collector of customs to negotiate for the purchase of the plant and to operate it, and on March 7, 1903, a further resolution authorizing the collector of customs to so purchase it.

After an appraisal of the property, consisting of steam cranes, locomotives, cars, railroad tracks, and other machinery and appliances, the purchase was consummated by the Philippine Commission in Act No. 897, passed September 23, 1903, which appropriated P29,000 for the purpose, and also P10,000 additional for placing the system in operation. The receipts for the service were made a permanent appropriation to pay its expenses, the intention being to make the charge merely sufficient to cover the cost of operation. The collector of customs was authorized by the same act to operate, maintain, and administer the arrastre system, and to fix and collect charges for the service. In accordance therewith regulations for the organization, government, and operation of the arrastre service were issued. In the main the personnel employed by the former owners was retained, but reorganized and placed under custom-house administration. An office and clerical force were established and provisions made for collecting a charge for all the merchandise handled in the custom-house.

On October 16, 1903, the custom-house assumed control of the arrastre. In the absence of data and experience upon which to fix the rate for the charge, other than that furnished by the former owners, the same rate as charged by them was continued as a tentative

measure, ₱1.50 per ton. The charge of 50 centavos per ton on all merchandise permitted to take delivery in bulk without discharging on the custom-house wharf, known as "pasé delivery," was immediately discontinued, saving to the importers about ₱37,000 a year.

In a month's time it was found that the handling of the merchandise stored upon and delivered from the wharf, instead of the warehouses, could be done at less cost, and the rate for wharf delivery was lowered to ₱1 per ton, effecting a saving of about ₱8,300 a year to the importers. They have been encouraged to take wharf deliveries as not only a saving of expense but a saving of time, and every facility possible has been given them which would effect an economy and do away with bad conditions which had hampered the incoming commerce of Manila. The great majority of importers have appreciated, and cooperated with, these betterments of service, and have been led to institute better business methods of their own, effecting further savings which can not well be estimated, but which do exist.

ADDITIONAL SERVICE GIVEN.

Although the arrastre rate was retained at ₱1.50 per ton, much additional service was at once given for the one charge. Previous to the assumption of the arrastre by the custom-house the service consisted of the conveyance of the merchandise from the custom-house wharf to the warehouses and the storing therein. It ended at that point. The merchandise had been stored more or less indiscriminately, neither a ship's cargo nor individual consignments being kept together, but scattered through two, three, or more warehouses. When delivery was desired, the consignee would go into a warehouse with his cooly laborers, and after vexatious search and much work of piling and repiling boxes would get his goods together, carry them out of the warehouse, and put them on his carts. The consignee was also required to carry the samples selected for examination and appraisal from the warehouses to the appraiser's stores, and also to furnish the laborers for the opening of cases and the unpacking and repacking of the contents. All this work was taken over by the new arrastre division of the custom-house, the service to be included in the charge of ₱1.50 per ton. The storing of merchandise was at once systematized by each ship's cargo being kept together in a warehouse and by each individual consignment being piled together. This did away with one of the bad conditions that existed at the port of Manila, of sorting cargoes on board incoming steamers, delaying their departure and causing great demurrage. When delivery is desired, the arrastre laborers now take the merchandise out of the warehouse, delivering it to the consignee's carts. Arrastre laborers also carry the sample cases to the appraiser's stores and perform all labor required therein, consisting of the handling of the cases for examination and appraisal, the unpacking and repacking, and delivery outside the stores to the consignee. Not only has this reform kept all coolies (except customs employees) and other unauthorized persons out of the warehouses and appraiser's stores, but it has effected another considerable saving to importers estimated at about ₱41,000 a year.

NO DELAY AT WHARF.

By improvements to the plant, adding new facilities and changing methods, a quicker handling of the merchandise has been secured, by reason of which lighters are now discharged one-third or more quicker at the wharf. This enables the lighters to return to the bay for further cargo, and a consequent faster discharge of the incoming steamships, whereby they are enabled to save demurrage. It has done away with the former complaint that there were not enough closed lighters to do the business of the port. It has aided materially in correcting the evils which surrounded shipping and commerce coming to Manila.

Loaded lighters are discharged at the wharf in the order in which they arrive. Thus there is absolutely no discrimination in discharging. Perishable articles, like vegetables, etc., are given a preference, but otherwise without interfering with the order of discharge.

IMPROVEMENTS IN WAREHOUSING.

When the arrastre plant was acquired the merchandise was conveyed into the warehouses from the wharf by running the loaded tramway flat cars into each warehouse on a single track. As the empty cars had to be taken out through the same doorway, which also served as the egress of the coolies taking out merchandise for delivery, much difficulty and confusion was experienced, frequent blockades being caused, which delayed the work of the whole service, being felt on the wharf as well. This bad condition has been remedied by taking up the tracks into the warehouses, replacing them with broad runways, constructing receiving platforms outside next to the main track on the one side and delivery platforms at other doors on the other side and handling the cases of merchandise by hand trucks. The blockades have been prevented and much confusion done away with. Fewer laborers are required—a considerable saving of expense. The better facilities have

lessened the liability of breakage from rough handling. It is a big improvement over old methods. By the changes mentioned the old warehouses have been made as much as possible like the new warehouse "P" under the new wing of the customs building. With its unimpeded wooden floor, plenty of doors, wooden platform outside, of a height of the carts, the handling of the merchandise has been vastly facilitated and the time reduced one-half or more, especially by use of the warehouse trucks introduced by the arrastre division. Quickness of delivery has been the object sought. No complaints are now made of inability to obtain merchandise out of the custom-house as soon as the consignee wants it. On the contrary, complaints have been made that delivery is ready before the consignee is.

SAMPLE PACKAGES.

The sample packages for appraiser's examination were until lately not taken to the appraiser's stores until requested by the consignee, who brought the permit for the samples with him from the appraiser's office. This has been changed by the permits being sent without intervention of the consignee and by the samples being transferred to the stores by the arrastre force without delay. This work has been so systematized that a saving has been effected not only in arrastre labor, but the good effects are felt in the work of appraisal. It has also resulted in a saving to the importers, who need fewer representatives—a saving not readily ascertainable, but a fact.

UNINTENTIONAL PROFITS.

Notwithstanding these enlargements of the service performed by the arrastre system, the expense was kept down by more systematic and better methods, so that in time it was found that the charge of ₱1.50 per ton yielded a considerable profit, even after many improvements had been made to the plant. It was not the intention of the government and the insular collector of customs to conduct the arrastre service for the purpose of making a profit and thus create a revenue, but to do the work for cost and thus make the service as inexpensive as possible to the importer. But a surplus being unintentionally created, the general fund of the Philippine government was reimbursed on June 27 last by ₱22,368.39 being paid back out of the arrastre profits as a partial refund of the ₱36,368.39 expended out of the appropriation by the Commission for the purchase and operation of the plant. Another refund of ₱5,000 was made August 3 and the remainder, ₱9,000, was paid back September 8.

Thus the entire cost of the arrastre plant to the government has been paid back (without expectation) out of its earnings, notwithstanding the greatly increased service and the reduction of the rate, in less than one year from the date of the appropriation for its purchase and less than eleven months from the actual assumption of the service by the custom-house.

The charge of ₱1.50 per ton having yielded net profits larger than expected, on July 1, 1904, the arrastre rate was reduced by 16 per cent—from ₱1.50 per ton to ₱1.25 for warehouse deliveries, and from ₱1 to ₱0.90 per ton for wharf deliveries. This reduction will save the importers of Manila over ₱22,300 a year.

EXPENSE SAVED TO IMPORTERS.

Altogether, therefore, the taking over and operation of the arrastre service by the custom-house has saved to the importers of Manila over ₱108,600 a year of the expense to which they were formerly subjected, as follows:

Pasé deliveries.....	₱ 37, 000
Wharf deliveries.....	8, 300
Warehouse deliveries and handling of sample packages.....	41, 000
Reduction of rate to ₱1.25 and 90 centavos.....	22, 300
Total.....	108, 600

The importers have also saved some other expenditures, especially demurrage on lighters, which can not well be computed, and it is believed have been given a greatly improved and more expeditious service and freer from liability to breakage than they ever enjoyed before.

Moreover the saving of demurrage to steamships coming to Manila has been very considerable. It is not only a saving to the shipping of Manila in actual money, but it is a reform that wipes out an evil which contributed much in former years to giving a bad name to this port and to hampering the commerce of the Philippine Islands.

IMPROVEMENTS TO PLANT.

The plant of the arrastre system has been much improved. The locomotive in use on the tramway, a French engine of old style, being unable to haul the traffic, a new American

locomotive of latest design and double the capacity has been purchased. It has the distinction of being the first American locomotive to be introduced into the Philippine Islands. The light rails of the main line of the tramway have been replaced with heavy steel rails. New tracks and switches have been laid, increasing the trackage 50 per cent and vastly improving the facilities. A firm roadbed paved with cobblestone has been constructed. Board runways with receiving and delivery platforms have been built in five warehouses and a sixth is now being likewise improved. A track has been constructed through the appraiser's stores for the conveyance of samples direct from the warehouses. The warehouses have all been supplied with hand trucks, which the Filipino laborers handle quite well, contrary to the expectation of many. The steam cranes and other machinery have all been repaired and put in good condition. About half the customs wharf has been repaved by the arrastre division, and quite a number of minor improvements have been made to facilitate the work. Altogether ₱13,784.42 has been expended on additions and improvements to the plant in materials, besides considerable labor.

FIRE AND POLICE PROTECTION.

The arrastre division maintains and has charge of a system of fire protection of the custom-house grounds, consisting of a reel and fire hose and barrels and buckets. It also provides four policemen and watchmen in the warehouses by day and one on the wharf at night, in addition to the regular custom-house watchmen. The division also cleans the customs wharf and grounds once or twice each day.

OFFICE AND PERSONNEL.

The entire finances of the arrastre are conducted by its own office, the collections for the charges being made by its receiving teller and deposited with the insular treasurer in separate account. The expenditures are made by its disbursing officer under the usual regulations. A complete system of accounts is kept in its office.

The personnel has given excellent service. In the office the chief clerk and two clerks are Americans and the receiving teller, bookkeeper, and three clerks are Filipinos. In the wharf and warehouse force the wharfinger (who has general charge) is an American. The first assistant wharfinger, the warehouseman, and first assistant warehouseman are Spaniards (now Philippine citizens); the second assistant warehouseman a Chinese, and three other assistants Filipinos—all these being old employees of the arrastre retained by the custom-house. The engineers of locomotives and steam cranes, the superintendent of the tramway railroad, the conductors, firemen, machinists, and watchmen are Filipinos, as are also the 12 wharf and warehousemen foremen and the 12 openers and packers. Both Chinese and Filipino carpenters are employed. The laborers are all Filipinos—mostly Pampangas, Visayans, and Ilocanos, only a very few Tagalogs. About one-fourth are steady workers. Another fourth, or a little more, work about three to four days a week. The others come and go, working one to two or three day a week. There has never been any difficulty in obtaining all laborers needed. They do good work if plentifully superintended, but not otherwise. They are paid 90 centavos Philippine currency per day of eight hours, and at the same rate for overtime, and are paid weekly. The average number employed is 125 to 150.

The skilled and semiskilled employees are paid monthly and number 65 to 70. The native assistant superintendents are paid salaries of from ₱42 to ₱50, the locomotive engineers from ₱42 to ₱50, the crane engineers ₱34, firemen ₱20, machinists ₱25 to ₱50, carpenters ₱40 to ₱50, wharf and warehouse foremen ₱30, and openers and packers ₱30.

The whole force of skilled and semiskilled employees and laborers have done good work, being well and liberally superintended.

FINANCIAL STATEMENT.

The following shows the amount of merchandise handled by the arrastre plant from October 16, 1903, to June 30, 1904:

	Tons.
Merchandise delivered from wharf.....	11,511.66
Merchandise delivered from warehouses.....	57,248.44
Total tonnage of merchandise landed at custom-house.....	68,760.10
Merchandise given passé delivery.....	51,579.82

Statement of the finances of the arrastre from October 16, 1903, to August 31, 1904.

DEBITS.

Gross cash receipts.....	₱ 139,489.34
Refunded for pasé and wharf deliveries.....	23,925.60
Arrastre collections, net.....	115,563.74
Appropriation, Act No. 897.....	7,368.39
Exchange of currency and miscellaneous sources.....	91.14
Total debits.....	123,023.27

CREDITS.

Reimbursement to general fund, government of Philippine Islands.....	₱ 27,368.39
Expense:	
Labor.....	₱ 24,824.93
Salaries.....	35,562.75
Supplies.....	7,392.78
Improvements to plant.....	13,784.42
Overtime, customs employees.....	1,743.36
Total expenditures.....	83,308.24
Treasurer's balance, August 31, 1904.....	₱ 8,013.36
Disbursing officer's balance, August 31, 1904.....	3,743.65
Cash balance, August 31, 1904.....	589.63
Total balances.....	12,346.64
Total credits.....	123,023.27

The ₱ 29,000 appropriated and expended for the purchase of the plant is not included in the above statement. As stated above, since September 1, 1904, ₱ 9,000 additional has been reimbursed to the general fund of the government, making the total refunded ₱ 36,368.39, all that was expended out of the appropriation for the arrastre.

The greatest satisfaction of the operation of the arrastre plant by the custom-house is not so much in the favorable financial exhibit as it is in the belief that great relief has been given to the importers and that a bad condition hampering the port of Manila and choking its commerce has been destroyed.

Respectfully,

CLIFFORD D. HAM,
Deputy Surveyor of Customs, in Charge of Arrastre.

The COLLECTOR OF CUSTOMS FOR THE PHILIPPINE ISLANDS.
(Through office of insular surveyor.)

EXHIBIT 8.

ANNUAL REPORT OF THE ACTING COLLECTOR OF INTERNAL REVENUE.

OFFICE OF ACTING COLLECTOR OF INTERNAL REVENUE,
Manila, P. I., October 1, 1904.

The honorable the SECRETARY OF FINANCE AND JUSTICE,
Manila, P. I.

SIR: As the acting collector of internal revenue to date of August 1, 1904, I have the honor to submit herewith my report covering the period from September 1, 1903, to which date the last annual report was brought, to August 1, 1904, when "the internal-revenue law of 1904" went into effect and a complete reorganization of the bureau inaugurated.

As is well known to you, sir, the jurisdiction of the collector of internal revenue was limited to the unorganized provinces. Little by little the field became narrowed down to a part of the island of Mindanao and to the Jolo Archipelago, and not long after the closing of the last annual report all this territory was swept from under our control by the inauguration of the Moro government.

Exhibit A, hereto attached and made a part of this report, shows the internal-revenue collections from September 1, 1903, to date of transfer to the new government above referred to.

The undersigned, as acting collector of internal revenue, continued until August 1, 1904, to collect the fees for the forestry bureau on forestry products coming to and assessed in the city of Manila. Said collections are covered by Exhibit B, hereto attached.

The distribution of revenue stamps to the provincial treasurers, through the insular treasurer, was also continued up to August 1. Exhibit C, attached hereto, shows such distribution and also shows the account balanced by transfer of stock to the city assessor and collector. Such stamps are now handled and distributed by the said city assessor and collector of the city of Manila, in accordance with the provisions of Act No. 527.

Exhibit D, attached hereto, is a complete return of the accountable and expendable property on hand belonging to the internal-revenue bureau, the disposition of which the undersigned awaits your instructions.

Respectfully submitted.

A. W. HASTINGS,
Acting Collector Internal Revenue, Philippine Islands.

ANNUAL REPORT OF THE COLLECTOR OF INTERNAL REVENUE.

BUREAU OF INTERNAL REVENUE
OF THE PHILIPPINE ISLANDS,
OFFICE OF THE COLLECTOR,
Manila, P. I., September 19, 1904.

The honorable HENRY C. IDE,
Secretary of Finance and Justice, Manila, P. I.

SIR: In accordance with the provisions of section 4 of the "internal-revenue law of 1904," and complying with your request of the 6th instant, I have the honor to submit herewith, for transmission to the Philippine Commission, my first annual report of the proceedings in the bureau of internal revenue, including a statement of certain collections and disbursements therein.

The data submitted herewith are necessarily quite incomplete, for the following reasons: First, only a portion of the taxes imposed in the internal-revenue law are now being collected, as by the provisions of that law the taxes imposed on certain persons, objects, and occupations do not become operative until January 1, 1905; second, this bureau has been in existence less than two months, and it has not been possible in so short a period to properly organize the work in the provinces; and third, the time available for the preparation of this report was so brief as to make it impossible to secure complete statistical reports from the provincial treasurers. No exhaustive review of the situation can, therefore, be attempted at this time. The statistics submitted herewith in the accompanying exhibits are for the city of Manila, and for the month of August, 1904, and may be taken as fairly accurate and complete. The only change which the final figures will make in the various statistics will be in the way of increasing the number of registered taxpayers and amount of taxes paid. When complete reports have been received from the provinces the figures of tax collections herein given will be increased very materially.

TAXES NOW BEING COLLECTED.

Act No. 1189 of the Philippine Commission, "the internal revenue law of 1904," enacted July 2, 1904, imposed the following taxes, effective on August 1, 1904: On each proof liter of distilled spirits, containing amyl alcohol or other poisonous substances, removed for use exclusively for industrial purposes and not as beverages, 10 centavos; on each proof liter of distilled and rectified spirits, 20 centavos; on each proof liter of manufactured liquors, 30 centavos;

on each gauge liter of fermented liquors, 4 centavos; on each kilogram of snuff or snuff flour, 32 centavos; on each kilogram of manufactured (smoking or chewing) tobacco, 48 centavos; on each 1,000 cigars, ₱2 when the manufacturer's wholesale price does not exceed 20 pesos per thousand, ₱4 when the price exceeds 20 but does not exceed 50 pesos per thousand, and ₱6 when the price exceeds 50 pesos per thousand; on each 1,000 cigarettes, 67 centavos when the weight per thousand cigarettes does not exceed 2 kilograms, and ₱2 when the weight exceeds 2 kilograms; on each gross of boxes of matches containing not to exceed 120 sticks to the box, 40 centavos, and a proportionate additional tax on each gross of boxes containing over 120 sticks to the box. The taxes on these articles accrue not at the time of their manufacture, but at the time of their removal from the manufactory for domestic sale or consumption. All of these articles manufactured for export are exempted from the payment of these taxes. The only articles of foreign manufacture made subject to the payment of these taxes are matches, on which a tax is levied at the same rate as is levied on the domestic product, and is collected at the custom-house of the port of entry.

In the original figures submitted to the Philippine Commission it was estimated that between ₱8,000,000 and ₱9,000,000 would be collected in a normal year as taxes on the articles enumerated above. The reductions made in the proposed rates before the bill was finally passed reduced this estimate to an amount between ₱6,500,000 and ₱7,500,000, or just about the amount which was collected annually during the last years of the Spanish regime from the one tax known as the *cedula personal*, or poll tax. The *cedula personal* was a direct tax of obligatory payment which none could escape, as it was a tax paid mainly for the privilege of living in these islands, and incidentally for the privilege of owning property. The poll tax imposed in the internal-revenue law will yield but the merest fraction of what was formerly collected on *cedulas personales*.

The taxes imposed on the cigars and other articles enumerated above are indirect taxes and of optional payment, each consumer suiting his own convenience as to the time and measuring his ability as to the amount of his payments. These are taxes which are paid not for the privilege of living here but for the privilege of consuming the cigars and other cheap but good things that these islands afford. Even with the taxes added, the consumer in these islands of cigars, cigarettes, or spirits can still get three or four times as much for his money as can the less fortunately situated resident of the United States or Europe. Careful inquiry made by this office has not demonstrated that the residents of these islands, native or foreign, have failed or are failing to grasp their opportunity, nor that the popular taste for cigarettes and vino has, since August 1, become sated to any appreciable extent.

PRELIMINARY WORK.

It is provided in section 152 of the internal-revenue law:

Until the collector of internal revenue shall have the proper books, stamps, and forms ready for distribution the methods provided for the administration of this act shall not be required, and he is empowered to make such temporary regulations and arrangements for the collection of the taxes imposed by this act as will not unduly embarrass or interrupt the business of the persons affected thereby.

In accordance with these provisions of law, and to carry into effect the announced policy of the government, i. e., that the law should be administered in a liberal spirit, "Circular No. 1, to all internal-revenue officers," was issued from this bureau before the 1st of August and was distributed to every part of the islands (copy of this circular is made a part of this report, marked "Exhibit A"). This circular was printed in English and Spanish and was published in the Official Gazette and in most of the local periodicals. A copy was also delivered to every registered manufacturer of the articles subject to the taxes. Tables and rules for gauging spirits have also been issued (copy inclosed, marked "Exhibit B.")^a

During the months of July and August a preliminary assessment was made in the city of Manila and in the provinces of the various manufactures, with the following result:

Taxpayers.	In Manila.			In the provinces.		
	Number.	Total anticipated output for year ending June 30, 1905.		Number.	Total anticipated output for year ending June 30, 1905.	
		Unit.	Quantity.		Unit.	Quantity.
Distillers.....	7	Proof liters...	6,627,000	490	Proof liters...	15,000,000
Breweries.....	1	Gross liters...	3,592,200			None.
Manufactured tobacco..	23	Kilos.....	326,916			(?)
Cigars.....	66	Number.....	116,059,302	181	Number.....	12,179,500
Cigarettes.....	48	do.....	4,520,938,085	257	do.....	186,467,697
Matches, domestic.....	1	Gross boxes..	387,700			None.
Total.....	146			928		

SUMMARY.

Taxpayers.	Number.	Total output for year ending June 30, 1905.	
		Unit.	Quantity.
Distillers.....	497	Proof liters...	21,627,000
Breweries.....	1	Gross liters...	3,592,200
Manufactured tobacco..	23	Kilos.....	326,916
Cigars.....	247	Number.....	128,238,802
Cigarettes.....	305	do.....	4,707,405,782
Matches, domestic.....	1	Gross boxes..	387,700
Total.....	1,074		

These figures are compiled from the declarations made by the manufacturers themselves, are based largely on the actual output for the year ending June 30, 1904, and are believed to be quite conservative.

During the twenty-nine days grace allowed, between the time these taxes were imposed and the time they became operative, July 2 to August 1, 1904, many of the manufactories in the provinces, and practically all of those in Manila, ran overtime and vastly increased their normal output. In fact, the increase in the output of cigars, cigarettes, spirits, and matches began during the month of June, when it was foreseen that the internal-revenue law would be passed, and when it was generally believed it would become operative on the 1st day of July.

Therefore, when the taxes became effective, on August 1, 1904, the market was overstocked with tobacco and alcohol products and

^a Not printed.

matches on which the taxes had not been paid and could not then be collected, inasmuch as these taxes accrue at the time of the removal of the articles from the place of their manufacture. These cigars, cigarettes, spirits, and matches were purchased by merchants and middlemen, in amounts far in excess of the normal needs of trade, for the purposes of speculation. Consumers of these articles paid during the month of August to these speculators the normal price of the articles, prior to the imposition of the taxes, plus the amount of the tax which had been paid neither by the manufacturer nor the merchant. It can, therefore, be readily seen that the profits derived from their business by the dealers in tobacco and alcohol products increased very materially during the month of August, and that these abnormal profits will continue to be collected from the actual consumers until the stocks removed before the 1st of August are entirely exhausted. It is, of course, not to be expected that as long as the dealers can continue to sell their wares at heretofore undreamed-of profits they will voluntarily resume their purchases of tax-paid articles from the manufacturers. Of course, the consumer is led to believe that the increase in price of his smoke and his drink is due to the internal-revenue tax, and the fact that there has been no serious diminution in the consumption of such articles would seem to indicate that the consuming public in these islands is able and willing to pay the amount of the taxes imposed, even though such amounts, instead of reverting to the insular treasury as taxes, are kept by the dealers as added profits.

Nor can it be doubted for a moment that the immediate effect of this law has been to temporarily increase the profits of the manufacturing industries affected by the taxes imposed. Most, probably all, of these manufactories did a thriving business during the months of June and July, and many of them, especially the distillers, were found on the 1st of August to have scarcely any stock whatever on hand. This is probably an unprecedented condition of affairs in the manufacturing annals of these islands. These manufacturers, therefore, sold during the months of June and July all of their old or normal stock, all of their normal output, and all of their forced output during those two months. Yet, according to some of the local periodicals, they now express surprise and disappointment because their sales during the month of August are not up to the normal level. It is very much like the youth who believed he could both eat his cake and have it.

The opposition to this law, so general at the start, appears now to have simmered down to the question of distilled spirits. It is claimed that this industry is irrevocably ruined. The manager of one of the largest distilleries in these islands, probably the largest distillery in the East, told me that before the end of July he had exhausted all of his sugar and other raw material, and that he was reluctantly obliged to refuse to fill orders for spirits, one of them for about 300,000 liters, even though higher prices were offered than ever before. In a case of this sort the surprise should lie in the fact not that the output for August should have been reduced, but that there was any output at all in August, inasmuch as the normal sales for that month had already been made in June and July.

There is submitted herewith a statement (Exhibit C) in which are given the figures, as returned by the Manila manufacturers

themselves, showing the actual stock on hand of the various alcohol and tobacco products and matches on July 1 and on August 1, 1904, and the total amounts of such articles sold by the manufacturers during the first month's operation of the law. To this statement are also added comparative figures showing the amount of each of such articles sold by manufacturers during an average normal month before the imposition of the taxes.

From these figures it will be seen that on July 1 the various distillers in Manila had on hand 746,420 liters of proof spirits and that on August 1 the stock in the same distilleries was only 171,387 liters of proof spirits. The difference between these two amounts, 575,033 proof liters, plus the amount in which the forced output exceeded the normal output for July, would give with a fair degree of approximation the number of liters of proof spirits with which the local market was overstocked, i. e., above the normal needs of trade, on August 1, 1904, when the tax on distilled spirits became operative.

What the amount of the excess over the normal output was in the month of July can not, unfortunately, now be accurately determined. However, as will be remembered, the leading distillers of Manila stated, at the second public session in which the proposed law was discussed before the Philippine Commission, that there had been a serious fall off in the output of their manufactories during the first five months of 1904. On the invitation of these distillers, and acting under instructions of the Commission, I met them at the office of one of the leading distillers, where the account books or transcripts therefrom were presented to me for examination by all of the leading distillers or by their representatives. This was near the end of June while the bill was still under consideration. At this meeting the fact was conclusively established, by the books and other documentary evidence, that the business done by the various Manila distilleries from January to May, inclusive, of 1904 was on an average equal to only 65 or 70 per cent of the business done by them during the same five months in the year 1903. This fact was admitted by all. I remember it distinctly, because it came as such an agreeable surprise to find that these distillers so kindly refrained from blaming the law for a slackness in business existing for several months before the date of its enactment.

It also appeared of record in some of the leading distillers' books that in the month of May, 1904, their distilleries had been in operation on an average of but five or six hours a day, whereas in 1903 these same stills had worked from eight to twelve hours a day. But the magic effect of the passage of the internal-revenue law changed all this and for a while put an end to dull times. Beginning some time in June and continuing until July 31, or until their sugar or other raw material gave out, the Manila distilleries ran overtime manufacturing and shipping anisado, ginebra, and other liquors.

There are eight distilleries in Manila, but one is not in operation, having been closed temporarily by the department of public health. The remaining seven distilleries during the first five months of this year had been running only a little over half of the normal number of hours a day. But during the month of July and during a part of June most of these distilleries ran the full number of hours, and some of them ran overtime. It would therefore not be extravagant

to estimate that the forced output of spirits during the months of June and July would equal one month's normal output during the first five months of the year. Therefore, if 575,033 proof liters, the old stock disposed of, be increased by 552,250 proof liters, one month's normal output, it would appear that the liquor market was overstocked, i.e., above normal trade needs, on August 1 by 1,127,283 liters of proof spirits, or nearly 2,000,000 gauge liters of the strength at which anisado and the other compounded liquors are commonly sold to the actual consumer.

Now, in the statements of their estimated production of spirits for the fiscal year ending June 30, 1905 (figures given above), as made by the Manila distillers themselves, it would appear that they would produce in that year something over 6,500,000 liters of proof spirits. So, figured on this basis, the local liquor market, as far as the Manila distillers were concerned, was overstocked on August 1, 1904, with liquors sufficient to supply the normal consumption for a period of over two months. Meanwhile a certain amount of spirits are being removed every day from the distilleries for domestic consumption, which adds to an already overstocked market. Therefore, to expect that normal conditions will obtain in the liquor market before the middle or end of next October is to court disappointment, because it would be to hope for a reversal of the universally accepted commercial law governing supply and demand.

Of course these figures and the inferences made therefrom are based on the Manila distilling business taken as a whole, and no attempt is made to explain wherein some of the distillers got more and others less than their normal share of the increased business during the months of June and July. Some of the distillers were quick to take advantage of the twenty-nine days' margin allowed them for the removal of their spirits, whereas others lost their time execrating the law.

OPERATION OF THE LAW DURING THE FIRST MONTH OF ITS ENFORCEMENT.

An examination of Exhibit C, herewith, giving output by articles and comparative figures, and of Exhibit D, showing the tax collections by articles for the month of August, 1904, in the city of Manila, will be found interesting in view of the statements so often made that the imposition of these taxes on tobacco and alcoholic products would prohibit their consumption.

There were removed from the various manufactories in Manila during the month of August, for domestic consumption, 44,248 proof liters of distilled spirits, 196,885 gauge liters of fermented liquors (beer), 6,969 kilograms of manufactured tobacco, 7,289,778 cigars, 106,233,420 cigarettes, and 8,750 gross boxes of matches. Compared with the normal output during an average month before these taxes were imposed, the August output stands as follows: Distilled spirits, 8 per cent; fermented liquors (beer), 66 per cent; manufactured tobacco, 25 per cent; cigars, 80 per cent; cigarettes, 28 per cent; matches, 62 per cent; or a general average of 45 per cent. The taxes collected on these articles during the month were as follows: Distilled spirits, P10,890; fermented liquors (beer), P9,465.04; manufactured tobacco, P2,397.67; cigars, P6,715.42; cigarettes,

₱73,414.90; matches, ₱3,500; making a total of ₱106,383.03. This amount is now estimated to be between 20 per cent and 25 per cent of what these taxes may be expected to yield during an average month after normal commercial conditions have been restored. The above total does not include the taxes collected on imported matches, the exact figures for which were not available.

Of the total taxes collected during August, one-half, or ₱53,191.51, was collected during the first twenty-one days and the other half was collected during the last ten days of the month. These figures should be most encouraging to the manufacturers as showing in an unmistakable manner the revival of the various industries even at this early date. For the sake of convenience the tax collections by articles are distributed in Exhibit D in three groups, each covering the collections for a period of ten days. The percentages of increase in the tax collections from period to period are also indicated. Partial returns of collections so far made during September seem to indicate that the output of the Manila manufactories, and therefore the tax collections, during the current month will considerably exceed the output and collections during August.

An analysis and explanation of the figures presented in Exhibits C and D may be made as follows:

DISTILLED SPIRITS.

This subject has been fairly well discussed in the preceding pages of this report. All of the articles subject to excise taxes deteriorate with age, except distilled spirits, which usually improve the longer they are kept. This will explain why dealers and middlemen found it profitable to lay in, before the taxes became effective, very large stocks of liquors and only comparatively large stocks of cigarettes and other perishable articles. It will also explain why the August output, as compared with the normal output, of the distilleries was proportionately so much smaller than the August output of the cigarette and other manufactories whose products are subject to these taxes. Why the output of the distilleries for the second ten days in August fell below the output for the first ten days by 12 per cent is not clearly apparent. The probability, however, is that in the rush of the last days of July certain customers were left unsupplied with liquors, and that these orders were filled after August 1 with tax-paid goods.

FERMENTED LIQUORS (BEER.)

The output of beer from the local brewery during August, 1904, was 66 per cent of its output in August, 1903. The price of this native beer was increased considerably after the American occupation, and on July 1 of this year the price was increased still more by the change made in the previous price in Mexican money to the same figure in Philippine currency. Up to August 1, 1904, the brewery allowed middlemen and dealers a discount on its published prices of 20 per cent on draft and 25 per cent on bottled beer. During the month of July last the brewery announced to its customers that on and after August 1, 1904, they would only be allowed 10 per cent discount on draft beer and from 12 per cent to 19 per cent discount on bottled beer, according to the amount of the purchase.

It is estimated that this cut in the discounts previously allowed the trade was just about equal to the tax, 4 centavos per liter, imposed in the internal-revenue law. Of course many dealers anticipated this cut in the discounts by purchasing more than the usual amount of beer in July, and the result was a drop in the August output from the brewery. The price of a glass of native beer has not increased since August 1, 1904, and the situation appears to be that the manufacturers make the same or greater profits than they did before the imposition of the tax; that the consumer pays no more than he did previously, or at most the difference between Mexican and Philippine currency, and that the middlemen and dealers pay the tax out of their profits. It was feared that after the imposition of the internal-revenue tax on the native beer Japanese imported beer might wage a disastrous competition with the native product, unless such foreign beer was also made subject to this tax. This office has since learned that the Japanese Government pays a bounty of 1 yen and 39 sen on each case of beer, containing 36 liters, exported from that country. This bounty is therefore just about the same per liter as the internal-revenue tax imposed here on the native product. A separate and detailed report will be made on this matter.

MANUFACTURED TOBACCO.

There is little chewing, snuff taking, or pipe smoking done in these islands. The picadura, or fine-cut tobacco, turned out mostly by small manufactories, is used almost exclusively for the making of cigarettes. The tax imposed in the internal-revenue law on this picadura is proportionately higher than the other taxes. The likelihood is that the more strictly the law is enforced with regard to this tax the greater will be the output of the cigarette manufactories become. Some 4,000 kilograms of manufactured tobacco exported to other countries, and on which no taxes were collected, are not included in Exhibit D.

CIGARS.

Notwithstanding the fact that large amounts of cigars were removed by dealers from the local manufactories in July to supply the August trade, and that even many of the actual consumers, anticipating an increase in the price in August, made their purchases in July, there was a reduction of only 20 per cent from the normal output in the cigars sold by the Manila manufacturers during the month of August. Cigars require a larger proportion of manual labor in their manufacture than any of the other articles subject to these taxes. For this reason the capacity of a cigar manufactory is largely a question of the number and skill of the cigar makers it employs, and it is not so easy to quickly increase its production and output. For this reason, and also because of large quantities of leaf tobacco which were damaged by the floods early in July, the output of the Manila manufactories was not as large during that month as some of the manufacturers might perhaps have wished. The August output of the cigar manufactories was, therefore, larger than it would otherwise have been. In addition to the 7,289,778 cigars sold for domestic consumption there were exported during August, mostly to China, the Straits Settlements, Australia, and Europe, 6,282,260 cigars.

CIGARETTES.

It is estimated that fully one-half of all the taxes paid on tobacco and alcoholic products will be collected on cigarettes. In view of this fact the movement in the output of cigarettes from the Manila manufactories during the month of August is most satisfactory, as indicating a speedy resumption of their normal output. The taxes collected on cigarettes from the 11th to the 20th of August were more than twice as great as the taxes collected during the first ten days of that month; again, the taxes collected during the last eleven days of the month were more than double the taxes collected between the 10th and the 20th. The increase in the output of tax-paid cigarettes is, therefore, proceeding by leaps and bounds. It was stated at the second public session, in which the proposed law was discussed before the Philippine Commission, that notwithstanding the fact that many cheaper grades of cigarettes were on the market, the vast majority of the consumers of cigarettes voluntarily paid from 2 to 4 centavos more for the better grades. This was before the imposition of the tax. It is not now seriously believed by anyone that the tax imposed, 1 centavo on each 15 cigarettes, will reduce the consumption of these "necessities" to an appreciable extent. That the output from the cigarette manufactories of Manila during August only reached 28 per cent of the normal output during previous months is satisfactorily explained by the well-known fact that all of these manufactories increased enormously their output during July, and that on August 1 (as shown by Exhibit C) their stock on hand was only 16 per cent of the normal stock on hand on July 1. In fact, 7 of the largest of these manufactories were found on August 1, when the tax became effective, to have not a single cigarette on the premises. Besides the 106,233,420 cigarettes sold by the Manila manufacturers for domestic consumption, there were 2,150,825 cigarettes exported to other countries. No tax was collected on these exports, and therefore they are not included in the figures in Exhibit D.

MATCHES.

The statistics on foreign and domestic matches reveal a most interesting state of affairs in the local match market. The average monthly importation of Japanese matches during June and the preceding months in this year was about 38,000 gross of boxes, and the average output of the local match manufactory during the same period was about 14,000 gross of boxes, making a total of 52,000 gross of boxes of matches consumed in a normal month in these islands. Anticipating the effects of the internal-revenue law the local importers brought in from Japan during July 218,401 gross of boxes, and the local match manufactory sold out its entire stock of 47,750 gross and all that it could turn out by forced production during July. There were, therefore, in the hands of the local merchants and speculators on August 1, 1904, an amount considerably in excess of 266,151 gross of boxes, or enough to supply the normal needs of trade for a period of five months from August 1. Under these circumstances it was not to be expected that the importation of foreign matches and the output of domestic matches would be very brisk during August, and when the owner of the local manufactory closed

his books on the 1st of August, and declared that he had not a match in the house, he told an internal-revenue officer that he did not expect to sell any more matches this year. Much to his surprise, however, he paid during August ₱3,500 in taxes on an output of 8,750 gross of boxes, or 62 per cent of the normal output from his manufactory during an average month before the tax on matches was imposed. Only one explanation of this anomalous condition of affairs can be given, and that is that the large stocks of foreign and domestic matches are now in the hands of a limited number of speculators, who hold them at a price equal to that of the tax-paid article. And the smaller merchants and consumers, who had laid in no stocks, finding no choice in the matter as regards price, have continued to trade to a large extent with the local manufacturer, and to whom they paid the taxes on all the matches purchased during August.

DISTILLATION IN THE PROVINCES.

There are 8 well-equipped distilleries in Manila, and about 25 or 30 more in the provinces. The remainder of the 497 distilleries, so far registered in these islands, are primitive affairs, known locally as "cauas." An empty hogshead, a coal-oil can, a tin pan, and a couple of joints of bamboo properly arranged near a stream make a caua. Wherever there are nipa-palm swamps, and no large distilleries cauas abound. In the province of Pangasinan alone there are over a hundred of these cauas, usually attended by a man and a boy. The tuba, or fermented sap from the nipa palm, is put in the can over a fire and under the hogshead. A constant supply of cold water is kept running through the pan at the top of the hogshead. The watery vapor carries the spirits up to the bottom of the pan, where it condenses and falls into the spilt bamboo, arranged gutterwise, and trickles out through the side of the hogshead.

This is the commercial vino de nipa, and it all contains large quantities of amyl alcohol and other poisonous ingredients. It is a very popular drink. Many cases of death or insanity are reported as due to an excessive use of this liquor. Were it not for the fact of the temperate manner in which the natives consume this liquor there would soon be an utter dearth of consumers.

In La Laguna and some other provinces the sap of the cocoanut bud is also distilled into what is known as vino de coco. Some of the cauas used for the distillation of these saps are stone-clay ovens on which is fixed a boiler of iron or copper, in connection with which is used a wooden cylinder and copper coil, called a "toong" by the natives.

The principal nipa districts lie in the provinces of Capiz, Bulacan, Pampanga, and Pangasinan. In all of these provinces are a few large distilleries, and to these the tuba is brought for distillation. Scarcely any of these distilleries, however, are equipped to rectify the crude spirits and remove the amyl alcohol and other poisonous substances. In the past a large proportion of these crude spirits were brought to Manila for rectification. When the provisions of the internal-revenue law regarding the sale of impure spirits for use as beverages are fully enforced very nearly all of these crude spirits will be rectified before they get to the consumers.

About half of the impure spirits produced in these islands comes from the nipa swamps in the province of Bulacan. The tuba is

gathered in jars and most of it is sold by the owners of the nipa lands to the Chinese distillers, about 12 or 13 in number, who have engaged in the distilling business in that province for many years.

The Manila distillers use a certain proportion of sugar as raw material in the distilling of spirits, but the bulk of their anisado, ginebra, and other compounded liquors is made from crude spirits brought from Bulacan and the other provinces, and rectified in Manila. On August 1, when the Manila and Bulacan distilleries reduced the amount of their output, the demand for tuba ceased. The owners of the nipa lands and a large number of men employed in the swamps gathering the tuba complained bitterly. They blamed not the law alone, but also the owners of the distilleries, who they claimed had of late years been in the habit of putting their own price on the tuba and getting it for a song. The distillers, on the other hand, claimed that they, and not the owners of the nipa lands and gatherers of the tuba, were the ones whom the law injured, for the reason that they, the distillers, had already advanced to the owners of the nipa lands about ₱200,000, which they could not collect until this season's tuba crop was delivered. The situation was aggravated by the fact that, relying on false reports published during June to the effect that the internal-revenue law would not be passed, a number of the owners of nipa lands had cut the nipa buds and, in default of a market for tuba, the sap was running to waste. It was estimated that over ₱50,000 worth of tuba was thus lost in one town.

For a while some anxiety was felt on account of the number of the unemployed in the province of Bulacan. However, the situation has now been relieved, or will soon be relieved. Last week the provincial treasurer of Bulacan telegraphed this office for the detail of an agent to assist in the assessment work in that province, as the distillers were about to resume operations, and a couple of days since he reported to this office as follows:

During the month of August but one of the 14 distilleries of Bulacan was in operation. This distillery was operated continuously during August, but none of the spirits distilled has as yet been disposed of.

On September 12 one of the larger distillers of the province applied for a license to begin operations and another distiller has notified me that he will begin operations before the 24th instant.

If this latter-mentioned distillery resumes operations, I am quite certain that the remaining distilleries, which are the largest in this province, will open up, possibly during the first part of the coming month.

Another distillery is being extensively repaired and new and more modern machinery is being installed. This distillery should resume operations October 1.

A new distillery now in course of construction is being hurried to completion. This distillery should be in operation by the 1st of November.

The balance of the distilleries in the province will be reopened so soon as the operators have disposed of the large stock of spirits distilled during June and July, and no further trouble relative to this industry here is anticipated.

ENFORCEMENT OF THE LAW.

The enforcement of the law and the assessment and liquidation work in Manila has been attended to by the agents of this office, assisted during July and August by the deputy city assessor. Very little friction has been encountered in getting the law into operation in accordance with the temporary provisions contained in "Circular No. 1, to all internal-revenue officers" (Exhibit A, herewith).

The majority of the manufacturers of tobacco and alcoholic products are subjects of Spain and of the Chinese Empire. There has been a cheerful disposition manifested by all of these manufacturers to comply fully with the provisions of the law and the regulations. The Hon. Mun Yew Chung, consul-general of the Chinese Empire, kindly volunteered to aid this office in making the law clear to the Chinese subjects in Manila, and thanks are due him for valuable cooperation.

The stamps in the various denominative values, for use in the payment of the internal-revenue taxes, have now been printed by the bureau of public printing, and, so soon as they have been gummed and perforated, will be deposited in the vaults of the insular treasury. The permanent regulations, to replace the temporary regulations now in force, will be issued as soon as practicable.

The time is now near at hand when a strict enforcement of all of the provisions of the internal-revenue law is imperatively demanded if it is expected to bring the tax yield up to the expected figure and in order to protect the larger manufacturers from illegal competition. It is confidently expected that the affixture of the internal-revenue stamps to the official invoice instead of to the packages of goods will to a large extent protect the bona fide manufacturers and secure a more complete collection of the taxes.

For the purpose of imitating imported and high-priced liquors holes are drilled in the bottom of glass bottles, the contents removed and replaced with inferior spirits, and the hole plugged with a gob of melted glass. To be able to sell on the mainland inferior cigars as the output of well-known Manila manufactories the bottom of the box is dexterously removed, the choice cigars removed and poor ones put in their place, the bottom returned to its place, and the manufacturer's trade-mark and labels on the cover left intact. Of course where such ingenious frauds are practiced internal-revenue stamps on corks and lids would afford but scant protection.

DISBURSEMENTS.

The following is a statement of the appropriations made for this bureau by Act 1225 of the Philippine Commission and of the amounts expended during the month of August, 1904:

	Appropriated.	Expended.	Balance.
Salaries and wages	₱75,000.00	₱2,354.22	₱72,645.78
Contingent expenses	40,000.00	1,868.46	38,131.54
Total	115,000.00	4,222.68	110,777.32

Of the above disbursements for contingent expenses, ₱1,764.66 were expended for office furniture and supplies through the insular purchasing agent.

The expenses incurred by the provincial treasurers in the enforcement of the law are paid from provincial funds. Many of the provincial treasurers will be unable to properly attend to this work and secure a prompt and complete payment of the various taxes now in force, and those that will become effective on January 1, 1905,

unless they are allowed additional employees or unless agents are detailed from this bureau to assist them in their work in the field. Agents have already been detailed to this work in certain provinces and more will be sent as occasion requires. Further experience will soon demonstrate whether or not a sufficient number of agents have been provided for in the law to properly attend to the inspection and assessment work in Manila and in the provinces.

CONCLUSION.

This office has no recommendations to make at this time as to amendments to the law. There has been a widespread misapprehension as to the effect of the taxes imposed, of the provisions of the law, and as to the manner of their enforcement. The total per annum per capita taxes which will be collected on tobacco and alcoholic products is less than ₱1, or 2 centavos each week. It has been asserted by the manufacturers that in these islands these articles are of universal consumption, even the women and children using their share. If this be so, then the head of an average family of five would pay, as his weekly tax bill for the family smoking and drinking, the sum of 10 centavos. It is not believed that the imposition of so moderate a tax will tend to curtail the consumption of these articles to any appreciable extent.

In Porto Rico the per annum per capita tax on tobacco and alcoholic products is something over \$1, or ₱2. In the United States it is approximately \$3, or ₱6. In England and in most European countries these taxes are imposed in even higher rates. Many countries in Europe have established a government monopoly in the production of these articles and their manufacture by individuals is prohibited. Spain has for many years had a monopoly in the manufacture of tobacco products, and within the last three or four months has very greatly increased the internal-revenue tax rates on distilled spirits.

The opposition of a large portion of the local press, which had subsided during August, was revived during the first days of September. A leading manufacturer of Manila was lamenting this fact in this office a few days since. He said that his business was in a very satisfactory state, and that as dealers' stocks were becoming exhausted there was a notable increase in the purchases from his manufactory. But, he added, the new campaign against the law inaugurated by the press raised the hopes of the merchants and middlemen that these taxes would be abolished or reduced, and that by holding up their purchases for a short while they would get their goods cheaper.

Of course the opposition to this law at this time can retard, but it can not prevent, its final success. The only regrettable feature to this opposition is that the smaller and more ignorant manufacturers of vino, cigars, and cigarettes have been and are being educated to an attitude of unreasoning hostility to this law. Therefore whenever the provisions of the law are strictly enforced, illicit stills and cigar and cigarette factories will begin to operate behind closed doors and in inaccessible regions. Long after the larger manufacturers shall have recognized, with satisfaction, that their opposition to this tax was a mistake and have settled down to the new order

of things, they will have to suffer the illegal competition waged by these "moonshiners" and illicit manufacturers of all kinds.

It will then become the duty of this office and of the provincial treasurers to weed out these lawbreakers and bring them to justice. It is hoped that the existing penal provisions of the internal-revenue law will be found sufficient to meet the case. But should this not prove to be so this office will, at the proper time, recommend that the Philippine Commission reintroduce, by amendment, into the internal-revenue law certain of the harsher of the penal provisions embodied in the original draft of the law and which were eliminated by the Commission because of the indignant objections raised by the large manufacturers of Manila.

Respectfully submitted.

JNO. S. HORD,
Collector of Internal Revenue.

EXHIBIT A.

CIRCULAR }
No. 1. }

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,
DEPARTMENT OF FINANCE AND JUSTICE,
BUREAU OF INTERNAL REVENUE,
Manila, P. I., August 1, 1904.

To all internal-revenue officers:

SUBJECT: *Preliminary instructions as to the assessment and collection of taxes on distilled spirits, manufactured liquors, fermented liquors, manufactured tobacco, cigars, cigarettes, and matches.*

1. By the provisions of section 71 to 109, inclusive, of "the internal-revenue law of nineteen hundred and four," certain taxes, effective on and after August 1, 1904, are imposed on the objects and in the amounts enumerated in the next succeeding paragraph.

TAXES ON DISTILLED SPIRITS.

2. (a) On all distilled spirits manufactured in the Philippine Islands containing amyl or other higher alcohols (fusel oil), aldehyde, or methyl alcohol (wood alcohol) in the proportion of four or more parts in one thousand, when removed from the place of their manufacture for domestic sale or consumption exclusively for manufacturing or industrial purposes, and not for use as beverages, there shall be levied and collected on each proof liter a tax of 10 centavos (sec. 88).

(b) On all distilled spirits containing the poisonous substances in the proportions mentioned in the preceding subdivision removed from the place of their manufacture to a rectifying establishment for the purpose of their rectification and to reduce the amyl alcohol or other poisonous substances to four or less parts in one thousand there shall be levied and collected, when rectified and the poisonous substances removed as aforesaid, an additional tax of 10 centavos on each proof liter of such rectified spirits removed from the rectifying establishment for domestic sale or consumption as beverages (sec. 88).

(c) On all distilled and rectified spirits removed from the place of their manufacture for domestic sale or consumption there shall be levied and collected on each proof liter a tax of 20 centavos (sec. 74).

(d) On all distilled spirits intended for domestic sale or consumption as beverages, which may be changed in form by a liquor manufacturer, by the addition of flavoring extracts, of other kinds of liquors, or of coloring matter (except methylene blue, etc., which is added to impure spirits), there shall be levied and collected on each proof liter of spirits contained in such manufactured liquors, when removed from the place of their manufacture, an additional tax of 10 centavos, which shall be distinct from and in addition to the tax imposed on the spirits used in the compounding of such manufactured liquors (sec. 87).

TAX ON FERMENTED LIQUORS.

(e) On all beer, lager beer, ale, porter, and all other fermented liquors (except the native fermented drinks known as tuba, basi, tapuy, etc.) brewed or fermented in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each gauge liter of such fermented liquor a tax of 4 centavos (sec. 91).

TAXES ON MANUFACTURED TOBACCO.

(f) On all snuff and snuff flour manufactured or partially manufactured in the Philippine Islands, when removed from the place of manufacture for domestic sale or consumption, there shall be levied and collected on each kilogram a tax of 32 centavos (sec. 101).

(g) On all chewing and smoking tobacco manufactured or partially manufactured in the Philippine Islands, when removed from the place of manufacture for domestic sale or consumption, there shall be levied and collected on each kilogram a tax of 48 centavos (sec. 101).

TAXES ON CIGARS.

(h) On all cigars manufactured in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each one thousand cigars a tax at one of the following rates: When the manufacturer's wholesale price does not exceed ₱20 per thousand, ₱2; when the manufacturer's wholesale price exceeds ₱20 but does not exceed ₱50 per thousand, ₱4; when the manufacturer's wholesale price exceeds ₱50 per thousand, ₱6 (sec. 107).

TAXES ON CIGARETTES.

(i) On all cigarettes manufactured in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each one thousand cigarettes a tax at one of the following rates: When the rate per thousand cigarettes exceeds 2 kilograms, ₱2; when the rate per thousand cigarettes does not exceed 2 kilograms, from August 1, 1904, to June 30, 1905, both inclusive, 67 centavos; when the weight per thousand cigarettes does not exceed 2 kilograms, on and after July 1, 1905, ₱1 (sec. 107).

TAXES ON MATCHES.

(j) On all matches manufactured in the Philippine Islands or imported from other countries, when removed from the place of their manufacture or from the customs warehouse of the port of entry, as the case may be, for domestic sale or consumption, there shall be levied and collected on each gross of boxes containing not more than 120 sticks to the box, 40 centavos; and a proportionate additional tax shall be levied and collected on each gross of boxes containing over 120 sticks to the box (sec. 108).

WHEN TAXES ACCRUE.

3. The taxes imposed on the articles enumerated in the preceding paragraphs accrue not at the time of their manufacture but at the time of their actual removal for domestic sale or consumption from the place of their manufacture or bonded warehouse. Articles manufactured prior to August 1, 1904, and which on said date are still in the possession of the manufacturers thereof, whether at the manufactory or elsewhere, are liable to the payment of the taxes imposed, which should be levied and collected at the time of the removal of such articles from the manufactory or other premises. But the taxes imposed shall not be collected on any of the articles enumerated which on August 1, 1904, are outside of the manufactory premises and in the possession of persons who are not the manufacturers of such articles; nor shall the taxes imposed be collected on any of the articles enumerated, whether manufactured before or after August 1, 1904, and which may be removed from the place of their manufacture, bonded warehouse, or other premises for exportation to other countries and not for domestic sale or consumption (secs. 28 (a), 35, and 36).

TAXES, HOW ASSESSED.

4. The taxes on distilled and rectified spirits and liquors manufactured therefrom for use as beverages will be assessed as follows:

(a) A manufacturer who from raw materials distills impure spirits and removes them to a rectifying establishment shall pay at the time of such removal a tax of 10 centavos on each proof liter of impure spirits so removed.

(b) A manufacturer who rectifies impure spirits originally distilled by another manufacturer, and who removes such rectified spirits for immediate domestic sale or consumption or to some other establishment for the purpose of their conversion into manufactured liquors, shall pay at the time of such removal a tax of 10 centavos on each proof liter of rectified spirits so removed.

(c) A manufacturer who changes the form of spirits distilled and rectified by other manufacturers by the addition of flavoring extracts, etc., as to convert such spirits into

manufactured liquors, and who removes such manufactured liquors for domestic sale or consumption, shall pay at the time of such removal a tax of 10 centavos on each proof liter of manufactured liquors so removed.

(d) A manufacturer who distills spirits from raw materials and who on the same premises, at the time of such original distillation or at any subsequent time, separates the pure from the impure spirits by rectification, and who removes such rectified spirits for immediate domestic sale or consumption, or to some other establishment for the purpose of their conversion into manufactured liquors, shall pay at the time of such removal a tax of 20 centavos on each proof liter of rectified spirits so removed.

(e) A manufacturer who distills spirits from raw materials and who on the same premises, at the time of such original distillation or at any subsequent time, separates the pure from the impure spirits by rectification, and who also at the time of such distillation or rectification or at any subsequent time, and on the same premises, changes the form of such distilled or rectified spirits by the addition thereto of flavoring extracts, etc., so as to convert such spirits into manufactured liquors, and who removes such manufactured liquors for domestic sale or consumption, shall pay at the time of such removal a tax of 30 centavos on each proof liter of manufactured liquors so removed.

(f) Proof spirits are defined as follows in section 72 of the law: "Proof spirits shall be held to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of seven thousand nine hundred and thirty-nine ten thousandths at sixty degrees Fahrenheit of temperature." An alcoholmeter and a thermometer will be sent with this circular to all provincial treasurers who have so far reported the existence of distilling or rectifying establishments within their provinces. A table of equivalents with rules for the reduction of gauge to proof liters at all degrees of temperature, and rules for the gauging of spirits, will also be printed and sent as soon as possible to all revenue officers.

● FERMENTED LIQUORS.

5. The taxes of fermented liquors will be assessed on the total number of gauge liters removed for domestic sale or consumption regardless of the percentage of alcohol contained in such liquors.

MANUFACTURED TOBACCO.

6. The taxes on snuff and manufactured tobacco will be assessed on the actual number of kilograms removed for domestic sale or consumption, and when the weight of the wrappers or boxes in which such snuff or tobacco is packed is included in the weight of the snuff or tobacco invoiced, the tax will be assessed on such total weight and no allowance will be made for the weight of such wrappers or boxes.

CIGARS.

7. (a) The taxes on cigars will be assessed on the cigars removed for domestic sale or consumption, using as a basis the price list at wholesale published by each manufacturer, from which should be deducted the discount, if any, allowed by each manufacturer to the trade in general. Where no price list is published, or where different prices are charged different customers for the same kind of cigars, the assessment should be made using as a basis the price charged in each case. Where the price reported in any case by the manufacturer is manifestly too low, and where as a result of such undervaluation the cigars would fall under a lower tax rate than that under which they properly belong, the assessment will be made using as a basis the actual average selling price by manufacturers at wholesale of cigars of the same kind or similar in quality to the cigars which may have been undervalued.

(b) All manufacturers of cigars or cigarettes, whether such cigars or cigarettes are made in manufactories, in stores, or in the homes of the manufacturers, shall pay the taxes imposed in section 107 on all such cigars or cigarettes removed from any locality where made for domestic sale or consumption; but the taxes on cigars or cigarettes made by manufacturers in their homes and delivered to larger manufacturers shall be paid at the time of the removal of such cigars or cigarettes for domestic sale or consumption from such larger manufactories.

CIGARETTES.

8. (a) The taxes on cigarettes will be assessed on the cigarettes removed for domestic sale or consumption, using as a basis the actual weight, under normal conditions of humidity, of 1,000 cigarettes; and there shall be included in such weight the weight of the paper in which each individual cigarette is rolled, but not the box wrapper, or label in which the cigarettes are placed.

CIGARETTES.

It is estimated that fully one-half of all the taxes paid on tobacco and alcoholic products will be collected on cigarettes. In view of this fact the movement in the output of cigarettes from the Manila manufactories during the month of August is most satisfactory, as indicating a speedy resumption of their normal output. The taxes collected on cigarettes from the 11th to the 20th of August were more than twice as great as the taxes collected during the first ten days of that month; again, the taxes collected during the last eleven days of the month were more than double the taxes collected between the 10th and the 20th. The increase in the output of tax-paid cigarettes is, therefore, proceeding by leaps and bounds. It was stated at the second public session, in which the proposed law was discussed before the Philippine Commission, that notwithstanding the fact that many cheaper grades of cigarettes were on the market, the vast majority of the consumers of cigarettes voluntarily paid from 2 to 4 centavos more for the better grades. This was before the imposition of the tax. It is not now seriously believed by anyone that the tax imposed, 1 centavo on each 15 cigarettes, will reduce the consumption of these "necessities" to an appreciable extent. That the output from the cigarette manufactories of Manila during August only reached 28 per cent of the normal output during previous months is satisfactorily explained by the well-known fact that all of these manufactories increased enormously their output during July, and that on August 1 (as shown by Exhibit C) their stock on hand was only 16 per cent of the normal stock on hand on July 1. In fact, 7 of the largest of these manufactories were found on August 1, when the tax became effective, to have not a single cigarette on the premises. Besides the 106,233,420 cigarettes sold by the Manila manufacturers for domestic consumption, there were 2,150,825 cigarettes exported to other countries. No tax was collected on these exports, and therefore they are not included in the figures in Exhibit D.

MATCHES.

The statistics on foreign and domestic matches reveal a most interesting state of affairs in the local match market. The average monthly importation of Japanese matches during June and the preceding months in this year was about 38,000 gross of boxes, and the average output of the local match manufactory during the same period was about 14,000 gross of boxes, making a total of 52,000 gross of boxes of matches consumed in a normal month in these islands. Anticipating the effects of the internal-revenue law the local importers brought in from Japan during July 218,401 gross of boxes, and the local match manufactory sold out its entire stock of 47,750 gross and all that it could turn out by forced production during July. There were, therefore, in the hands of the local merchants and speculators on August 1, 1904, an amount considerably in excess of 266,151 gross of boxes, or enough to supply the normal needs of trade for a period of five months from August 1. Under these circumstances it was not to be expected that the importation of foreign matches and the output of domestic matches would be very brisk during August, and when the owner of the local manufactory closed

his books on the 1st of August, and declared that he had not a match in the house, he told an internal-revenue officer that he did not expect to sell any more matches this year. Much to his surprise, however, he paid during August ₱3,500 in taxes on an output of 8,750 gross of boxes, or 62 per cent of the normal output from his manufactory during an average month before the tax on matches was imposed. Only one explanation of this anomalous condition of affairs can be given, and that is that the large stocks of foreign and domestic matches are now in the hands of a limited number of speculators, who hold them at a price equal to that of the tax-paid article. And the smaller merchants and consumers, who had laid in no stocks, finding no choice in the matter as regards price, have continued to trade to a large extent with the local manufacturer, and to whom they paid the taxes on all the matches purchased during August.

DISTILLATION IN THE PROVINCES.

There are 8 well-equipped distilleries in Manila, and about 25 or 30 more in the provinces. The remainder of the 497 distilleries, so far registered in these islands, are primitive affairs, known locally as "cauas." An empty hogshead, a coal-oil can, a tin pan, and a couple of joints of bamboo properly arranged near a stream make a caua. Wherever there are nipa-palm swamps, and no large distilleries cauas abound. In the province of Pangasinan alone there are over a hundred of these cauas, usually attended by a man and a boy. The tuba, or fermented sap from the nipa palm, is put in the can over a fire and under the hogshead. A constant supply of cold water is kept running through the pan at the top of the hogshead. The watery vapor carries the spirits up to the bottom of the pan, where it condenses and falls into the spilt bamboo, arranged gutterwise, and trickles out through the side of the hogshead.

This is the commercial vino de nipa, and it all contains large quantities of amyl alcohol and other poisonous ingredients. It is a very popular drink. Many cases of death or insanity are reported as due to an excessive use of this liquor. Were it not for the fact of the temperate manner in which the natives consume this liquor there would soon be an utter dearth of consumers.

In La Laguna and some other provinces the sap of the cocoanut bud is also distilled into what is known as vino de coco. Some of the cauas used for the distillation of these saps are stone-clay ovens on which is fixed a boiler of iron or copper, in connection with which is used a wooden cylinder and copper coil, called a "toong" by the natives.

The principal nipa districts lie in the provinces of Capiz, Bulacan, Pampanga, and Pangasinan. In all of these provinces are a few large distilleries, and to these the tuba is brought for distillation. Scarcely any of these distilleries, however, are equipped to rectify the crude spirits and remove the amyl alcohol and other poisonous substances. In the past a large proportion of these crude spirits were brought to Manila for rectification. When the provisions of the internal-revenue law regarding the sale of impure spirits for use as beverages are fully enforced very nearly all of these crude spirits will be rectified before they get to the consumers.

About half of the impure spirits produced in these islands comes from the nipa swamps in the province of Bulacan. The tuba is

gathered in jars and most of it is sold by the owners of the nipa lands to the Chinese distillers, about 12 or 13 in number, who have engaged in the distilling business in that province for many years.

The Manila distillers use a certain proportion of sugar as raw material in the distilling of spirits, but the bulk of their anisado, ginebra, and other compounded liquors is made from crude spirits brought from Bulacan and the other provinces, and rectified in Manila. On August 1, when the Manila and Bulacan distilleries reduced the amount of their output, the demand for tuba ceased. The owners of the nipa lands and a large number of men employed in the swamps gathering the tuba complained bitterly. They blamed not the law alone, but also the owners of the distilleries, who they claimed had of late years been in the habit of putting their own price on the tuba and getting it for a song. The distillers, on the other hand, claimed that they, and not the owners of the nipa lands and gatherers of the tuba, were the ones whom the law injured, for the reason that they, the distillers, had already advanced to the owners of the nipa lands about ₱200,000, which they could not collect until this season's tuba crop was delivered. The situation was aggravated by the fact that, relying on false reports published during June to the effect that the internal-revenue law would not be passed, a number of the owners of nipa lands had cut the nipa buds and, in default of a market for tuba, the sap was running to waste. It was estimated that over ₱50,000 worth of tuba was thus lost in one town.

For a while some anxiety was felt on account of the number of the unemployed in the province of Bulacan. However, the situation has now been relieved, or will soon be relieved. Last week the provincial treasurer of Bulacan telegraphed this office for the detail of an agent to assist in the assessment work in that province, as the distillers were about to resume operations, and a couple of days since he reported to this office as follows:

During the month of August but one of the 14 distilleries of Bulacan was in operation. This distillery was operated continuously during August, but none of the spirits distilled has as yet been disposed of.

On September 12 one of the larger distillers of the province applied for a license to begin operations and another distiller has notified me that he will begin operations before the 24th instant.

If this latter-mentioned distillery resumes operations, I am quite certain that the remaining distilleries, which are the largest in this province, will open up, possibly during the first part of the coming month.

Another distillery is being extensively repaired and new and more modern machinery is being installed. This distillery should resume operations October 1.

A new distillery now in course of construction is being hurried to completion. This distillery should be in operation by the 1st of November.

The balance of the distilleries in the province will be reopened so soon as the operators have disposed of the large stock of spirits distilled during June and July, and no further trouble relative to this industry here is anticipated.

ENFORCEMENT OF THE LAW.

The enforcement of the law and the assessment and liquidation work in Manila has been attended to by the agents of this office, assisted during July and August by the deputy city assessor. Very little friction has been encountered in getting the law into operation in accordance with the temporary provisions contained in "Circular No. 1, to all internal-revenue officers" (Exhibit A, herewith).

The majority of the manufacturers of tobacco and alcoholic products are subjects of Spain and of the Chinese Empire. There has been a cheerful disposition manifested by all of these manufacturers to comply fully with the provisions of the law and the regulations. The Hon. Mun Yew Chung, consul-general of the Chinese Empire, kindly volunteered to aid this office in making the law clear to the Chinese subjects in Manila, and thanks are due him for valuable cooperation.

The stamps in the various denominative values, for use in the payment of the internal-revenue taxes, have now been printed by the bureau of public printing, and, so soon as they have been gummed and perforated, will be deposited in the vaults of the insular treasury. The permanent regulations, to replace the temporary regulations now in force, will be issued as soon as practicable.

The time is now near at hand when a strict enforcement of all of the provisions of the internal-revenue law is imperatively demanded if it is expected to bring the tax yield up to the expected figure and in order to protect the larger manufacturers from illegal competition. It is confidently expected that the affixture of the internal-revenue stamps to the official invoice instead of to the packages of goods will to a large extent protect the bona fide manufacturers and secure a more complete collection of the taxes.

For the purpose of imitating imported and high-priced liquors holes are drilled in the bottom of glass bottles, the contents removed and replaced with inferior spirits, and the hole plugged with a gob of melted glass. To be able to sell on the mainland inferior cigars as the output of well-known Manila manufactories the bottom of the box is dexterously removed, the choice cigars removed and poor ones put in their place, the bottom returned to its place, and the manufacturer's trade-mark and labels on the cover left intact. Of course where such ingenious frauds are practiced internal-revenue stamps on corks and lids would afford but scant protection.

DISBURSEMENTS.

The following is a statement of the appropriations made for this bureau by Act 1225 of the Philippine Commission and of the amounts expended during the month of August, 1904:

	Appropriated.	Expended.	Balance.
Salaries and wages.....	P75,000.00	P2,354.22	P72,645.78
Contingent expenses.....	40,000.00	1,868.46	38,131.54
Total.....	115,000.00	4,222.68	110,777.32

Of the above disbursements for contingent expenses, P1,764.66 were expended for office furniture and supplies through the insular purchasing agent.

The expenses incurred by the provincial treasurers in the enforcement of the law are paid from provincial funds. Many of the provincial treasurers will be unable to properly attend to this work and secure a prompt and complete payment of the various taxes now in force, and those that will become effective on January 1, 1905,

unless they are allowed additional employees or unless agents are detailed from this bureau to assist them in their work in the field. Agents have already been detailed to this work in certain provinces and more will be sent as occasion requires. Further experience will soon demonstrate whether or not a sufficient number of agents have been provided for in the law to properly attend to the inspection and assessment work in Manila and in the provinces.

CONCLUSION.

This office has no recommendations to make at this time as to amendments to the law. There has been a widespread misapprehension as to the effect of the taxes imposed, of the provisions of the law, and as to the manner of their enforcement. The total per annum per capita taxes which will be collected on tobacco and alcoholic products is less than ₱1, or 2 centavos each week. It has been asserted by the manufacturers that in these islands these articles are of universal consumption, even the women and children using their share. If this be so, then the head of an average family of five would pay, as his weekly tax bill for the family smoking and drinking, the sum of 10 centavos. It is not believed that the imposition of so moderate a tax will tend to curtail the consumption of these articles to any appreciable extent.

In Porto Rico the per annum per capita tax on tobacco and alcoholic products is something over \$1, or ₱2. In the United States it is approximately \$3, or ₱6. In England and in most European countries these taxes are imposed in even higher rates. Many countries in Europe have established a government monopoly in the production of these articles and their manufacture by individuals is prohibited. Spain has for many years had a monopoly in the manufacture of tobacco products, and within the last three or four months has very greatly increased the internal-revenue tax rates on distilled spirits.

The opposition of a large portion of the local press, which had subsided during August, was revived during the first days of September. A leading manufacturer of Manila was lamenting this fact in this office a few days since. He said that his business was in a very satisfactory state, and that as dealers' stocks were becoming exhausted there was a notable increase in the purchases from his manufactory. But, he added, the new campaign against the law inaugurated by the press raised the hopes of the merchants and middlemen that these taxes would be abolished or reduced, and that by holding up their purchases for a short while they would get their goods cheaper.

Of course the opposition to this law at this time can retard, but it can not prevent, its final success. The only regrettable feature to this opposition is that the smaller and more ignorant manufacturers of vino, cigars, and cigarettes have been and are being educated to an attitude of unreasoning hostility to this law. Therefore whenever the provisions of the law are strictly enforced, illicit stills and cigar and cigarette factories will begin to operate behind closed doors and in inaccessible regions. Long after the larger manufacturers shall have recognized, with satisfaction, that their opposition to this tax was a mistake and have settled down to the new order

of things, they will have to suffer the illegal competition waged by these "moonshiners" and illicit manufacturers of all kinds.

It will then become the duty of this office and of the provincial treasurers to weed out these lawbreakers and bring them to justice. It is hoped that the existing penal provisions of the internal-revenue law will be found sufficient to meet the case. But should this not prove to be so this office will, at the proper time, recommend that the Philippine Commission reintroduce, by amendment, into the internal-revenue law certain of the harsher of the penal provisions embodied in the original draft of the law and which were eliminated by the Commission because of the indignant objections raised by the large manufacturers of Manila.

Respectfully submitted.

JNO. S. HORD,
Collector of Internal Revenue.

EXHIBIT A.

CIRCULAR }
No. 1. }

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,
DEPARTMENT OF FINANCE AND JUSTICE,
BUREAU OF INTERNAL REVENUE,
Manila, P. I., August 1, 1904.

To all internal-revenue officers:

SUBJECT: *Preliminary instructions as to the assessment and collection of taxes on distilled spirits, manufactured liquors, fermented liquors, manufactured tobacco, cigars, cigarettes, and matches.*

1. By the provisions of section 71 to 109, inclusive, of "the internal-revenue law of nineteen hundred and four," certain taxes, effective on and after August 1, 1904, are imposed on the objects and in the amounts enumerated in the next succeeding paragraph.

TAXES ON DISTILLED SPIRITS.

2. (a) On all distilled spirits manufactured in the Philippine Islands containing amyl or other higher alcohols (fusel oil), aldehyde, or methyl alcohol (wood alcohol) in the proportion of four or more parts in one thousand, when removed from the place of their manufacture for domestic sale or consumption exclusively for manufacturing or industrial purposes, and not for use as beverages, there shall be levied and collected on each proof liter a tax of 10 centavos (sec. 88).

(b) On all distilled spirits containing the poisonous substances in the proportions mentioned in the preceding subdivision removed from the place of their manufacture to a rectifying establishment for the purpose of their rectification and to reduce the amyl alcohol or other poisonous substances to four or less parts in one thousand there shall be levied and collected, when rectified and the poisonous substances removed as aforesaid, an additional tax of 10 centavos on each proof liter of such rectified spirits removed from the rectifying establishment for domestic sale or consumption as beverages (sec. 88).

(c) On all distilled and rectified spirits removed from the place of their manufacture for domestic sale or consumption there shall be levied and collected on each proof liter a tax of 20 centavos (sec. 74).

(d) On all distilled spirits intended for domestic sale or consumption as beverages, which may be changed in form by a liquor manufacturer, by the addition of flavoring extracts, of other kinds of liquors, or of coloring matter (except methylene blue, etc., which is added to impure spirits), there shall be levied and collected on each proof liter of spirits contained in such manufactured liquors, when removed from the place of their manufacture, an additional tax of 10 centavos, which shall be distinct from and in addition to the tax imposed on the spirits used in the compounding of such manufactured liquors (sec. 87).

TAX ON FERMENTED LIQUORS.

(e) On all beer, lager beer, ale, porter, and all other fermented liquors (except the native fermented drinks known as tuba, basi, tapuy, etc.) brewed or fermented in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each gauge liter of such fermented liquor a tax of 4 centavos (sec. 91).

gathered in jars and most of it is sold by the owners of the nipa lands to the Chinese distillers, about 12 or 13 in number, who have engaged in the distilling business in that province for many years.

The Manila distillers use a certain proportion of sugar as raw material in the distilling of spirits, but the bulk of their anisado, ginebra, and other compounded liquors is made from crude spirits brought from Bulacan and the other provinces, and rectified in Manila. TAXES ON DISTILLED SPIRITS.

2. (a) On all distilled spirits manufactured in the Philippine Islands containing amyl or other higher alcohols (fusel oil), aldehyde, or methyl alcohol (wood alcohol) in the proportion of four or more parts in one thousand, when removed from the place of their manufacture for domestic sale or consumption exclusively for manufacturing or industrial purposes, and not for use as beverages, there shall be levied and collected on each proof liter a tax of 10 centavos (sec. 88).

(b) On all distilled spirits containing the poisonous substances in the proportions mentioned in the preceding subdivision removed from the place of their manufacture to a rectifying establishment for the purpose of their rectification and to reduce the amyl alcohol or other poisonous substances to four or less parts in one thousand there shall be levied and collected, when rectified and the poisonous substances removed as aforesaid, an additional tax of 10 centavos on each proof liter of such rectified spirits removed from the rectifying establishment for domestic sale or consumption as beverages (sec. 88).

(c) On all distilled and rectified spirits removed from the place of their manufacture for domestic sale or consumption there shall be levied and collected on each proof liter a tax of 20 centavos (sec. 74).

(d) On all distilled spirits intended for domestic sale or consumption as beverages, which may be changed in form by a liquor manufacturer, by the addition of flavoring extracts, of other kinds of liquors, or of coloring matter (except methylene blue, etc., which is added to impure spirits), there shall be levied and collected on each proof liter of spirits contained in such manufactured liquors, when removed from the place of their manufacture, an additional tax of 10 centavos, which shall be distinct from and in addition to the tax imposed on the spirits used in the compounding of such manufactured liquors (sec. 87).

TAX ON FERMENTED LIQUORS.

(e) On all beer, lager beer, ale, porter, and all other fermented liquors (except the native fermented drinks known as tuba, basi, tapuy, etc.) brewed or fermented in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each gauge liter of such fermented liquor a tax of 4 centavos (sec. 91).

TAXES ON MANUFACTURED TOBACCO.

(f) On all snuff and snuff flour manufactured or partially manufactured in the Philippine Islands, when removed from the place of manufacture for domestic sale or consumption, there shall be levied and collected on each kilogram a tax of 32 centavos (sec. 101).

(g) On all chewing and smoking tobacco manufactured or partially manufactured in the Philippine Islands, when removed from the place of manufacture for domestic sale or consumption, there shall be levied and collected on each kilogram a tax of 48 centavos (sec. 101).

TAXES ON CIGARS.

(h) On all cigars manufactured in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each one thousand cigars a tax at one of the following rates: When the manufacturer's wholesale price does not exceed ₱20 per thousand, ₱2; when the manufacturer's wholesale price exceeds ₱20 but does not exceed ₱50 per thousand, ₱4; when the manufacturer's wholesale price exceeds ₱50 per thousand, ₱6 (sec. 107).

TAXES ON CIGARETTES.

(i) On all cigarettes manufactured in the Philippine Islands, when removed from the place of their manufacture for domestic sale or consumption, there shall be levied and collected on each one thousand cigarettes a tax at one of the following rates: When the rate per thousand cigarettes exceeds 2 kilograms, ₱2; when the rate per thousand cigarettes does not exceed 2 kilograms, from August 1, 1904, to June 30, 1905, both inclusive, 67 centavos; when the weight per thousand cigarettes does not exceed 2 kilograms, on and after July 1, 1905, ₱1 (sec. 107).

TAXES ON MATCHES.

(j) On all matches manufactured in the Philippine Islands or imported from other countries, when removed from the place of their manufacture or from the customs warehouse of the port of entry, as the case may be, for domestic sale or consumption, there shall be levied and collected on each gross of boxes containing not more than 120 sticks to the box, 40 centavos; and a proportionate additional tax shall be levied and collected on each gross of boxes containing over 120 sticks to the box (sec. 108).

WHEN TAXES ACCRUE.

3. The taxes imposed on the articles enumerated in the preceding paragraphs accrue not at the time of their manufacture but at the time of their actual removal for domestic sale or consumption from the place of their manufacture or bonded warehouse. Articles manufactured prior to August 1, 1904, and which on said date are still in the possession of the manufacturers thereof, whether at the manufactory or elsewhere, are liable to the payment of the taxes imposed, which should be levied and collected at the time of the removal of such articles from the manufactory or other premises. But the taxes imposed shall not be collected on any of the articles enumerated which on August 1, 1904, are outside of the manufactory premises and in the possession of persons who are not the manufacturers of such articles; nor shall the taxes imposed be collected on any of the articles enumerated, whether manufactured before or after August 1, 1904, and which may be removed from the place of their manufacture, bonded warehouse, or other premises for exportation to other countries and not for domestic sale or consumption (secs. 28 (a), 35, and 36).

TAXES, HOW ASSESSED.

4. The taxes on distilled and rectified spirits and liquors manufactured therefrom for use as beverages will be assessed as follows:

(a) A manufacturer who from raw materials distills impure spirits and removes them to a rectifying establishment shall pay at the time of such removal a tax of 10 centavos on each proof liter of impure spirits so removed.

(b) A manufacturer who rectifies impure spirits originally distilled by another manufacturer, and who removes such rectified spirits for immediate domestic sale or consumption or to some other establishment for the purpose of their conversion into manufactured liquors, shall pay at the time of such removal a tax of 10 centavos on each proof liter of rectified spirits so removed.

(c) A manufacturer who changes the form of spirits distilled and rectified by other manufacturers by the addition of flavoring extracts, etc., as to convert such spirits into

manufactured liquors, and who removes such manufactured liquors for domestic sale or consumption, shall pay at the time of such removal a tax of 10 centavos on each proof liter of manufactured liquors so removed.

(d) A manufacturer who distills spirits from raw materials and who on the same premises, at the time of such original distillation or at any subsequent time, separates the pure from the impure spirits by rectification, and who removes such rectified spirits for immediate domestic sale or consumption, or to some other establishment for the purpose of their conversion into manufactured liquors, shall pay at the time of such removal a tax of 20 centavos on each proof liter of rectified spirits so removed.

(e) A manufacturer who distills spirits from raw materials and who on the same premises, at the time of such original distillation or at any subsequent time, separates the pure from the impure spirits by rectification, and who also at the time of such distillation or rectification or at any subsequent time, and on the same premises, changes the form of such distilled or rectified spirits by the addition thereto of flavoring extracts, etc., so as to convert such spirits into manufactured liquors, and who removes such manufactured liquors for domestic sale or consumption, shall pay at the time of such removal a tax of 30 centavos on each proof liter of manufactured liquors so removed.

(f) Proof spirits are defined as follows in section 72 of the law: "Proof spirits shall be held to be that alcoholic liquor which contains one-half its volume of alcohol of a specific gravity of seven thousand nine hundred and thirty-nine ten thousandths at sixty degrees Fahrenheit of temperature." An alcoholmeter and a thermometer will be sent with this circular to all provincial treasurers who have so far reported the existence of distilling or rectifying establishments within their provinces. A table of equivalents with rules for the reduction of gauge to proof liters at all degrees of temperature, and rules for the gauging of spirits, will also be printed and sent as soon as possible to all revenue officers.

● FERMENTED LIQUORS.

5. The taxes of fermented liquors will be assessed on the total number of gauge liters removed for domestic sale or consumption regardless of the percentage of alcohol contained in such liquors.

MANUFACTURED TOBACCO.

6. The taxes on snuff and manufactured tobacco will be assessed on the actual number of kilograms removed for domestic sale or consumption, and when the weight of the wrappers or boxes in which such snuff or tobacco is packed is included in the weight of the snuff or tobacco invoiced, the tax will be assessed on such total weight and no allowance will be made for the weight of such wrappers or boxes.

CIGARS.

7. (a) The taxes on cigars will be assessed on the cigars removed for domestic sale or consumption, using as a basis the price list at wholesale published by each manufacturer, from which should be deducted the discount, if any, allowed by each manufacturer to the trade in general. Where no price list is published, or where different prices are charged different customers for the same kind of cigars, the assessment should be made using as a basis the price charged in each case. Where the price reported in any case by the manufacturer is manifestly too low, and where as a result of such undervaluation the cigars would fall under a lower tax rate than that under which they properly belong, the assessment will be made using as a basis the actual average selling price by manufacturers at wholesale of cigars of the same kind or similar in quality to the cigars which may have been undervalued.

(b) All manufacturers of cigars or cigarettes, whether such cigars or cigarettes are made in manufactories, in stores, or in the homes of the manufacturers, shall pay the taxes imposed in section 107 on all such cigars or cigarettes removed from any locality where made for domestic sale or consumption; but the taxes on cigars or cigarettes made by manufacturers in their homes and delivered to larger manufacturers shall be paid at the time of the removal of such cigars or cigarettes for domestic sale or consumption from such larger manufactories.

CIGARETTES.

8. (a) The taxes on cigarettes will be assessed on the cigarettes removed for domestic sale or consumption, using as a basis the actual weight, under normal conditions of humidity, of 1,000 cigarettes; and there shall be included in such weight the weight of the paper in which each individual cigarette is rolled, but not the box wrapper, or label in which the cigarettes are placed.

(b) The taxes on cigarettes manufactured in their homes by small manufacturers for delivery to the larger manufacturers shall be paid in the manner provided in subdivision (b) of the next preceding paragraph.

MATCHES.

9. (a) The taxes on matches will be assessed on the number of gross manufactured in the Philippine Islands and removed for domestic sale or consumption, using as a basis the average number of individual matches in each box; thus, any number of sticks up to and including 120 to a box will be assessed at 40 centavos per gross of boxes; 121 sticks to a box will be assessed at forty and one-third centavos per gross of boxes; 123 sticks to a box will be assessed at 41 centavos per gross of boxes; 240 sticks to a box will be assessed at 80 centavos per gross of boxes.

(b) Matches imported from other countries for domestic sale or consumption in the Philippine Islands are under the provisions of sections 108 and 109 made subject to the same taxes as are imposed on matches manufactured in the Philippine Islands for domestic sale or consumption. The taxes on imported matches will be assessed and collected by customs officers, to be designated by the collector of customs for the Philippine Islands. The assessment of this tax will be made in the manner provided in subdivision (a) of this paragraph for the assessment of taxes on matches manufactured in the Philippine Islands, and the taxes on imported matches will be paid before they are delivered to the importer or removed from the customs warehouse.

TEMPORARY REGULATIONS FOR THE COLLECTION OF TAXES.

10. The foregoing regulations, until repealed or amended, will govern the manner in which the assessment of the articles referred to shall be made. With regard to the collection of the taxes imposed, attention is invited to the following provision of the law:

"Sec. 152. Until the collector of internal revenue shall have the proper books, stamps, and forms ready for distribution, the methods provided for the administration of this act shall not be required: and he is empowered to make such temporary regulations and arrangements for the collection of the taxes imposed by this act as will not unduly embarrass or interrupt the business of the persons affected thereby."

Therefore, until such time as the stamps, register, and invoice books, bonds, and other forms and the necessary instructions, now being prepared, are issued, the record of articles manufactured and removed shall be kept and the taxes thereon shall be collected in the manner provided in the next succeeding paragraph.

RECORD BOOK.

11. (a) On August 1, 1904, each manufacturer of any of the articles subject to the taxes aforesaid shall provide a record book for each class of articles manufactured by him. The location of the factory by province, barrio, or town and street number, the name of the manufactory, and the name of the owner and of the manager shall be entered on the first page of each book, together with the name of the article manufactured. The record books shall be ordinary blank books of a convenient size, and shall have on the first page the impress of the seal of the provincial treasurer or his authorized deputy, or by an internal-revenue agent: and such record books shall be used exclusively for the entries provided for in this paragraph.

ENTRY OF STOCK AND ARTICLES MANUFACTURED AND REMOVED.

(b) The second, fourth, sixth, etc., pages in each record book shall be marked "Debit," and the first entry made thereon shall be the total stock of taxable articles on the manufactory premises on the morning of August 1, 1904, and thereafter at the close of work each day the owner or manager of the manufactory shall enter on such "debit" pages the total of taxable articles manufactured during the preceding twenty-four hours. The third, fifth, seventh, etc., pages in each record book shall be marked "Credit," and the owner or manager of the manufactory shall promptly at the time of removal of any articles from the premises make entry of the same on such "credit" pages, if for domestic sale or consumption in black ink and if for export to other countries in red ink. Whenever a "debit" or a "credit" page has been filled both it and the "credit" or "debit" page facing it shall be added up and both totals carried over to the next "debit" and "credit" pages. All blank spaces shall be ruled off and at the foot of each filled page the following certificate shall be entered and signed by the owner or manager of the manufactory: "I certify that the entries contained on this page fully and truly describe all of the taxable articles manufactured or removed from the manufactory premises from the — day of — to the — day of —, and that no articles manufactured or removed have been omitted. — owner or manager."

PAGES OF RECORD BOOK.

(c) The record books for distilled or rectified spirits or manufactured liquors shall have on each page three columns, in the first of which shall be entered the number of gauge (or volume capacity) liters, in the second column the alcoholmeter (Gay Lussac) and thermometer readings (centigrade), and in the third column the equivalent of the total gauge liters shall be expressed in liters of proof spirits. The record books for manufactured tobacco shall have on each page two columns, in the first of which shall be entered the number of kilograms of snuff and in the second column the number of kilograms of smoking or chewing tobacco. The record books for cigars shall have on each page three columns, in the first of which shall be entered the number of cigars valued at ₱20 or less per thousand, in the second column the number of cigars valued at more than ₱20 but not more than ₱50 per thousand, and in the third column the number of cigars valued at more than ₱50 per thousand. The record books for cigarettes shall have on each page two columns, in the first of which shall be entered the number of cigarettes weighing 2 kilograms or less per thousand, and in the second column the number of cigarettes weighing more than 2 kilograms per thousand. The record books for matches shall have on each page three columns, in the first of which shall be entered the number of gross of boxes containing each box 120 sticks or less, in the second column the number of gross of boxes containing each box more than 120 sticks, and in the third column the average number of sticks to each box when it exceeds 120.

ENTRY AND MEMORANDUM SLIP FOR ARTICLES REMOVED.

(d) Manufacturers shall enter on the "credit" pages the date of the removal of each lot of articles, and the name and residence of the purchaser or person to whom consigned, and shall in the proper columns, on such "credit" pages, enter a true description of the articles removed, and shall deliver, at the time of such removal, to the purchaser or carrier a memorandum slip on which shall be copied the entries made in the record book. The entries made on such "credit" pages shall be numbered consecutively, beginning with "No. 1" for the first lot of articles removed on August 1, 1904, from each manufactory. Each memorandum slip given to the purchaser or sent to the consignee shall be given the same number as is given to the corresponding entry in the record book, and all such memorandum slips shall be signed by the owner, manager, or employee in charge of the articles removed from the manufactory.

LIQUIDATION SHEETS AND PAYMENT OF TAXES.

(e) At daily, weekly, or other frequent intervals, in the discretion of each provincial treasurer, a balance shall be struck in the record book in each manufactory and a liquidation of the account showing the taxes due on articles removed for domestic sale or consumption since August 1, 1904, or since the date of the last liquidation, shall be entered in the record book and signed by the provincial treasurer or other internal-revenue officer who strikes the balance, makes the liquidation, and inspects the stock of articles remaining on the manufactory premises. Manufacturers shall from day to day make on loose sheets two copies of all entries made on the "debit" and "credit" pages of their record books, and at the time of each liquidation of a manufacturer's record book the two copies shall also be added up and liquidated and signed by the provincial treasurer or other revenue officer who makes the inspection. The manufacturer shall then sign both such copies and at once deliver, or transmit them to the treasurer or deputy treasurer of the proper province, together with the amount of taxes due. Any internal-revenue officer may make and certify to a liquidation of a manufacturer's account, but only provincial treasurers or their authorized deputies are authorized to receive and receipt for money in payment of taxes.

RECEIPT AND RECORD OF TAXES PAID.

(f) Provincial treasurers and their deputies shall on August 1, 1904, open a ledger account with each manufacturer, of the articles mentioned above, in each locality. They shall debit each such account with the stock of articles on the manufactory premises on August 1, 1904, and thereafter with the articles manufactured as shown from time to time by the liquidation sheets; they shall credit each such account with all articles removed for export and with all articles on which the taxes are paid as shown from time to time by the liquidation sheets. When the liquidation sheets and the money in payment of the taxes due are presented to a provincial treasurer or his deputy, as provided in the next preceding subdivision (e), such officer shall at once enter the totals in the proper ledger account, receipt each copy of the liquidation sheets, return one copy to the manufacturer, send the other by first mail to the collector of internal revenue, and hold the money received as taxes until the stamps, register,

and invoice books provided by sections 28 et seq. of the law, are issued, when further instructions will be given regarding the affixture and cancellation of internal-revenue stamps in payment of such taxes. Provincial treasurers and their deputies will in their ledger accounts give each manufacturer a temporary assessment number and will number the liquidation sheets consecutively for each manufacturer; and such assessment and liquidation sheet numbers shall be entered on both copies of the liquidation sheets when presented.

RECORD OF ARTICLES OUTSIDE OF THE FACTORY PREMISES.

(g) A separate record book shall be kept by each manufacturer who on August 1, 1904, has in his possession on any premises other than those of the manufactory any of the taxable articles aforesaid manufactured by him prior to the said date. Such record book shall be kept on the same premises where the articles are stored, and all entries therein, liquidation of accounts, transcripts therefrom, and payment of taxes for articles removed from such premises, shall be made as near as may be possible in conformity with the regulations prescribed in the preceding subdivisions of this paragraph for record books kept on the manufactory premises proper. But in no case shall the payment of taxes be required for articles which on August 1, 1904, had left both the possession and ownership of the manufacturers thereof.

MANUFACTURERS OF CIGARS, ETC., ON A SMALL SCALE.

(h) Persons who manufacture cigars or cigarettes in their homes for sale or delivery to others, and other persons who manufacture on a very small scale, shall be required to submit statements at frequent intervals as to the total of the articles manufactured and sold by them, or delivered by them to the larger manufacturers. Provincial treasurers may, in their discretion, waive the use of record books and liquidation sheets in the cases of such small manufacturers who, on account of their ignorance or of the unimportance of their business are unable to keep such record themselves or to employ some one else to keep it for them. But all such small manufacturers shall be given an assessment number, and a ledger account shall be opened in the name of each such manufacturer in which he shall be debited with all articles he declares, orally or in writing, to have manufactured, and he shall be credited with all articles he shall declare to have removed for domestic sale or consumption or to have delivered to the larger manufacturers. Whenever required, a declaration sheet in duplicate shall be signed and delivered by such small manufacturers to the provincial treasurer or his deputy, together with the taxes due, and the officer shall indorse his receipt thereon, make entry in the proper ledger account, return one copy of the declaration to the manufacturer, and send the other copy to the collector of internal revenue in the same manner as is provided in the previous subdivisions of this paragraph for the handling of the liquidation sheets presented by the larger manufacturers. Whenever a small manufacturer is delinquent in the payment of the taxes due, or whenever he deliberately conceals or fails to report any of the taxable articles manufactured, sold, or removed by him, the provincial treasurer or deputy treasurer shall require such small manufacturer to thereafter keep a record book and present, when required, the liquidation sheets provided for in the previous subdivisions of this paragraph.

DUTIES OF PROVINCIAL TREASURERS AND OTHER INTERNAL-REVENUE OFFICERS.

12. By the provisions of section 26 and other sections of the internal-revenue law the provincial treasurers and their deputies, and, in the city of Manila, the city assessor and collector and his deputies, are charged with the inspection, assessment, and collection of the various taxes. The assist in the enforcement of the law and to supervise and secure uniformity in its administration in all parts of the islands, internal-revenue agents, storekeepers and gaugers will be appointed and detailed from this office for special or general duty in localities where such assistance or supervision may be required.

BANKS, BANKERS, AND INSURANCE COMPANIES.

13. The taxes imposed on banks and bankers in section 111 of the law also become effective on August 1, 1904, but such taxes due for the five months ending December 31, 1904, will not be collectible until February 1, 1905. The taxes imposed on insurance companies in section 126 of the law also become effective on August 1, 1904, but such taxes due for the five months ending December 31, 1904, will not be collectible until April 1, 1905. Provincial treasurers will at once furnish copies of the law to all banks, bankers, and insurance companies and their branch establishments in the various towns, and call the attention of the president or manager of each such bank or insurance company as to the record which should be kept, and report which will be required of its business transactions.

EXISTING STAMP AND INDUSTRIAL TAXES.

14. The stamp taxes imposed by royal decree on May 16, 1886, and the taxes on business imposed by royal decree on June 19, 1890, known as the "industria" tax, and which have been continued in operation since the American occupation, will continue to be collected, under existing regulations, until December 31, 1904.

CIRCULAR TO BE DISTRIBUTED TO TAXPAYERS.

15. Copies of this circular, in English and Spanish, will be furnished provincial treasurers and internal-revenue agents, sufficient in number to supply all taxpayers. In referring to circulars issued by this office, internal-revenue officers should give the number of the circular, of the section, and of the page to which the remark or query applies.

JNO. S. HORD,
Collector of Internal Revenue.

Approved:

HENRY C. IDE,
Secretary of Finance and Justice.

EXHIBIT 10.

REPORT OF THE AUDITOR FOR THE PHILIPPINE ISLANDS FOR THE FISCAL YEAR ENDED JUNE 30, 1904.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,
OFFICE OF THE AUDITOR,
Manila, P. I., December 1, 1904.

SIRS: Pursuant to the provisions of rule 38 of Act No. 90 of the Philippine Commission, I have the honor to submit my annual report of the financial transactions of the government of the Philippine Islands for the fiscal year 1904, showing the receipts and disbursements of the several branches of the government, by departments, bureaus, offices, and provinces, together with such deductions from results obtained and suggestions as to future policy as seem to present themselves.

This report embodies all transactions of the said fiscal year which were included in accounts received to November 1, 1904, for the period ended June 30, 1904, and also settlements pertaining to prior fiscal years which were not included in previous annual reports.

Accounts covering transactions pertaining to the fiscal year 1904, but subsequent to June 30, and all suspended items in the accounts of said fiscal year will be considered in subsequent reports according to the fiscal year in which admitted but on account of the fiscal year to which the transaction pertained.

The organization of the office and the personnel of the executive staff at the close of the fiscal year were as follows: Auditor, A. L. Lawshe; deputy auditor, William W. Barre; chief clerk, W. H. Clarke; bookkeeping division, W. Y. Handy, chief; customs division, A. J. Gibson, chief; postal division, William A. Walsh, chief; miscellaneous division, C. H. French, chief; provincial division, O. H. Tibbott, chief; property division, C. A. Smith, chief.

The authorized personnel at the close of the fiscal year was an auditor, a deputy auditor, three clerks of class 3, four clerks of class 4, two clerks of class 5, nine clerks of class 6, seven clerks of class 7, thirteen clerks of class 8, fourteen clerks of class 9, six clerks of class 10, four clerks of Class A, two clerks of Class B, two clerks of Class C, three clerks of Class D, three clerks of Class E, two clerks of Class F, two clerks of Class G, two clerks of Class H, two clerks of Class I, two employees at \$180 per annum each, and two employees at \$150 per annum each.

To provide for contingencies and for the better efficiency of the service it has been the policy of this office to designate a clerk in

each division to familiarize himself with the working detail of the division, in order that he could assume the duties of his chief in the event of resignation or permissible absence. During the fiscal year part of the executive staff availed themselves of their accrued leave to visit the United States. In their absence the work of the respective divisions has been carried on by such clerks with efficiency. Favorable mention should be made of Mr. Ora Miller and Mr. F. W. Thornton, acting chief and acting assistant chief, respectively, of the customs division, and Mr. J. H. Hauck, acting chief of the miscellaneous division. During the illness of the chief of the provincial division and several temporary absences on special work his duties were creditably assumed by Mr. H. W. Gangnuss.

The work of this bureau has been somewhat retarded by reason of the resignation of several of its most experienced examiners, while others of long service have availed themselves of their accrued leaves of absence to visit the United States. This has necessarily added to the work of the remaining employees and resulted in considerable overtime work during several months of the year. The acting auditor wishes to express his appreciation for their cheerful acceptance of the circumstances and efficient work thereunder.

Just before the close of the fiscal year the auditor, Mr. A. L. Lawshe, left for the United States to enjoy the benefits of a well-deserved vacation, and shortly after his arrival there was temporarily appointed a member of the Philippine exposition board at St. Louis, where he is now on duty.

AN ACTING DEPUTY AUDITOR.

Act No. 1064 was passed by the Commission on February 24, 1904, with the approval of the Secretary of War first had, amending Act No. 90, and providing that "the chief clerk shall be acting deputy auditor during the absence of the deputy auditor and when the deputy auditor, by virtue of his office, is performing the duties of the acting auditor. In the absence of both auditor and deputy auditor he shall take charge of the bureau as acting auditor." Under this provision of law, Mr. W. H. Clarke has efficiently performed the duties during such absences.

THE BOOKKEEPING DIVISION.

In addition to the regular duties of the bookkeeping division, as outlined in the auditor's last report, this division during the year assumed the audit of the several special accounts covering premiums on demand and telegraphic drafts sold on the gold-standard fund; interest on balances in government depositories in New York, Washington, and Manila; shipments of Mexican and Spanish-Filipino coin withdrawn from the treasury for recoinage, and all new Philippine coin received from the United States mints at Philadelphia, Pa., and San Francisco, Cal. The Commission, by Act 1088, so amended rules 58, 59, and 60 of Act No. 90 that the insular treasurer is no longer required to prepare the voluminous abstracts which have been submitted with his monthly account-current since the rules and instructions governing the accounting system first became effective. The result of the change has been to greatly reduce the work of handling this account without removing any of

EXHIBIT 10.

REPORT OF THE AUDITOR FOR THE PHILIPPINE ISLANDS FOR THE FISCAL YEAR ENDED JUNE 30, 1904.

THE GOVERNMENT OF THE PHILIPPINE ISLANDS,
OFFICE OF THE AUDITOR,
Manila, P. I., December 1, 1904.

SIRS: Pursuant to the provisions of rule 38 of Act No. 90 of the Philippine Commission, I have the honor to submit my annual report of the financial transactions of the government of the Philippine Islands for the fiscal year 1904, showing the receipts and disbursements of the several branches of the government, by departments, bureaus, offices, and provinces, together with such deductions from results obtained and suggestions as to future policy as seem to present themselves.

This report embodies all transactions of the said fiscal year which were included in accounts received to November 1, 1904, for the period ended June 30, 1904, and also settlements pertaining to prior fiscal years which were not included in previous annual reports.

Accounts covering transactions pertaining to the fiscal year 1904, but subsequent to June 30, and all suspended items in the accounts of said fiscal year will be considered in subsequent reports according to the fiscal year in which admitted but on account of the fiscal year to which the transaction pertained.

The organization of the office and the personnel of the executive staff at the close of the fiscal year were as follows: Auditor, A. L. Lawshe; deputy auditor, William W. Barre; chief clerk, W. H. Clarke; bookkeeping division, W. Y. Handy, chief; customs division, A. J. Gibson, chief; postal division, William A. Walsh, chief; miscellaneous division, C. H. French, chief; provincial division, O. H. Tibbott, chief; property division, C. A. Smith, chief.

The authorized personnel at the close of the fiscal year was an auditor, a deputy auditor, three clerks of class 3, four clerks of class 4, two clerks of class 5, nine clerks of class 6, seven clerks of class 7, thirteen clerks of class 8, fourteen clerks of class 9, six clerks of class 10, four clerks of Class A, two clerks of Class B, two clerks of Class C, three clerks of Class D, three clerks of Class E, two clerks of Class F, two clerks of Class G, two clerks of Class H, two clerks of Class I, two employees at \$180 per annum each, and two employees at \$150 per annum each.

To provide for contingencies and for the better efficiency of the service it has been the policy of this office to designate a clerk in

each division to familiarize himself with the working detail of the division, in order that he could assume the duties of his chief in the event of resignation or permissible absence. During the fiscal year part of the executive staff availed themselves of their accrued leave to visit the United States. In their absence the work of the respective divisions has been carried on by such clerks with efficiency. Favorable mention should be made of Mr. Ora Miller and Mr. F. W. Thornton, acting chief and acting assistant chief, respectively, of the customs division, and Mr. J. H. Hauck, acting chief of the miscellaneous division. During the illness of the chief of the provincial division and several temporary absences on special work his duties were creditably assumed by Mr. H. W. Gangnuss.

The work of this bureau has been somewhat retarded by reason of the resignation of several of its most experienced examiners, while others of long service have availed themselves of their accrued leaves of absence to visit the United States. This has necessarily added to the work of the remaining employees and resulted in considerable overtime work during several months of the year. The acting auditor wishes to express his appreciation for their cheerful acceptance of the circumstances and efficient work thereunder.

Just before the close of the fiscal year the auditor, Mr. A. L. Lawshe, left for the United States to enjoy the benefits of a well-deserved vacation, and shortly after his arrival there was temporarily appointed a member of the Philippine exposition board at St. Louis, where he is now on duty.

AN ACTING DEPUTY AUDITOR.

Act No. 1064 was passed by the Commission on February 24, 1904, with the approval of the Secretary of War first had, amending Act No. 90, and providing that "the chief clerk shall be acting deputy auditor during the absence of the deputy auditor and when the deputy auditor, by virtue of his office, is performing the duties of the acting auditor. In the absence of both auditor and deputy auditor he shall take charge of the bureau as acting auditor." Under this provision of law, Mr. W. H. Clarke has efficiently performed the duties during such absences.

THE BOOKKEEPING DIVISION.

In addition to the regular duties of the bookkeeping division, as outlined in the auditor's last report, this division during the year assumed the audit of the several special accounts covering premiums on demand and telegraphic drafts sold on the gold-standard fund; interest on balances in government depositories in New York, Washington, and Manila; shipments of Mexican and Spanish-Filipino coin withdrawn from the treasury for recoinage, and all new Philippine coin received from the United States mints at Philadelphia, Pa., and San Francisco, Cal. The Commission, by Act 1088, so amended rules 58, 59, and 60 of Act No. 90 that the insular treasurer is no longer required to prepare the voluminous abstracts which have been submitted with his monthly account-current since the rules and instructions governing the accounting system first became effective. The result of the change has been to greatly reduce the work of handling this account without removing any of

the safeguards properly pertaining to the accountability of the treasurer. The combined balance of all funds in the hands of the insular treasurer on June 30, 1904, was ₱52,842,238.50 Philippines currency value.

During the fiscal year just closed there were 1,690 separate settlements declared on which warrants were issued, and 1,673 accountable warrants were issued during the same period. There were 9,176 receipts issued by the treasurer during the year, which were double entried and checked against the invoices accompanying the deposits, after which they were presented to the auditor for counter signature. There were 2,430 certificates of settlements received in this division and these were double entried, the first entries being in the personal accounts and the others in the statistical accounts. On the ledgers for fiscal year 1904 accounts are being carried with 210 collecting officers and 320 disbursing officers, some of whom are acting in more than one capacity, making the total number of collection accounts 247 and the total number of disbursing accounts 426. There are also 93 open accounts with provincial treasurers in their capacities of collecting and disbursing officers.

The more comprehensive double-entry system of bookkeeping introduced in the bureau of auditing at the beginning of the fiscal year affords a better analysis of all accounts settled and a greater security for correctness of compilations. This system makes necessary the consideration of all the factors entering into every phase of the accounting, as also the effect of each upon the general result. The set of books provided for this work consists of a journal and general account ledger and such individual ledgers and records as correspond respectively to the various general ledger accounts. The individual ledgers are distributed among several clerks, who must present the balance shown by their individual ledgers, which in turn must agree with the aggregate balance shown by the several general accounts, the likelihood of counterbalancing errors being thus eliminated. The ledgers and records referred to as now in use are as follows:

LEDGERS OF PERSONAL ACCOUNTS OF ALL COLLECTING AND DISBURSING OFFICERS.

In which are posted the complete data from all certificates of settlement furnished by the auditor, separate accounts being kept with each officer throughout the islands handling insular funds in each official capacity in which he may serve.

SETTLEMENT WARRANT LEDGERS.

In which are recorded all settlements of accounts payable as claims, proper ledger entries being made to preserve a complete record of each settlement. Both the personal and settlement warrant ledgers, however, are considered as ledgers of personal accounts, they being merely elaborations of the general ledger, differing only in that the personal ledgers embrace all transactions entering into the individual accounts of collectors and disbursing officers as settled, while the warrant ledgers carry all direct payments made by settlement warrants issued, whether chargeable to personal accounts for balances due collectors and disbursing officers, to expense account for amounts due individuals and firms having no responsibility to

the government, or to the general accounts concerned in payments from special appropriations, as loans to provinces, payments of revenues ceded or refunded to provinces, return of deposits for export duties refundable, revenues refunded on account of excess collections under conditions prescribed by the Commission, invalid money orders, etc.

TRANSFER LEDGERS.

In which are recorded all transfers of funds between officers when certified in their accounts as settled by the auditor, the amounts credited to transferors being charged to transfer account and amount charged to transferees being credited to transfer account.

POSTAL LEDGERS.

In which accounts are kept with all postmasters throughout the islands in the dual capacity of collectors and disbursing officers. Except in the case of deficiencies in the postal revenues, funds for disbursement are not advanced to postmasters upon duly approved requisitions, as is required with the other classes of accounts, they being authorized by law to pay the expenses of their respective offices, under authority of the director of posts, from revenues coming into their hands. When quarterly settlements of postmasters' accounts are declared by the auditor, however, the total revenues and expenditures are treated by the so-called warrant and counter-warrant process, which is a method of simultaneous deposit and withdrawal of the funds in order that the treasury account may properly record the transactions for credit of postal revenues and that a distribution of the expense may be made under the appropriations chargeable therewith.

APPROPRIATION LEDGERS.

In which are recorded to the credit of each department and bureau, by subheadings and in the order observed by the Philippine Commission in the enactment of appropriation bills, all appropriations as made, charges for withdrawals of funds by accountable and settlement warrants issued, and credits for unexpended balances returned to the treasury. So numerous and varied are the adjustments entering into the account of appropriations that it would be all but impossible to correctly keep this account without the positive check against the balances which the double-entry system affords.

REGISTERS OF WARRANTS.

In which are recorded the date, number, and amount of each accountable and settlement warrant issued, as also the date and number covering each certificate of settlement in which accountable warrants have been charged to payees, so that any failure to account for or properly charge warrants as issued may be duly reported to the auditing division concerned, and such accounting be demanded forthwith from the officers to whom advances were made as will be consistent in all respects.

REGISTERS OF WITHDRAWALS FROM TREASURY.

In which are recorded all payments made by the insular treasurer on account of warrants drawn against appropriations duly made or authorized by law to be created.

REGISTERS OF DEPOSITS IN TREASURY.

In which are entered the amounts of all funds for which regular receipts of deposit are issued by the insular treasurer, whether coming into his hands for credit of general revenue or as payments and repayments to appropriations. All credits for deposits made by collecting and disbursing officers as entered in settlements of their accounts are verified by checking the same against the corresponding entries in the account of the insular treasurer, the settlement number covering the account of each officer being noted opposite every item of deposit, so that all amounts outstanding when the certification for the year shall have been completed may be easily and quickly listed for prompt handling by the auditing division concerned.

The following records are also carried in which the so-called statistical accounts are kept, the compilation of a final summary of the work of all settlements declared being obtained therefrom.

REGISTERS OF CUSTOMS RECEIPTS.

In which are credited all revenues derived from customs sources, and in which are charged all payments made for excess revenues coming into the hands of collectors of customs and amounts included in certificates of settlement as having been improperly credited to this account, the net customs revenues being thus determined.

MISCELLANEOUS RECEIPTS LEDGERS.

In which are credited all revenues derived from all sources (other than customs or postal) and in which are charged all payments of excess collections and any items shown in certificates of settlement as having been improperly credited to this account, the net miscellaneous revenues being thus determined.

EXPENDITURES LEDGERS.

In which are charged by bureaus and subheadings of appropriations all payments made and chargeable to expense account and in which are credited all refunds or other items taken up in certificates of settlement for credit of expense account, the net expenditures being thus determined.

For convenience, abstracts of collections and disbursements are in use, which record the aggregate transactions for the month as set forth in all settlements by the auditor covering accounts of collecting and disbursing officers. At the end of each month the distribution of the entries in the abstracts is carried by totals to the journal, collecting and disbursing officers being charged with the total of the debtor side of abstracts (less amount of credit balances) for credit of the several general accounts involved, and in turn credited with the total of creditor side of abstracts (less amount of credit balances) for charge

against the various general accounts involved. Each settlement entered in the abstracts is posted to the individual accounts kept with collectors and disbursing officers, and then to the various general accounts as indicated by the entries in certificates of settlement. The journal is intended to contain each month the entries necessary to record the collection and disbursement abstracts, to record the treasurer's account, to record the appropriation account, and to record any unusual transactions for which provision can not be made in the abstracts, the treasury registers, or appropriation ledgers. Any adjustments between the different general accounts are first made by journal entry, to show the facts in each case, before being treated in the accounts themselves, the general principle being followed that no entries shall reach the ledgers except through the journal.

Preliminary to concluding the work for the month the journal entries are posted to the general ledger, after which the different accounts therein contained are aggregated and a balance sheet of all accounts is prepared, showing the net condition of each general account as a result of all settlements declared and entered in the records of the bookkeeping division from the beginning of the fiscal year to the close of the month in which the balance is drawn.

THE CUSTOMS DIVISION.

There were received in the customs division during the fiscal year 1904, 813 accounts with their respective abstracts and vouchers. Of these, 322 were accounts covering customs collections, involving 32,566 import vouchers, 4,389 export vouchers, and various miscellaneous vouchers for licenses, stamps, etc. Fourteen of the accounts were for miscellaneous receipts and 477 were disbursement accounts, 134 of the latter being on account of previous fiscal years.

In addition to masters' manifests on hand at the beginning of the fiscal year, 1,851 masters' manifests were received, covering entrances and clearances of vessels from foreign ports. All manifests have been liquidated to September 30, 1903, and those for ports other than Manila to April 30, 1904. Nine hundred and forty-one masters' manifests remain unliquidated. For each master's manifest received a collector's manifest is also furnished, and these have been liquidated to the same extent as the masters' manifests.

Warehouse and bond accounts have been received and liquidated to June 30, 1904, from all entry ports where such warehouses for the accommodation of bonded merchandise exist.

The number of accounting customs officers has been reduced, only 8 collectors of customs and 17 coast district inspectors rendering accounts for fiscal year 1904. The number is now being further reduced.

CUSTOMS REVENUES.

The figures for the fiscal year 1904 show a marked reduction in the matter of revenue derived from imports, the largest loss being at the port of Manila; but every port where foreign merchandise is received shows reduction in revenues derived from this source. The total revenues from all customs sources shows a decrease, even taking into account the large increase of more than 1,000,000 pesos, arising from customs collections on Philippine products in the United States.

CUSTOMS REFUNDS.

During the fiscal year 361 applications were received and allowed for refunds on hemp shipped to and consumed in the United States, one application being denied on the ground that more than eighteen months had expired since shipment. The number of bales covered by these allowed applications was 525,004, and the amount refunded ₱1,004,069.97. Two applications were received and granted for refunds on copra shipped to the United States, the amount being 139 tons (₱278); total amount refunded during the fiscal year under act of March 8, ₱1,004,347.97.

In connection with the act of March 8, 1902, the following comparative statement is submitted:

Collections in the Philippine Islands subject to refund under provisions of act of Congress dated March 8, 1902.

Date.	Export duties.	
	Philippines currency.	Mexican currency.
March 8, 1902, to December 31, 1902	₱153,963.96	
July 1, 1902, to June 30, 1903	511,029.50	\$657,602.91
July 1, 1903, to June 30, 1904	802,412.29	113,998.86
Total	1,467,405.75	771,501.77

Collections in the United States on Philippine products payable to the insular treasury.

Date.	United States currency.
March 8, 1902, to June 30, 1903	\$212,723.99
July 1, 1903, to June 30, 1904	549,161.81
Total	761,885.80

Or ₱1,523,771.60 Philippines currency.

It is noted from the preceding table that while the entire revenue collected in the United States on imported Philippine products, from the date of the act of March 8, 1902, became effective, to June 30, 1904, is less than the entire amount of refundable export duties collected in the Philippines for the same period, the figures for the fiscal year 1904 show that the receipts in the United States during the last year exceeded the refundable receipts in the Philippines, thus indicating better financial results in the future for Philippine revenues on account of the act of March 8, 1902.

Certificates of settlement of claims for refund of excess collections of customs revenues, including short shipments, clerical errors and errors of appraisement and classification, remittance of fines and refunds on commercial samples, etc., were granted to the number of 299. These were paid from appropriation created by Act 357. The claims covered by these 299 certificates numbered more than 500, as many as 40 claims being settled on one certificate. The amount of these refunds was ₱49,908.75. Thirty-five refunds on coal were granted under provisions of Acts 355 and 430. Refund was denied on 38 coal consumption certificates for the reason that the persons

making application were not competent to make the necessary declarations. Amount refunded on coal ₱10,838.82.

During the preceding fiscal year the refunds granted numbered only 215, including hemp, excess collection and coal refunds. The extraordinary increase shown above does not indicate increased liability to error in the customs service. It is due (1) to the fact that hemp shipments to the United States, covered by the period for which refunds were made, have increased greatly over the corresponding shipments for the fiscal year 1903, and (2) to the change in the methods of the board of protests and appeals at the Manila custom-house. During the fiscal year that board considered and decided protests that had been outstanding since 1901; the decisions were so far reaching, in consequence of the long delay in their promulgation, that each decision of an old case decided the course to be taken in many subsequent protests, and at this time a protest is usually considered so promptly that a decision is reached before the original entry has reached this office.

Several decisions of the court of customs appeal have added largely to the number of refunds. This branch of the work of the division has been more notably changed during the past fiscal year than any other.

ARRASTRE PLANT.

The arrastre plant of the Manila custom-house was purchased from Carmen & Co. (Limited), and transferred to the customs officers on October 16, 1903. This plant handles merchandise which passes through the custom-house, and consists of a small railway with steam locomotives, cranes, etc. A fixed tonnage rate is charged importers for handling their goods. The revenue derived from this source is deposited as a special fund in the treasury, from which the operating expenses of the plant are paid. The total receipts for the fiscal year 1904 amounted to ₱119,119.87 and pfs. 2,814.85. From this there was expended ₱63,541.83. Of the surplus, ₱22,368.39 has been transferred to the general fund as part reimbursement of the amount expended under Act 897, which appropriated the sum of ₱39,000 for the purchase of the plant.

CUSTOMS MATTERS IN THE MORO PROVINCE.

Settlements for the Moro Province, which was organized July 15, 1903, have been made for each customs port in the same manner as in the past, except that Moro treasury receipts formed the basis of credits in the revenue accounts instead of receipts of the insular treasurer. The total amount of customs collections in the Moro Province (included in the total of customs collections heretofore cited) is ₱220,596.36 and pfs. 2,415. The expenditures for the customs service in the province amount to ₱51,013.01 and pfs. 1,096.23. These expenditures were paid from the insular treasury and charged to the Moro Province. The difference between the total of revenues and expenditures amounts to ₱169,583.35 and pfs. 1,315.77, which amounts are the net revenues from customs in the province, payable to the provincial funds under the provisions of Act 787.

Following is a statement of certificates sold during the fiscal year 1904 by the insular collector of customs, in accordance with Act 702, dated March 27, 1903:

CHINESE REGISTRATION AND LANDING CERTIFICATES.

	Landing certificates.	Certificates of registra- tion.
On hand June 30, 1903.....	19,985	96,731
Sold, July 1, 1903, to June 30, 1904.....	442	46,546
Balance on hand June 30, 1904.....	19,543	50,185

In addition to the customs accounts this division handles those of the bureau of coast guard and transportation.

THE POSTAL DIVISION.

This division is charged with the settlement of the postal accounts of all postmasters in the Philippine Islands, the money-order accounts of postmasters at money-order post-offices, the disbursing account of the bureau of posts, the postage-stamp account of the bureau of posts, and the general money-order account with the United States Government.

The number of post-offices in the Philippine Islands June 30, 1904, was 391, showing an increase of 179 offices during the fiscal year. Sixty-one post-offices are authorized to issue and pay money orders. There have been received and settled 3,181 monthly postal accounts and 2,155 weekly money-order statements pertaining to the fiscal year 1904; also from the Auditor for the Post-Office Department, Washington, D. C., 12 statements of Philippine money orders paid in the United States, together with 34,587 vouchers, aggregating \$1,447,077.79.

Of the 212 postmasters in the service July 1, 1903, 185 were compensated on the basis of a percentage of the gross receipts. This system of compensation was found to be decidedly unsatisfactory, as it offered a constant temptation to postmasters to improperly increase the sale of stamps beyond the legitimate and normal requirements of their respective localities, resulting in a reduction of postal revenues at offices whose postmasters received fixed salaries. To overcome this difficulty, the director of posts, acting within the authority vested in him, assigned fixed salaries to all postmasters. This readjustment of compensation was practically completed during the first quarter of the fiscal year.

Act No. 1191, providing for quarterly instead of monthly postal accounts, effective as of July 1, 1904, will greatly simplify the work of this division in future.

THE MISCELLANEOUS DIVISION.

This division is the largest in this bureau in number of clerks employed and in the variety and number of accounts received for settlement. It audits practically all insular revenue and disbursing

accounts not distinctive in character, such as for the customs, postal, and provincial services, and enumerated as follows:

The Philippine Commission, executive bureau, civil-service board, insular purchasing agent, board of health, quarantine service, mining bureau, weather bureau, bureau of public lands, bureau of agriculture, ethnological survey, bureau of government laboratories, Philippine civil hospital, civil sanitarium at Benguet, signal service, Philippines constabulary, bureau of prisons, bureau of coast and geodetic survey, bureau of engineering, bureau of the insular treasurer, bureau of the insular auditor, insular cold storage and ice plant, bureau of justice, bureau of education, bureau of public printing, bureau of archives, American Circulating Library, Official Gazette, exposition board, bureau of architecture, Benguet road, city of Manila, accounts of the superintendents of the several government buildings, and the insular accounts of the chief quartermaster, the chief commissary, and the chief engineer of the Division of the Philippines, which include the improvement of the port of Manila.

The following statement will show the work accomplished during the fiscal year 1904:

Unaudited monthly accounts on hand June 30, 1903.....	2,050
Monthly accounts received during the fiscal year.....	5,351
Monthly accounts audited during the fiscal year.....	5,247
Unaudited monthly accounts on hand June 30, 1904.....	2,154

In addition to the foregoing, 753 special and supplemental settlements were made during the period July 1, 1903, to June 30, 1904.

THE PROVINCIAL DIVISION.

This division receives for audit and settlement the provincial-municipal, internal revenue-forestry, and internal revenue-ordinary accounts of the 45 provincial treasurers, which include the five district treasurers of Moro Province, the internal revenue-forestry collection account of the city assessor and collector of the city of Manila, the accounts of the disbursing officer of the forestry bureau and internal-revenue bureau, and the internal-revenue stamp accounts of the collector of internal revenue and the insular treasurer.

During the past year monthly property returns of Congressional relief-fund rice have also been received in this division from nearly every province in the islands and examined in connection with the provincial-municipal accounts of provincial treasurers, for under the provisions of Executive Order No. 64, series of 1903, the money value of rice sold or exchanged for services and the expenditure thereof is taken up and accounted for in the provincial-municipal accounts.

In addition to the above, this division received monthly reports from municipal treasurers of their cash transactions, monthly reports of the committees designated under the provisions of Acts Nos. 753 and 1233 to count the cash of provincial treasurers, and monthly deposit and trust-fund accounts of provincial treasurers. All of these reports are examined and checked in connection with the settlement of the provincial-municipal accounts.

Beginning with the fiscal year 1904 the provincial and municipal revenue account and the provincial disbursing account, heretofore rendered and settled separately, were combined into one account. This change has proved very satisfactory and a saving of time not only to this office but also to the accounting officers.

The number of accounts settled and certified for the fiscal year 1904 was as follows:

Provincial-municipal.....	646
Forestry.....	529
Miscellaneous revenues and disbursing accounts.....	62
Total.....	1, 237

INTERNAL-REVENUE LAW—ACT 1189.

This law went into operation on August 1, 1904, and taxes on the following articles became due and were collectable from and after that date: Matches, cigars and cigarettes, manufactured tobacco, fermented liquors, distilled spirits.

Taxes on the following will become due and collectable from and after January 1, 1905: Certain licenses, banks and bankers, stamp taxes, poll and cedula personal tax, insurance companies, forestry products, mining concessions granted prior to April 11, 1899, business, manufactures, and occupation.

The industrial, cedula, and stamp taxes now collected as joint provincial and municipal revenue, the forestry tax, collected as an insular revenue and after deducting the expenses of the forestry bureau returnable pro rata to the provinces from which the forestry products were taken, together with certain licenses in the city of Manila and in the municipalities of the several provinces, are repealed, effective from and after January 1, 1905.

The taxes assessed and collected by virtue of the act are distributed as follows:

1. To municipalities in which collected: License taxes on theaters, museums, cockpits, concert halls, pawnbrokers, circuses, and billiard rooms.
2. To provinces and municipalities jointly—poll or cedula tax.
3. The collections from all other sources accrue to the insular treasury. Of this amount 75 per cent is to be devoted wholly to the insular government, 25 per cent to be returned to the provincial treasury, of which sum 10 per cent is to be used for general provincial purposes and 15 per cent returned to the municipalities, of which one-third is to be devoted to municipal school purposes and the balance to general municipal purposes.

The refunds to the provincial and municipal governments, and the city of Manila, which for this purpose shall be deemed as a municipality and as a province, shall be in proportion to their respective populations, and will be made quarterly by settlement warrants.

THE PROPERTY DIVISION.

This division is charged with the settlement of property returns and all matters coming within the administrative jurisdiction of the auditor under the requirements of Act No. 215, which provides that every officer or agent who has public property in his charge shall be deemed to be responsible for the value of same until relieved from such responsibility pursuant to the provisions of the act.

The returns on hand July 1, 1903, numbered 1,203, and 1,495 were received during the fiscal year. Of these, 2,146 have been examined and 552 remain unaudited at the close of the year.

Effective February 15, 1904, a new system of property accountability by the insular purchasing agent was inaugurated to obviate

the necessity of rendering the voluminous returns formerly required, which entail several months' work in checking each return. This system requires the insular purchasing agent to keep certain stock books wherein each article and its purchase price is entered, and the price at which it is sold to the bureau or province, the 10 per cent on cost price being taken up in a separate column. The stock books are balanced at the end of each quarter, and a list of the property on hand submitted for the purpose of checking the stock in warehouse as shown by the difference between purchase and sales vouchers.

Under date of September 23, 1903, Act No. 909 was passed, amending Act No. 215, and authorizing the civil governor, in his discretion, to order property sold at private sale subject to such restrictions as may be imposed in each particular case. This procedure protects the interests of the government, as the accountable or other officer authorized to conduct the sale may be allowed to solicit bids, sealed or otherwise, for the property ordered sold, and the best prices are obtained by reason of the competitive features. The objection to sales at public auction, by reason of bidders not competing under mutual agreement, is thereby obviated.

ADMINISTRATIVE AND FIELD EXAMINATION OF ACCOUNTS.

The field examinations of the accounts of officers located in the city of Manila, who are authorized to collect and disburse public funds, are made by this office under the provisions of Act No. 490. The results obtained from these inspections during the past year have been very satisfactory, Mr. A. M. Easthagen, city examiner, devoting his entire time to the work of field examinations for the city of Manila. The accounts of fifty-three officers serving in their several capacities have been examined during the past fiscal year; in some special instances the accountability covered a period of a little more than one month; the average, however, has been about six months. Only in special cases have field examinations been conducted by this office outside of Manila, owing to the fact that inspectors and examiners are now authorized for practically all branches of the insular service.

The copies of reports of the examiners of the insular treasury bureau which are submitted to this office have been of considerable assistance in determining the correct amount of the revenue with which a provincial treasurer should be charged.

The accounts received in this office from the officers receiving and disbursing government funds show a very marked improvement over the accounts rendered for previous fiscal years, and due credit should be given to the vigilant, energetic, and painstaking examiners, special agents, and inspectors of the provincial, customs, postal, and constabulary services for their part in bringing about this improved condition of affairs.

THE NEW PHILIPPINES CURRENCY.

During the fiscal year 1903 two additional appropriations, amounting to ₱5,000,000 Philippines currency were made and withdrawn for the purchase of bullion and alloy for coinage into the new Philippines currency authorized by the United States Congress. The sum of ₱2,600,000 Philippines currency was also placed to the credit of the appropriation account and withdrawn for the same purpose in

accordance with the following resolution of the Commission of September 18, 1903:

Whereas the act of Congress approved March second, nineteen hundred and three, authorizes the government of the Philippine Islands to appropriate money from its current funds or from the proceeds of sales of certificates of indebtedness for the purchase of metal for the coinage of the new Philippines currency; and

Whereas the Commission has already appropriated from its current funds the aggregate sum of five million five hundred thousand dollars in United States currency for the purchase of bullion and alloy for the coinage of silver pesos, subsidiary and minor coins, which sum, under the provisions of section nine of the act of Congress of March second, nineteen hundred and three, "shall be reimbursed from the coinage under said sections:" Now, therefore, be it

Resolved, That it is the sense of the Commission that further appropriations for the purchase of silver and alloy for coinage are not necessary, but that under the authority of section nine of the act named the auditor is authorized to reimburse the appropriations already made by the United States currency value of the coinage from said bullion already received, and that of the said sum of five million five hundred thousand dollars in United States currency heretofore appropriated three million dollars may constitute a fixed reimbursable appropriation or continuing credit for the purchase of bullion and alloy, the Commission having the right at any time to reduce such fixed appropriation or continuing credit to a smaller sum if in its judgment such action is deemed advisable.

Resolved further, That any surplus or gain which may arise after deducting the cost of mintage, insurance, and transportation on bullion and coins shall be carried to a fund to be known as "seigniorage."

Pursuant to the aforementioned resolution and in accordance with the provisions of Act No. 970 of the Commission, the appropriations as previously made were reimbursed for the ₱7,600,000 stated above, as also the ₱6,000,000 mentioned on page 19 of last year's report by the withdrawal of these amounts being charged against the gold, standard fund for credit of the general fund in the treasury available for appropriation. Mexican and Spanish-Filipino currency to the value of ₱6,920,843.30 was also withdrawn from the insular treasury during the fiscal year and forwarded to the United States mint at San Francisco for recoinage, the same being charged to the gold-standard fund in Philippine currency equivalent at the legal ratio in effect at the time of withdrawal. These shipments were made in accordance with the following extract from a resolution of the Philippine Commission dated October 26, 1903:

"Be it resolved, That the treasurer of the Philippine Islands is authorized and directed to transmit to the mint at San Francisco for recoinage into Philippine pesos and subsidiary and minor coins all the Spanish-Filipino half pesos and other subsidiary and minor Spanish-Filipino coins now in the treasury, and to make the same shipment as to such local coins as subsequently come into his possession in convenient sums as may accrue from time to time.

At the close of the fiscal year, 19,841,494.56 pesos had been received and taken into the account of the treasurer. To November 1, a total of 24,939,769.56 pesos of the new currency, including subsidiary coinage, had been received and taken into the treasurer's account. It is impossible at this time to state the seigniorage exclusive of mintage charges, insurance, and transportation, as complete reports covering payments at Washington have not been received.

CERTIFICATES OF INDEBTEDNESS.

The issue of certificates of indebtedness referred to on pages 21 and 22 of the last annual report fell due May 1, 1904, and were retired on that date. Under authority of section 2 of the act of Congress of March 2, 1903, authorizing the issue of certificates of indebtedness for the purpose of maintaining the parity of the new

Philippines currency, a second issue of these certificates was placed on sale in the United States pursuant to the additional provisions of Act No. 792 of the Philippine Commission.

The following report of the Secretary of War relative to this bond issue is herewith submitted:

WAR DEPARTMENT,
BUREAU OF INSULAR AFFAIRS,
Washington D. C., September 1, 1903.

SIR: In accordance with the provisions of section 2 of enactment No. 792 of the Philippine Commission, authorizing the issue of \$3,000,000 of certificates of indebtedness under and by authority of section 6 of the act of Congress entitled "An act relating to currency for the Philippine Islands," approved March 2, 1903, said section reading as follows:

"Sec. 2. The Secretary of War shall report to the auditor and treasurer of the Philippine Islands the amount of the certificates of indebtedness, the issue of which is authorized in the previous section, which he shall issue under the authority thereof, the numbers and denominations thereof, the rate of interest to be paid thereon, the time when payable, the premium, if any, at which they were issued, and the total proceeds therefrom; and such facts shall be made a matter of record in the offices of the auditor and treasurer of the Philippine Islands. The certificates to be issued under this act, shall be numbered consecutively, the first certificate thereof bearing the number next after that of the last numbered certificate issued under act numbered six hundred and ninety-six."

By direction of the Secretary, I have the honor to render the following report:

In pursuance of the authority contained in section 1 of this enactment, the Secretary of the Treasury was requested to submit a form of a temporary certificate of indebtedness that would meet the requirements, which form was immediately submitted by him with the statement that it embodied the terms set forth in section 6 of the enactment of Congress providing for a standard of value in the Philippine Islands.

With a view to placing the certificates of indebtedness to the best advantage, the matter was taken up with the Secretary of the Treasury, who authorized the statement that they would be accepted by the Treasury Department as security for deposits of the public money of the United States in national banks whenever further deposits were made, and that they could at any time be substituted for United States bonds now held as security for deposit, on condition that the Government bonds thus released be used as security for additional bank-note circulation.

On July 9, the Bureau of Insular Affairs issued a circular which was widely circulated through the mails and in the public press inviting subscriptions for \$3,000,000 of the certificates of indebtedness to be issued in coupon form of the denomination of \$1,000, dated September 1, 1903, with interest at the rate of 4 per cent per annum, payable quarterly, such certificates to be redeemable in one year after date of issue in gold coin of the United States at the office of the Guaranty Trust Company of New York.

The bids for subscription for these temporary certificates of indebtedness were opened in the office of the Chief of the Bureau of Insular Affairs on the afternoon of August 25, 1903, with the understanding, as set forth in the circular referred to above, that the award would be made to the bidder or bidders most advantageous to the government of the Philippine Islands, as a result of which the entire award was made to the firm of Harvey Fisk & Sons, 29 Nassau street, New York, whose bid for the same was 102.24 per one hundred.

On account of the exorbitant charges demanded by the express company, the certificates of indebtedness were conveyed to New York by special messengers of the Department, at considerable saving, and placed in the custody of the Guaranty Trust Company of New York. These certificates were issued in the denomination of \$1,000, dated September 1, 1903, numbered from 3001 to 6000 inclusive, each bearing three coupons, dated December 1, 1903, March 1, 1904, and June 1, 1904, for interest at the rate of 4 per cent per annum, payable quarterly, and due on the dates above shown, with interest due for the last quarter with the principal after maturity and upon presentation of the certificate.

On September 1, 1903, these certificates of indebtedness as described above were placed in the hands of the firm of Harvey Fisk & Sons, the successful bidders, by the Guaranty Trust Company, the said Harvey Fisk & Sons, in consideration thereof and in accordance with their bid depositing with the Guaranty Trust Company the sum of \$3,067,200, which was duly accepted and placed to the credit of the treasurer of the Philippine Islands.

From the second paragraph above it will be seen that by December 1, it will become necessary to have available, by appropriation of the Philippine Commission, the sum of \$30,000 for the use of the Guaranty Trust Company of New York, in meeting the interest due for the first quarter ending on that date on these temporary certificates of indebtedness, and that a like amount for the same purpose will become necessary on March 1, 1904, and on June 1, 1904, and that on September 1, 1904, the face value and interest for the last

quarter on these certificates amounting to \$3,030,000 will also become necessary to permit of the retirement of this issue of certificates.

Under an agreement with the Guaranty Trust Company of New York, the proceeds resulting from this sale of certificates of indebtedness will draw interest at the rate of 3½ per cent per annum on daily balances.

Very respectfully,

CLARENCE R. EDWARDS,
Colonel, U. S. Army, Chief of Bureau.

Inasmuch as the insular government receives 3½ per cent on its deposit in New York it is evident that with the premium realized on these certificates of indebtedness and the interest on the deposit of the proceeds, this loan will be without expense to the insular government.

SILVER-CERTIFICATES AND SILVER-CERTIFICATES REDEMPTION FUND.

By authority of the act of Congress of March 21, 1903, and pursuant to the additional provisions of Act No. 938 of the Philippine Commission, the printing of the new silver certificates was begun by the Bureau of Engraving and Printing at Washington. The first installment of these certificates was taken up by the treasurer of the Philippine Islands on October 6, 1903. This fund is not a part of the general revenue account of the treasurer and a separate register for the same has been provided as required by law, which shows the denominations, serial numbers, and amounts of certificates received, issued, and redeemed by the treasurer, and he is kept charged with all coin received in lieu of certificates issued, so that the balance of certificates on hand plus the coin in reserve for redemption must at all times equal the total of certificates originally received.

To November 1, 15,030,000 pesos of the new silver certificates had been taken into account by the treasurer and a total of 7,230,000 pesos issued by him for coin deposited, leaving a balance on hand that date in silver certificates of 7,800,000 pesos.

FRIAR-LANDS FUND.

Under authority of sections 63, 64, and 65 of the act of Congress of July 1, 1902, the Philippine government was empowered to issue bonds for the purpose of providing funds to acquire by purchase certain lands in the Philippine Islands generally known as the friar lands. An issue of these bonds was placed on sale in the United States in accordance with the additional provisions of Act No. 1034 of the Commission with most gratifying results.

The following report of the Secretary of War relative to this bond issue is herewith submitted:

WAR DEPARTMENT,
BUREAU OF INSULAR AFFAIRS,
Washington, February 19, 1904.

SIR: In accordance with the provisions of section 3 of enactment No. 1034 of the Philippine Commission authorizing the issue of bonds of the government of the Philippine Islands to the amount of \$7,237,000 gold coin of the United States of the present standard value, for the purpose of acquiring funds for the payment of the purchase price of certain large tracts of land in the Philippine Islands, commonly known as the friar lands, pursuant to the provisions of sections 63, 64, and 65 of the act of Congress entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," approved July 1, 1902, which enactment of the Commission was enacted January 6, 1904, by direction of the Secretary of War, I have the honor to render the following report:

Prior to the enactment above mentioned, on the strength of cable communication with Manila, the Secretary of the Treasury was requested to have the Chief of the Bureau of

Engraving and Printing confer with this Bureau upon the preparation and engraving of bonds authorized in the Philippine government act, and upon receipt of the cabled report of the passage of this act, such draft was made consistent therewith.

On account of the length of time necessary to prepare the properly engraved bond, it was determined to first issue a temporary bond in printed form, to be later replaced with the formal engraved bond.

With a view to placing the certificates of indebtedness to the best advantage, the Secretary of the Treasury was asked to authorize an announcement in regard to the same, similar to the announcement authorized in the case of the temporary certificates of indebtedness, to the effect that "these land-purchase bonds will be accepted at par as security for United States bank deposits whenever further deposits may be made, and may at any time be substituted for Government bonds now held as security for deposit, on condition that the Government bonds thus released be used as security for additional circulation whenever, in the judgment of the Treasury Department, an increase of national-bank circulation is desirable."

In reply thereto the Secretary of the Treasury authorized the following statement in its stead:

"The Secretary of the Treasury authorizes the statement that the Philippine land-purchase bonds will be accepted at par as security for deposits of public money, should further deposits be made; and may be substituted for Government bonds now held as security for deposits on condition that the Government bonds thus released be used as security for additional circulation whenever, in the judgment of the Secretary of the Treasury, it is desirable to stimulate an increase in national-bank circulation."

The Attorney-General was advised of the proposed issue of land-purchase bonds and furnished with a draft of the proposed bond, with request that he pass upon the legality of the issue in the form of the bond.

Further, in order to avoid tying the Philippine government up in any particular banking concern and to assure the registration being conducted by experts, the question of having the registration of this bond performed by the Register of the Treasury of the United States was taken up and determined to be feasible and practicable.

The opinion of the Attorney-General that the issue of bonds and the form of the bond proposed by the Philippine government for the purpose of securing funds with which to purchase the friar lands are in strict conformity with the act of Congress authorizing bonds for that purpose, and are legal in all respects, and his opinion that there exists no legal objection to the Register of the Treasury of the United States registering and recording the bonds issued by the Philippine government to secure funds with which to purchase the friar lands, and also that there is no legal objection to the Treasurer of the United States receiving from the Philippine government the money due as principal and interest on said bonds and distributing the same to the holders of the securities, are appended hereto as Exhibit A, and form a part of this report.

After further preliminary arrangement and consultation, the issue of bonds was agreed upon and announced in the form as set forth in the accompanying Exhibit B, which is a part of this report.

As set forth in this circular announcement, the bids were opened in this office on January 11, in the presence of many of the most responsible bidders and others.

I append hereto as Exhibit C, forming a part of this report, a transcript of the names of all bidders, the amount desired, and the premium offered.

After careful consideration and estimation of these bids, it was found that the joint bid of the National City Bank, of New York, Harvey Fisk & Sons, and Fisk & Robinson, who agreed to accept the entire issue of \$7,000,000 at 107.577, was most advantageous to the government of the Philippine Islands, and to them was accordingly awarded the entire issue.

As set forth in the circular announcement of this issue, the bonds were to be delivered to the successful bidder by the assistant treasurer of the United States at New York on February 1, upon payment of the amount required by the figures of the successful bid.

On account of the fact that the funds resulting from this issue would probably remain subject to the orders of the Philippine government for several months, the question of the utilization of this money in the meantime was taken up, and after agreement with the Guaranty Trust Company, of New York, and the International Banking Corporation, of New York, depositaries of the Philippine government in the United States, it was decided to divide the deposit equally between these two corporations, both agreeing to allow interest at the rate of 3½ per cent per annum on daily balances while the money remained on deposit with them.

The check for \$150,000 which accompanied the bid of the successful syndicate bidders was immediately placed on deposit with the Guaranty Trust Company, of New York, to the credit of the treasurer of the Philippine Islands, "Philippine land-purchase bonds account."

The proceeds of the issue of \$7,000,000 at the bid of 107.577 amounted to \$7,530,390.

The bonds were sent to New York by special representatives of this Bureau and delivered to the assistant treasurer of the United States and his formal receipt obtained.

On February 1, upon receipt by the assistant treasurer of the proceeds of the issue (not counting the \$150,000 already deposited with the Guaranty Trust Company, of New York)

which amounted to \$7,380,390, the bonds were delivered by him to the successful syndicate bidders and the proceeds deposited by him—\$3,615,195, with the Guaranty Trust Company, of New York, and \$3,765,195 with the International Banking Corporation, of New York, both to the credit of the treasurer of the Philippine Islands, "Philippine land-purchase bonds account."

I append hereto as Exhibit D, to form a part of this report, a letter of this Bureau to the Banking Corporation above named, advising them of the conditions of this deposit, which have been accepted by them.

I am in receipt of information from the International Banking Corporation to the effect that the funds in its possession will be carried upon the books of the Washington branch.

Under authority contained in section 1 of the act of the Philippine Commission authorizing this issue of bonds, that the same should be in registered form in the denomination of \$1,000 and \$10,000 in proportion to suit the purchaser or purchasers thereof, after consultation and agreement with the successful syndicate bidders the issue was prepared in the denominations and bearing the numbers and names set forth in the attached receipt given this Bureau by the assistant treasurer of the United States at New York upon delivery of the bonds, which receipt is marked "Exhibit E" and forms a part of this report.

Very respectfully,

CLARENCE R. EDWARDS,
Colonel, U. S. Army, Chief of Bureau.

The AUDITOR OF THE PHILIPPINE ISLANDS.

The following table shows the interest received, including premiums on bonds, and the interest paid by the insular government during the fiscal year on account of the several funds as carried in the general revenue account of the insular treasurer:

Statement of interest received and paid by the insular government during the fiscal year 1904

Character of item.	Debit.	Credit.
Expended for interest on first and second series of certificates of indebtedness (gold-standard fund).....	P420,000.00
Expended for interest on friar-land bonds.....	140,000.00
Interest received on gold-standard fund deposits and premium on certificates of indebtedness issued.....		P330,795.44
Interest received on friar-land fund deposits and premium on issue of bonds.....		1,147,226.80
Interest received on Congressional relief fund deposits.....		72,058.40
Interest received on general fund deposits.....		31,853.02
Amount received to June 30, 1904, in excess of amount expended.....	1,021,933.66
Total.....	1,581,933.66	1,581,933.66

Statement of premium and interest received on bond issues and interest paid and due thereon to June 30, 1904.

Character of item.	Debit.	Credit.
Interest paid on first and second series of certificates of indebtedness to June 1, 1904.....	P420,000.00	
Interest due on June 30, 1904.....	60,000.00	
	P480,000.00	
Interest paid on friar-land bonds to May 1, 1904.....	140,000.00	
Interest due on friar-land bonds on June 30, 1904.....	93,333.33	
	233,333.33	
Premium on first series of certificates of indebtedness, issued in the fiscal year 1903.....		P150,780.00
Premium on second series of certificates of indebtedness, issued in the fiscal year 1904.....		134,400.00
Premium on reissue of first series of certificates of indebtedness, issued in the fiscal year 1904.....		70,860.00
Interest received on deposits of certificates of indebtedness funds.....		125,535.44
		P481,575.44
Premium on friar-land bonds.....		1,060,780.00
Interest received on deposits of friar-land funds.....		86,446.80
		1,147,226.80
Amount received to June 30, 1904, in excess of amount expended.....	915,468.91
Total.....	1,628,802.24	1,628,802.24

CHANGES IN RATIO BETWEEN MEXICAN OR SPANISH-FILIPINO CURRENCY AND PHILIPPINE CURRENCY.

At the beginning of the fiscal year 1904, or June 30, 1903, the ratio between Mexican and United States currency was \$2.45 of the former to \$1 of the latter.

Effective July 18, 1903, the ratio between Mexican and Philippine currency was fixed at \$1.19 of the former to \$1 of the latter; August 1, 1903, 1.15 to 1; January 1, 1904, 1.12 to 1; January 29, 1904, 1.10 to 1; April 11, 1904, 1.13 to 1; May 23, 1904, 1.10 to 1, which continued to be the ratio to June 30, 1904, the end of the fiscal year.

EXCESSIVE APPROPRIATIONS.

As a result of closer calculations on the part of the respective chiefs of bureaus and the careful scrutiny given their estimates by the Commission preliminary to the passage of appropriating acts, the past year shows a marked reduction in the amount of moneys appropriated and not actually required to meet outstanding obligations. It is apparent that the funds of one fiscal year must be carried forward to the next to provide payment for salaries undrawn, bills not presented for payment, and supplies ordered but not delivered, although every effort has been made to close all transactions within the year. This office has endeavored as far as possible to restore to the general fund all moneys over and above these actual needs, and under the provisions of Act No. 729 the transactions during the year have been as follows:

Item.	Fiscal year—		
	1902.	1903.	1904.
Turned back to general revenues.....	₱285,097.51	₱2,378,154.45	₱421,031.12
Restored to credit of appropriation account under section 3, Act No. 729.....	20,263.39	237,346.61
Net amount turned back.....	264,834.12	2,140,807.84	421,031.12

The above amounts are stated in Philippines currency. It is evident that a portion of the appropriations undrawn June 30, 1904, will not be required for outstanding obligations of that year, and to this end the heads of bureaus have been requested to certify the amount to be retained. All remaining sums will be immediately turned back as provided in the act.

APPROPRIATED MONEYS UNDRAWN JUNE 30, 1904.

The appropriation ledgers of this office on June 30, 1904, showed the following amounts of appropriated moneys to the credit of the various bureaus and offices of the insular government for the fiscal year 1904, all amounts undrawn relating to fiscal year 1903 and former years having been previously turned back to the general fund:

Executive:	
Executive bureau.....	₱39,980.70
Philippine civil-service board.....	1,300.02
Bureau of the insular purchasing agent.....	51,463.20
Purchase of supplies.....	23,233.92

Department of the interior:	
Board of health for the Philippines.....	P 228, 840. 42
Quarantine service.....	104, 868. 81
Forestry bureau.....	24, 574. 85
Mining bureau.....	1, 759. 49
Philippine weather bureau.....	6, 307. 04
Bureau of public lands.....	3, 133. 42
Bureau of agriculture.....	69, 220. 98
Bureau of non-Christian tribes.....	3, 314. 40
Bureau of government laboratories.....	23, 794. 61
Philippine Civil Hospital.....	6, 580. 98
Civil Sanitarium, Benguet.....	4, 814. 98
Department of commerce and police:	
Bureau of post-offices.....	13, 410. 51
Post-office service.....	211, 640. 11
Invalid money orders.....	3, 184. 08
Signal service.....	994. 79
Bureau of Philippines constabulary.....	112, 083. 07
Exposition battalion to St. Louis.....	23, 206. 82
Commissary stores.....	53, 969. 52
Bureau of prisons.....	163, 530. 84
Bureau of coast guard and transportation.....	502, 798. 38
Bureau of coast and geodetic survey.....	128, 634. 64
Bureau of engineering.....	11, 007. 72
Department of finance and justice:	
Bureau of the insular treasurer.....	45, 386. 56
Bureau of the insular auditor.....	4, 708. 43
Bureau of customs and immigration.....	52, 445. 61
Refundable export duties.....	841, 204. 90
Surplus, section 203, Act 355.....	10, 319. 52
Overtime service, customs employees.....	2, 320. 01
Services of officers, private bonded warehouses.....	38. 26
Arrastre plant.....	11, 466. 44
Bureau of internal revenues.....	416. 20
Insular cold storage and ice plant.....	62, 316. 38
Bureau of justice.....	38, 932. 78

Total..... 6,585,095.36

Outstanding liabilities (amounts expressed in Mexican and Spanish-Filipino currency)..... \$6,085.48

PUBLIC WORKS AND PERMANENT IMPROVEMENTS.

An analysis of the expenditures of the insular government, the city of Manila, and from the Congressional relief fund shows that a very large percentage of the total disbursements were for public works or improvements of a permanent character.

The items of this character have been segregated and are here stated:

Item.	Fiscal year 1904.	Prior fiscal years.	Total.
Insular:			
Insular purchasing agent, construction of lorchas....	P45,000.00		P45,000.00
Board of health, public works, including leper colony.....	28,457.75		28,457.75
Bureau of engineering, public works, including temporary wharf at Cebu.....	47,211.95	P10,581.50	57,793.45
Bureau of coast guard and transportation, permanent improvements, light-house service.....	68,522.52		68,522.52
Construction of vessels.....	267,536.71	282,967.37	550,504.08
Railway and machine shop, Marine Island.....	48,386.14		48,386.14
Bureau of coast and geodetic survey, construction of vessels.....	26,620.00	1,971.84	28,591.84
Bureau of architecture, public works.....	603,413.86	282,651.35	886,065.21
Engineer, division of the Philippines—			
Public works.....	10,768.28	798.82	11,567.10
Roads and bridges.....	33,351.92	12,155.29	45,507.21
Map.....	315.53		315.53
Harbor improvements, Manila.....	2,624,075.66		2,624,075.66
Pasig River, Walla.....	6,304.69		6,304.69
Dredging Santa Cruz estero.....	1,505.70		1,505.70
Unassigned service—			
Benguet road.....	913,579.70	5,104.18	918,773.88
Naguilian road.....	8,759.90		8,759.90
Harbor at Cebu.....	831.30		831.30
Harbor at Iloilo.....	902.90		902.90
Calbayog pier.....	27,837.58	39.97	27,877.55
Wharf at Jolo.....	4,468.21	2,532.73	7,000.94
Wharf at Siasi.....	621.93		621.93
Wharf at Iligan.....	46.36		46.36

THE INSULAR SALARY AND EXPENSE FUND.

Prior to this fiscal year disbursements from this appropriation were largely confined to payment of traveling expenses and half salaries of employees of the civil service from the United States, traveling expenses and salaries while taking or changing station, etc., and such cases as were not provided for by the appropriations for the bureaus concerned. The provisions of Acts 643 and 697 made this appropriation to a large extent a reimbursable one, and under the provisions of the last-named act the sum of ₱20,830 was collected and deposited as a refund to this appropriation in the past fiscal year, but the corresponding disbursements were not made until this fiscal year. The excess of refunds over disbursements in the case of that act is represented by outstanding claims for transportation furnished by the different companies.

Refunds for transportation furnished under the provisions of Act 643 are reimbursable to the payers at the end of their contract of service, and these refunds must therefore be really considered as a trust fund. Of the collections under Act 643 the sum of ₱29,010.42 was deposited with the disbursing agent of Philippine revenues at Washington by the employees. The balance of the refunds under this act, ₱37,543.77, were deducted from the salaries of such employees and deposited in the insular treasury. In addition to the cost of their transportation, they are entitled to reimbursement for their traveling expenses upon the conclusion of their contracts, and in this connection the acting auditor recommends that an allowance be fixed upon a mileage basis in lieu of such traveling expenses.

Under the provisions of Act 1049, which authorized the civil governor in his discretion to commute two or more years' leave of absence, the sum of ₱54,688.11 was disbursed, of which sum ₱18,435.88 was refunded from the appropriations of the bureaus concerned, the balance pertaining to the next fiscal year. The practice of charging these expenditures first to insular salary and expense fund and then reimbursing that appropriation from the appropriations of the bureaus concerned ceased with the passage of Act 1225, which authorized the civil governor or proper head of department to commute leaves of absence directly from the appropriation from which the salaries should properly be paid, only excepting cases where two fiscal years are involved.

DEFALCATIONS, EMBEZZLEMENTS, AND SHORTAGES.

One of the most pleasing features of this report is the marked decrease in the number of defalcations and embezzlements of public funds on the part of those intrusted with making collections and disbursements. This situation is the result of more frequent examinations by the increased corps of field examiners and the application of the merit system in the selection of responsible officials.

In every case arising prompt measures have been taken for the prosecution of the offender and the protection of the government's interests by demand on the surety company responsible under contract for the integrity of the official. The officers charged with the enforcement of the laws and prosecution of offenders have been untiring in their efforts to secure prompt convictions and sentences.

Following is a statement of these defalcations, with the name of the offender, the official position held by him, the amount of his peculation, and the status of the government's claim against the surety for the recovery of the amount:

J. W. Walsh, a supply officer of the Philippines constabulary stationed at Masbate, was found to be short in his accounts ₱2,739.50 and pfs. 12,728.28. He was charged with embezzlement and forgery and sentenced to twenty-six years' imprisonment. Demand was made on the Union Surety and Guaranty Company and the Fidelity and Deposit Company, joint sureties, for the shortage, and ₱26.66 and pfs. 2,659.78 have been paid thereunder.

A final examination of the accounts of C. G. Johnson, a supply officer of the Philippines constabulary, shows a balance due government of ₱3.62 and pfs. 603.55, against which there is due officer ₱31.10 and pfs. 148.50. His property accounts also reveal a shortage of ₱1,821.91. These funds were stolen by Johnson, who later, in company with Captain Herman, his senior inspector, confiscated a launch and tried to escape to British North Borneo, but were prevented by the ruse of a native captain. Later, Johnson was murdered by natives in attempting to land on the island of Mindanao. His accomplice, Captain Herman, was captured later, seriously wounded. He is now serving a term in Bilibid for his connection with the crime.

John Arthur, a supply officer of the Philippines constabulary, committed suicide at Cavite on March 6, 1904. Examination of his accounts revealed a shortage of ₱3,649.61 and pfs. 263.10 in his disbursing account and ₱7,402.46 in his commissary accounts. Demand will be made on his sureties for the amounts.

The final audit of the accounts of L. A. Porter, a supply officer of the Philippines constabulary, now deceased, shows a total shortage of ₱1,409.16 and pfs. 3,517.13. His property accounts also reveal shortages to the value of ₱1,312.78. When last communicated with Lieutenant Porter stated that he had the sum of ₱3,517.13 in his possession, but on thorough search after his decease the money could not be located. His sureties have been requested to indemnify the government for the shortage.

Isidor Gintzler, a supply officer of the Philippines Constabulary stationed at Cebu, was found on examination to be short in his accounts in the sums of ₱2,782.35 and pfs. 21.40. He is also responsible for a shortage in property to the value of \$319.62. He was charged with criminal negligence and misappropriation, of government funds and received a sentence of three years, six months, and one day's imprisonment. The charge of criminal negligence was dismissed. The sum of ₱2,801.80 has been paid by his sureties.

The final audit of the accounts of Elmer B. Melton, a supply officer of the Philippines Constabulary at Baguio, Benguet, now deceased, shows a balance due the government of ₱216.87, which can not be accounted for. His sureties will be called upon to liquidate this balance.

Carel Knip, a supply officer of the Philippines Constabulary stationed at Capiz, was found to be short in his accounts in the net sum of ₱407.47. He was charged with falsification and embezzlement and on the latter charge was found guilty and sentenced to two

years' imprisonment and to pay the government the amount embezzled. The charge of falsification was lost through a technicality. His accounts have not been finally closed, and any other shortages arising will be included in the demand on his sureties.

Charles Borden, a supply officer of the Philippines Constabulary, was convicted of misappropriation of public funds and sentenced to three years, six months, and twenty-one days' imprisonment, and to indemnify the government to the amount of ₱1,035.31. Demand has been made on his sureties for the amount of the shortage.

Paul B. Weiss, deputy of the provincial treasurer of Sorsogon, was tried and convicted on the charge of falsification of a public document and the embezzlement of ₱1,372.75. On the former charge he was sentenced to twelve years' imprisonment and on the latter to ten years and one day. The amount of his shortage has been deposited with the clerk of the court of first instance of Sorsogon Province.

Ernest Hagerdorn, late lieutenant, Twenty-eighth Infantry, U. S. Army, was found guilty of embezzlement by a general court-martial and sentenced to two years in Bilibid prison. His final account showed a balance of \$145.04 due the insular government, which amount was credited to him by consent of the civil governor under rule 29 of Act 90.

LOSSES BY THEFT AND OTHER UNAVOIDABLE CAUSE.

Lieut. William H. Martin, a supply officer of the Philippines Constabulary, lost pfs. 1,216.36 of public funds as the result of the burning of headquarters building at Bayombong, Nueva Vizcaya. Damaged bullion to the value of ₱437.78 was recovered and the balance will be credited to the officer with the written consent of the civil governor, as provided in rule 28 of Act 90.

Lieut. Frank J. O'Grady, a supply officer of the Philippines Constabulary was found to be short in his accounts in the sum of ₱4,107.60, which, upon investigation, was proved not to be the fault of said officer. The Commission relieved Lieutenant O'Grady by special legislation.

Capt. George D. Guyer, Sixteenth U. S. Infantry, serving as a disbursing officer of insular funds, lost \$2,543.47 by theft. As the loss occurred through no fault of the officer, he was relieved of the amount by special statute.

Dr. H. Eugene Stafford, attending physician and surgeon, civil hospital, was relieved of accountability for ₱2,214.10 and pfs. 230 pertaining to his civil hospital account, and ₱90 and pfs. 513.12 pertaining to the Benguet Sanitarium account, pursuant to the provisions of rule 29 of Act 90. Adolph Schenck, a former employee at the civil hospital, was prosecuted for embezzlement and his trial revealed the disappearance of part of these funds.

Lieut. J. W. Lattimore, a supply officer of the Philippines Constabulary, while absent from his station on a pay trip lost ₱879.10 by theft. These funds were stolen by Herman and Johnson, an account of whose actions has already been stated. The civil governor, by written consent, allowed credit for this sum in the accounts of Lieutenant Lattimore, under rule 28 of Act 90.

Dorateo Alviar, clerk of the court of first instance at Vigan, applied for relief from responsibility for the sum of pfs. 159.45 which had been

sent by registered mail to the insular treasurer. On arrival at Manila the pouch containing the money could not be found. Relief was granted under rule 28 of Act 90.

Capt. C. McK. Saltzman, Signal Corps, U. S. Army, reported the theft of ₱99.70 of insular funds. Credit was allowed for the amount pursuant to rule 28 of Act 90.

Capt. G. W. Povey, quartermaster, U. S. Volunteers, was allowed credit in his accounts for \$0.66 pursuant to rule 29 of Act 90.

Capt. D. H. Boughton, Third Cavalry, U. S. Army, claimed credit for \$62.50 as money disbursed and for which he had not taken proper vouchers. The civil governor authorized credit pursuant to rule 29 of Act 90.

Capt. Anton Springer, First Infantry, U. S. Army, was killed in action. His final accounts showed a balance of \$30 due the insular government, for which sum credit was allowed under rule 29 of Act 90.

Lieut. J. McRae, a supply officer of the Philippines Constabulary, stationed at Vigan, lost during the mutiny of the constabulary in that district the sum of ₱818.56 of public funds. The loss was adjusted under rule 28 of Act 90.

Lieut. Bissell Thomas, Thirty-fifth Infantry, U. S. Volunteers, was credited under the provisions of rule 29 of Act 90 with a balance of ₱120 of insular funds. This officer was cashiered and no probability existed that the amount would ever be recovered.

Lieut. G. A. Williams, Forty-ninth Infantry, U. S. Volunteers, was credited with ₱790 under the provisions of rule 29 of Act 90, information having been received from the War Department to the effect that he was indebted to the United States for a much larger sum.

A. B. Smith, acting assistant surgeon, U. S. Army, was credited with ₱93 on his disbursing account and for property to the value of ₱45. This officer left the islands without final accounting and no means exist of making collection of the balance found to be due.

L. P. Smith, acting assistant surgeon, U. S. Army, was accountable to the government at the time of his decease for ₱0.24, which sum was removed under rule 29 of Act 90.

Maj. W. A. Glassford, Signal Corps, U. S. Army, claimed credit for a loss of \$112.46 of public funds. The claim was allowed and amount credited pursuant to rule 28 of Act 90.

Lieut. W. L. Clarke, Signal Corps, U. S. Army, reported a loss of ₱163.96, for which amount he was allowed credit in his accounts under rule 28 of Act 90.

Capt. A. J. Robertson, paymaster, Philippines Constabulary, in April, 1904, prepared a box said to contain ₱1,926.90 for shipment to Lieut. L. E. McMurray. This box was receipted for by the constabulary quartermaster for the purpose of shipment, but never reached its destination. The responsibility for this loss has not been finally determined.

Lieut. J. A. Moss, U. S. Army, postmaster at Camp Vicars, Moro Province, was allowed a credit for ₱9.32 under rule 28 of Act 90 for postal funds lost by burglary.

Fred J. Schlotfeldt, treasurer of Cebu Province, has requested relief under rule 28 of Act 90 for ₱5,000 lost by John S. Stevenson, deputy treasurer, through the capsizing of a banca. Affidavits have been

submitted and an investigation made by a special examiner, but the loss remains unadjusted.

G. B. Travis, secretary-treasurer of Lepanto-Bontoc Province, sustained a loss of ₱3,036 by robbery at Bangued, where the funds had been misshipped by the insular treasurer. Part of the amount has been recovered. The case has not yet been disposed of.

THE INSULAR TREASURY.

TREASURY STATEMENT.

GENERAL REVENUE ACCOUNT OF THE TREASURER.

The following is the general revenue account of the treasurer of the islands, by months, as audited. The new Philippines currency having a fixed and permanent value in its relation to United States currency at the ratio of two to one, the account as stated in Philippine currency includes all transactions in United States currency on this basis.

This statement of deposits in and withdrawals from the treasury embraces all transactions at the treasury within the fiscal year 1904 without reference to the period for which the collections as so deposited were made, and also without reference to the fiscal year for the service of which funds were withdrawn for expenditure.

General revenue account of the insular treasurer for the fiscal year ended June 30, 1904.

The following is a comparative statement of deposits and withdrawals at the insular treasury by fiscal years since the date of American occupation in August, 1898, to June 30, 1904, expressed in Philippines currency. The treasurer's account for the fiscal year 1904, elsewhere stated in the currencies actually involved, is here for the purpose of comparison converted at the ratio of 1.10 to 1, the official ratio at the close of the fiscal year, which may be considered a fair average ratio for the year. From this statement has been excluded the sum of \$455,093.49, the estimated United States currency value of seized funds in the treasury, treated in former statements as a part of the treasurer's balance until June 30, 1901, at which time the funds were taken over to a special account.

Comparative Treasury statement, fiscal years 1899, 1900, 1901, 1902, 1903, and 1904.

ACCOUNTS OF THE INSULAR TREASURER AS DEPOSITARY.

Under the provisions of section 85 of the act of Congress of July 1, 1902, temporarily providing for the administration of affairs of civil government in the Philippine Islands, the insular treasurer has been designated as a depositary of funds of the United States, consisting of the funds of the United States Army and Navy disbursing officers serving in the Philippine Islands and on the Asiatic Station, respectively, and funds to the credit of the treasurer of the United States as repayments, miscellaneous, and United States money-order funds.

Under the provisions of act 758 the insular treasurer is likewise designated as a depositary of insular disbursing officers' funds and of all trust funds coming into the hands of officers of the insular government as such.

The various accounts are stated in the actual currencies involved, in order to preserve the identity of the funds received in trust.

ARMY AND NAVY DISBURSING OFFICERS' FUNDS.

Following is a statement of the account of United States Army and Navy disbursing officers' funds in the hands of the treasurer to June 30, 1904:

THE ASSURANCE FUND.

Following is a statement of account of the assurance fund, created by the provisions of act 496 of the Philippine Commission, in the hands of the treasurer of the Philippine Islands June 30, 1904:

Character of item.	United States currency.	Philippines currency.	Mexican currency.
Deposits to date.....	\$166.22	₱2,992.61	\$123.40
Withdrawals to date.....	166.22		123.40
Balance June 30, 1904.....		2,992.61	

Under section 99 of the act named, upon original registration under the act and also upon the entry of a certificate showing title to real estate as registered owners in heirs or devisees, one-tenth

of 1 per cent of the assessed value of the land shall be paid to the register of deeds as an assurance fund. Such money is required to be paid to the insular treasurer, who shall keep the same invested. Sections 101, 102, 103, and 104 provide for the payment from this fund of all losses or damages through errors on the part of the register of deeds and otherwise direct the management of this assurance fund. No payments have been made from the fund for the purposes contemplated by the act, the withdrawals representing conversion of United States and Mexican currency balances to Philippines currency.

THE CONSTABULARY RELIEF FUND.

Following is a statement of the account of the Philippines Constabulary relief fund created by the provisions of Act No. 619, as deposited with the treasurer of the Philippine Islands as depository of trust funds, to June 30, 1904:

Character of item.	United States currency.	Philippines currency.	Mexican currency.
Deposits to date.....	\$273. 83	₱26, 212. 03	\$4, 427. 71
Withdrawals to date.....	273. 83	4, 427. 71
Balance June 30, 1904.....	26, 212. 03

Under the general provisions of Act No. 619 fines, penalties, and forfeitures are imposed against members of the constabulary for breaches of discipline, and in addition certain deductions are made from the monthly pay of officers and enlisted men. All funds arising from the first-named source constitute a special fund to be expended by a board appointed by the chief of constabulary for the moral and material welfare of the enlisted men of the service. The funds arising from the second source constitute a special fund for the benefit of the widows and orphans of members of the constabulary who may lose their lives in the line of duty, and for the benefit of members of the constabulary who may be physically disabled by reason of wounds or other causes in line of duty. No payments have been made from the fund for the purposes contemplated, the withdrawals noted representing conversion of United States and Mexican currency balances to Philippines currency.

FRANCHISE DEPOSITS.

The following is a statement of franchise deposits in the hands of the treasurer on June 30, 1904: Deposits to date, \$211,500 United States currency; no withdrawals.

These deposits are required under paragraph 22 of part 1 of Act No. 484, section 30 of Act No. 554, section 30 of Act No. 703, and the general provisions of paragraph 9 of section 2 of Act No. 667, as an earnest of good faith and as security for the completion of work to be done by the applicants for or grantees of certain franchises within the time specified.

MISCELLANEOUS TRUST FUNDS

Following is a statement of account of miscellaneous trust funds in the hands of the treasurer of the Philippine Islands to June 30, 1904, representing cash security for the faithful performance of contracts, funds deposited to cover shortages pending investigations, etc.:

Character of items.	United States currency.	Philippines currency.	Mexican currency.
Deposits to date.....	\$7,155.00	₱1,368.06	\$1,696.00
Withdrawals to date.....	500.00	1,096.00
Balance June 30, 1904	6,655.00	1,368.06	600.00

RIZAL MONUMENT FUND.

Under the provisions of Act No. 243 of the Commission the insular treasurer is the custodian of the funds collected for the purpose of erecting, on the Luneta in Manila, a monument to José Rizal, the Filipino patriot, scientist, and author.

The receipts and expenditures of the insular treasurer on this account to the close of the fiscal year were as follows:

Character of item.	United States currency.	Philippines currency.	Mexican currency.
Total receipts.....	\$1,849.10	₱3,745.94	\$64,681.80
Exchanges of currency.....	58,035.77
Total	1,849.10	61,781.71	64,681.80
Total disbursements.....	31.07	4,592.15
Exchanges of currency.....	1,818.03	50,197.43
Balance on hand	61,781.71	892.22
Total	1,849.10	61,781.71	64,681.80

ESTATES OF DECEASED EMPLOYEES.

Under the provisions of Act No. 290 of the Commission the insular treasurer is made administrator of the estates of employees of the insular government, citizens of the United States, who may die in the service, when such estates do not exceed in value the sum of \$500. The treasurer is authorized to take possession of the effects of deceased employees, receive all salary due or accrued on account of earned leave, and to pay all expenses of interment here or shipment of the remains to the United States, as may be desired. He settles all of a decedent's just debts in the islands and pays over any balance remaining to the next of kin.

Following is a statement of the treasurer's general account as such administrator:

Character of item.	United States currency.	Philippines currency.	Mexican currency.
Total receipts, Nov. 1, 1901, to June 30, 1904	\$5,625.91	₱16,216.46	\$43,407.57
Total disbursements, Nov. 1, 1901, to June 30, 1904....	4,838.86	10,908.90	41,215.95
Balance on hand June 30, 1904.....	987.05	5,307.56	2,191.62

[illegible]

The majority of the persons arrested were detained in the possession of the proceeds of the sale of the property of the deceased. The items of clothing and other personal effects were considered as property and taken to a police station. During the process of a search of the property of the deceased, the following items were found: a small amount of cash, a small amount of jewelry, a small amount of clothing, a small amount of food, a small amount of medicine, a small amount of other personal effects. The items were taken to a police station and the proceeds of the sale of the property of the deceased were distributed to the family of the deceased. The items were taken to a police station and the proceeds of the sale of the property of the deceased were distributed to the family of the deceased.

The following summarizes information on occupational hazards and on the health hazards which arise from mass shootings, derived from research conducted during the last 10 years:

The amounts are stated in Philippine currency in order to show the relative features of the two in a more intelligible manner. The amounts received in American and Spanish-Philippine dollars from the national customs officers have been reduced to Philippine currency and recorded in that currency expression at the rate of 2 to 1, this being the ratio in effect June 30 and the amount of average rate for the transactions of the fiscal year. In the statement determining the United States currency equivalent of the amounts the amounts as stated in Philippine currency may be converted at the fixed and permanent ratio of 2 to 1.

SPECIAL PROPERTY AND DEPOSIT ACCOUNT.

As shown by previous reports, there remained in the possession of the treasurer of the islands on June 30, 1903, certain remaining items of Spanish seized funds and special deposits, which were considered as property and carried on a special account as such. During the present fiscal year various sales were made under the authority contained in Act 608 of the Commission, and the proceeds, amounting to ₱283,721.90 Philippine currency, and pfs. 2,551.45 Mexican currency, deposited in the treasury to the credit of the general revenue account.

INSULAR REVENUES.

The following statements, tabulated by departments, bureaus, and offices, show the revenues, under appropriate classifications, derived from insular sources during the fiscal year 1904.

The accounts are stated entirely in Philippines currency in order to present the statistical features of the report in a more intelligible manner. The amounts received in Mexican and Spanish-Filipino currency from the several revenue officers have been reduced to Philippines currency value and included in that currency expression at the ratio of 1.10 to 1, this being the ratio in effect June 30 and approximately an average ratio for the transactions of the fiscal year. For the purpose of determining the United States currency equivalent of the revenues, the amounts as stated in Philippines currency may be reduced at the fixed and permanent ratio of 2 to 1.

As authorized by resolution of the Commission of May 23, 1903, additional work to the value of ₱29.18 was performed without charge for the Settlement House, Manila, an institution for the gratuitous medical treatment of indigent natives.

DEPARTMENT OF COMMERCE AND POLICE.

THE POST-OFFICE SERVICE.

The postal service of the Philippine Islands is conducted on the same basis as that of the United States. No postal laws and regulations have been promulgated, but the regulations of the United States are necessarily applied as far as practicable. All expenditures are made pursuant to appropriations, but each postmaster under specific authority of the director of posts, as provided in rule 34 of Act No. 90, pays the expenses of his office out of its receipts, or, if his revenues are sufficient, from funds transferred to him by the postmaster at Manila, the designated depository for postal revenues. The receipts and expenditures of the postal service are covered into and withdrawn from the insular treasury by warrant and counter warrant, as provided in rule 37 of the act above cited, when the accounts for a quarter are audited and certified.

Following is a statement of the postal revenues collected at the various post-offices in the islands during the fiscal year 1904:

[In Philippines currency.]

Total insular receipts.....	19,352,487.16

UNDEPOSITED COLLECTIONS.

The accounts covering the settlements in the foregoing statements of revenues collected show that there were in the hands of collecting officers on June 30, 1904, undeposited balances (net) amounting to ₱302,516.65 Philippine currency and pfs. 36,828.79 Mexican currency.

INSULAR DISBURSEMENTS.

Following are statements, arranged by departments, bureaus, and offices, showing the insular disbursements to June 30, 1904, on account of the fiscal year 1904 and prior fiscal years, from the regular appropriations of the Philippine Commission, whether made by disbursing officers in the islands, by the disbursing agent at Washington, or by settlement warrant. Disbursements from reimbursable appropriations are omitted in these statements, but appear elsewhere under appropriate heads.

The accounts are stated entirely in Philippines currency in order to present the statistical features of the report in a more intelligible manner. The amounts expended in Mexican and Spanish-Filipino currency relate almost entirely to expenditures for the account of prior fiscal years, when the appropriation acts provided that withdrawals and disbursements should be made in that currency except in specific

instances otherwise provided for. The introduction of the new Philippine currency and its sole use in the transactions of the government will shortly eliminate this feature. All such expenditures have been reduced to Philippine currency value and included in that currency expression at the ratio of 1.10 to 1, this being approximately an average ratio for the transactions of the year. For the purpose of determining the United States currency equivalent of the disbursements, the amounts as stated in Philippines currency may be reduced at the fixed and permanent ratio of 2 to 1.

Expenditures during fiscal year 1904 and prior fiscal years.

[In Philippines currency.]

Departments and bureaus.	Fiscal year 1904.	Prior fiscal years.

THE PAIL SYSTEM.

Under the provisions of Acts 330, 430, and 437 the difference between the amount expended for the installation of the pail system in the city of Manila and the amount collected therefor from property owners was refundable to the insular government. In accordance with the above and pursuant to the further provisions of Acts 1048 and 1049, the pail system was transferred to the city of Manila as of January 1, 1904, reimbursement being made to the insular government by the city in the sum of ₱384,664.10, this amount representing the net expense borne by the insular government for the installation and operation of the pail system, the same being duly deposited in the treasury as repayments to the credit of insular appropriations from which previously withdrawn and taken up in special settlement for credit of insular expense on account of the several fiscal years involved. The following table shows the figures concerned in the settlement between the central government and the city of Manila on account of the pail system:

Fiscal year.	Expend- itures.	Revenues.	Net expend- itures.
1902.....	₱59,920.00		₱59,920.00
1903.....	294,964.40	₱20,361.96	274,602.44
1904.....	85,722.16	11,633.58	74,088.58
Total.....	440,606.56	31,995.54	408,611.02
Expense borne by insular government subsequent to January 1, 1904, charged against public works, city of Manila.....			23,946.92
Amount reimbursed insular government by city of Manila.....			384,664.10
Net amount charged to expense board of health in settlements during the fiscal year 1904:			
On account fiscal year 1904.....		₱49,682.85	
On account fiscal year 1903.....		63,981.65	
			113,664.50
Net credit deducted from total insular expenditures.....			270,999.80

UNDEPOSITED BALANCES.

The accounts covering the settlements included in the foregoing statement of disbursements show that there were in the hands of disbursing officers on June 30, 1904, actual cash balances (net) amounting to ₱1,865,636.80 Philippines currency and pfs. 20,580.85 Mexican currency.

The official balances in the accounts as certified were ₱2,668,396.27 Philippines currency and pfs. 69,798.19 Mexican currency, the difference of ₱802,759.47 Philippines currency and pfs. 49,217.34 Mexican currency between the official balances being due to items in suspense in the settlement of the accounts.

PAYMENTS TO PROVINCES.

The policy of the Commission of giving needed assistance to provinces for general and extraordinary expenses has been continued. The following is a statement of account of payments and refunds made during the fiscal year 1904:

Province.	Purpose.	Act.	Payments.	Refunds.
Benguet.....	Wagon road to Naguilian.....	795	₱700.00
Lepanto-Bontoc.....	General expenses.....	807	13,000.00
Mindoro.....	do.....	821	8,782.00
Benguet.....	do.....	807	5,000.00	₱211.82
Nueva Vizcaya.....	General purposes.....	807	8,500.00
Moro.....	Repairing wharves.....	852	4,000.00
Batangas.....	Roads and bridges.....	913	12,442.48
Mindoro.....	General purposes.....	821	8,782.00
Benguet.....	General expenses.....	807	5,000.00	81.98
Lepanto-Bontoc.....	do.....	807	13,800.00
Nueva Vizcaya.....	Construction of provincial government building.....	831	5,000.00
Do.....	General expenses.....	807	8,500.00
Benguet.....	General purposes.....	1,049	5,400.00	47.88
Mindoro.....	do.....	1,049	6,000.00
Moro.....	Salary of United States representative at Cagayan de Jolo.....	807	390.00
Nueva Vizcaya.....	General expenses.....	1,049	4,750.00
Lepanto-Bontoc.....	do.....	1,049	13,500.00
Mindoro.....	General purposes.....	1,049	6,000.00
Ambos Camarines.....	Salary and subsistence to volunteers in suppressing brigandage.....	857	2,219.66
Moro.....	Repairing wharves.....	852	16,000.00
Sorsogon.....	High School building.....	858	9,110.21
Mindoro.....	Supplies furnished by insular purchas- ing agent.....	821	21,620.77
	Net payments.....			178,155.44
	Total.....		178,497.12	178,497.12

NOTE.—See accounts of Congressional relief fund and war emergency rice fund for other payments to provinces

ADVANCES TO PROVINCES.

Act 799 provides for the reimbursement to provincial governments from the insular treasury of the amount ascertained to be lost through defalcation of bonded provincial officials pending recovery on the official bonds. The amounts so reimbursed are considered as advances on the security of the amount due on such bonds and when recovered are deposited in the insular treasury to the general credit of the insular government.

During the fiscal year 1904 the following amounts were advanced and collected on this account:

Character of item.	Advanced.	Collected
Province of Rizal—Loss through defalcation of provincial treasurer	₱13,043.48	₱8,695.65
Province of Occidental Negros—Loss through defalcation of provincial treasurer	2,625.02
Net advances	6,972.85
Total	15,668.50	15,668.50

The city of Manila, supported in part by the insular government, is considered elsewhere in this report under a distinct head. Three-tenths of the appropriations for the city are chargeable to the insular government and during the fiscal year, as represented by net withdrawals, such charges amounted to ₱1,628,445.79 Philippines currency.

Loans to provinces during the fiscal year amounting to ₱171,885 Philippines currency are omitted from the disbursements, as the amounts loaned are properly assets of the insular government.

There was due to the insular government June 30, 1904, on account of unpaid loans to provinces the sum of ₱441,800 Philippines currency and pfs. 75,000 Mexican currency.

Refunds to provinces and collections ceded are also omitted from the statement of the insular expenditures. These loans and refunds to provinces are disbursed by the provinces for their current needs, and the disbursements therefrom appear in the statements of the accounts of the several provincial treasurers.

Payments from reimbursable appropriations are likewise omitted, except as they may show net expenditures, as otherwise they are not properly chargeable as administrative expenses. These transactions appear elsewhere under the heading "Refundable collections and reimbursable expenditures."

COMPARATIVE STATEMENT OF RECEIPTS AND EXPENDITURES.

Following is a statement of the ordinary and extraordinary revenues and disbursements of the government for the fiscal year 1904, expressed in Philippines currency. All items in Mexican currency

have been reduced at the ratio of 1.10 to 1, this being approximately an average ratio for the transactions of the year:

Character of item.	Amount.
DEBIT.	
Ordinary revenues, fiscal year 1904, exclusive of excess collections refunded:	
Customs revenues.....	₱17,171,161.03
Postal revenues.....	267,569.44

THE CITY OF MANILA.

FINANCES OF THE CITY OF MANILA UNDER ITS CHARTER.

Under the Manila city charter, which became effective August 7, 1901, its government passed to the control of a municipal board. All revenues derived under the charter are deposited with the treasurer of the islands to the credit of the city. Disbursements are made pursuant to the appropriations of the Philippine Commission, but under section 15 of the charter 30 per cent of the appropriations for the city are payable out of the insular treasury and 70 per cent out of the revenues deposited by the city to its credit.

Following is a statement in Philippine currency of the revenues collected by the various departments of the government of the city of Manila during the fiscal year 1904, as shown by the settlement of the accounts submitted to this office:

REVENUES.

Item.	Philippines currency.	Item.	Philippines currency.

THE CITY OF MANILA, IN ACCOUNT WITH THE GOVERNMENT OF THE PHILIPPINE ISLANDS, JUNE 30, 1904.

From the standpoint of deposits in and net withdrawals from the insular treasury, the account of the city of Manila with the insular government on June 30, 1904, was as follows:

Item.	Philippines currency.
DEBIT.	
Net withdrawals during fiscal year 1902.....	₱3,400,756.18
Net withdrawals during fiscal year 1903.....	3,728,861.02
Net withdrawals during fiscal year 1904.....	5,428,152.64
Balance due city of Manila June 30, 1904.....	343,708.19
Total debit.....	12,901,478.03

Item.	Philippines currency.
CREDIT.	
Deposits of revenue during fiscal year 1902.....	P2, 135, 587. 64
Three-tenths of net withdrawals during fiscal year 1902.....	1, 020, 226. 86
Deposits of revenue during fiscal year 1903.....	3, 122, 947. 22
Three-tenths of net withdrawals during fiscal year 1903.....	1, 118, 658. 30
Deposits of revenue during fiscal year 1904.....	3, 875, 612. 22
Three-tenths of net withdrawals during fiscal year 1904.....	1, 628, 445. 79
Total credit.....	12, 901, 478. 03

The basis for this statement is the reduction of all Mexican currency deposited in the insular treasury to its Philippines currency equivalent at the respective ratios prevailing at the close of each month. The withdrawals from appropriations were all made in Philippine currency. Previous statements have been made in which the entire Mexican currency deposits for the year were reduced to Philippines currency at 1.10 to 1, the rate in effect June 30, 1904.

From the standpoint of actual expenditures and revenues, as shown by audited accounts, the account of the city of Manila with the insular government on June 30, 1904, was as follows:

Item.	Philippines currency.
DEBIT.	
Expenditures during fiscal year 1902.....	P3, 034, 694. 20
Expenditures during fiscal year 1903.....	3, 895, 859. 86
Expenditures during fiscal year 1904.....	5, 370, 765. 33

Deposits of revenue during fiscal year 1904.....	3, 875, 612. 22
Three-tenths of expenditures during fiscal year 1904.....	1, 611, 229. 59
Total credits.....	12, 824, 542. 88

REFUNDABLE COLLECTIONS AND REIMBURSABLE EXPENDITURES.

Under the authorities quoted in the several accounts following, certain collections are made by the insular government and held pending claim for refund after the conditions of the law have been complied with; likewise certain of the appropriations made are reimbursable, the expenditures made thereunder being reimbursed by the deposit to the credit of the appropriations concerned of the funds accruing thereunder.

The items are omitted from the regular statement of insular receipts and expenditures, as they are quasi-trust funds when received as such and constitute a liability of the government until paid or transferred to general revenues by operation of law. On the other hand, certain items advanced are considered as assets, either in the form of stock on hand or net amount of advances after crediting sums returned.

The operations under these respective accounts for the fiscal year 1904 were as follows:

REFUNDABLE CUSTOMS COLLECTIONS AND DISBURSEMENTS.

Under the provisions of an act of Congress, approved March 8, 1902, certain export duties are collected in the Philippines and deposited in the insular treasury, subject to refund to the parties from whom received upon compliance with specific requirements. These moneys are in a sense trust funds and are so considered until eighteen months from the date of collection, when, under ruling of the Secretary of War, they are transferrable to the general revenue of the insular government.

In accordance with enactment of the Commission, moneys are collected from importers and owners of bonded warehouses, which are deposited in the insular treasury for payment to employees for overtime work and salaries of officers engaged in bonded warehouses.

Following is a statement of receipts and disbursements on account of these funds to June 30, 1904:

Character of item.	Philippines currency.	
	Collections.	Refunds.

THE CUSTOMS ARRASTRE PLANT.

Under the provisions of Act No. 897, effective September 23, 1903, the sum of P39,000 was appropriated for the purchase, maintenance, and operation of an arrastre plant for the landing, conveyance, storing, and delivery of imported merchandise at the custom-house of the port of Manila, and the collector of customs was authorized to fix and collect such charges as he shall deem necessary to cover the total cost of operating said plant.

The transactions under this authority to June 30, 1904, were as follows:

Character of item.	Philippines currency.	
	Collections.	Disbursements.
Net receipts from arrastre charges, after refunding ₱23,923.33 to importers as excessive collections.....	₱97,755.49	
Expended for purchase, maintenance, and operation of plant.....		₱97,878.50
Excess of expenditures over receipts, carried to account of insular expenditures.....	123.01	
Total.....	97,878.50	97,878.50

REFUNDABLE INTERNAL-REVENUE COLLECTIONS.

Under the provisions of the provincial and municipal codes, revenue derived from industrial, cedula, and other taxes internal in character were ceded to the provinces as the territory became organized under the codes.

During the fiscal year the following internal revenues were collected in territory at the time unorganized. With the passage of the Moro government act all the territory within the archipelago became organized.

INTERNAL-REVENUE STAMP ACCOUNT.

Stamp taxes are collected under the provisions of Spanish royal decrees and orders and General Orders, No. 57, military governor's office, dated March 31, 1900. Up to June 30, 1901, all collections

from this source accrued to the central government of the islands, after which date the collections in organized provinces, under the provisions of section 18 of Act No. 83, as amended by Act No. 133, became jointly provincial-municipal revenue. These stamps are furnished by the collector of internal revenue for the islands to the various collectors of internal revenue and to the treasurers of the various provinces through the insular treasurer.

From and after January 1, 1905, stamp taxes will be levied and collected as internal revenue under the provisions of sections 116 to 119 of the internal-revenue law, Act No. 1189.

REFUNDABLE FORESTRY COLLECTIONS.

From July 1, 1902, under existing laws, no revenue has actually accrued to the insular government from forestry taxes, the amount remaining after the pro rata expenses of the forestry bureau have been deducted being refunded to the province in which the timber was cut. It being permissible to pay taxes in one province for timber cut in another, this office is required to make adjustments of the various accounts and refund to the provinces entitled thereto. Following is a statement of collections and refunds to June 30, 1904:

	Philippines currency.
Balance on hand June 30, 1903.....	₱149,390.34
Collections made from July 1, to December 31, 1903.....	357,245.54
Collections made from January 1 to June 30, 1904.....	178,987.93
	685,623.81

INVALID MONEY ORDERS.

Under the rules of the money-order system an order becomes invalid for direct payment twelve months after the last day of the month of issue. The amounts received from the issuance of money orders which have become invalid are deposited in the insular treasury and are made a permanent appropriation by the provisions of paragraph 8 of section 1 of Act No. 357, for the payment of the amount of the original orders by warrant upon certification of the claims by the auditor.

The operations under this fund during the fiscal year were as follows:

Character of item.	Philippines currency.

Total.....	18,519.30

OUTSTANDING LIABILITIES.

Rule 31 of Act No. 90 provides that no disbursing officers' check shall be paid after one year from the last day of the month of its issue. In every case where after one year after the rendition and settlement of the final account of a disbursing officer there remains a balance in any depository to the credit of such disbursing officer, by reason of the nonpresentation of checks or otherwise, the auditor reports said amounts to the civil governor, who requires the depository to deposit the said balance with the treasurer of the islands to the credit of "Outstanding liabilities."

The operations during the fiscal year under this fund were as follows:

WAR EMERGENCY RICE FUND.

Act No. 488 of the Commission provided for the taking over to the insular treasury the sum of \$65,965.65 Mexican currency, profits arising in connection with sales of rice, etc., by the military authorities to the inhabitants of Batangas and Laguna provinces during the so-called reconcentration period. The act named provides that the sum so deposited should be treated as a reimbursable appropriation, expendable in the discretion of the civil governor for the benefit of the inhabitants of the provinces named.

On October 29, 1902, the said sum of \$65,965.65 Mexican currency, was deposited in the treasury and became available for withdrawal and expenditure, in accordance with the terms of the appropriation.

NOTE.—The gold-standard fund is benefited by the amount of interest earned on deposits of the fund in the United States, and the premiums on demand and telegraphic drafts sold under provisions of Act No. 938. The amounts accruing to the fund from these sources, as incorporated in the monthly treasury statements during the fiscal year 1904, are as follows:

Premiums on drafts sold.....	₱ 68,145.15
Interest on deposits.....	125,535.44
Total.....	193,680.59

THE CONGRESSIONAL RELIEF FUND.

By act of Congress approved March 3, 1903, the sum of \$3,000,000 United States currency was appropriated for relief of distress in the Philippine Islands, to be expended under the direction and in the discretion of the Philippine government, in such proportions as they deem wise, in the direct purchase and distribution or sale of farm implements, farm animals, supplies, and necessities of life, and through the employment of labor in the construction of government wagon roads and other public works. The act further provides that the governor of the Philippines shall submit to the Secretary of War a statement of all expenditures under this fund.

The sum so appropriated was transmitted to the treasurer of the Philippine Islands and taken into the account of insular funds as ₱6,000,000. As contemplated by the appropriating act, and for the purpose of making the reports required thereunder, the identity of

the fund has been maintained and expenditures made therefrom have been segregated from the ordinary expenses of the government.

The procedure inaugurated by the Philippine Commission as to the disposition of this fund was to set apart by means of appropriation acts specified sums for specific purposes, such as public works, etc., as well as amounts for expenditure under direction of the civil governor in such manner as might from time to time be authorized by resolution of the Commission.

The following statement of account shows the expenditures from the fund as audited to June 30, 1904, together with the various cash balances remaining on hand and making up the full amount of the Congressional appropriation:

Fiscal year 1903:		Philippines currency.
Purchase of rice.....		₱193,862.46
Fiscal year 1904:		
Public works and permanent improvements—		
Villaverde trail.....	₱44,265.31	
Capas-Iba-O'Donnell road.....	42,125.84	
Vigan-Bangued road.....	66,617.68	
Pasacao-Nueva Caceres road.....	30,486.59	
Bacon-Bulasan road.....	44,575.88	
Pagbilao-Atimonan road.....	73,524.09	
Carcar-Barili road.....	43,274.46	
Bay-Tiaong road.....	5,894.52	
Sogod-Putad road.....	817.30	
Calamba-Los Banos-Bay road.....	2,687.70

Benguet road.....	732,521.01	
Shovels.....	142.04	
Government laboratories.....	25,533.25	
		1,116,302.52
Purchase of rice.....		1,001,879.84
Purchase and care of carabao.....		315,348.00
Board of health, veterinarians and inoculators.....		64,766.96
Bureau of agriculture—		
Live stock.....	5,169.23	
Locust boards.....	5,155.00	
		10,324.23
Charter of the steamship <i>Kodiak</i> for the transportation of rice, etc.....		10,920.00
Payments to provinces—		
Moro Province, for expenditure under the direction of the legislative council.....	300,000.00	
Albay Province, for expenditure by the provincial board in public improvements and relief.....	50,000.00	
		350,000.00
Donations—		
Relief of fire sufferers, Maraquina.....	1,471.47	
Nazario Crisostomo, for support, incapacitated in government service.....	1,000.00	
		2,471.47
Total expenditures.....		3,065,875.48
Loans—		
Batangas Province.....	2,000.00	
Ilocos Sur Province.....	20,000.00	
Romblon.....	8,000.00	
		30,000.00
Cash balances—		
Balance in the hands of disbursing officers.....	458,332.55	
Available for appropriation.....	903,928.52	
Undrawn appropriations.....	1,541,863.45	
		2,904,124.52
Amount of original Congressional appropriation.....		6,000,000.00

THE MONEY-ORDER SYSTEM.

DEPARTMENT OF COMMERCE AND POLICE, BUREAU OF POSTS.

The money-order system of the Philippine Islands, operated by the bureau of posts, is analogous to that of the United States in all of its details.

Money orders issued in the United States and paid in the Philippines are charged to the United States. Orders issued in the Philippines and paid in the United States are charged to the Philippines. Under this reciprocal arrangement paid orders are respectively transmitted as remittances to the country in which issued.

The only revenue which accrues from the money-order system is the net amount of fees received, after all losses have been deducted therefrom.

An analysis of the money-order statement shows that there were balances in the hands of postmasters June 30, 1903, amounting to \$1,251,631.85, and there was due from former postmasters at that date \$7,002.60, and due to former postmasters the sum of \$36.18. During the fiscal year 68,034 money orders were issued, for the aggregate sum of \$3,102,606.38, upon which fees were received amounting to \$12,623.95, with gains by exchange amounting to \$399.28.

The number of orders paid and repaid during the fiscal year was 33,637, aggregating \$1,564,753.41. There was remitted to the United States for the credit of the Philippine money-order system, on account of money orders of Philippine issue paid in the United States, the sum of \$2,000,000. There was transferred to postal funds \$12,071.17, and \$8,719.89 was deposited in the insular treasury on account of invalid money orders, for the credit of a permanent appropriation from which claims for invalid and lost money orders are payable.

There were balances in the hands of postmasters on June 30, 1904, aggregating \$786,104.02, which includes the balance in the hands of the postmaster at Manila as the designated depository on money-order funds.

There was due from former postmasters the sum of \$2,615.90, while the balances due former postmasters June 30, 1904, aggregated \$35.85.

Appended is a tabulated statement of the money-order transactions during the fiscal year at each of the various money-order offices in the islands to June 30, 1904, and a statement of the general account with the United States, as shown by the records of this office.

The account is stated entirely in United States currency, all transactions of the money-order system being so expressed.

Statement of the money-order business of the post-offices in the Philippine Islands, fiscal year 1904.

THE PROVINCIAL GOVERNMENTS.

FISCAL AFFAIRS OF THE PROVINCES.

Under the provisions of Act No. 83, as amended by Act No. 133 and other acts, the revenue collected in the provinces and municipalities for local purposes is not deposited in the insular treasury, but is deposited with the treasurer of the province in which collected. That portion which accrues to each municipality is returned to the municipal treasurer and disbursed by him under direction of the municipal board, in accordance with the general provisions of the municipal code. The provincial treasurer exercises over the municipal accounts the functions of an auditor, and is by law required to examine the accounts of each municipality in his province at stated intervals. Each provincial treasurer renders a monthly account to the auditor for the islands covering all of his receipts and disbursements, as in the case of insular officials, but as provincial instead of insular funds, and the accounts are adjusted and settled independently of insular receipts and disbursements.

The policy of the Commission of giving needed assistance to the provinces in various ways—by loans, refunds of internal revenue and forestry collections, and by appropriations outright—was continued during the fiscal year 1904.

INSULAR LOANS TO PROVINCES.

Loans of insular funds to provinces were made during the fiscal year 1904 as follows:

Province.	Philippines currency.	Province.	Philippines currency.
Albay.....	P25,000	Occidental Negros.....	P20,000
Antique.....	7,500	Paragua.....	10,000
Batangas.....	13,300	Tayabas.....	13,085
Capiz.....	15,000	Union.....	20,000
Ilocos Sur.....	3,000	Zambales.....	5,000
Laguna.....	20,000		
Misamis.....	5,000	Total.....	171,885
Nueva Ecija.....	15,000		

During the fiscal year 1904 the insular government received repayments of loans to provinces as follows:

Province.	Date.	Philippines currency.
Bataan.....	January.....	P2,500.00
Do.....	June.....	2,500.00
Bulacan.....	September.....	10,000.00
Ilocos Sur.....	May.....	3,000.00
Isabela.....	January.....	5,133.93
Laguna.....	June.....	20,000.00
Samar.....	December.....	5,217.30
Total.....		48,351.23

On June 30, 1904, there were due from provinces the following unpaid balances for loans made by the insular government:

Province.	Philippines currency.	Mexican currency.
Albay.....	P25,000.00	
Antique.....	22,500.00	
Batangas.....	63,300.00	
Capiz.....	70,000.00	
Misamis.....	5,000.00	
Nueva Ecija.....	27,000.00	
Occidental Negros.....	20,000.00	
Paragua.....	21,000.00	
Union.....	37,000.00	
Zambales.....	10,000.00	
Samar.....		\$25,000.00
Abra.....	10,000.00	
Ambos Camarines.....	50,000.00	
Cavite.....	5,000.00	50,000.00
Iloilo.....	50,000.00	
Masbate.....	5,000.00	
Mindoro.....	5,000.00	
Pangasinan.....	5,000.00	
Rizal.....	7,000.00	
Surigao.....	4,000.00	
Total.....	441,800.00	75,000.00

STATEMENT OF FORESTRY-TAX SETTLEMENTS, FISCAL YEAR 1904.

Since July, 1902, the revenues collected on account of forestry taxes are refunded to the province in which the timber was cut, after deducting pro rata the expenses of the forestry bureau.

It should be noted that forestry taxes may be paid in the city of Manila or any province for the benefit of the province in which the timber was cut. The collections made are considered as refundable revenues and so appear under that general subject in the report. Adjustments between the provinces are made in this office and the amounts found due are refunded by settlement warrant. The net collections for the account of Benguet Province and the city of Manila are treated as insular revenues.

The following table shows the balances due June 30, 1903, the collections under the forestry laws for timber cut in each province, the expenses of the forestry bureau as prorated, the amounts refunded to provinces during the fiscal year, and the amounts refundable June 30, 1904:

	Balance due June 30, 1903.		Collections on account of timbers cut in provinces.		Pro rata expenses of forestry bureau, Philippines currency.	Amount refunded to June 30, 1904, Philippines currency.	Balance due June 30, 1904, Philippines currency.
	Philippines currency.	Mexican currency.	Philippines currency.	Mexican currency.

GENERAL ACCOUNTS OF PROVINCIAL TREASURERS.

Following will be found statements of the general accounts of the various provincial treasurers arranged by provinces in alphabetical order. These statements show the collections from all sources made in each province and in the municipalities during the fiscal year by the provincial treasurer or his deputies, the refunds from the insular treasury of internal-revenue and forestry collections under existing law, and all loans from the insular treasury. Disbursements for provincial purposes are likewise shown, together with all payments to municipalities, the balance due from each treasurer to the municipalities of his province as a whole, and the balance due each province June 30. The municipalities receive one-half of certain revenues collected, and municipal treasurers have no accountability to this office.

Each balance due a province is analyzed to show the amount represented by unsettled differences of the treasurer and late treasurers, and the amount of the actual cash balance with which the treasurer is chargeable at the close of the fiscal year.

REPORT DEPARTMENT OF PUBLIC INSTRUCTION.

DEPARTMENT OF PUBLIC INSTRUCTION,
Manila, P. I., October 15, 1904.

The secretary of public instruction begs leave to submit to the honorable the Philippine Commission the third annual report of the work accomplished during the year ending October 15, 1904, unless otherwise stated, by those bureaus of the insular government under the executive control of the department of public instruction.

BUREAU OF EDUCATION.

ORGANIZATION.

Since the filing of the second annual report there has been no change in the plan of organization of the Bureau of Education except along the lines of development and perfection. A general superintendent in charge of the bureau, 32 actual and 4 ex officio division superintendents supervising the school work of 36 school divisions, and a force of American and native teachers discharging the duties of instructors in the various municipalities and barrios make up for the school year 1904-5, as for that of 1903-4, the Philippine educational organization. Thirty-eight provincial high schools are now in operation in 35 of the provinces, and 3 technical, 12 intermediate, and 2,233 primary schools have been permanently established in 629 of the 660 municipalities. Owing to lack of American teachers, want of municipal funds, and local conditions, 31 of the total number of municipalities are without any facilities for public instruction worthy of the name. Municipalities which have no public schools and the provinces in which such municipalities are located are as follows:

Albay.—Bagamanoc, Calolbon, Caromaran, Jovellar, Pandan, Payo.

Ambos Camarines.—Capalonga, Gainga, Lupi, Siruma.

Capiz.—Buruanga.

Isabela.—Santo Tomas.

Misamis.—Jiminez.

Samar.—Almagro, Oquendo, Oras, Santo Nino.

Sorsogon.—Bonsul, Castilla, Irosin, Matnog, Pilar, Santa Magdalena.

Surigao.—Bislig, La Paz, Lianga, Nonoc, Sapao, Talacogon, Veruela.

Tayabas.—Baler.

Six of the 31 municipalities just mentioned, viz, Santo Tomas, in the province of Isabela, and La Paz, Liango, Sapao, Talacogon, and Bislig, in the province of Surigao, will open schools during the current month. As soon as the American teachers now under appointment in the United States report for duty, schools will be

established at Baler, in the province of Tayabas, and in those municipalities of Albay, Sorsogon, and Ambos Camarines which are at present unprovided with facilities for public instruction. American teachers will be assigned to Almagro, Oquendo, Oras, and Santo Nino, in the province of Samar, as soon as the existing pulajan activity in the vicinity of those municipalities abates and permits the people to return to their usual avocations and pursuits. There is no present expectation of establishing schools at Buruanga, Capiz, or Jiminez, in the province of Misamis, or at Nonoc or Vuela, in the province of Surigao.

THE GENERAL SUPERINTENDENT.

During the past year the passing of the teaching force to the civil-service list, the adjustment of leave due to teachers retiring from the service or entitled to visit the United States, the preparation of additional courses of study to meet the advance of the pupils, the comparison of efficiency reports for the purpose of making promotions, the filling of vacancies among the American teachers, the selection of insular native teachers, the choosing of students for education in the United States, the development of a system of technical and industrial instruction in provincial high schools and the furnishing of the necessary plant and facilities therefor, the establishment of a system of intermediate instruction, the preparation of plans for standard school buildings, and, finally, the keeping in touch with each school division and with every school in it, have increased the routine work of the general superintendent's office 525 per cent over that of the previous year.

This enormous increase of work necessitated some increase in the office force, and this was accomplished without increased expense to the government by the substitution of six Filipino for two American clerks. The work, however, is still too heavy for the number of men employed, as is evidenced by the fact that all employees are obliged to work overtime, some of them as much as sixty hours a month.

Since September, 1903, the general superintendent, notwithstanding the addition to his routine work, has found time to visit the schools of 26 provinces, and the benefit resulting has been so marked that it seems imperative that he should be relieved of as much office work as possible in order that more time may be left to him for the performance of the important duty of school inspection. The long distances to be traveled in order to make such a round of visits, coupled with the difficulty of obtaining anything resembling proper transportation or living accommodations, imposed serious hardships on the general superintendent, and he is deserving of high commendation for the energy displayed, especially when it is considered that the termination of a tour of inspection meant the return to a mass of accumulated office work, the disposition of which required days and weeks of extra and extraordinary labor.

The office force of the general superintendent, as authorized by the appropriation bill for the fiscal year 1904-5, is composed of 21 Americans and 8 Filipinos, assigned to divisions as follows: Assistant's division, assistant to the general superintendent and 2 stenographers; record division, 1 record clerk and 6 clerks; statistical division, 2

clerks and 1 stenographer; disbursing officer's division, 1 disbursing officer and 4 clerks; property division, 1 property clerk, 1 stenographer, and 4 clerks; special division, 1 architectural draftsman and assistant, 1 special order clerk and assistant, and 1 stenographer to the general superintendent.

DIVISION SUPERINTENDENTS.

In the month of December, 1903, the school division of Misamis was virtually suppressed by the withdrawal of its division superintendent and American teachers on account of the lack of interest shown by the provincial officials and people in the public schools. This drastic measure called the attention of both officials and people to the fact that education was not to be forced upon those unwilling to receive it, and so wounded provincial pride that there was a sudden and notable revival of interest in everything pertaining to public instruction. The honorable the civil governor, the general superintendent, and the secretary of public instruction were besieged with petitions, letters, and telegrams asking for the reopening of the schools, but to all the answer was returned that the insular government would incur no further expense for education in Misamis until the province had furnished some tangible evidence that its lukewarmness and indifference had been replaced by an active interest in schools and a willingness to cooperate with the bureau of education in educational matters. With praiseworthy energy the province set to work to establish schools at its own expense, and at the beginning of the current school year the interest in schools was so manifest and the school attendance so greatly increased that the province of Misamis was rehabilitated as a school division.

Inclusive of the Moro Province, there are now 36 school divisions, in charge of 4 ex officio, 4 acting, and 28 actual division superintendents. In the provinces of Benguet, Lepanto-Bontoc, Mindoro, and Paragua, the governor, in addition to his duties as such, performs those of division superintendent. All the other school divisions are in charge of actual or acting division superintendents, who devote their entire time to the schools within their jurisdiction. Division superintendents supervise the school work of their divisions, select municipal teachers and fix their salaries, nominate the Filipino teachers for insular appointment, pass on the efficiency of American teachers, recommend promotions, distribute supplies, account for school property, represent the bureau of education in provincial boards and municipal councils, encourage the construction of school buildings, maintain friendly relations with the people, and, all in all, perform a variety of important duties demanding judgment, tact, energy, courage, physical endurance, and a high order of executive ability. While the success of the school in each municipality, and therefore that of the schools of the province, depends largely on the individuality, the personality, the influence, and the industry of the teacher, credit can not and ought not to be withheld from the men who plan and supervise the work and hesitate at no sacrifice to keep the educational machine in motion.

Under Act No. 477 the salaries were fixed for the various school divisions according to their importance, and division superintendents received the salaries prescribed for the divisions to which they were assigned. At first this arrangement did not work disadvantageously,

but as vacancies occurred the making of promotions for merit occasioned so many transfers and such a disturbance of the entire supervisory personnel as to cause detriment to the service. In the appropriation bill for the current fiscal year salaries were detached from divisions, and the salaries of division superintendents receiving \$1,500 a year increased to \$1,600. This bill provides for 1 division superintendent, at \$3,000 per annum; 3 division superintendents, at \$2,500 per annum; 6 division superintendents, at \$2,250 per annum; 5 division superintendents, at \$2,000 per annum; 8 division superintendents, at \$1,800 per annum; 8 division superintendents, at \$1,600 per annum.

The salary of the superintendent of schools of the Moro Province has been fixed by the civil governor at \$4,000 per annum, in accordance with the act of organization, No. 787, and was not affected by the legislation just mentioned.

THE TEACHING FORCE.

The American teaching force at the opening of the school year 1902-3 was 926. At the beginning of the school year 1903-4 this number had fallen to 723, and by the time the Second Annual Report was written, in October, 1903, only 691 American teachers were available for duty. At first the bureau of education felt that it could get along with this reduced number of skilled instructors by not seeking to enlarge the field of operations and by confining its efforts to the perfection and development of schools already established. With the return of tranquillity to nearly all the provinces and the abatement of cholera and smallpox, interest in educational matters became so intense and the demands for more schools so insistent that the bureau saw itself obliged to abandon its conservative policy and to increase the number of American teachers to 812, with which number the school year closed in March, 1904.

The expiration of the contract period, the completion of three years of service, and the accruing of leave to visit the United States left less than 600 American teachers ready for duty when the schools opened about the middle of June of the present year. By the 15th of September, however, 723 regular and 49 temporary appointees were on duty, which number will be increased before the end of October by the return of 48 now on leave and the arrival of 36 new appointees. In the appropriation bill for the present fiscal year provision is made for 863 American teachers. The salaries of this force are graded as follows:

Superintendent of Insular Normal School.....	\$3,000
Superintendent of school of arts and trades.....	2,400
3 teachers, at \$2,000.....	6,000
8 teachers, at \$1,800, including superintendent of nautical school....	14,400
10 teachers, at \$1,600.....	16,000
50 teachers, at \$1,500.....	75,000
80 teachers, at \$1,400.....	112,000
60 teachers, at \$1,300.....	78,000
350 teachers, at \$1,200.....	420,000
50 teachers, at \$1,100.....	55,000
137 teachers, at \$1,000.....	137,000
113 teachers, at \$900.....	101,700
863	1,020,500

The average annual salary of American teachers is \$1,182.50, or \$98.54 per month.

The division of the teaching force into classes according to salary has put an end to indiscriminate raises of salary, and made possible a system of promotions which obliged the recognition of conspicuous merit. Whether an increase of compensation should be conceded to a teacher no longer depends on his individual record, but on his right to promotion after a careful comparison of his service with that of every other teacher in the bureau. As a consequence the pressure for raises of salary has been removed, and the danger of paying varying salaries to teachers rendering the same identical kind of efficient service has been reduced to a minimum. Teachers usually enter the service at \$900 or \$1,000 a year and receive promotion to the higher grades as vacancies occur and comparative merit may justify.

Excluding the technical schools, the work of the American teacher in the Philippines may be divided into two great classes, that of teaching in the provincial high schools and that of supervising and directing the primary work in the various municipalities. Stationed at the provincial capital or some other important town of the province and surrounded, as he usually is, by a small American community composed of teachers and other persons in the Government service, the lot of the high school teacher may be considered as reasonably comfortable and agreeable. The conditions under which teachers supervising primary instruction perform their duties are not so attractive. They are practically isolated from those of their own race in municipalities or, better said, townships, which cover many square miles of territory and include within their boundaries a multitude of barrios or hamlets, oftentimes far removed from the town center or poblacion. If municipal finances permit, the supervising teacher must organize a school in each barrio or hamlet, and that means that school accommodations must be secured, teachers provided, and supplies furnished. Then he must get the pupils for the school, and that he can do only when he has overcome local prejudice and gained the good will, the confidence, and the friendship of the people. And when all this is done, the real, trying, and strenuous life of the teacher has just commenced. In storm and in sunshine, in good weather and in bad, on foot or on horseback, in carromata or in banca, by land or by water, he must frequently visit all the schools within his jurisdiction and keep in intimate touch with the work confided to his care. It is needless to say that for such work women are unfitted and that service of such a character can only be discharged by men, and by men of strong constitution, stout hearts, unusual courage, firm resolution, infinite tact, and inexhaustible patience.

Yet, with all its hardships and its trials, all its difficulties and its tribulations, the life of the supervising teacher is not without its compensations. His tact, his patience, but, above all, his sturdy sense of justice and fair play, bring to him in time the warm friendship of those with whom he is thrown in daily contact, and their genuine regard consoles him to some extent for the loss of social intercourse with his own people. Almost every waking moment has its duty. The time passes quickly and he hardly notices its flitting until the long vacation arrives and gives him a chance for a change of scene and the opportunity to visit other points of the archipelago or oriental countries within convenient distance of the Philippines.

The American teaching force has now its body of seasoned veterans, who have lost the deadly feeling of homesickness, who have become accustomed to life in the Tropics, who understand the customs of the people, and who have cultivated a real, true, and abiding interest in local hopes and aspirations. The recruit is no longer surrounded by an atmosphere of discontent and unhappiness, but in the strength of his fellows of longer experience he finds encouragement and esprit de corps, which quickly remove his unreasonable fears and reduce to proper proportions the difficulties and troubles which he is expected to meet and overcome. The dissatisfied and the discontented have taken their departure and left to the service a corps of healthy-minded men and women, who are not daunted by the difficulties of their task, and rather pride themselves on their ability to bring about a successful result where failure might have been expected.

On September 1, 1903, the teaching service was brought under civil-service rules, and those teachers who were in the employ of the government on that date were listed as civil-service employees with the right to draw the salaries then received by them without the necessity of passing a civil-service examination. Teachers so "blanketed" into the classified service, however, are not entitled to promotion or advance in salary until they have passed the examination required by regulations. Five hours per day and five days a week is the minimum of service required of teachers during the school year of forty weeks. Two weeks of vacation are allowed at Christmas, and ten weeks during the heated term in the months of April, May, and June.

Although the long vacation gave to teachers a yearly period of rest double that allowed to other employees, it could not be accumulated, and was not of sufficient duration to enable the teacher to visit the United States without incurring an expense entirely disproportionate to the benefits received. As it was manifest that teachers ought to be given an opportunity to visit the home land for the purpose of preserving their health and renewing their strength, Act No. 1040, which took effect January 1, 1904, gave the character of leave to the long vacation and permitted teachers to visit their homes in the United States once in every three years on full pay during that period and half pay for sixty days additional. Teachers returning to duty after the enjoyment of leave for three years' service are entitled at the end of two years' additional service to the repayment of the traveling expenses incurred by them for the trip from their homes in the United States to Manila. Teachers appointed under Act No. 80, who have rendered continuous, faithful, and satisfactory service for three years, still enjoy the privilege on resigning of receiving half pay for thirty days and their traveling expenses from Manila to San Francisco. Those appointed since the passage of Act No. 1040 are not entitled to receive half pay or traveling expenses on acceptance of resignation. At this point it may not be inappropriate to remark that American teachers in the Philippines receive, on the average, 90 per cent more pay and enjoy more vacation twice over than teachers in the United States or anywhere else in the world.

Division superintendents are entitled to the same leave as other employees of the Government drawing the same salaries. Those receiving between \$1,600 and \$1,800 are entitled to 30 days accrued

leave and 28 days vacation leave. Those receiving \$1,800 a year and over are entitled to 35 days accrued leave and 28 days vacation leave. The 28 days vacation leave must be enjoyed during the calendar year, but at the end of three years' service may be added to the leave accrued, which, in the case of a division superintendent who has used none of his accrued leave and none of his vacation leave for the last year of service, would give from 118 to 133 days' leave on full pay, besides 60 days on half pay. Absences of teachers from duty are charged to their pay accounts, unless such absences are occasioned by illness, in which case the absences may be made up by service during vacation. All absences of division superintendents are charged to the vacation leave of 28 days, and when that period is consumed absences must be deducted from accrued leave.

Prior to the passage of Act No. 1040, teachers—as were all the other employees of the government—were entitled to draw full pay for a period of 60 days while absent on account of illness. So many abuses crept in under this privilege, and so great was the burden of extra duty imposed upon healthy teachers and other employees as the result of its operation, that the Commission was compelled to take away the privilege of drawing pay while sick. Employees other than teachers were compensated for the withdrawal of sick-leave privilege by the allowance of an annual vacation leave which could be consumed by reason of absence on account of illness or enjoyed by relief from duty, if the employee retained his health. The fact that this annual vacation leave was not extended to teachers worked them no injustice, inasmuch as the Christmas holidays and long vacation enjoyed by them covered a period of not less than 84 days—21 days more leave from duty than that allowed to the most favored of the other employees of the government.

FILIPINO TEACHERS.

The force of 900 American teachers with which the work of educating the Filipino began some three years ago was, of course, wholly insufficient to properly instruct the 100,000 or more children who were almost immediately enrolled in the schools. The resources of the government, however, did not permit the employment of many more American instructors, and it was evident from the very beginning that if the exigent demand for more help was to be met it would have to be supplied by the schools themselves. True, there were some two thousand and odd teachers in the schools on the termination of Spanish rule in the islands, but none of these teachers had any knowledge of English and many of them little knowledge of Spanish. Most of them had passed the stage when the acquisition of new methods was an easy matter, and as an entirety they were unfit to carry out a system of instruction which obliged not only the teaching of English, but teaching in English, and was otherwise radically different from that to which they were accustomed. The bureau of education, therefore, turned for assistance to the students themselves, and bent all its energies to the creation of a body of student teachers sufficient in number to give to all pupils in attendance the benefit of some instruction in the limited curriculum at first prescribed. The brightest young men and young women in each

The American teaching force has now its body of seasoned veterans, who have lost the deadly feeling of homesickness, who have become accustomed to life in the Tropics, who understand the customs of the people, and who have cultivated a real, true, and abiding interest in local hopes and aspirations. The recruit is no longer surrounded by an atmosphere of discontent and unhappiness, but in the strength of his fellows of longer experience he finds encouragement and esprit de corps, which quickly remove his unreasonable fears and reduce to proper proportions the difficulties and troubles which he is expected to meet and overcome. The dissatisfied and the discontented have taken their departure and left to the service a corps of healthy-minded men and women, who are not daunted by the difficulties of their task, and rather pride themselves on their ability to bring about a successful result where failure might have been expected.

On September 1, 1903, the teaching service was brought under civil-service rules, and those teachers who were in the employ of the government on that date were listed as civil-service employees with the right to draw the salaries then received by them without the necessity of passing a civil-service examination. Teachers so "blanketed" into the classified service, however, are not entitled to promotion or advance in salary until they have passed the examination required by regulations. Five hours per day and five days a week is the minimum of service required of teachers during the school year of forty weeks. Two weeks of vacation are allowed at Christmas, and ten weeks during the heated term in the months of April, May, and June.

Although the long vacation gave to teachers a yearly period of rest double that allowed to other employees, it could not be accumulated, and was not of sufficient duration to enable the teacher to visit the United States without incurring an expense entirely disproportionate to the benefits received. As it was manifest that teachers ought to be given an opportunity to visit the home land for the purpose of preserving their health and renewing their strength, Act No. 1040, which took effect January 1, 1904, gave the character of leave to the long vacation and permitted teachers to visit their homes in the United States once in every three years on full pay during that period and half pay for sixty days additional. FILIPINO TEACHERS.

The force of 900 American teachers with which the work of educating the Filipino began some three years ago was, of course, wholly insufficient to properly instruct the 100,000 or more children who were almost immediately enrolled in the schools. The resources of the government, however, did not permit the employment of many more American instructors, and it was evident from the very beginning that if the exigent demand for more help was to be met it would have to be supplied by the schools themselves. True, there were some two thousand and odd teachers in the schools on the termination of Spanish rule in the islands, but none of these teachers had any knowledge of English and many of them little knowledge of Spanish. Most of them had passed the stage when the acquisition of new methods was an easy matter, and as an entirety they were unfit to carry out a system of instruction which obliged not only the teaching of English, but teaching in English, and was otherwise radically different from that to which they were accustomed. The bureau of education, therefore, turned for assistance to the students themselves, and bent all its energies to the creation of a body of student teachers sufficient in number to give to all pupils in attendance the benefit of some instruction in the limited curriculum at first prescribed. The brightest young men and young women in each

The American teaching force has now its body of seasoned veterans, who have lost the deadly feeling of homesickness, who have become accustomed to life in the Tropics, who understand the customs of the people, and who have cultivated a real, true, and abiding interest in local hopes and aspirations. The recruit is no longer surrounded by an atmosphere of discontent and unhappiness, but in the strength of his fellows of longer experience he finds encouragement and esprit de corps, which quickly remove his unreasonable fears and reduce to proper proportions the difficulties and troubles which he is expected to meet and overcome. The dissatisfied and the discontented have taken their departure and left to the service a corps of healthy-minded men and women, who are not daunted by the difficulties of their task, and rather pride themselves on their ability to bring about a successful result where failure might have been expected.

On September 1, 1903, the teaching service was brought under civil-service rules, and those teachers who were in the employ of the government on that date were listed as civil-service employees with the right to draw the salaries then received by them without the necessity of passing a civil-service examination. Teachers so "blanketed" into the classified service, however, are not entitled to promotion or advance in salary until they have passed the examination required by regulations. Five hours per day and five days a week is the minimum of service required of teachers during the school year of forty weeks. Two weeks of vacation are allowed at Christmas, and ten weeks during the heated term in the months of April, May, and June.

Although the long vacation gave to teachers a yearly period of rest double that allowed to other employees, it could not be accumulated, and was not of sufficient duration to enable the teacher to visit the United States without incurring an expense entirely disproportionate to the benefits received. As it was manifest that teachers ought to be given an opportunity to visit the home land for the purpose of preserving their health and renewing their strength, Act No. 1040, which took effect January 1, 1904, gave the character of leave to the long vacation and permitted teachers to visit their homes in the United States once in every three years on full pay during that period and half pay for sixty days additional. Teachers returning to duty after the enjoyment of leave for three years' service are entitled at the end of two years' additional service to the repayment of the traveling expenses incurred by them for the trip from their homes in the United States to Manila. Teachers appointed under Act No. 80, who have rendered continuous, faithful, and satisfactory service for three years, still enjoy the privilege on resigning of receiving half pay for thirty days and their traveling expenses from Manila to San Francisco. Those appointed since the passage of Act No. 1040 are not entitled to receive half pay or traveling expenses on acceptance of resignation. At this point it may not be inappropriate to remark that American teachers in the Philippines receive, on the average, 90 per cent more pay and enjoy more vacation twice over than teachers in the United States or anywhere else in the world.

Division superintendents are entitled to the same leave as other employees of the Government drawing the same salaries. Those receiving between \$1,600 and \$1,800 are entitled to 30 days accrued

leave and 28 days vacation leave. Those receiving \$1,800 a year and over are entitled to 35 days accrued leave and 28 days vacation leave. The 28 days vacation leave must be enjoyed during the calendar year, but at the end of three years' service may be added to the leave accrued, which, in the case of a division superintendent who has used none of his accrued leave and none of his vacation leave for the last year of service, would give from 118 to 133 days' leave on full pay, besides 60 days on half pay. Absences of teachers from duty are charged to their pay accounts, unless such absences are occasioned by illness, in which case the absences may be made up by service during vacation. All absences of division superintendents are charged to the vacation leave of 28 days, and when that period is consumed absences must be deducted from accrued leave.

Prior to the passage of Act No. 1040, teachers—as were all the other employees of the government—were entitled to draw full pay for a period of 60 days while absent on account of illness. So many abuses crept in under this privilege, and so great was the burden of extra duty imposed upon healthy teachers and other employees as the result of its operation, that the Commission was compelled to take away the privilege of drawing pay while sick. Employees other than teachers were compensated for the withdrawal of sick-leave privilege by the allowance of an annual vacation leave which could be consumed by reason of absence on account of illness or enjoyed by relief from duty, if the employee retained his health. The fact that this annual vacation leave was not extended to teachers worked them no injustice, inasmuch as the Christmas holidays and long vacation enjoyed by them covered a period of not less than 84 days—21 days more leave from duty than that allowed to the most favored of the other employees of the government.

FILIPINO TEACHERS.

The force of 900 American teachers with which the work of educating the Filipino began some three years ago was, of course, wholly insufficient to properly instruct the 100,000 or more children who were almost immediately enrolled in the schools. The resources of the government, however, did not permit the employment of many more American instructors, and it was evident from the very beginning that if the exigent demand for more help was to be met it would have to be supplied by the schools themselves. FILIPINO TEACHERS.

The force of 900 American teachers with which the work of educating the Filipino began some three years ago was, of course, wholly insufficient to properly instruct the 100,000 or more children who were almost immediately enrolled in the schools. The resources of the government, however, did not permit the employment of many more American instructors, and it was evident from the very beginning that if the exigent demand for more help was to be met it would have to be supplied by the schools themselves. True, there were some two thousand and odd teachers in the schools on the termination of Spanish rule in the islands, but none of these teachers had any knowledge of English and many of them little knowledge of Spanish. Most of them had passed the stage when the acquisition of new methods was an easy matter, and as an entirety they were unfit to carry out a system of instruction which obliged not only the teaching of English, but teaching in English, and was otherwise radically different from that to which they were accustomed. The bureau of education, therefore, turned for assistance to the students themselves, and bent all its energies to the creation of a body of student teachers sufficient in number to give to all pupils in attendance the benefit of some instruction in the limited curriculum at first prescribed. The brightest young men and young women in each

school were called to the aid of the American teacher, organized into a special class, and given a course of extra instruction daily after school hours.

In a few months these special students had sufficiently advanced to aid the American principal in the teaching of less advanced pupils. Of course they received frequent assistance in their work from the skilled American, and in the beginning whatever teaching was done by them was under his immediate supervision and control. At first the shyness and timidity of the student assistant made his efforts at instruction halting and unsatisfactory, but as he gained more confidence in himself and acquired a larger English vocabulary he became more certain and direct in his methods, and the teaching assistance rendered by him was real and substantial.

The daily instruction of the native teacher is supplemented each year by from five to eight weeks in normal-institute training, which serves to perfect him in the knowledge of subjects taught and methods of teaching. After three years of this kind of training it has ceased to be necessary for the American teacher to supervise practically every movement and action of his assistant. The student teacher has become the municipal teacher, can be trusted to maintain discipline, and may be safely left to himself for a large portion of the time while engaged in the work of instruction.

English has now become the language of the primary school, and from the time the student enters the school he hears and speaks no other tongue.

On September 15, 1904, the corps of student teachers had furnished a force of native municipal teachers consisting of 2,138 men and 1,057 women. Had the attendance remained what it was in October of last year this number of teachers, added to the American force, would have been reasonably sufficient for the needs of the service, but the 200,000 students enrolled when the second annual report was rendered have increased to about 264,000, and the bureau of education is still obliged to depend on the aid of the student teacher or aspirante in order that the work of instruction may be carried on with satisfactory results. The following table, compiled on August 1 of this year, shows the number of Filipino teachers, male and female, employed in each province, the monthly and average salaries received, and the totals expended for salaries.

This table does not include the student teachers or aspirantes, who are rendering valuable teaching service without pay or for a nominal wage. The increased attendance, the expectation of its further increase, and the fact that no inconsiderable number of teachers find more remunerative employment in other branches of the service create a constantly increasing demand for aspirantes from whom the native teaching force may be recruited as attendance increases and the number of native teachers diminishes.

The whole teaching force was constituted on September 15, 1904, as follows: 772 American teachers, at an average salary of \$1,182.50; 284 insular native teachers, at an average salary of \$300; 3,195 municipal teachers, at an average salary of \$120; apprentice teachers serving without pay or for a nominal compensation; pupil monitors, without pay.

PRIMARY SCHOOLS.

The primary course covers a period of only three years, and it can well be imagined that the curriculum is confined to essentials and designed to give the student only such information as may be absolutely required to properly meet the exigencies of a workaday life should necessity oblige him to terminate his studies and begin an early struggle for existence.

Even if the conditions of life in the Philippines were not such as to require that the very young should contribute their labor to the support of the family, other considerations would force the shortening of the period of primary instruction and the limitation of the course of studies almost to the indispensable. It is estimated that the children of school age number not less than 1,200,000, the overwhelming majority of whom must receive instruction between the ages of 6 and 14 or not at all. The finances of the government will be strained to the breaking point to furnish at any one time supplies, school accommodations, and teachers for one-third of that number. If, then, two-thirds of the children of school age are not to be left wholly illiterate,

it is evident that the time for elementary instruction must be so reduced that all may receive some instruction before passing the age limit. Moreover, owing to the very limited number of American teachers, the burden of imparting primary instruction must fall on the native teacher, who has his limitations and can not be expected at this stage of the proceedings to properly cover a very wide range of educational subjects.

In view of all this the period of primary instruction has been fixed at three years, which will be devoted to the reading, writing, and speaking of English, and to the study of elementary arithmetic, the elements of geography, music, and drawing, character and physical training. Tool and gardening work for the boys and sewing and housekeeping for the girls are features of the primary course. The older boys, whose circumstances preclude the continuance of their studies beyond the primary course, will be given instruction in local government and Philippine history. It is not expected that the plan of primary instruction will equip students for a professional career or that it will fit them even for entrance to a high school course, but it is expected that the course of elementary instruction imparted, short and meager as it may be, according to American standards, will in the course of ten years practically eliminate illiteracy among the rising generation, and will give to those who can not afford to spend more than three years in school a knowledge of essentials, and a moral, physical, and mental training sufficient to equip them for the modest demands of a modest life.

INTERMEDIATE SCHOOLS.

For those students who have completed the primary course and who can afford to spend more time in school an intermediate course of instruction has been provided. This course, which covers a period of three years, is designed to complete elementary instruction, to fit the student to struggle advantageously with the practical problems of life, and to prepare him for entrance to the secondary schools should he find it possible to continue his studies for a longer period than six years. The first year of this course is devoted to the elements of grammar and composition, selected reading, the fundamentals of integers and fractions, world geography, with special attention to peoples and products of different countries, the study of familiar plants of the Philippines, agriculture for the boys, and housekeeping and plain sewing for the girls.

During the second year the study of language, grammar, and arithmetic is continued. An intermediate language book is introduced and readings from Philippine history commenced. Attention is given to decimals and the metric system, and the course in geography is completed by the study of volcanoes, earthquakes, monsoons, typhoons, coral formation, wet and dry seasons, the physical features of land and water, and by special instruction in the physiography and meteorology of the Philippines. Science studies are confined to lessons on animal life in Malaysia and to a course for boys in elementary agriculture, with special emphasis on the cultivation of economic Philippine plants. The girls are trained in housekeeping and special attention is given to the cooking and serving of meals.

In the third year of the intermediate course the study of arithmetic and the elements of grammar is completed. The reading of epic tales and stories from history is made a feature and special attention is given to commercial operations. Instruction will be given in physiology, anatomy, and hygiene, and some study will be made of epidemic and tropical diseases. Boys will receive training twice a week in carpentry and ironwork, and useful information in house-keeping and care of the sick will be given to the girls for the same period. Instruction in music and drawing, for which the native peoples have considerable aptitude, will receive attention throughout the course.

Finally, the classes will be organized into municipal councils, provincial boards, and legislative assemblies, and will make themselves acquainted with the municipal and provincial codes, the instructions of President McKinley, the acts of Congress affecting the archipelago, and the existing form of government in the islands. Auxiliary to this political instruction, papers will be read on the government of the United States, American politics, parliamentary law, and the government of colonies by European states.

The Filipinos are a sentimental, almost a poetical, but scarcely a practical people. They will freely sacrifice life itself for an abstraction, and at the same time turn aside from the prosaic work of commonplace preparation which would make the sacrifice unnecessary and give form and substance to the abstraction. Their temperament predisposes them to dwell too much on their expectations of the future and too little on the live, exigent problems of the present. Great emphasis is therefore laid on the severely practical by the bureau of education and but little attention is paid to classical studies. While this will be a distinct shock to many American educators, it is, after all, the only wise course to pursue if lack of initiative and a too pronounced tendency to idealize are to be corrected.

SECONDARY SCHOOLS.

Provision was made by Act No. 372 for the establishment of provincial high schools in the various provinces. The salaries of teachers, the expense of supplies, and to some extent that of equipment, are paid by the insular government, and will continue to be paid until such time as the provinces are in financial condition to assume the burden.

From the necessities of the case these schools have hitherto been engaged principally in the work of intermediate instruction. During the present school year, however, intermediate instruction will be remanded as speedily as possible to the central municipal schools, and the provincial high schools will be left to devote themselves exclusively to the purpose for which they were organized. They are the centers of the provincial educational system, and as time passes they will perform all the functions not only of high schools, but also of training schools and colleges for the provinces. Thirty-eight provincial high schools are now completely organized in 35 of the provinces. These schools are supplied with American instructors in the proportion of about 1 teacher for every 50 pupils. It has already been remarked that the policy of the bureau of education

was to confine the primary and intermediate courses of study to the bare essentials of elementary education. The secondary course of instruction is more ambitious and aims to fit the student for entrance to standard American colleges or the undergraduate university courses and to give him at the same time sufficient training to follow with advantage to himself some useful calling or vocation adapted to the economic conditions of his province should he choose to discontinue his studies. The secondary course covers a period of four years, and includes a course in literature, history, and the sciences, a course in teaching, a course in commerce, a course in geography, and a course in the arts and crafts. On matriculating in the provincial school each student must elect the course which he will pursue, and once selected he will not be at liberty to change it except by special permission of the division superintendent. The course in literature, history, and the sciences covers a period of four years, which will be devoted to the study of English literature, history, the elements of algebra and geometry, and an optional course in Latin, Spanish, or French. The course in teaching covers a period of only two years, during which, in addition to instruction in literature, history, and the sciences, instruction will be imparted in the theory and practice of teaching. The course of commerce covers a period of four years, and in addition to the instruction in literature, history, and the sciences, includes the study of bookkeeping, mercantile arithmetic, commercial geography, Spanish, French, or some other modern language, and commercial law. In the second year of the course of commerce the pupil may elect to take up the study of stenography or telegraphy. The course in agriculture will embrace three years of literature, history, and the arts and sciences, with special attention to botany, anatomy and physiology of animals, physiography, and meteorology, and four years of theoretical and practical agriculture. Two years will be devoted to the course in arts and crafts, and, in addition to practical wood and metal working, instruction will be given in English, mathematics, and mechanical drawing. The Philippine Normal School and the Philippine School of Arts and Trades furnish to those taking the teaching course and the course in arts and crafts an opportunity for further and more advanced study.

PHILIPPINE NORMAL SCHOOL.

The Philippine Normal School is located in the city of Manila, and occupies an assembly hall, 14 class rooms, and 2 laboratories in the exposition grounds. During the last school year a dormitory for girls residing in the provinces was established at 168 Calle Nueva, Ermita. At the beginning of the present school year the demands for accommodations in the dormitory had so increased that an additional building had to be rented in order to furnish quarters for the full number of young women desiring to pursue their studies at the normal school. Both these buildings will be vacated about the 1st of November, 1904, and the occupants transferred to a new building especially erected for the use of the dormitory.

The normal school was organized under the provisions of Act No. 74 for the purpose of furnishing trained and skilled native teachers to the insular public schools. Five hundred and twenty-seven students are now enrolled, 360 of whom are boys and 167 girls, with an

average attendance of 451, 304 of whom are boys and 147 girls. The course of study at the normal school covers a period of four years and embraces the following subjects: English, arithmetic, geography, drawing, music, United States history, Philippine history, nature study, physiology and hygiene, algebra, general history, botany, physics, and professional training as a teacher.

THE PHILIPPINE SCHOOL OF ARTS AND TRADES.

The Philippine School of Arts and Trades was organized in 1901, and began its work of instruction under adverse circumstances. It started practically without any adequate equipment for industrial work, and was handicapped at the very beginning by what might be called a caste prejudice to manual labor. Students had to be coaxed to enter the school, and once they had entered considerable difficulty was experienced in retaining them. With the furnishing of a sufficient number of trade teachers and the supplying of an adequate equipment for practical instruction in trade work new life was given to the school, and instead of offering inducements to students to enter the superintendent has been compelled to refuse admission to 75 applicants on account of lack of space. The school is located in one of the old Spanish buildings situated on the exposition grounds, and has accommodations reasonably sufficient for 150 pupils. By conducting day and night classes, however, instruction is given to 270 pupils. The course of study covers a period of four years, and includes instruction in elementary English, geography, history, arithmetic, simple bookkeeping, algebra, complete plane geometry, and, at the option of the student, a course in architecture, blacksmithing, carpentry and cabinetmaking, mechanics, plumbing, steam engineering, stenography and typewriting, or telegraphy. The following table will show the relative preferences of the students in September, 1903, and September, 1904, for some of the branches taught in the school:

Day classes.

	September,		Increase.	Decrease.
	1903.	1904.		
English branches	110	150	40
Drawing	67	120	53
Metal work	11	44	33
Wood work	51	70	19
Telegraphy	37	30	7

In addition to the students in attendance on the day classes there are 120 students in attendance on the night classes, whose preferences for the several branches taught may be shown by the following returns for the month of September, 1904:

English branches	32
Drawing	30
Metal working	17
Telegraphy	41
Total for evening classes	120

In September, owing to the illness of the teacher in charge, there was no wood-working class. That widespread interest is taken in this school is shown by the number of provinces which furnish pupils to it. The distribution of pupils by provinces is as follows:

Albany -----	4	Leyte -----	1
Ambosé Camarines -----	1	Manila -----	72
Bataan -----	1	Nueva Ecija -----	1
Batangas -----	3	Pampanga -----	4
Bulacan -----	12	Pangasinan -----	4
Cagayan -----	1	Rizal -----	10
Cavite -----	2	Samar -----	1
Ilocos Norte -----	6	Sorsogon -----	1
Ilocos Sur -----	3	Tayabas -----	6
Isabela -----	1	Zambales -----	6
La Laguna -----	5		
La Union -----	5	Total -----	150

The average attendance of this school during the school year 1903-4 was 92 per cent. In June, 1904, it was 93 per cent; July, 1904, 93.2 per cent; August, 1904, 95.5 per cent; and in September, 1904, 96.1 per cent.

All students are required to take English and mathematics. Those students who elect the course in wood or iron working are obliged to take architectural and mechanical drawing. Excepting 6 students, who have elected to take a course in drawing and the mechanical branches, all students are obliged to take the machine-shop practice.

The school has furnished 1 telegrapher to the Manila Observatory and 6 sergeants, 9 corporals, 10 first-class privates, and 13 second-class privates to the Philippine Constabulary for service as telegraphers. It has also furnished 3 teachers of drawing to the Manila schools, 1 assistant teacher of drawing to the trade school, 1 draftsman to the coast and geodetic survey, and 1 draftsman to an architect engaged in private business in Manila.

Three lathes, 2 of which are engine lathes, 1 shaper, 1 milling machine, 1 upright drill, 1 sensitive drill, 1 cutter and reamer grinder, 1 twist-drill grinder, 1 wet-tool grinder, and a good assortment of hand tools for those taking the course in mechanics have been added to the iron-working equipment. One surface planing machine, 1 circular sawing machine, 1 band sawing machine, 1 pattern-maker's lathe, 6 wood-turning lathes, with necessary chisels and gouges, 1 power grindstone, and an assortment of bench tools and wood-carving tools, sufficient for a class of 24, have been added to the equipment of the wood-working department. Power for the various machines is furnished by two kerosene engines, respectively, of 6 and 8 horsepower.

The city of Manila has recently appropriated the sum of 50,000 pesos, or \$25,000 United States currency, for the erection of a building for the use of the Trade School. The building will be located in the Santa Cruz district, near the center of the Filipino population and on the line of the new electric railway. The site has an area of 7,787.50 square meters and will give ample room for future development and growth.

THE PHILIPPINE NAUTICAL SCHOOL.

The Philippine Nautical School was established in 1839 by the board of commerce, and, as its name implies, its purpose is to give

theoretical and practical instruction in navigation. The original home of the institution was destroyed by the earthquake of 1863, and since that time the school has suffered three changes of location. Its present location is at No. 97 Calle Santa Elena, district of Binondo, in the city of Manila. With the change of sovereignty the school passed to American hands, and Lieutenant-Commander Coltman, Lieutenant Cooper, Lieutenant Townley, and Lieutenant-Commander Knapp, of the United States Navy, were successively placed in charge. Under the administration of Lieutenant-Commander Knapp English textbooks and American methods of instruction were introduced, and the school reached a very high degree of excellence. When Commander Knapp was relieved from duty in the Orient by the Navy Department, Lieutenant-Commander Glennon was detailed for duty as superintendent of the school and rendered excellent service until November 1, 1902, when he was relieved from duty. Since his relief the bureau of education has been unable to secure the services of a naval officer as superintendent. From 1903 until the end of the last school year the assistant superintendent was in charge of the school and carried on the work of theoretical instruction along the lines prescribed by his predecessors. At the beginning of the present school year Mr. C. L. Jenkins was placed in charge of the school.

The school is well equipped with nautical instruments, and has a good telescope, tellurians, celestial and terrestrial globes, maps, charts, and other supplies. It is poorly housed, however, and as soon as insular finances permit a vessel of sufficient size should be secured as a home for the school and for the purpose of giving the students practical instruction in seamanship. The course prescribed is four years, and is as follows:

First year: Arithmetic, algebra, plane geometry, geography, English, and seamanship.

Second year: Algebra, plane and solid geometry, plane trigonometry, physics, geography, drawing, English, and seamanship.

Third year: Spherical trigonometry, physics, electricity and magnetism, physiology and hygiene, astronomy, navigation and nautical astronomy, seamanship, and English.

Fourth year: Chemistry, Philippine and United States history, navigation and nautical astronomy, English, and seamanship.

To secure the proper physical development of the pupils, setting-up exercises, infantry and seamanship drills, fencing and singlestick are prescribed, and boxing, football, and baseball encouraged. The students display great proficiency in mathematics, and evince a very commendable interest in their chosen specialty. The school enrollment is 121 and the average attendance 115, or 95 per cent of the enrollment.

SCHOOLS IN THE MORO PROVINCE.

Public instruction in the Moro Province presented problems so radically and essentially different from those of other parts of the archipelago that the province was left almost educationally independent by the act providing for its organization and government. The act provides for the appointment of a superintendent of schools and confers upon him, not only all the powers of a division superintendent, but also many of those exercised by the general superintendent under the

plan of organization prescribed for other provinces. It is the duty of the superintendent of the Moro Province to establish schools in the various municipalities, rancherias, and townships of the province whenever practicable; to define school districts and provide for them principal teachers; to appoint native teachers; to fix the salaries of American and native teachers; to prescribe a curriculum for primary, industrial, and secondary schools; to select school sites and supervise the construction of school buildings thereon, and to exercise general supervision over school work in the province. He is only dependent on the bureau of education to the extent that American teachers must be appointed by the general superintendent, and that he must make a report of his administration to the last-named official in January and July of each year. In a word, the superintendent of schools for the Moro Province was given a free hand, and such a course was necessary in view of the social conditions in his jurisdiction and the character of the people with whom he had to deal. The population is made up of Christians, Mohammedans, and pagans, and none of them is particularly predisposed in favor of the public schools. The parochial school, under the able and beneficent management of the Jesuit order, attracts and holds the Christian; the Moro regards the public school with suspicion and hesitates whether to accept or reject it; the pagan is satisfied with the geography of his haunts and his own crude methods of addition, subtraction, and division. What schools should be established, how they should be conducted, and what class of information should be imparted by them has therefore been left to the judgment of the local authority best fitted to solve the problems presented by local conditions. Notwithstanding the difficulties of the situation, 52 schools are now in operation in the Moro Province, 10 of which were established during the last school year. Fifteen American and 54 native teachers are now on duty in the various schools and are making just such progress as might be expected under all the circumstances. Nine of the native teachers are Mohammedans. Within the past few months a secondary school has been established at Zamboanga. For some time to come the principal aim of this school will be the creation of a sufficient number of native teachers to supply the requirements of the province. The total enrollment of the 52 schools is 2,114, of which number 1,289 are boys and 825 are girls. One thousand seven hundred and sixty-four of the students enrolled are Christians, 240 are Mohammedans, and 110 pagan Bagobos. The whole cost of public instruction is borne by the province. For the nine months ending July 1, 1904, the legislative council appropriated ₱85,230.85 for educational purposes. Of this sum only ₱46,898.17 was expended, leaving a balance of ₱38,341.68 unexpended.

PAGAN SCHOOLS.

The lack of interest shown in schools by the pagan tribes of the Moro Province does not exist among the pagan tribes of Luzon. The schools established for Igorrotes at Cervantes and Alilem, in Lepanto-Bontoc, and at Baguio, Benguet, it is true, have met with only a fair degree of success, but that better results were not obtained is rather due to want of teachers and school accommodations than to want of interest among the Igorrotes.

The schools established among the pagan Tinguianes of Abra promise to be as successful as any of those established among Christian Filipinos. The Tinguianes are a gentle, kindly disposed, and industrious people. They dislike the Christian Ilocanos, who are their neighbors, but seldom, if ever, manifest their aversion by violence. They own large numbers of cattle and horses, and many of them are better off in worldly goods than the Ilocanos, who are disposed to regard them as their inferiors. Noting the establishment of schools in the bordering province of Ilocos Sur, they desired that similar advantages should be extended to them. Their petitions were disregarded at first, and they then had recourse to Mr. Commissioner Worcester, who had always taken a kindly interest in their affairs. Through his influence and representations, the bureau of education was induced to send American teachers to some of the Tinguian villages, and the results achieved have fully justified the experiment. There are at present 16 insular and 25 municipal teachers employed among the Tinguianes, and in September of this year the number of students enrolled was about 2,500. Some of the rancherias to which it was impossible to assign insular teachers have engaged native teachers on their own account and pay salaries in rice and chickens.

STUDENTS SENT TO THE UNITED STATES.

There are now in the United States 100 students who are receiving an education in various schools and colleges at the expense of the insular government. For special and detailed information as to these students, the course of studies which they are pursuing, and the progress made by them reference is made to the report of Mr. William Alexander Sutherland, who is in charge of such students, which report is annexed hereto, marked "Exhibit B," and made a part hereof.

For the fiscal year 1905 the Commission, by resolution dated February 26, 1904, authorized the sending of 40 additional Filipino students to the United States for a four years' course of instruction at the expense of the insular government. In accordance with the provisions of Act No. 854, an examination of candidates for appointment was duly held in the month of April. At this examination only 10 succeeded in passing. The 10 so passing received their appointments in accordance with law, and were sent to the United States in charge of Mr. and Mrs. Swindell in the month of August. A second examination of candidates was held in September, and 24 of the candidates received the required percentage and will be sent to the United States as soon as they report at Manila and pass the necessary medical examination.

The table following shows the number of primary, intermediate, provincial, and technical schools, the number of schoolhouses, the number of American, insular, native, and municipal teachers in each province, and the population, school population, school enrollment, and school attendance of each province.

Division.	Number of schools.				Number of teachers.				Popula- tion.	School popula- tion.	Enroll- ment.	Attend- ance.

^a Enrollment and attendance are of August 1, 1904.

^b Includes recently built barrio schools.

^c Small attendance due to recent military operations.

SCHOOL BUILDINGS.

The question of furnishing proper and permanent accommodations for school children continues to demand the serious attention of the bureau of education. During the Spanish régime little if any consideration was given to public instruction in the barrios removed from the municipal center, and as a consequence the erection of barrio school buildings was never attempted. The construction of school buildings was almost wholly confined to the municipal centers, and of those not much more than half were provided with school accommodations owned by the municipality. At the time of American occupation 374 of the 734 municipalities were provided with school buildings. These buildings, 534 in number, were located on the plazas of the various municipalities, and were built in most cases of wood and stone. Many of the municipalities were provided with two school buildings, one for boys and one for girls. The structures were not of modern type, and besides being poorly lighted were seldom of a size sufficient to accommodate a fraction of the school population residing in the immediate vicinity, to say nothing of the school children who lived in the barrios. Many of these schoolhouses were damaged during the course of the war, some of them destroyed, and others rendered unfit for use by decay. Nearly all of the damaged buildings have been repaired, and substantially all those destroyed or decayed have been restored sufficiently to permit of their use by the bureau of education.

Between the date of change of sovereignty and December, 1903, 369 new school buildings were built, 40 of which were of "strong materials." Between January and July of this year 395 additional schoolhouses were in course of construction or had been actually completed, most of them having hard-wood frames, nipa or grass roofs, and bamboo walls and floors. This class of construction was adopted because it was within the capacity of ordinary native labor, comparatively inexpensive, and allowed the gradual substitution of permanent roofs, floors, and walls as financial conditions permitted. About 205 additional school buildings have been contracted for, but work upon them has not been commenced as yet. To aid in the building of school structures, rice purchased out of the Congressional relief fund was issued to the provinces of Capiz, Ilocos Norte, Batangas, Rizal, Laguna, Cebu, and Zambales. With the rice so issued Ilocos Norte has completed or has under contract 77 barrio schools; Batangas, 70 barrio schools, and Cebu, 40 municipal and barrio schools. The walls of the recently constructed Cebu school buildings are of lime plaster laid on a framework of bamboo, and in so much they differ from the plan of construction adopted in other provinces.

The following statement will show the number of schoolhouses owned by municipalities and actually completed or in course of construction:

Serviceable schoolhouses of Spanish construction.....	534
Built under American rule prior to December 31, 1903	369
Already built or in course of construction since January 1, 1904.....	395
Total.....	1,298

The buildings erected since American occupation and those which are in the course of erection are located principally in the barrios where it was practically impossible to secure school accommodations in any other way. In municipal centers the schools are usually housed in rented buildings, or in private residences loaned for the purpose. A few convents are occupied by schools, but in no case is such occupancy permitted against the objections of the church authorities, and positive instructions have been given to vacate any such buildings whenever objection is made to their further use by the bureau of education.

Busy as have been the municipalities with the work of school construction during the past year, their activity has not excelled that of the provinces of which they are constituent parts. Most of the provincial schools are located at present in rented buildings or in provincial or municipal buildings loaned for the purpose. Since the first of the year a steady effort has been made by provincial boards to secure adequate sites for their high schools and to gather together sufficient funds to construct thereon the necessary buildings. Sites from 6 to 8 acres in area have been secured by Albay, Batangas, Ilocos Sur, Occidental Negros, Oriental Negros, Romblon, and Sorsogon, and the sum of P163,021.23 is now available for the erection of suitable buildings, distributed as follows:

Albay	P35,000.00
Batangas	50,000.00
Ilocos Sur	20,000.00
Occidental Negros	20,000.00
Oriental Negros	20,000.00
Romblon	8,000.00
Sorsogon	10,021.23

Bataan, Bohol, Bulacan, Camarines, Leyte, Masbate, Nueva Ecija, Nueva Vizcaya, Pampanga, Pangasinan, Surigao, Tayabas, Union, and Zambales have secured the offer of sites, but have not as yet made a selection. These provinces have not sufficient money on hand to begin the work of building, but if the Commission sets apart \$200,000 of the Congressional relief fund for school construction, as has been proposed, these provinces and others without proper provincial high school accommodations will be enabled to obtain them, in all probability, before the end of the next school year.

Cagayan, Capiz, Cavite, Ilocos Norte, Mindoró, and Tarlac are already provided with high school buildings, which are either owned by the province or the municipality in which the school is located.

Antique, Cebu, Paragua, Rizal, Samar, Iloilo, and Isabela have neither sites nor money sufficient to erect high school structures, and it is expected that for some time to come they will be compelled to rent accommodations. Should the grant of \$200,000 from the Congressional relief fund be made, however, it is possible that their proportion of it will enable them to secure their own school quarters.

The Moro Province and Manila are in sound financial condition, and steps have already been taken for the erection of modern secondary schools.

COST OF PUBLIC INSTRUCTION.

The cost of public instruction to the insular government from July 1, 1901, to July 1, 1904, was as follows:

Fiscal year 1901-----	\$233, 411
Fiscal year 1902-----	1, 194, 381
Fiscal year 1903-----	1, 400, 563
Fiscal year 1904-----	1, 244, 096
Total -----	4, 072, 451

The maximum amount expended was in the year 1903 and the minimum amount in 1901. The small amount expended in 1901 was due to the fact that the number of American teachers on duty in that year was not large. During the last school year the cost of public instruction was \$155,467 less than that incurred during the year which immediately preceded it. This reduction in expense was due wholly to the fact that the bureau of education managed to struggle along with a less number of American teachers. In 1902 the outlay for schools represented 15.6 per cent of the total expenditures. In 1903 it was 13.2 per cent and in 1904 11.1 per cent.

The total amount expended by municipalities for schools is ₱1,004,448.12, or \$502,224.06 gold, which, added to the insular expense of \$1,244,096 gold, gives a total expense of \$1,746,320.06 gold for public instruction during the last fiscal year.

Of the total amount paid out for schools since 1901 nearly \$3,200,000 has been expended for salaries and a little less than \$900,000 for supplies. About two-thirds of the municipal school funds are required to pay native teachers' salaries, and the balance is expended on buildings and necessary school furniture.

Taking 7,000,000 as the Christian population of the islands, the total insular and municipal expense for schools for the last three years has not averaged more than 25 cents gold per capita per year. On the basis of an average enrollment of 215,000 during the year 1904, the cost per student was about \$8.12 gold. If the present enrollment of about 264,000 continues until the end of the year and the entire appropriation is expended, the cost per student will be about \$6.60 gold, and should the enrollment reach 300,000, as it now bids fair to do, the cost per student will be correspondingly diminished.

Cuba, in the fiscal year 1902, with a total population of about 1,600,000, a school enrollment of 160,000, and a force of nearly 3,500 teachers, expended, exclusive of repair and construction of school-houses, \$2,644,556.77 for public instruction, or \$1.66 per capita of population, or \$16.65 per student.

Porto Rico, with a population of 950,000, a school enrollment of 70,216, and a teaching force of 1,220, expended in the fiscal year 1903 \$801,912, or a little over 84 cents per capita of population, and about \$11.42 per student. Whether the expenses for Porto Rico include construction of school buildings and repairs can not be stated.

Japan, with a population of 50,000,000, about seven times that of the Philippines, expended in 1901 \$21,292,097 in schools, or about 40 cents per capita.

In the United States the cost of public instruction varies from about 80 cents per capita of population to about \$6 per capita, the average in the Northern States being about \$3.50 per each inhabitant.

California, with less than 1,500,000 inhabitants, expends \$9,133,136 on public instruction, or more than \$6 per capita. The city of San Francisco, with less than 350,000 inhabitants, expends \$1,382,956 on education, or about \$4 per capita.

These statistics are not cited for the purpose of showing that the government should expend more money on schools. The government is now expending for education all the money which its revenues will permit. They are cited, however, for the purpose of demonstrating to the Filipino people that if they expect to reach the same plane of educational progress as other peoples more money must be forthcoming, and that a total government income which does not much more than equal that spent by California on schools will hardly suffice to gratify immediately all their desires for material and intellectual advancement.

To educate the 1,200,000 young men and young women of the Philippines properly at least \$5,000,000 gold will be required to pay salaries alone every year, and that without adding one American teacher or increasing the supervising force by a single man. The following is a reasonable estimate of the cost of furnishing instruction to 1,200,000 Filipino children and of furnishing them with the necessary school material, viz:

General superintendent and office force	\$41,486.66
31 division superintendents	61,200.00
29 clerks to division superintendents	21,060.00
861 supervising, technical, and normal school-teachers (American)	824,171.34
294 native insular teachers	94,800.00
12,000 native municipal teachers, at \$240 per year	2,880,000.00
Supplies, at \$1 (gold) per student	1,200,000.00
Incidentals	25,000.00
Total	5,147,718.00

The appropriation for the fiscal year 1905 is as follows:

Salary of general superintendent and office force	\$41,486.66
Salary of 31 division superintendents	61,200.00
Salary of 29 clerks to division superintendents	21,060.00
Salary of 861 American teachers	824,171.34
Salary of 300 night school-teachers	52,650.00
Salary of 294 insular native teachers	94,800.00
Salary of 32 native teachers for Abra	2,592.00
Other employees	2,040.00
Transportation	12,300.00
School supplies	85,200.00
Contingent expenses	11,325.00
Total	1,208,725.00

In addition to this sum at least \$502,224.06 gold will be appropriated by the various municipalities for the payment of native teachers, the purchase of furniture, and the renting and repairing of school-houses.

For further and specific information as to the work of the bureau of education and the results accomplished by the various schools established in the archipelago, reference is made to the very complete report of the general superintendent of education, which is hereto annexed, marked "Exhibit A," and made a part hereof.

* Or ₱2,417,450 Philippine currency.

BUREAU OF ARCHITECTURE AND CONSTRUCTION OF PUBLIC BUILDINGS.

The office personnel of the bureau of architecture and construction of public buildings for the year beginning July 1, 1903, and ending June 30, 1904, was 1 chief of bureau; 1 master builder; 1 superintendent of construction, class 6; 1 electrical engineer, class 6; 1 disbursing officer, class 6; 1 clerk, class 7; 1 draftsman, class 7; 2 draftsmen, class 8; 1 mechanical engineer, class 8; 2 clerks, class 8; 1 clerk, class 9; 2 stenographers, class 9; 1 storekeeper, class 9; 2 junior draftsmen, class F; 2 junior draftsmen, class G; 1 clerk, class I; 1 employee, at \$210, and 1 employee, at \$150.

During the year the bureau constructed a new crematory for the board of health; renovated the Cuartel Fortin and prepared it for use by the bureau of posts; completed the new stable, wagon sheds, and men's quarters for the insular purchasing agent; constructed a coal shed for the insular purchasing agent at Romblon; finished the municipal building for the city of Manila; installed a telephone system for the bureau of customs and immigration; remodeled the old customs building; repaired and refitted the immigrant quarantine station on Engineer Island; erected a 2-story building for use of the customs-house at Balabac, Balabac Island; added kitchen extensions to the cottages at Baguio; constructed servants' quarters and a new office building at the same place; installed sanitary toilet rooms and lavatories in the ayuntamiento; cloth-lined and repainted the halls of the second floor and the offices of the commissioners in the same building; built a stable 30 by 102 feet for the bureau of agriculture at Singalong; erected a cottage for the superintendent of the government rice farm at Murcia, and constructed nipa buildings to shelter farm implements and horses used on the farm; rebuilt the old stone quadrangle on Engineer Island as a storehouse for the bureau of coast guard and transportation; erected a machine shop 80 by 160 feet and a warehouse 80 by 92 feet for the same bureau, and extended to two tanks on the island, each of 10,000 gallons capacity, the water supply of the city of Manila.

The badly decayed floor at Malacañan Palace has been removed and a new floor constructed, well raised above the ground for ventilation, the space below being filled in sufficiently to give drainage for surface water. Malacañan Palace has been repainted and rewired for electric incandescent lighting.

A vault, having 480 square feet of floor space and provided with a time lock, Bessemer steel lining on floors, walls, and ceilings, and surrounded with a grillage of steel beams and concrete, has been constructed for the insular treasury bureau, and the cash room of the same bureau enlarged and cashier's and teller's windows of modern design installed.

Additional stable room, sufficient to accommodate 18 horses, has been provided for the insular cold-storage and ice plant. A 2-story shed for the storage of ammonia and the furnishing of space for small workshops for the ice plant, with a corridor connecting with the main building, has been built on the river front.

The southerly entrance to the Intendencia Building and the patio corridor adjoining the offices of the United States Coast and Geodetic Survey have been floored over and inclosed to give additional

office space to that bureau. A workshop, 60 by 600 feet, with a steel corridor connecting with the main building, is now in course of construction at Bilibid Prison.

The Oriente Building has been completely remodeled for offices, and the bodega has been fitted up for the constabulary for use as a supply warehouse. The Oriente Building proper is now occupied by the following bureaus: Constabulary, internal revenue, forestry, agriculture, ethnological survey, civil-service board, Official Gazette, American Circulating Library, Philippine museum, and the court of customs appeals.

The building for the bureau of government laboratories has been practically completed and the machinery equipment installed. The smokestack, however, has not yet been put in place, and the machinery will not be ready for operation before the 1st of next December. The building was turned over to the bureau of government laboratories for occupancy in the month of September.

The contract for the construction of the foundations of this building was let in December, 1902, and the contractor completed the work on May 20, 1903. Bids for the construction of the building on the foundations were received on November 12 and December 12, 1902, as follows:

California Lumber Company:	
First bid.....	\$88,560
Second bid.....	83,500
M. Gotauco:	
First bid.....	98,500
Second bid.....	78,500
Smith & Jones:	
First bid.....	108,740
Second bid.....	96,000
D. W. Cadwallader & Co.:	
First bid.....	122,000
Second bid.....	86,000

These bids were rejected in view of the fact that the architect estimated that the building should not cost more than \$62,347, exclusive of material worth \$33,450 to be furnished by the government to the contractors. The architect has been directed to furnish this office a statement in detail of the entire cost of the building. Such statement has not as yet been furnished by the architect, and can not, therefore, be included in this report. The architect, however, has stated that the cost of the superstructure will not greatly exceed the amount of his estimate, excluding additions to the building authorized after the estimates were furnished, the cost of cesspool and septic tank, extra wages paid to laborers after July 1, 1903, due to paying the same in Philippine instead of Mexican currency, insurance, and customs duties which were imposed by the Commission subsequent to the making of the estimate.

Progress on the building was slow, due in a measure to the want of skilled labor and to the delay in the delivery of building material ordered from the United States, some of the material not being received until ten months after the order was placed.

The following comparative statement of materials used during the

fiscal year 1903 and the fiscal year 1904 will give some idea of the increase d amount of work performed by the bureau.

Description of item.	1903.	1904.
Property invoiced to the bureau by the insular purchasing agent on vouchers	382	829
Representing the value of Philippine currency	\$168,500.86	\$374,530.26
Cement expended on the various jobs	barrels. 3,189	4,629
Window glass	panes. 2,164	7,506
Corrugated iron	sheets. 1,302	4,615
Flat galvanized iron	do. 667	4,372
Locks of various descriptions and sizes	do. 445	690
Oregon pine and California redwood	feet B. M. 635,940	1,079,438
Nails	pounds. 18,172.5	48,660
Paint	gallons. 748	1,007.5
Cast-iron pipe	pounds. 14,341	23,321
Galvanized-iron pipe	linear feet. 4,365	6,890
Wood screws	do. 4,265	32,949
Solder	dozen. 1,577	2,644
Turpentine	pounds. 878	1,908.5
Varnish	gallons. 62	500.75
	do. 65	245

There was actually expended on public works during the fiscal year 1903-4 ₱630,065.56, and incurred but unpaid on the same account ₱138,387.83. The sums appropriated, expended, or incurred on account of public works and construction and repair of public buildings are shown in detail by the following table, the amounts of which are expressed in Philippine currency:

Public works.

Building.	Appropriated.	Disbursed.	Outstanding.	Balance.
Audiencia	₱4,000.00	₱1,767.73		₱2,232.27
Ayuntamiento	23,700.00	16,811.57	₱360.00	6,528.43
Board of health, San Lazaro:				
Wm'n department	4,400.00	596.60		3,803.40
Electric wiring	1,700.00	922.06		777.94
Leper department	500.00			500.00
Roads, etc.	3,000.00	588.60		2,411.40
Bureau of agriculture:				
Piping, etc.	2,200.00	1,848.00		352.00
Storage building, etc.	4,000.00	3,921.24		78.76
General repairs	400.00			400.00
College, Occidental Negros	50,000.00			50,000.00
Bureau of education, exposition buildings	4,000.00	107.45		4,492.55
Bureau of government laboratories:				
Serum institute	8,000.00	5,286.60		2,713.40
Calle Iris	2,300.00	1,686.50		613.50
Calle Alix	2,000.00	1,264.41		735.59
New laboratory building	82,892.00	71,137.99	1,300.00	10,454.01
New laboratory equipment	100,000.00	46,254.74		53,745.26
New laboratory fixtures	22,000.00	1,596.64	2,016.80	18,416.56
New laboratory filig.	1,300.00	1,300.00		
Serum laboratory	2,000.00	934.21		1,065.79
Bureau of insular cold storage and ice plant, painting, etc.	4,900.00	3,171.76		1,728.24
Bureau of insular treasury, vault, etc.	36,628.00	29,667.80	3,600.00	3,360.20
Bureau of public printing, roof, etc.	8,600.00	1,016.50		7,583.50
Civil Hospital	8,000.00	5,146.70		2,853.30
Santa Potenciana	7,400.00	2,708.16		4,691.84
Building supplies	140,000.00	104,433.61		35,566.39
Board of health, San Lazaro:				
Stable	1,300.00			1,300.00
Sep. tanks	12,000.00	5,711.97	2,985.00	3,303.03
Wards, etc.	50,000.00			50,000.00
Cholera hospital	56,000.00	53,514.78		2,485.22
Plumbing	3,000.00			3,000.00
Crematory	3,000.00	2,374.35		625.65
Ventilators	1,530.00	794.50		735.50
Coast guard and transportation:				
Warehouse	68,000.00	1,883.04	63,984.00	2,132.96
Repairs	1,000.00			1,000.00
Watchman's building	600.00			600.00
Machine shop	15,700.00	15,279.48		420.52
Water and electric mns	10,000.00	5,059.59	200.00	4,740.41
Office	400.00	48.53		351.47

Public works—Continued.

Building.	Appropriated.	Disbursed.	Outstanding.	Balance.
Bureau of customs:				
Iron fence	P23,000.00			P23,000.00
Sidewalks	8,000.00	P3,597.39		2,402.61
Signal mast	3,000.00			3,000.00
Painting	3,000.00	2,982.90		7.10
Main building	14,024.00	11,421.36		2,602.64
Standpipes	3,000.00			3,000.00
Electric lights, etc.	12,100.00	7,286.73	P1,587.48	3,226.79
General alterations and repairs	12,000.00	10,855.22		1,144.78
Bureau of insular cold storage and ice plant:				
Storage shed	10,000.00	7,159.21		2,840.79
Stables	6,000.00	2,755.55		3,244.45
Insular purchasing agent:				
Stables, etc.	116,700.00	74,813.24	38,519.55	3,867.21
Coal sheds	28,000.00			28,000.00
Bureau of prison:				
Workshop	38,000.00	8,210.51	22,400.00	7,389.49
Warehouse, etc.	17,600.00	9,531.06		8,068.94
Bureau of public printing, warehouse, etc.	77,000.00			77,000.00
Bureau of architecture:				
Roof	3,600.00	2,275.95		1,324.05
Shelving, etc.	600.00	144.88		455.12
Buildings at Baguio	35,112.00	18,010.39		17,101.61

Oriente building	60,233.00	60,016.02		216.98
General alterations and repairs	22,000.00	18,185.41		3,814.59
Customs-house at Balabac	2,000.00	1,340.19		659.81
Insular purchasing agent:				
Sidewalks	700.00			700.00
Filling	1,700.00		1,445.00	255.00
Cuartel Fortin:				
Post-office	20,244.00	3,026.21		17,217.79
Supply store	13,000.00	1,597.06		11,402.94
Electric connections	400.00			400.00
Total	1,287,123.00	630,065.56	138,387.83	518,669.61

Of the amount actually expended P218,243.55 was paid for work performed by contract, P186,873.11 for work done by the bureau, and P224,948.90 for supplies furnished by the insular purchasing agent. The total amount actually expended by the bureau for all purposes was P691,439.20, to which must be added obligations incurred but not paid, amounting to P138,387.83. The following table will show in detail the total expenses of the bureau for all purposes:

	Appropriated.	Disbursed.	Outstanding.	General fund.	Balance.
Salaries and wages	P55,000.00	P54,612.17		P387.83	
Contingent expenses	6,572.00	5,766.91		805.09	
Transportation	3,000.00	994.56		2,005.44	
Public works	1,287,123.00	630,065.56	P138,387.83		P518,669.61
Total	1,351,695.00	691,439.20	138,387.83	8,198.36	518,669.61

The architectural work of this bureau has been on the whole highly satisfactory, and the same may be said of most of the construction work, especially of the construction work on the laboratory building. The patent roofing material used on the cottages at Baguio was not fitted to stand the strain of a tropical climate and should not have been employed by the bureau for construction purposes until proper experiment had demonstrated its usefulness as roofing.

For details of the work completed and the work now in progress by the bureau of architecture and construction of public buildings, reference is made to the report of the insular architect annexed hereto and marked "Exhibit C."

THE BUREAU OF PUBLIC PRINTING.

VALUE OF PRODUCT AND COST OF PRODUCTION.

From July 1, 1903, to June 30, 1904, the total product of the bureau of public printing was \$283,913.84, and the total expense for salaries, wages, printing paper, supplies, and miscellaneous amounted to \$195,435.92, or an excess of the value of the product over the cost of production amounting to \$88,477.92. The purchase-price value of the equipment in the fiscal year 1903 was \$141,506.63. Deducting from this sum \$14,458.88 for articles condemned and dropped and 10 per cent for reasonable wear and tear gives the sum of \$127,047.75, which represents the reasonable value of the equipment at the beginning of the fiscal year 1904. Adding to this \$11,321.38, the value of the equipment purchased in 1904, we have the sum of \$168,369.13, representing the gross value of the equipment for the year 1904. Deducting \$16,836.91, 10 per cent of the gross value for wear and tear during the year 1904, and \$12,000, rental value of the premises occupied, from \$88,477.92, the excess of value of product over cost of production, we have \$59,641.01 as the net excess of value of product over cost of production for the last fiscal year. The net excess for the fiscal year 1903 was \$24,236.64. The prices fixed for the product are according to Ramaly's schedule of prices.

Printing and binding work was executed during the year as follows:

Civil governor:	
Executive bureau	\$44,405.50
Philippine civil-service board.....	7,207.45
Bureau of the insular purchasing agent.....	3,410.45
Office of the improvement of the port of Manila.....	135.90
Exposition board	10,096.65
Total	\$65,255.95
Department of the Interior:	
Office of the secretary board of health for the Philippine Islands	9,328.45
Quarantine service	970.00
Forestry bureau	5,548.60
Mining bureau	1,270.85
Philippine weather bureau.....	4,133.30
Bureau of public lands.....	184.00
Bureau of agriculture.....	1,697.50
Ethnological survey for the Philippine Islands.....	359.60
Bureau of government laboratories.....	5,880.80
Philippine civil hospital.....	379.95
Civil sanitarium, Benguet.....	45.10
Total	29,798.15
Department of Commerce and Police:	
Bureau of posts.....	12,963.17
Signal service	695.30
Bureau of Philippine Constabulary.....	10,337.85
Bureau of prisons.....	1,421.90
Bureau of coast guard and transportation.....	6,866.65
Bureau of coast and geodetic survey.....	1,069.95
Bureau of engineering.....	1,337.80
Office of Benguet improvements.....	2,967.05
Calbayog pier construction.....	16.30
Total	37,675.97

Department of Finance and Justice:

January-----	20, 355. 60	20, 851. 60	Grand total-----	219, 817. 54	280, 551. 66

MATTERS OF GENERAL INTEREST.

Since the passage of Act No. 807, on July 27, 1903, the bureaus and offices of the insular government are not required to pay cash for their printing, but a report of the printing done for the various bureaus is submitted at the end of the year to the secretary of public instruction and to the insular auditor.

Owing to the diminution of customs receipts and the necessity for practicing the most rigid economy, the erection of a steel frame warehouse adjoining the present printing plant, for which appropriation was made by Act No. 831, was abandoned, arrangements having been made to secure storage for supplies and paper in one of the bodegas of the custom-house. In view of the fact that increased space was

required by the composing room and the bindery, the electrotyping and stereotyping foundry has been removed from the second to the first floor.

INSTRUCTION OF NATIVE CRAFTSMEN AND APPRENTICES.

In addition to the public printing performed by the bureau, the work of instructing native craftsmen and apprentices in the various branches and specialties of the printing trade has been continued along the same lines as those initiated during the fiscal year 1903.

In the composing room 8 of the 10 linotype machines are now operated by natives, and, while the product is not as great as that of an expert American operator, it has been sufficient, in conjunction with two machines operated by Americans, to meet the demands for machine composition. In this room all make-up and imposition work is done by junior craftsmen, under the guidance and instruction of an American. The preparation of all job copy, all job work, the distribution of all job and body type, the care of electrotype plates, the running of the dumping bank are all performed by native craftsmen and apprentices. The instruction of apprentices in the composing room covers a period of three years, one year being devoted to straight and tabular composition, one year to job composition, and one year to making-up and imposition.

During the fiscal year 1903, 23 Americans, 15 junior craftsmen, 5 apprentices, and 4 helpers were employed in the composing room. At the beginning of the fiscal year 1904 there were employed in the same division 11 Americans, 34 junior craftsmen, 10 apprentices, and 6 helpers, while on September 1, 1904, there were only 7 Americans employed in this division of the bureau.

The bureau of public printing has the only electrotyping and stereotyping plant in the islands, and prior to its introduction there was no opportunity whatever for natives of the islands to acquire any information or knowledge of electrotyping or stereotyping. Two apprentices were assigned to this division in April, 1903. Since that time 6 more have been assigned. All of the apprentices have shown considerable aptitude in molding, building, and battery and casting work, and are at present performing all such work under supervision. One of the apprentices, who began work in this division in April, 1903, is at present able to finish skillfully all ordinary work, and is especially proficient in making corrections in plates. But little stereotyping work was done by the bureau during the last year and, as a consequence, the opportunity for practical instruction in this specialty was limited.

Of all the allied trades which go to make up the printing bureau, none appeals more strongly to the Filipino than the binding trade, and, as a result of this strong liking for the business, the product of their labor more favorably compares with that of American craftsmen than in any other branch of the printing business. They are anxious to become acquainted with modern methods and display very satisfactory skill in operating the automatic folding machine, book-sewing machines, automatic paper-cutting machines, wire-stitching machines, and ruling machines. In the bindery native employees are classified as craftsmen, junior craftsmen, apprentices, and helpers. Junior

craftsmen are advanced to the grade of craftsmen when they have sufficiently demonstrated their ability as binders. Apprentices begin their education as binders at the foot of the ladder, and from the handling of paper they are advanced gradually to finishing in a workmanlike and skillful manner blank and printed books of all kinds. In the bindery there are 15 apprentices, 3 of whom are detailed on ruling machines, 2 on finishing, 8 on blank and printed forwarding, and 2 on quarter-bound work.

Six apprentices are employed in preparing, exposing, and developing plates in the photo-engraving room. They coat, strip, print, etch, route, bevel, and block. The apprentices, of course, have little or no knowledge of chemicals or formulas, and considerable study and experience will be required of them before they have a complete knowledge of photo-engraving.

Five native craftsmen are capable of operating cylinder presses as against one who had that ability one year ago. They execute in a satisfactory manner ordinary book and job work from type or plates. Progress has also been made by native craftsmen in working the platen presses. Fourteen apprentices are on duty in the press room. Their instruction begins with feeding the press and ends with the complete knowledge of its operation on all classes of work.

Three apprentices are assigned to the power plant and machine shop, 2 of whom have been instructed in electrical work with such machinist's work as properly belongs to that trade, while the third has been assigned chiefly to machinist's work. The progress of all has been satisfactory. Two junior craftsmen manage with skill the lathe and shaper and do many odd jobs of repair work.

There are employed in the bureau of public printing 59 apprentices, assigned as follows: Composing room, 13; bindery, 15; electrotyping and stereotyping room, 8; photo-engraving room, 6; press room, 14; machine shop, 3. The chief of the bureau insists that apprentices shall attend the night schools, and his enforcement of this rule has been one of the most important factors in giving to the bureau of public printing the nucleus of a strong force of native workmen well acquainted with English and able to render substantial service to the government.

Large as is the quantity of printing turned out by the bureau, the work is carefully done and its quality is fully up to the standards of the best printing establishments at home.

The public printer has been conscientious, zealous, and earnest in the discharge of his duties, and his administration of the bureau has been highly satisfactory and commendable. The American workmen at present employed in the bureau are careful, painstaking, and efficient in the performance of their duties as craftsmen and, at the same time, conscientiously discharge their duties as instructors of Filipino junior craftsmen and apprentices.

For further and detailed information regarding the bureau of public printing, reference is made to the report of the acting public printer hereto attached and marked "Exhibit D."

THE BUREAU OF ARCHIVES.

After the fall of Manila, the various offices of the Spanish Government were thrown into the greatest confusion, and official documents

of the greatest importance, pertaining to all the departments of the Spanish Government, became so mixed and mingled together that it became absolutely necessary to establish some bureau to bring order out of the chaos occasioned. As a consequence, the bureau of archives was organized and the work of orderly arrangement of documents belonging to the general government, provincial and municipal governments, the council of administration, auditor of state, postmaster and treasurer-general, the government of Manila, direct and indirect imposts, court of accounts, and the post-office was confided to its care. The orderly disposition of these documents required great labor by itself. In addition there were and will continue to be constant demands on the office for the examination of old records, making copies of official papers, and the issuance of certificates and reports on records affecting the title to government property and property claimed by the government. The transfer of the notarial protocols of the islands to this bureau, the making of inventories for 322 volumes of protocols not provided by the provinces of Cebu, Mindoro, Iloilo, Ilocos Sur, Nueva Vizcaya, Negros Occidental, and Negros Oriental, the registration of copyrights and trade-marks, the registration of brands and marks of large cattle, the filing of patents granted in the United States, and the reclassification of old Spanish documents which was occasioned by the transfer of the bureau from the Intendencia Building to the Ayuntamiento have further increased the burden of labor over that imposed on the bureau at the time of its formation. It is to the credit of this bureau, however, that it has asked no substantial increase in personnel and that the employees have worked extra hours every working day in order to meet the demands of the service.

During the year a chronological index of the royal cédulas from 1660 to 1696 was made. On account of the old orthography of these cédulas, so different from that now in use by Spaniards, and the fading of the ink, this was a work of considerable magnitude and required special knowledge, accuracy, and care.

From July 1, 1903, to June 30, 1904, 517 copies of public documents were issued and fees amounting to ₱898.50 collected therefor. Fees for searches and certificates issued thereon amounted to ₱831.80. Sixty-nine copies of documents requested by various heads of departments and bureaus were also furnished, but without charge. Two hundred and fifty-one trade-marks and 72 copies of patents registered in the United States were filed with the bureau and fees amounting to ₱12,694 collected therefor. In addition 12 copyright certificates, 4 certified copies of trade-mark registration, 5 trade-mark certificates, and 6 certificates of assignments of patents registered in the United States were issued, and fees for the service amounting to ₱34.36 collected. The total collections of the bureau for the fiscal year were ₱14,458.74. The total expenses for the same period were ₱22,614.31.

Since the removal of the bureau of archives to the Ayuntamiento, great difficulty has been experienced in preserving the records from the ravages of the anay or white ant. These little insects come through the cement wall, throw out their bridges so as to escape obnoxious preventives, and unless a daily examination is made destruction of important records is likely to occur. Due to the precautions taken by the chief of the bureau and the employees, no important record has been seriously injured by these insects save and except

the protocol of Marcos Gonzales for the year 1740. This document, while badly injured, can be recopied and this work is now being done by the bureau.

The work of this important bureau has been very satisfactorily performed, and great credit is due to its chief and the office force for the efficient service rendered.

For details as to the work accomplished by the bureau of archives, reference is made to the report of the acting chief, marked "Exhibit E," attached hereto and made a part hereof.

THE AMERICAN CIRCULATING LIBRARY.

The American circulating library was founded in 1900 by Mrs. Charles R. Greenleaf. The original purpose of the library was to furnish the soldiers and sailors of the United States forces with entertaining and useful reading matter. As the expense of maintaining the library was a little in excess of its resources, the library was turned over to the insular government and is now maintained as a government bureau for the benefit of the general public. The library was originally located on Calle Rosario, but on May 25 of this year it was assigned to more commodious and comfortable quarters in the Oriente Building, and supplied with new book stacks and furniture made by the forestry bureau. The number of books on hand on June 30, 1904, was 21,575, most of which were donated to the library through the efforts of Mrs. Nelly Young Egbert, the present librarian, who has so ably administered the affairs of the library since its organization. Since the transfer of the library to its new quarters two complete bound sets of the Oceania, a Manila periodical which began publication in 1877 and continued under that name until May, 1899, when it became *El Progreso*, were secured. Two complete sets of *El Progreso* have also been received, and its successor, the *Adelanto*, will furnish copies of its file from time to time. Bound volumes of the Manila Gazette from 1878 have also been obtained, as well as a complete set of the Manila Freedom and an incomplete set of the Manila Times. The present quarters of the library furnish room for at least 10,000 additional volumes. When this number is secured it is hoped that a suitable library building will be provided by the city of Manila.

The library is supported by admission fees, fines, donations, and appropriations made by the insular government. The fund realized by fees, fines, and donations amounted on July 31, 1904, to ₱4,486.79, which fund is deposited with the insular treasurer. During the fiscal year 1903-4 the insular government appropriated ₱7,440 for salaries, wages, and contingent expenses, and out of this sum there has been expended ₱7,423.86, leaving an unexpended balance of ₱16.24 on June 30, 1904.

The amounts appropriated by the insular government are not available for the purchase of books. Books are purchased out of the special fund resulting from fees, fines, and donations, and during the year the sum of ₱1,006.30 was expended for this purpose.

In September of last year Capt. Leon S. Roudiez, of the United States Army, was ordered to the United States, and was compelled to resign his position as trustee and disbursing officer of the library.

Capt. George P. Ahern, also of the Army, was appointed to succeed him. Captain Ahern continued discharging his duties as trustee and disbursing officer until August, 1904, when he was relieved from further duty in order to permit him to enjoy a period of leave in the United States. Mr. George Sellner was appointed to succeed Captain Ahern as trustee, and Mr. Louis M. Lang, acting disbursing officer of the executive bureau, succeeded Captain Ahern as disbursing officer of the library.

For further information as to matters pertaining to the library, attention is called to the report of Capt. George P. Ahern, trustee and disbursing officer of the library from September 30, 1903, to August, 1904, which report is hereto attached, marked "Exhibit F."

THE OFFICIAL GAZETTE.

The publication of the Gazette was authorized by Act No. 453, passed September 2, 1902. The Gazette is published weekly, in two parts, issued separately, one part being in English and the other in Spanish. It contains the legislative acts of the insular government, all the resolutions of the Commission of a public nature, all executive orders, decisions of the supreme court and the court of customs appeals, and such other official matters as may be designated by the secretary of public instruction. Notices of civil-service examinations, appointments, resignations and removal of officers of the government, and an official roster are also published. Until within the last few months monthly statistical reports were published, but as the statistics were furnished in complete form in the annual reports of the bureau chiefs the publication of the monthly statistics was considered useless and discontinued. Seven hundred copies of the English part and 2,000 copies of the Spanish part of the Gazette are published each week by the bureau of public printing. Copies of the Gazette are sent to the President of the United States and each member of his Cabinet, the Civil Service Commission at Washington, the commanding general of the army in the Philippines, the commanding general of each department in the islands, the judge-advocate of the division, the admiral on this station, the commandant of the naval station at Cavite, the civil governor, the members of the Philippine Commission, judges of the courts, justices of the peace, the heads of bureaus and offices of the insular government, such other officers of the Philippine government as may be designated by the civil governor or the secretary of a department, provincial and municipal governments, voluntary subscribers, and exchanges. Provincial and municipal governments and voluntary subscribers pay the usual subscription, and all others receive the Gazette free of charge.

On June 30, 1904, there were 964 free-list subscribers and 972 paid subscriptions. Six hundred and thirty-eight of those on the free list are justices of the peace. Seven hundred and twenty-one of the paid subscriptions come from provincial and municipal governments and 251 from private subscribers.

The Gazette is exchanged with the Straits Budget, Singapore; the Englishman, Calcutta, India; the Capital, Calcutta, India; the Indian Municipal Journal and Sanitary Record, Bombay, India; the Queensland Gazette, Brisbane, Australia; the Assam Gazette;

the protocol of Marcos Gonzales for the year 1740. This document, while badly injured, can be recopied and this work is now being done by the bureau.

The work of this important bureau has been very satisfactorily performed, and great credit is due to its chief and the office force for the efficient service rendered.

For details as to the work accomplished by the bureau of archives, reference is made to the report of the acting chief, marked "Exhibit E," attached hereto and made a part hereof.

THE OFFICIAL GAZETTE.

The publication of the Gazette was authorized by Act No. 453, passed September 2, 1902. The Gazette is published weekly, in two parts, issued separately, one part being in English and the other in Spanish. It contains the legislative acts of the insular government, all the resolutions of the Commission of a public nature, all executive orders, decisions of the supreme court and the court of customs appeals, and such other official matters as may be designated by the secretary of public instruction. Notices of civil-service examinations, appointments, resignations and removal of officers of the government, and an official roster are also published. Until within the last few months monthly statistical reports were published, but as the statistics were furnished in complete form in the annual reports of the bureau chiefs the publication of the monthly statistics was considered useless and discontinued. Seven hundred copies of the English part and 2,000 copies of the Spanish part of the Gazette are published each week by the bureau of public printing. Copies of the Gazette are sent to the President of the United States and each member of his Cabinet, the Civil Service Commission at Washington, the commanding general of the army in the Philippines, the commanding general of each department in the islands, the judge-advocate of the division, the admiral on this station, the commandant of the naval station at Cavite, the civil governor, the members of the Philippine Commission, judges of the courts, justices of the peace, the heads of bureaus and offices of the insular government, such other officers of the Philippine government as may be designated by the civil governor or the secretary of a department, provincial and municipal governments, voluntary subscribers, and exchanges. Provincial and municipal governments and voluntary subscribers pay the usual subscription, and all others receive the Gazette free of charge.

On June 30, 1904, there were 964 free-list subscribers and 972 paid subscriptions. Six hundred and thirty-eight of those on the free list are justices of the peace. Seven hundred and twenty-one of the paid subscriptions come from provincial and municipal governments and 251 from private subscribers.

The Gazette is exchanged with the Straits Budget, Singapore; the Englishman, Calcutta, India; the Capital, Calcutta, India; the Indian Municipal Journal and Sanitary Record, Bombay, India; the Queensland Gazette, Brisbane, Australia; the Assam Gazette;

the Burma Gazette; the Chamber of Commerce Journal, England; the Monthly Bulletin of American Republics; the Harvard Law Review; the Calcutta Gazette; the Central Provinces Gazette, Nagpur, India, and the Bombay Gazette.

Many of these exchanges contain articles of great value to the student of problems in the Philippines, and such articles are properly indexed for ready reference.

The total expense to the government of publishing the Gazette during the last fiscal year was ₱42,323.21, and the total receipts from all sources were ₱20,580.42. The Gazette could be made to more than pay for itself by the publication in it of all legal notices and governmental advertising, and it is thought that either this course should be pursued or the further publication of the paper should be suspended. As the matter stands, the government incurs the expense of maintaining the Gazette, and, at the same time, pays for the publication in the daily papers of the same identical matter which the official paper is required by law to publish. In the beginning, when the daily papers had no wide or extended circulation in the provinces and when it was absolutely necessary that the widest publicity should be given to the acts of the Commission and the orders and proclamations of the Executive, this double expense was justified. It would seem, however, that the time has about arrived when one of the methods now employed to give official information to the people should be suppressed in the interest of economy. As the government has its own printing plant, it is believed that all governmental advertising and announcements could be published more economically in the official paper now established, but, if the Commission considers such a course unwise and an invasion of a field which properly belongs to private enterprise, it is recommended that on the termination of the present fiscal year further publication of the Gazette be discontinued.

The editor of the Gazette and the acting editor, during the former's absence, have displayed commendable energy in keeping the paper abreast of its work, and their constant and persistent efforts to increase the number of paid subscriptions are worthy of praise.

For further information as to the Gazette, reference is made to the report of the acting editor, which is hereto annexed and marked "Exhibit G."

Respectfully submitted.

JAMES F. SMITH,
Secretary of Public Instruction.

The PHILIPPINES COMMISSION.

EXHIBIT A.

REPORT OF THE GENERAL SUPERINTENDENT OF EDUCATION, SEPTEMBER 15, 1903, TO SEPTEMBER 15, 1904.

MANILA, *September 15, 1904.*

SIR: I have the honor to submit herewith the fourth annual report of the general superintendent of education for the Philippine Islands, covering the period from September 15, 1903, to September 15, 1904.

The work of the past year has effected a more perfect and uniform organization of schools and offices, with a closer relationship between the office of the general superintendent and those of the division superintendents. A better understanding has been gained by the central office of the needs of the different fields and a greater economy practiced in the assignment of teachers. Reliable statistics have been secured relative to public instruction in the Philippines, through a careful system of school reports. What follows is largely a presentation of these statistics, which are believed to be as exact as careful reports from teachers and superintendents can secure.

PUBLIC EXPENDITURES FOR THE SCHOOLS.

As is well understood, the Philippine government made prompt provision for the establishment of schools in the islands. Some criticism has been made on the ground that a disproportionate amount of the public revenue has been devoted to public instruction rather than to more material benefits to the population. An examination of the actual expenditures by the insular government does not appear, however, to warrant this criticism. Commencing July 1, 1901, a date prior to the arrival of any considerable number of teachers from the United States, and prior also to the organization of the school work in the provinces, down to July 1, 1904, there has been actually expended out of the insular funds appropriated by the Philippine Commission, \$3,839,040, or \$1,279,680 a year.

The total amount of money expended by the insular government for all purposes since 1901 is as follows:

1901.....	^a \$6,100,453.57
1902.....	^a 7,657,002.85
1903.....	^a 10,609,186.13
1904.....	^b 11,152,139.19

^a Reports of the insular auditor: 1901, page 121; 1902, page 58; 1903, page 50.

^b This last figure was obtained from the insular auditor in advance of the publication of report.

The amounts expended by the insular government for the bureau of education in these four years have been as follows:

Fiscal year—	
1901.....	\$233, 411
1902.....	1, 194, 381
1903.....	1, 400, 563
1904.....	1, 244, 096

It may be seen from this table that the maximum amount of money expended for the bureau of education was in the year 1903. In the past year the work of the bureau has been conducted with the reduced expense of ₱156,467. In the year 1902 the expense for the bureau of education amounted to 16 per cent of the total expenditures of the government; in 1903 to 13.5 per cent; in 1904 to 11.2 per cent. It is thus seen that the proportion of money spent for the bureau of education has been continually decreasing for the last three years, when compared with the total disbursements of the Philippine government. This retrenchment of expenditure, both in actual amount and in proportion to the total expenses of the government, has been carried out in spite of the fact that each year has shown a large gain in the amount of school work done. Considering the great necessity for public instruction, the ambition of the people of all classes to receive it, and the very considerable influence that the public schools have had in creating satisfaction with the American Government, the total amount of money expended for the purpose of education would appear to be neither extravagant nor disproportionate. It is by no means as liberal a provision for public education as is frequently supposed, and falls far behind that made by the government of Cuba, Porto Rico, or Japan.^a

Of the total amount expended for public instruction since July, 1901, (\$3,839,040), about two-thirds has been expended for the salaries of American teachers and superintendents. About \$890,000 has been spent for schoolbooks and school supplies. In the last year these supplies have included a considerable amount of carpentry tools, iron working tools, agricultural implements, and wood and iron working machinery for the establishment of agricultural and tool work in the different school divisions.

The appropriation by the insular government for the bureau of education for the fiscal year 1904-5, provides for public instruction in the sum of ₱2,417,450, distributed in the following items:

Salary of general superintendent and office force.....	₱82, 973. 32
Salary of 31 division superintendents.....	122, 400. 00
Salary of 29 clerks to division superintendents.....	42, 120. 00
Salary of 861 American teachers.....	b 1, 648, 342. 68

^a Japan, with a population approximately 50,000,000, less than seven times that of the Philippines, expended in 1901 \$21,292,097 on public instruction, or more than sixteen times the amount expended in the Philippines in 1904. (*Résumé Statistique del Empire de Japon*, Tokio, 1904.)

Cuba, in the fiscal year of 1899, expended \$4,000,000 upon public instruction, having at that time 3,000 public schools with 3,500 teachers and a student attendance of 130,000. (The attendance in the Philippines is close to 300,000 and expenditures for public instruction, as stated, less than \$1,250,000 on the part of the insular government, and about \$500,000 out of local funds.) (Report on the Census of Cuba. War Department, Washington, 1899, p. 584 et seq.)

Porto Rico, in 1902, fiscal year, had a total school attendance of 61,863, the disbursements for this purpose being \$505,000, a little more than one-fourth of the entire governmental revenue. (Report of Commissioner of Education, Washington, 1902, vol. 2, p. 1205.)

^b The full amount of money for this number of teachers was not appropriated, by reason of the considerable saving that is anticipated will occur this year on account of lapses.

Salary of 300 night-school teachers.....	105,300.00
Salary of 294 native teachers.....	189,600.00
Salary of 32 native teachers for Abra.....	5,184.00
Salary of other employees.....	4,080.00
Transportation.....	24,400.00
School supplies.....	170,400.00
Other contingent expenses.....	22,650.00

These items indicate the share of public school maintenance which is borne by the bureau of education. The expenses for the salaries of municipal primary teachers, the erection and repair of school-houses, and the purchase or manufacture of school furniture, are borne by the municipalities and are paid for in part by appropriations made by the municipal councils out of the general municipal funds. It has proven very difficult to secure reliable statistics as to the amounts so expended by the 660 organized Christian municipalities in the islands. Fairly accurate reports have been made by 30 of the provinces, but, except for salaries of teachers, data could not be obtained for Albay, Isabela, Samar, and Misamis. The Moro Province is separately administered and is not included.

The total amount expended by municipalities for schools in the Christian provinces, and in the case of Albay, Isabela, Samar, and Misamis, including only teachers' salaries, was ₱1,016,303.93. Of this amount the city of Manila expended ₱325,545.44, or 32 per cent of the total. Cebu leads the provinces with a total of ₱60,367, an average of ₱1,504 to each of its 40 pueblos; the next is Pangasinan, with ₱43,207 from 32 municipalities; Tayabas, ₱38,690 from 25 municipalities, and Iloilo, ₱30,767 from 17 municipalities. The average for the 30 provinces reporting in full was ₱20,201.11. This expenditure provided by local taxation outside of the city of Manila amounts to an average of 10.2 cents per inhabitant, an exceedingly moderate school tax in comparison with other countries and peoples with less resources than the Philippines.

Out of the total amount appropriated for the support of schools the city of Manila expended ₱273,952.15, or 84 per cent of its total, for teachers' salaries; ₱46,115.63, or 14 per cent, for the rental of school buildings, and ₱5,477.66, or 2 per cent, for all other expenses. The provinces outside of Manila spent for teachers' salaries ₱469,280.05, or 68 per cent, of their total; ₱128,014.10, or 19 per cent, for the construction, repairs, and rental of schools; and ₱93,464.34, or 13 per cent, for incidental expenses. It will thus be seen that the great proportion of school funds is necessarily utilized for the payment of teachers and only a comparatively small amount is available for permanent school improvements in the way of new buildings and additional furniture.

Delays in the collection of the land tax and in the accounting for municipal school funds resulted in undischarged obligations in 18 of the 29 provinces reporting, which aggregate ₱28,799.01. The provinces with municipalities most deeply in debt and with consequent greatest arrears in teachers' salaries are Iloilo, with a total of ₱4,283.64; Occidental Negros, with ₱3,603.99; Batangas, ₱2,330; Antique, ₱1,798; Zambales, ₱1,911; Sorsogon, ₱1,823; Oriental Negros, ₱1,677; Ilocos Norte, ₱1,650; Pangasinan, ₱1,570; and Cebu, ₱1,318. Filipino teachers in these cases were obliged to wait several months for the settlement of salaries due them.

Since the first of the year, however, the condition of municipal school finances has been constantly improving and these delays will probably not occur another year.

A year ago there were serious complaints of the diversion of school funds. But by an understanding between the division superintendents and the provincial treasurers, which has received the approval of the insular treasurer, school funds are now disbursed only upon the approval of the division superintendent. This makes impossible the waste, misappropriation, and loss which a year ago was a most serious handicap to the school work. The results of this change which has been brought about will tell very materially upon the amount of local school funds available for this coming year. Not only will it make it possible to hire a somewhat larger number of teachers, but these teachers will receive far more promptly the salary due them each month.

In addition to the school expenditures by the municipalities the provincial boards in 33 provinces have made provision by appropriation out of provincial funds for the establishment of provincial high schools. The appropriations have, in the majority of cases, been very moderate and in most cases limited to the payment of rental for buildings, janitor service, and incidentals. The salaries of all American teachers and all educational equipment for these provincial high schools, which includes not only blackboards, textbooks, expendable school supplies, but also tools, and in a few cases machinery, have been supplied by the bureau of education. In a number of cases, as will be subsequently indicated, the provinces have incurred or are incurring very considerable obligations for the erection of buildings for the provincial schools. The division of expenditures thus outlined between the bureau of education and the provincial boards for the maintenance of these institutions has proved practicable and will probably be continued for some years, although the law (par. n, sec. 1, Act No. 372) contemplates that in the end the provinces will meet all expenses for their high schools out of their own revenues unaided by the insular government.

PRIMARY INSTRUCTION.

Education under the American Government commenced with primary instruction. At the present time, after three years of organized effort, the instruction continues to be almost entirely primary. The aim has been and still is to place the elements of an English education within the reach of children of every social class in every municipality and every hamlet of the archipelago. The reasons for pursuing such a policy as this were sufficiently set forth in the report of the general superintendent a year ago and do not need to be recapitulated here. The aim sought is still sufficiently remote, although great progress toward that end has been made in the past twelve months.

During the past year a course of study has been prescribed for these primary schools by the general superintendent. It covers but three years of instruction, which include three in the English language, two in arithmetic, prefaced in the first year by easy number work, and one year in elementary geography. In addition to these subjects provision is also made for singing and drawing, for both

of which the Filipino has unusual endowment; for handiwork, consisting of school gardening and simple tool work for the boys, sewing and elementary housekeeping for the girls; for physical exercise; and for the training of character. These three years of primary instruction must necessarily appear meager and inadequate to most educators. It should be understood, however, that the primary course of three years does not lead directly to the various secondary courses which are offered at the provincial high schools. An intermediate course of three years is taught in all high schools and at many of the larger municipal schools, the plan being to have the central municipal schools ultimately devote their attention to this intermediate course and to have all primary work done in the barrio schools, which will be located in every one of the hamlets of which a Philippine pueblo or municipality is composed.

The main reason for making the primary course so brief is the need for a plan of study, fairly complete though very simple, which could be taught wholly by Filipino teachers and which, within a reasonable time, could be given to all. In fixing upon so brief and simple a course consideration was also given to the following circumstances:

The training and attainments of the Filipino teachers are very limited. Few of them have had more than three years of instruction in English, and many of these had no previous education. Some years must pass during which the Filipino teacher will continue to receive constant training and assistance before he will be competent to give more than the three years of teaching which have been prescribed. It is certain that the primary teaching can not be done by American teachers. So far as this branch of instruction is concerned, the American teacher at the present time is wholly occupied with the work of organization and supervision and the Filipino teachers are doing the actual work of the class rooms.

The total number of children in the Philippines between the ages of 6 and 14 is reckoned at 1,200,000. The primary course aims to give the bare essentials of a primary education, and it aims to give this to every child between the ages of 6 and 14. These age limits, however, allow for a period of nine years in which to give three years of instruction and permit us to divide the total number of children of school age by 3 when we come to fix upon the measure of equipment necessary to meet the ends in view; that is, if there are sufficient schoolhouses, school-teachers, school furniture, and school-books to give continuous instruction to 400,000 children, it will be possible to give every child three years of primary instruction during the nine years between 6 and 14. The attendance of 400,000 children in the primary schools is the standard toward which the bureau of education is aiming, and if it can reach this standard and maintain it for a period of ten years there will be, broadly speaking, no illiterate youth among the Filipino people, but the entire coming generation will be able to speak, read, and write the English language with a fair degree of accuracy and fluency; will be able to make ordinary arithmetical calculations, including those operations which are used in ordinary business; will have a fair knowledge of the geography of the Philippines and of the continents and countries of the world; and, it is believed, will have received a very beneficial influence upon their characters during the formative

period. Judging from an experience with Filipino pupils extending over the period of the last four years this amount of public education, limited as it appears, will produce an effect upon the Filipino people surpassing any previous experience of this race, with the exception of its conversion to Christianity.

The past year has shown a notable advance toward the attainment of this standard of primary instruction. In the month of September, 1903, a very close approximation of the public school enrollment was made by the division superintendents, amounting to 182,202 pupils for the whole archipelago, about 6,000 of these being of intermediate grade. At the close of the school year last March this figure had risen to 227,600. The school returns for the month of July, 1904, showed that there were actually enrolled 263,974. In considering this last enrollment report it should be noted that at the time it was made the schools had just opened after the long vacation; it was during the rainy season and the time of rice planting, in which many children are necessarily employed. Reports subsequent to the 1st of August have not been received in full, but from those provinces from which returns are in there is in every case a still larger gain and the probability is that when the drier and cooler months of October and November come, and the labor of the children is no longer necessary in cultivation, the total number in primary schools will reach 300,000 of both sexes.

This increase in public school attendance of the past twelve months is due very largely to the spontaneous growth of interest in public instruction among Filipinos of all classes. The American schools passed the experimental stage over a year ago. The American teachers have fully won their place in the confidence and affection of the native population. The period of war with its enmities, suspicions, and social disorganization is past, and the time is ripe for meeting without hindrance the ambitious desires of the entire Filipino race for American education. To meet the increased demand for schools during the past year, a system of school districts has been organized, each in charge of an American supervising teacher. These districts usually embrace a single municipality, but in some cases, owing to the limited number of American teachers, they include two or three. The population of a district varies from 5,000 and 6,000 to as many as 40,000 souls. Some of the largest of these districts, with the number of American teachers in charge, are as follows:

Province.	District.	Population.	American teachers.	Enrollment in the primary schools.
Ilocos Norte.....	Batac.....	23,530	2	3,975
Do.....	Dingras.....	15,792	1	1,188
Do.....	Bacafla Vintar.....	24,051	2	1,874
Cavite.....	Noventa.....	15,058	1	1,044
	Rosario.....			
	Cavite Viejo.....			
Pangasinan.....	Asingan.....	12,911	1	1,184
Do.....	Calasiao.....	16,539	1	1,093
Do.....	Mangaog.....	16,793	1	1,072
Tarlac.....	Gumiling.....	25,243	2	2,084
Cebu.....	Dumanjug.....	18,374	2	1,235
Ilocos Sur.....	Narvacan.....	19,575	1	1,203
Do.....	Gandon.....	18,829	2	1,200
Rizal.....	Malabon.....	31,824	2	1,450
Ilocos Norte.....	Laoag.....	45,334	4	3,712
Laguna.....	San Pablo.....	22,612	2	1,265

These district supervisors spend the greater portion of their time in riding about from barrio to barrio, organizing the small hamlet schools and, after they are once organized, visiting them regularly and assisting the native teacher in his work of instruction. Wherever possible at least once a day all the Filipino teachers gather at the central schoolhouse for an hour or an hour and a half of instruction under the American teacher. This supervising work has proven exceedingly arduous. It calls for high qualities of endurance and courage, but it has met a magnificent response from the American teachers in all parts of the islands. It has proved to be the only method whereby instruction could be given to the masses of the population.

The force of the bureau of education is inadequate at the present time to meet this rapidly growing attendance. It has not been possible to supply all municipalities with public instruction. Out of the 660 organized municipalities in the islands there are 31 in which there are no public schools, properly speaking, and for which American teachers can not be spared even in the capacity of supervisors. An additional reason for the lack of public schools in these towns is the paucity of local school funds. The towns without public schools for the above reasons are as follows:

Albay.—Bagamanoc, Calolbon, Caromaran, Jovellar, Pandan, Payo.

Ambos Camarines.—Capalonga, Gaing, Lupi, Siruma.

Capiz.—Buruanga.

Isabela.—Santo Tomas.

Misamis.—Jimenez.

Samar.—Almagro, Oquendo, Oras, Santo Niño.

Sorsogon.—Bonsul, Castilla, Irosin, Matnog, Pilar, Santa Magdalena.

Surigao.—Bislig, La Paz, Lianga, Nonoc, Sapao, Talacogon, Veruela.

Tayabas.—Baler.

The lack of organized public schools in the provinces of Albay and Sorsogon, which two provinces constitute the second division of schools, is due to the limited number of American teachers now in the service. It is believed that a sufficient number of new American teachers may be assigned from those now under appointment in the United States to perfect the school organization of these two provinces, and give every municipality public instruction. The same explanation applies to the four municipalities which are without public instruction in the province of Ambos Camarines.

The division superintendent of Cagayan and Isabela reports that a schoolhouse in Santo Tomas, Isabela, is under construction and a school will be opened within a month. The paucity of school funds has prevented the establishment of a school at Jimenez, Misamis.

Schools were to have been opened in the four municipalities of Samar which are now without schools, but the recent activity of "pulajanes," with consequent military operations, have delayed the sending of American teachers. As soon as these conditions pass four American teachers will be assigned for the organization of work in these municipalities.

The division superintendent of Surigao reports that of the seven municipalities in that province at present without schools Lapaz, Lianga, Sapao, and Talacogon will have public schools organized during the current month of September. In Bislig schools will be opened in October; while Nonoc and Veruela, the latter a small town near the headwaters of the Agusan River, still await public instruction.

In Tayabas the town of Baler is at the present time without schools. It has had public instruction in the past, and it will probably be possible to reopen schools in that municipality again within a short time.

For the administration of public instruction in the 629 municipalities where schools are organized and in which, as stated above, there are over a quarter of a million children in attendance, the bureau of education has (September 15) a force of 700 American teachers regularly employed and on duty, and 49 American teachers who are temporary appointees. There are 47 teachers on leave in the United States, whose early return is expected, and 40 more under appointment who have not yet reached the Philippines. There are 294 Filipino teachers appointed as a result of civil service examination and paid by the bureau of education, and, in addition, 3,195^a Filipino teachers appointed by division superintendents and paid out of local municipal funds. For the Filipino teachers actually engaged in classroom instruction there is an average of over 70 pupils to the teacher, an unfortunately large number when other conditions are excellent and especially so when the poor housing, inadequate school furniture, and the still limited training of the Filipino teacher are taken into consideration.

The local school funds promise to be augmented to a considerable amount during the coming year by the 5 per cent of the total amount raised by the new internal-revenue law (Act No. 1189), passed July 2, 1904, which is to be allowed for municipal school expenses. Upon advice received from the collector of internal revenue, upon the basis of the impartial data in hand, the following table has been compiled, which shows the estimated amount of revenue for each province for public schools which will be derived from the operation of this new act:

Province.	Population.	Estimated income for educational purposes from internal-revenue act.	Province.	Population.	Estimated income for educational purposes from internal-revenue act.
Abra	51,680	₱2,581.00	Mindoro	39,582	₱1,979.10
Albay	210,326	12,016.30	Negros Occidental	308,272	15,413.60
Ambos Camarines	239,405	11,970.25	Negros Oriental	201,494	10,074.70
Antique	134,166	6,708.30	Nueva Ecija	131,147	6,707.35
Bataan	46,787	2,339.35	Nueva Vizcaya	62,541	3,127.05
Batangas	257,715	12,885.75	Pampanga	223,754	11,187.70
Bohol	209,223	13,461.15	Pangasinan	397,902	19,895.10
Bulacan	221,742	11,187.10	Paragua	35,696	1,784.80
Cagayan	156,239	7,811.95	Rizal	150,923	7,516.15
Capiz	290,721	11,536.05	Romblon	52,848	2,612.40
Cavite	131,779	6,738.95	Samar	266,237	13,311.85
Cebu	654,727	32,696.35	Sorsogon	120,485	6,024.75
Ilocos Norte	178,965	8,949.75	Surigao	115,112	5,755.60
Ilocos Sur	187,411	9,570.55	Tarlac	135,107	6,755.25
Iloilo	410,315	20,515.75	Tayabas	204,739	10,236.95
Isabela	76,151	3,821.55	Union	137,839	6,891.95
Laguna	148,666	7,430.30	Zambales	104,549	5,227.45
Leyte	388,922	19,446.10			
Manila	279,928	10,996.40	Total	6,984,030	349,211.50
Masbate	43,675	2,183.75			

This estimate gives a total addition to the educational funds of about ₱350,000. This sum, if laid out in salaries of municipal teachers, allowing ₱20 per month to a teacher, which is about the average

^a There are also 16 Christian teachers for the Ilocano towns of Abra and 16 teachers for the Tinguian towns of Abra paid by the bureau of education. This number does not include 56 teachers in Moro Province and 7 in Lepanto-Bontoc.

salary paid in the archipelago, would provide about 1,420 additional Filipino teachers. With the promised increase to school funds derived from the land tax and from other municipal appropriations there will be possible a larger expenditure for school-teachers, so that it is anticipated that by the coming month of January 5,000 Filipino teachers may be employed. This, on the basis of 60 pupils to a teacher, would allow for suitable instruction of the 300,000 children whom it is expected will present themselves for public instruction by the beginning of another calendar year. A great difficulty, however, will be in finding the additional 1,500 young men and women with sufficient experience and maturity to enable them to give even the primary instruction outlined above. In only a few of the divisions has the number of young people available for appointment as teachers kept pace with the demand. It must be remembered that the great majority of municipal teachers at the present time, and the only class from whom the future teachers can be appointed, are those who have been acquiring English and experience in the conduct of schools in the six years that have elapsed since the American occupation of these islands. This normal training of teachers has been the point most emphasized in the work of the bureau of education from the very beginning, and the fact that we have as a result 3,500 instructors of good capability is a signal justification of this policy.

THE FILIPINO TEACHER.

The number of teachers employed in the public schools of the Philippine Islands at the end of Spanish rule, according to the *Guia de Filipinas* for 1898, was 2,167, including both men and women. This figure appears to be a purely formal estimate of the Spanish Government. It is identical for each year from 1895 to 1898 and was evidently based upon the fact that the Spanish plan contemplated a "maestro" and a "maestra" for each of the thousand or more pueblos. Nevertheless this plan was actually almost realized and this figure must be approximately accurate. The education possessed by these teachers, with very few exceptions, was almost without any value under the system of public instruction introduced with American occupation. Many of them also were past middle life and naturally found extreme difficulty in acquiring a new tongue and radically changing the methods of instruction. The present number of teachers derived from the class who were teaching the Spanish schools at the time of the American occupation is very small.

The great majority of Filipino teachers have received most of their education and all their training as teachers from American instructors. In the beginning the process of making Filipino teachers was exceedingly radical. Bright, intelligent young men and women were selected and organized in a teachers' class. Many of them after only a few months of English instruction commenced teaching their pupils with an English chart and an English primer. Not only were they entirely ignorant of English in the beginning, but their knowledge of the fundamental subjects of arithmetic, geography, and history was also very small. In their own instruction by the American teacher they could be kept but little in advance of the pupils in their classes. Frequently the teacher taught one week what he himself had acquired only the week preceding. Such a system of instruction, to be of

any value at all, naturally had to be accompanied by the constant assistance, supervision, and instruction by the American teacher. Surprising to say, the Filipino teacher under this method has made progress far in advance of anything that could have been anticipated. Many of those now employed are very fair instructors in the subjects falling within the primary course. They have developed well as disciplinarians. Schoolrooms in charge of Filipino teachers are now almost invariably quiet and well ordered. The daily programme is carried through on time and successfully. What perhaps is more gratifying than anything else they show reliability and fidelity to their work and increasing professional pride.

In addition to the daily instruction given by the resident American teacher, the teachers of each province or school division have been gathered together at least once a year for a period of from four to eight weeks in a normal institute. These institutes, the first of which was held in Manila in April and May, 1901, have been productive of excellent results. Instruction has followed not only the ordinary branches, English, arithmetic, geography, history, civics, and science studies, but a large amount of emphasis has been put upon methods. The simplest matters of class and school organization and conduct had to be explained and illustrated. The method of presenting the subject, teaching with the use of objects, the conduct of English conversation, etc., have been explained with great care and the teachers drilled in these methods. The result has been that the Filipino teachers have left these institutes with new conceptions of school management and of teaching, with great enthusiasm, and with the assured feeling that the government was seeking to raise their efficiency and value. Year by year the results have told in raising the quality of primary instruction.

Primary instruction, with the exception of a very few schools, is now conducted entirely in the English language. More than this, the conversation of the class room is in English. The Filipino teacher has been carefully instructed to address even the smallest pupil in short English sentences, discarding almost entirely the use of the native dialect from the beginning, in order to familiarize the child immediately with spoken English. Under these conditions the Filipino child, who is an exceedingly apt learner and possesses natural ability in the acquisition of languages, is making progress that is almost marvelous. The American supervising teacher spends only a few minutes a week in the class, and at this time is occupied very largely with the correction of errors of grammar and mistakes of pronunciation or in the method of presentation by the teacher, but in spite of this fact the little boys and girls who have received instruction practically only from a Filipino teacher have acquired a correct pronunciation of English and are able to speak with fair regard to grammatical rules. This result will be hardly credited by those who have not themselves had the opportunity to study the progress of this teaching on the ground.

The normal institutes held this last year exceeded in value those of any previous year. They were held in thirty-two provinces, the average duration being about five and one-half weeks. Service in conducting these vacation institutes was required for one month of all American teachers. Hence the institutes of 1904 were supported by almost the entire teaching strength of the bureau. Sessions usually continued

throughout the day. They were attended not only by the regularly appointed teachers, but by large numbers of young people who were seeking appointment. This class of students is known as "aspirantes." It is largely from them, in the lack of graduates of the normal school, that appointments to the position of teacher are made. As stated above, however, the number of qualified native teachers is by no means equal to the demand. Other branches of the insular service are usually better paid and excellent teachers are lost each year by their transfer to clerkships or other positions. At the same time it is noticeable that teachers remain in the teaching profession in spite of higher inducements elsewhere by reason of their interest in the work and the belief that in the service of teaching they are receiving benefits in the way of instruction which would not be so great in other branches of the service.

The greater number of the Filipino teachers are men, there being 2,138 men and 1,057 women. The service is open to both sexes, however, on identical terms and in many provinces the women teachers receive an average larger salary than the men. The average salary of Filipino teachers in the archipelago is ₱20.61 per month for twelve months to the year. It is nearly the same for men (₱20.76) and for women (₱20.99). The following table shows the number, sex, and salary of Filipino teachers in each province:

[This table was compiled August 1, 1904. The total number on that date was 3,134. Sixty-one additional teachers have been since appointed.]

Province.	Filipino teachers.			Average.		Salary, average.	Amount expended for salaries.		
	Male.	Female.	Total.	Male.	Female.		Male.	Female.	Total.
Manila.....	105	62	167	₱72.67	₱70.16	₱71.99	₱91,324.20	₱52,542.80	₱143,867.00

Total.....	2,080	1,054	3,134	20.76	20.99	20.61	511,838.06	265,490.94	777,329.00

As shown by this table, the average salary for a native teacher is highest in the city of Manila, where it amounts to ₱72.67 per month for men teachers, and ₱70.16 for women teachers; and it is lowest in Paragua, where it amounts to ₱7.50 for the men and ₱7.75 for the women. It is also very low in Bohol, ₱7.87 for the men and ₱8.02 for the women; in Zambales, ₱9.92 for men and ₱11.37 for women, and in Oriental Negros, where it is ₱11.07 for the men and ₱8.26 for the women.

The province paying most for teachers after the city of Manila is Sorsogon, where 16 men teachers receive an average of ₱29.37, and 9 women teachers receive an average of ₱30.55. It is almost the same in the contiguous province of Albay. The salaries paid teachers of both sexes are also above the average in Rizal, where it is ₱26.13; Tayabas, ₱26; Bulacan, ₱24.03, and Laguna, ₱23.20.

In addition to this number of Filipino teachers there is a considerable though undetermined number of "aspirantes" who are already giving service either without pay or for a very nominal wage. As an example, there are about forty of these young persons in the province of Pangasinan. They give, in most cases, one-half of their time to instruction, and as compensation are admitted to the teachers' class, which receives daily instruction from the American teacher. They also are accorded special privileges in attendance upon teachers' institutes, and are furnished with books and other aids to the prosecution of their studies. Their average age is between 15 and 16.

This class of "aspirantes," or apprentice teachers, should be very greatly increased. In nearly every branch of the service the government has pursued the policy of paying high wages to the Filipino assistants in advance of actual qualification to render satisfactory service. The principle of unpaid service to the government in return for training conferred or appointments in prospect has not been in operation. Clerks, teachers, and other public servants have been taken into paid employment before they were really qualified for usefulness and have been paid a relatively high grade of compensation during a period which was really one of training or apprenticeship. In the bureau of education it will be insisted upon in the future that a young person who is practically receiving his training as a teacher and at the same time gaining the benefits of an education shall render to the government a certain amount of service without compensation. Until by reason of training and experience his services have reached a mark of proved efficiency, salary, unless nominal in amount, shall not be paid or expected.

As the profession of teaching continues to gain in remuneration, permanency, and dignity, many young men and women should be willing to serve for a period of from one to three years as apprentice teachers without salary, in anticipation of receiving at the end of a suitable time appointments in a profession which provides regular and prompt advancement and an honorable social position.

As a still further relief to the teaching force, where classes have increased so that under a single Filipino teacher there are a hundred or more children enrolled, it is found to be practicable to divide these enormous classes into sections, putting each section in charge of a "pupil monitor," under whose help the younger pupils study, write, or engage in other occupation. This plan was most successfully adopted in the schools of the city of Iloilo. In one school where there

was a total enrollment last spring of 621 pupils, with 8 native teachers, the assignment of pupils as monitors made it possible to keep order and give good instruction. In one of the schools of Laoag, Ilocos Norte, the enrollment reached 700, with 3 paid teachers and about 20 monitors and "aspirantes." In the rules of the general superintendent governing the appointment of Filipino teachers it has seemed advisable to recognize these several grades of instructors and arrange the following schedule of positions and promotions for the Filipino teaching force:

(a) The insular teacher, with a salary ranging from ₱480 to ₱1,200 per annum.

(b) The municipal teacher, paid on an average of ₱240 per annum.

(c) The assistant municipal teacher, of less experience on a somewhat less salary.

(d) The apprentice teacher, serving without pay or at a nominal remuneration.

(e) The pupil monitor.

Eventually two or three years of study and experience should be represented by each of these successive changes.

As stated above, the Commission has now provided for the appointment of 284 Filipino insular teachers. The first of these were appointed a year ago this month. Their appointment produced a very favorable effect upon the teaching service. It advanced certain worthy and excellent teachers to a position in which they felt independent of an uncertain municipal salary, and it considerably increased their remuneration. It put them on a rank in point of pay and tenure of office with ordinary clerical positions as paid by provincial boards, provincial courts, or the insular government. By Act 1040 these teachers are now under the civil-service regulations. It is believed that under present conditions this number on insular pay should be considerably increased as the Filipino teachers gain in training and experience and it becomes possible to dispense with more American teachers. In some cases already Filipino teachers on insular pay act as supervising teachers.

AMERICAN TEACHERS.

At the beginning of the last school year the number of American teachers employed was 723. This number was gradually increased by new appointments until at the end of the school year, in March, 1904, the force was adequate for all schools then organized. However, the two and three year periods of service expired for many of these teachers during the summer and a considerable number of resignations took place at this time. Thus, the new school year began on June 13 with the force very shorthanded; less than 600 teachers were on duty at that time. This number was rapidly increased, however, by the arrival of new appointees and the return of old teachers to duty, so that on September 15, the date of this report, the force stands as follows: 772 on duty, including temporary appointees; 36 due to arrive under appointments made in the United States, and 48 on leave of absence. Owing to the large number of teachers on leave the temporary appointment of 49 persons as teachers had been made.

The American teaching force is kept considerably below the number originally contemplated. Act No. 74, which was passed in January, 1901, and which organized the bureau of education, authorized the employment of 1,000 American teachers. It may be a matter of interest and worthy of record that the number fixed in the original draft of this bill was only 500, but upon the urgent request of many Filipinos, who discussed the bill before the Commission in public meeting, the number was raised to 1,000, in order, if possible, to provide every municipality in the islands with at least one American teacher. The total number of teachers on duty at one time, however, never reached this figure. Our records show that up to September 1, 1904, there had been appointed and assigned to duty in the islands 1,401 teachers; but owing to frequent separations the largest number on duty at any one time was 928, which was in March, 1902. In the year 1901 approximately 889 teachers and division superintendents were appointed; of this number 45 sep the service the same year and 1 died. During the year 1902, 166 separated from the service and 15 died. During 1903, 152 of this number separated from the service and 8 died. In 1904, of this same original number, about 76 have separated from the service and 4 have died. From these figures it would appear that, of the 889 teachers appointed in the year 1901, only 426 now remain. There have been since the organization of the bureau 41 deaths in the service.

In the appropriation bill for the fiscal year 1904-5 the number of American teachers is fixed at 863, including a superintendent for the Philippine Normal School and a superintendent for the Philippine School of Arts and Trades. The compensation provided is shown by the following schedule, which can not be exceeded:

Superintendent, normal school.....	\$3,000
Superintendent, school of arts and trades.....	2,400
3 teachers, at \$2,000.....	6,000
8 teachers, at 1,800.....	14,400
10 teachers, at 1,600.....	16,000
50 teachers, at 1,500.....	75,000
80 teachers, at 1,400.....	112,000
60 teachers, at 1,300.....	78,000
350 teachers, at 1,200.....	420,000
50 teachers, at 1,100.....	55,000
137 teachers, at 1,000.....	137,000
113 teachers, at 900.....	101,700
863.....	1,020,500

Promotions are now made at all times of the year as vacancies in the higher positions occur and as the merit of any teacher becomes conspicuous. The prompt and adequate recognition of meritorious service, which is made possible by the graded list of salaries, has been the means of greatly encouraging the staff of teachers and adding to the attractiveness of the service. The majority of American teachers on entering the service are appointed at salaries of less than \$1,200, but on or before the end of a year's satisfactory service it is possible to advance any teacher who in that period of time demonstrates his worth to a salary of \$1,200, which is regarded as the mean or normal amount of compensation. Above this, the higher salaries are competitive and go to those teachers whose responsibilities are greatest

and whose value to the government is most clearly demonstrated. Compensation does not depend upon the particular station or appointment, but wholly upon the judged value of the man's services to the government. The supervisor of a large rural district is in general recognized as doing a most important and responsible work, although it can not be said that one of these classes of teachers is necessarily to receive a higher compensation than another. One very satisfactory evidence of the improvement in the organization of the school work and the growth and esprit de corps has been the prompt and satisfactory way in which new teachers have settled into their duties and almost without delay successfully undertaken their work, even when, as frequently happens, they have been assigned alone.

The work of the teacher, as already suggested, is of two main kinds: Supervising the rural districts and teaching in the provincial high schools or in one of the three technical schools maintained by the government. If a teacher is assigned to a provincial high school he becomes a member of a small American community of congenial tastes and high character. His home is usually in the capital of the province, his associates congenial, the surroundings sufficiently comfortable, and his work corresponds very closely to that of a schoolroom instructor in the United States. The work of district supervision is, however, pursued under quite different conditions. The teacher usually lives alone in a town separated by some miles from other communities and very frequently he is the only American resident in a large area. As supervising teacher he is the representative of the division superintendent in the district. He must consult tactfully and helpfully with the municipal president and council, represent the school needs of the locality to this body and obtain their cooperation and financial support. His relationship with the people of the town must be kindly, helpful, intimate, and above reproach. He has under him a corps of native teachers of from half a dozen to thirty, whose work must be laid out before them each week, or, often, each day, and who must be constantly visited and assisted in its discharge. He has the further task of organizing new schools, especially in those barrios or hamlets which are far separated from the town center and which are frequently densely ignorant and lawless. The greater part of his time is spent in school visitation, sometimes on foot, sometimes by horse or vehicle, and frequently by banca or canoe on streams and esteros that connect the different hamlets of the municipality. This work, which must be followed throughout the stormy season, is frequently onerous and perilous, and can usually be successfully discharged only by men of strong constitution and more than usual courage and resolution. Except for the fact that the teacher is accorded respect and protection by practically every class of people in the archipelago this work would frequently contain a considerable element of danger. By reason of their profession, however, teachers are enabled to visit regularly remote hamlets of their districts even in provinces still disturbed by bandits or "ladrones," where a single man in military uniform might not go without personal danger. As a part of their duty these teachers have to acquaint themselves thoroughly with the geography of their districts. They must know each hamlet and road, and they must thoroughly understand the social composition of the community where they are working. This is the work which can obviously only be performed by a man, and for

this reason the great majority of the teaching force is and must continue to be men.

In many cases, however, the assignment of a man and wife together is an excellent arrangement. It allows the man to carry on the work of supervision and organization and affords a woman teacher for the instruction of the more advanced classes of the central municipal school. There are forty-two married couples thus stationed together in districts of large size in the archipelago. Other women teachers in the employ of the bureau are, with few exceptions, stationed at provincial high schools. In both of these kinds of work, women teachers, while their number is necessarily limited, are most acceptable, both to the bureau and to the people among whom they teach. No difference in compensation is recognized between that of the American woman teacher and that of the American man teacher.

Were it not for the warm personal attachments which spring up between the American teacher and the people among whom he lives, his sincere interest in his work, and the cordiality, hospitality and affection of the native people for the teacher, the lives of many of these American supervising teachers would be intolerably lonely. There are a good many cases where they are separated by at least a day's arduous travel by land or boat from any other teacher, and weeks frequently go by them without the sight of another white face. The time, however, seems to pass rather quickly for them. There have been no instances of despondency or melancholia during the past year. These teachers are doubtless sustained against the loneliness of their stations by the realization that a spring vacation during the hot season awaits them, when they can return for some weeks' time to the companionship of men of their own race or can enjoy a wide change of scene and a variety of experience by traveling in the surrounding countries of the Far East. Most of them rent homes in the town centers, have their own establishments and servants, which can be maintained at surprisingly small expense according to American standards. At other times the American teacher, if alone, boards with some Filipino family, and in some cases on the invitation of the cura, makes his home with the priest in the town convento.

The general superintendent wishes to bear testimony here to the manliness and uprightness of the lives of these teachers. They have come from the best homes and in many cases from the best educational institutions of the United States. Although surrounded by conditions trying to character, they have remained true to those ideals of conduct set by the American home and college.

The spirit prevailing among American teachers at the present time is above criticism. The conditions of the service have been carefully defined, teachers have become accustomed to their life, their work is well organized and carefully supervised by the division superintendents, and the past year has seen an exceedingly small number of dissatisfied appointees. These have now, without exception, retired from the service. The teachers of the present force have the correct spirit toward their work, are disposed to do their whole duty, and, with few exceptions, are giving to the service more time than is actually required by law. Greater satisfaction has resulted from the rigor and impartiality with which the rules of the service have been enforced in the past year. The compensation and privileges which teachers receive are now such that the service does not suffer by com-

parison with that of any other bureau. Appointments in the United States are now made exclusively from an eligible list certified by the Philippine civil-service board as a result of examinations conducted by the United States Civil Service Commission. Those appointed contract for two years of service in the islands. Their traveling expenses to Manila are paid, and, in order to protect the government, an amount equivalent to this is deducted from their salaries at the rate of 10 per cent of their salaries per month until the total cost to the government has been repaid. Upon the completion of two years' satisfactory service the amount thus deducted is returned to the teacher. At the end of three years' satisfactory service the teacher may resign and receive transportation of equal cost to the government by any other route, together with half salary for thirty days and full pay for any vacation which immediately follows his resignation. If he elects to remain in the service, but desires to return to the United States on leave, he may be granted such leave, on full pay, for the vacation period of his school division, which is now ten weeks, with sixty days' half salary covering the voyage going and returning. Five hours per day is the minimum of the teacher's service in the schoolroom, while his days of actual service are usually five per week. Additional hours of service may, however, be required of any teacher, and while Saturday is generally a holiday, it may be made a day of duty. The school year is uniform throughout the islands and is fixed by the general superintendent at forty weeks, with twelve weeks of vacation, ten of which are consecutive during the months of April, May and June, and two are at the Christmas holidays. These ten weeks allow every teacher time to visit any of the nearby oriental countries which he may desire to see, and give him a chance to return to this work refreshed by a change of climate and new scenes.

By the provisions of Act No. 1040 teachers are not entitled to vacation leave, but the school vacation is more than the accrued and vacation leave allowed to other civil employees.

There are compensations in the life of a teacher in the provincial towns. First, and most practical, is the question of expense. Living is undoubtedly 50 per cent cheaper in provincial towns, except perhaps Iloilo and Cebu, than in Manila, and this fact has appealed to some teachers forcibly enough to lead them to request that they be transferred to such towns. Again, a teacher in a provincial town, particularly where he is the only American, has opportunity to become a very large factor in the life of his pueblo, and to become an important influence for good. This appeals to the best part of a teacher's nature and is no small compensation for the hardships naturally incident to such positions.

The emoluments and opportunities should and do call forth a class of young men who are products of the best American homes and universities.

CIVIL SERVICE.

Regulations governing the teaching force have been made more definite and satisfactory by reason of having been made a part of the general civil-service rules governing insular employment. This important step became effective by the provisions of Act No. 589 on September 1, 1903. It resulted in placing the entire force of the bureau of education under the same general civil-service regulations

as other branches of the service. The civil-service board is empowered to determine the qualifications for admission to the service. The passing of a written examination was made requisite for eligibility for promotion of those already in the service or of entrance for those seeking admission. This examination has been successfully passed by 30 per cent of the present teaching force, or 217 in all. While for some months there was a considerable amount of misunderstanding of the conditions accompanying the change and a consequent prejudice against it, this was no greater than should have been expected. As the gain in impartiality of treatment became apparent, this feeling was gradually changed until now a general satisfaction appears to prevail on the part of the teaching force with reference to the change.

The most just criticism to which the conduct of this office was formerly subjected by teachers was the difference of treatment accorded teachers in the matters of compensation, leave, and absence by reason of sickness. The danger of such discrimination is entirely removed by the passage of the force under the ordinary regulations governing the service.

Toward the close of the last school year, as teachers presented resignations from the service or requests for leave of absence with permission to visit the United States, a large amount of attention was devoted to adjusting, impartially and according to the conditions fixed by law, the many and various cases that arose. This matter was greatly complicated by the fact that teachers had been appointed at different intervals and had had very dissimilar periods of service, and that the amount of sick leave taken had varied greatly, and was frequently in excess of that allowed by act No. 80, and by the further fact that the additional service in vacation institutes had been very unequally borne. The settlement of these questions for the entire teaching force involved an enormous amount of correspondence and the submission of a very large number of cases to the secretary of public instruction for his decision. At an early date this office endeavored to lay down impartial rules governing separations from the service, the discharge of vacation institute work, and the enjoyment of leaves of absence. (Attention is invited to the circulars on this matter inclosed as an appendix.) Act No. 1040, passed in the month of February, made the conditions of service still more definite, and, while in some respects it made them more rigorous, it was correspondingly liberal in others.

UNIFORM COURSES OF STUDY.

In accordance with his legally prescribed duties, the general superintendent, on the 15th of June, 1904, issued prescribed uniform courses of instruction. Prior to the issuance of the bulletin upon this subject (Bulletin No. 7, bureau of education) considerable diversity existed in all school work.

These prescribed courses are for primary, intermediate, and secondary schools. As stated above, the primary course is taught almost entirely by Filipino teachers, under American supervision. It is planned to have this primary course taught in full in all barrio schools, the pupil to proceed therefrom to the central municipal school for instruction in the intermediate course, and thence to the provin-

cial high school for one of the secondary courses which aim to supply him with a profession or calling. At present, however, in the majority of barrio schools it is not possible to give more than two years of primary instruction, while the central municipal school doing intermediate work is the exception rather than the rule. The provincial high schools are giving their attention in the current year almost exclusively to intermediate work. This condition is indicative of the careful effort that is being made to grade pupils no higher than is warranted by their facility in reading and writing English. Were only the informational part of their training to be considered, as is usually the case for American school children, the resultant grading would be considerably higher than it is, for the Filipino student acquires knowledge of facts more rapidly than facility to explain them in correct English, either written or spoken. No students will be admitted to secondary courses whose written and spoken English is not approximately equivalent to that of an American school boy upon entering high school.

At the opening of the school year 1904-5 there were fully 200 such students in the public schools. In the great majority of these cases this advancement represented the work of but three years under American instruction, a result which speaks for itself of the ardor and capabilities of the Filipino students. To young men of such attainment, however, government positions, averaging fully \$20 gold per month, are open, and it becomes difficult for the pupil of limited means to continue his education at the sacrifice of immediate financial returns. Hence the majority of these students have become teachers or government employees in other capacities, or have been sent to America upon the government scholarships. With such factors contributing to the reduction in number of students presenting themselves for secondary instruction, and with the constantly increasing demand for the services of graduates from the intermediate course, especially as teachers, it has been possible for the bureau to proceed very gradually and carefully in the establishment of the secondary courses herein outlined. Not more than half of the provincial schools have classes as large as twelve which are now prepared to take up secondary courses.

Thus the intermediate course represents the field of work in which the great bulk of "advanced" teaching is being done. The three years of this course are denominated Grades IV, V, and VI, respectively. With but few exceptions, classes of Grades V and VI are found only in the provincial high schools, but it is common to find classes of Grade IV in central municipal schools which have been organized two years or more.

The intermediate course completes the elementary instruction. It aims to give the child an actual practical fitting for life; to equip him for new duties and responsibilities, and to cultivate in him qualities of unselfishness and honor. This course presents at the present time the best field for experiment on new lines, and it is here that the results of education upon the race can be studied most profitably. In the preparation of this course little help was gained by a study of typical school curricula. The principle followed was to select those groups of study most immediately useful and helpful, rather than imitate prescribed lines. There follows an

abstract from Bulletin No. 7 of the bureau of education. This and all other bulletins of the bureau are to be had upon application.

THE INTERMEDIATE COURSE.

(To be given in all provincial schools as a preparation for entrance to the secondary courses, and in such municipalities as can afford the necessary buildings and teachers for this instruction.)

GRADE IV.

Language and grammar (weight, two-fifths).—A third reader. Elements of grammar and composition. Supplementary reading to be chosen.

Arithmetic (weight, one-fifth).—Fundamentals of integers and compound fractions.

Geography (weight, one-fifth).—Chief emphasis upon memorizing the main facts of world geography. Study of the people and economic products of different countries.

Science studies (weight, one-fifth).—Lessons on familiar Philippine plants (three times a week). Boys: School garden or other outdoor work (twice a week). Girls: Housekeeping—care of house, the dining room, bedrooms, etc.; plain sewing throughout the year (twice a week). Physical exercise and athletic games throughout the course.

GRADE V.

Language and grammar (weight, two-fifths).—A fourth reader. Intermediate language book. Supplementary readers. A reader on Philippine history.

Arithmetic (weight, one-fifth).—Fractions, common and decimal, and the metric system.

Geography (weight, one-fifth).—Selective completion of advanced geography, the chief emphasis being laid upon physical features of land and water. Special instruction in the physiography and meteorology of the Philippine Islands—volcanoes, earthquakes, monsoons, typhoons, coral formation, wet and dry seasons, etc.

Science studies (weight, one-fifth).—Lessons on animal life of Malaysia (three times a week). Inasmuch as classes doing this grade of work in 1904-5 have not had the plant studies of Grade IV, their work this year will be divided between plants and animals, the animal studies being taken up in the second half year. Boys: Agriculture; a general course based on a text on elementary agriculture, accompanied by cultivation of staple Philippine economic plants (twice a week). Girls: Housekeeping; cooking and serving meals (twice a week).

GRADE VI.

Language and grammar (weight, two-fifths).—Fifth or sixth reader. Elements of grammar completed. Supplementary reading drawn from epic tales and stories of history.

Arithmetic (weight, one-fifth).—Completed, with special attention paid to commercial operations.

Science studies (weight, one-fifth).—Physiology and hygiene: Human anatomy and physiology, based on text-book work, with demonstrations by the teacher. Study of epidemic diseases, especially through the bulletins of the board of health (three times a week). Boys: Carpentry and ironwork (twice a week). Girls: Housekeeping; care of sick, sick diet, etc. (twice a week).

Government (weight, one-fifth).—The government of the Philippine Islands. Study of the municipal and provincial codes. The instructions of President McKinley to the Philippine Commission. The act of Congress of July, 1902. The class will be organized successively into a municipal council, a provincial board, and a legislative assembly. In the latter body such public questions relative to the Philippines as may properly be discussed by the Philippine legislature may be debated. The class will also read pamphlets prepared by the bureau on Government in the United States, American Politics and Parliamentary Law, and Colonial Governments of European States.

Emphasis upon "science studies."—Larger place is given to science work than is usual in the public schools of America. Training in the English language and literature supplies in the Philippine system the place of the classical studies of American school programmes. Time is gained thereby for that training in exact methods and concrete subject-matter for which there is peculiar need.

Another difference between American and Philippine educational conditions may be noted in this connection. An important function of American educational institutions had lain in the direction of modifying the strongly materialistic tendencies of American life.

No stimulus has been needed to supplement the national tendency toward the acquirement of material benefits. Such tendency has ever been an integral part of the environmental conditions and racial temperament. It has led to the highest material advancement, while the academic spirit has been as a guard against its stifling of the nonmaterial.

Here in the Philippines the demand upon the academic spirit is reversed. The great need of Filipino national life is precisely in the direction of effort to acquire material benefits. The graces of the culture studies may well await later lessons. The crying need now is for a stimulus which environment and racial history have for centuries denied—a stimulus to “practical” activity. It is with that training which gives the most tangible benefits that our secondary and specialized education proposes to concern itself. Elementary training of such character is given under the “science studies,” while the bulk of the work in the secondary courses is to the end of efficient and scientific conduction of various industrial activities.

We look to the Japanese for illustration of very much that is helpful in solving Philippine problems. There the most notable educational achievement of modern times has been effected. They have shown no conservatism in the work of national regeneration. Nowhere is this more apparent than in their educational system. In it we find a remarkably large place given to those subjects of which Old Japan was ignorant and in need and which in an educational scheme may be grouped as “science studies.” Under this caption the Philippine courses of instruction prescribe a large amount of work which finds its subject-matter in those things which most closely touch the daily life of the Filipino and affect his economic status.

Education in the Philippines is concerned with a people whose lack of exactness, especially in their mental processes, is a conspicuous racial fault. The Filipino has an instinctive and intense reluctance to admit ignorance. This characteristic has often earned him an otherwise undeserved reputation for unreliability or dishonesty. He fails to appreciate the desirability of accuracy. Training in science, properly given, will develop a new respect for exactness and a conception of the inexpediency of misstatement, proving, perhaps, a better corrective than methods which meet this fault by more direct attack.

The plant and animal studies place emphasis upon economic values. They give to all students information fundamentally related to the improvement and expansion of agriculture in the islands, information which is more expanded and accompanied by practical field work in the secondary course in agriculture. Their pedagogical purpose on the other hand is to induce accurate first-hand observation and reasoning about facts observed. Especial difficulty lies in overcoming the tendency of the Filipino pupil to learn merely by rote. The science studies largely eliminate the use of this method in that they require answers as the fruit of reasoning rather than of memory. Filipino boys and girls are quite alike in their enthusiasm for work which is out of doors, away from the printed page, and concerns things which they can handle, which they have seen

every day, and which have very considerable economic importance for them.

In this work each pair of students is provided with a dissecting microscope and dissecting instruments, while the teacher has a compound microscope for demonstration purposes. The note and drawing books prepared by the pupils compare more than favorably with those prepared in America in similar work at this stage. In so far as a text is necessary, texts are used which are based wholly upon local material and were written especially for this purpose.

Agriculture.—As a practical part of the "science studies" the boys in the intermediate course receive instruction twice a week in garden work and agriculture in the first two years. In the secondary courses place is provided for the further elaboration of this work. On account of conditions already described this work has not been fully installed, but full equipment has been sent to the following schools:

The provincial high schools at Capiz, in Panay, and Tuguegarao, in Cagayan, are well supplied with equipment for agricultural work, both of intermediate and secondary character. The work in these schools has been in operation for about a year and the results obtained exceed reasonable expectations. The provincial high schools in San Isidro, Nueva Ecija, and in San Fernando, La Union, are also equipped with tools for intermediate work of this description. The provincial high school of Batangas is preparing to give agricultural work of a still more extensive character. Cooperation has been begun with the experimental farm conducted by the bureau of agriculture at Batangas, and a well-trained teacher of scientific agriculture is stationed in the school. Additional schools are to be supplied with agricultural tools and equipment as rapidly as suitable tracts of ground are secured.

Carpentry and ironwork.—Equipment for carpentry teaching has been more fully supplied. The high schools at Cavite, Cebu, Batangas, Tuguegarao, Bacolod, Pagsanjan de Laguna, Tarlac, San Fernando de Union, Tagbilaran, Capiz, San Isidro, Masbate, Tanauan in Batangas, and Romblon are all supplied with tools and in most cases with qualified instructors, three of whom are graduates of American polytechnic institutions. Special teachers for this work have also been assigned to Cavite, Cebu, Batangas, and Tuguegarao. At Batangas a separate school building for this work was erected a year ago. At Tuguegarao and at Bacolod provision has been made for the erection of shop buildings on a larger scale than any yet provided, which will admit of machine tools, power engines, and complete outfits for wood and iron working. The schools of San Fernando de Union and Tuguegarao are also provided with ironworking tools. At Apalit, Pampanga, a small ironworking shop is under construction, which will be equipped with forges, bench tools, and drawing equipment. It will afford provision for the instruction in this trade of sixty boys at one time. The reason for locating the school at this point is that Apalit contains quite a considerable population of smiths and ironworkers, and public interest is very great in having this trade taught in an improved manner. The people of the town subscribed sufficient funds to purchase a good site of land and the municipality borrowed from the province the sum of ₱1,000 for the erection of a shop.

The sum of \$22,000 has this year been expended for this class of work. Among the items included in this order are eight class equipments of carpentry tools, eight of drawing instruments, and three of ironworking tools, each equipment being complete for a class of twenty. The equipment of schools for this work will probably go forward quite as rapidly as that of gardening and agriculture, although the work of securing sufficient ground for more than a small school garden is progressing very steadily. Many of the municipal schools also are giving special attention to the preparation of small garden plats by the boys, and special encouragement is given to the decorative treatment of school grounds.

Housekeeping, etc.—While the boys in the intermediate grades are engaged twice a week in gardening, agriculture, or tool work, the girls of the same classes at corresponding periods are to be given practical training in housekeeping and decoration, sanitation, cooking, care of children and invalids, sewing, etc. An excellent and most suggestive beginning has been made at the high school at Iba, Zambales, which has been followed by similar instances at Batangas, Tarlac, Tuguegarao and a few other schools. For this teaching a "model Filipino house" is to be built adjacent to all schools giving intermediate work with a kitchen garden, and the improved yards and surroundings. Some of these houses are already in process of erection and the bureau is preparing a special bulletin dealing with instruction in these matters. This bulletin is being compiled from contribution from various teachers interested in this work, and includes many recipes for the preparation of Filipino foods. The aim is to give training in domestic management within the financial capacities of the average native family. Matters of diet, improved methods of preparing and serving foods, table manners, etc., are made the subject of actual demonstration and practise. The furniture for these buildings will be built by boys in the school shops on plans furnished by the bureau.

Training in government and civic duties.—Of equal importance is the need of training in civic life. If we are to look forward to the time when the Filipino people are to be, at least in a large part, self-governing, certainly the obligation exists to supply the best possible training to that end. Hence, special emphasis is placed upon the teaching of methods and ethics of government, of the social relations and obligations of the individual, of fundamental political economy, and especially of the rights and right use of the elective franchise. There are in the public schools at present 12,000 male pupils who within the next three years will reach the age of 23 and will attain elective franchise through possessing the educational qualifications. Within six years upward of 60,000 will similarly attain the franchise. The necessity for giving these pupils, without delay, adequate instruction in civics and politics is manifest and such provision is made in all three of the courses of study. In the primary course special instruction is given to the older boys who are unable to continue their study in intermediate schools. In Grade VI, the last year of the intermediate course, very thorough study is made of the present system of Philippine government, familiarity is gained with the municipal and provincial codes and other important acts of the Commission which are put into the hands of the students. State papers dealing with the Philippines are also read, and particular examination made of the act of Con-

gress of July 1, 1902. Additional work in government and colonial history is prescribed in the secondary course.

Physical exercises and athletics.—There is manifest need for large attention to these matters. The Filipino is underdeveloped physically. This is particularly true of the students in the high schools, whose social position relieves them of all forms of manual labor and exercise. It is true of the boys even more than of the girls. That great progress can be made in their physical development under proper conditions has been demonstrated. In the case of students sent to America on government scholarships, improvement has been noticed at the end of a single year's residence in California, involving as it did participation in American athletic games and exercises, and the enjoyment of a more nourishing diet.

Many cases of physical injury, at least of a temporary character, have resulted from overzealous efforts on the part of students in preparing their class work. The average high school student, if required by his teacher to prepare more than a due amount of work, will deprive himself of a proper amount of sleep in order to accomplish it. This has been especially noticeable in the case of students in attendance upon vacation normal institutes. Young men and young women on these occasions have been found to be continuing their studies until 1 or 2 o'clock in the morning, resuming them at 6. In these cases regulations limiting the hours of study and retirement were necessary.

Provision in the new courses of study for but five recitation periods of forty minutes' length per day was made largely with this point in view. Sufficient time is thereby allowed for outdoor games as well as indoor physical exercises, and American teachers have been directed to give special attention to this work. An athletic spirit has been fostered among the boys, who, at nearly every high school, have organized baseball teams. Interscholastic games have been arranged. Filipinos take to baseball with enthusiasm and show remarkable skill at it. They need no stimulus to school spirit in the support of their teams. At the provincial schools, as rapidly as conditions permit, facilities are to be provided in the way of outdoor gymnastic apparatus, cinder tracks, dressing rooms, and baths.

As noted in another part of this report, attention is also being given to improvement of the usual Filipino diet so far as the circumstances of the average family will permit. This is especially to be fostered in the case of the diet of infants and young children, and of children attending school. The rate of infant and adolescent mortality, as has been reasonably established, can be greatly reduced by somewhat more careful attention in the manner of living and diet in early years.

SECONDARY SCHOOLS.

After what has been previously stated, it will be understood that secondary instruction is only beginning with the current school year. Schools for more advanced instruction than that provided by the primary course were intended also to provide for students whose greater age makes them reluctant to attend the barrio schools. Legal provision was made for these institutions in Act No. 372, quoted above. Such schools have been organized in 35 provinces, with attendance varying from 75 to 600. By an understanding which has

already been suggested, the provincial boards are expected to provide by rental or construction for housing of these schools, while the bureau of education supplies teachers and educational equipment. This arrangement has led to the designation of these schools for higher instruction as "provincial schools," i. e., schools supported, at least in part, by the provincial governments. This somewhat ambiguous expression has been recently modified upon the forms of the bureau into "provincial high schools." There are, in addition to these, two high schools in the city of Manila, maintained entirely out of insular funds with the exception of the rental of the buildings, which is paid from appropriations by the municipal board of Manila. American teachers are provided for these schools in about the proportion of one to each fifty pupils, and the work of the pupils is organized upon the basis of five forty-minute recitation periods, exclusive of music. Inasmuch as the teaching service required of each teacher is five hours per day, such basis permits the arrangement of schedules in the proportion of four teachers at most to each five classes, so that no classes exceed forty in size.

As has been stated, these schools are not at present doing the work of the prescribed secondary courses. They are almost wholly engaged in the work of the intermediate course. This work, however, is to be relegated as rapidly as possible to the central municipal schools, leaving the provincial high schools to perform their intended function, which is to act as training schools for fitting young men and women for certain definite occupations demanded by the economic conditions of the respective provinces, or for entrance into colleges or universities of American type. The vocations for which the secondary courses will prepare are teaching, agriculture, business, and several arts and crafts. In such capacity the provincial high school has a work before it which is not comparable to that of the American high school. Its scope will be broader, its curriculum more devoted to technical subjects, and its whole relationship to the people whose needs it seeks to meet is larger and more vital. Under present conditions of transportation and travel, the provinces of the Philippines are almost as remote from Manila, at least for educational purposes, as the various States of the United States are from Washington. Hence it becomes desirable that the provincial high schools should seek to provide for all such educational needs as are immediately demanded in their respective provinces so far as circumstances allow. Each province must be to a considerable extent educationally independent, and the provincial high school is the center of its system. It will perform, as the time comes, the function of general libraries, of public lecture courses, and of polytechnic and normal schools. It will be to the province, in a smaller way, what colleges and agricultural schools, schools of music and fine arts, and even State universities, are to the States. These schools will seek to so relate themselves in every possible way to the educational needs of their environment as to be of greatest benefit to the largest number. The secondary courses to receive chief emphasis will depend upon the particular economic conditions of each province, that a fortunate relation may result between educational opportunities and public needs.

The government of the Philippines has expended, and probably will continue to expend, large sums upon the work of various bureaus organized for scientific investigations. The primary purpose of these

bureaus is their benefit to the Filipino people. The result of their work appears from time to time in the form of bulletins of more or less technical phraseology. The great amount of valuable information imparted thereby will be comparatively inaccessible to the public as a whole unless it be imparted through the agency of the school. The bureau of education, especially through its provincial high schools, seeks to act as an intermediary of the scientific bureaus and the people.

To the ends which have been outlined, secondary courses have been organized as follows:

I.—THE COURSE IN LITERATURE, HISTORY, AND THE SCIENCES.

This course will compare with the American high school course, although the requisites for admission are less difficult and several courses taught in American high schools here receive less consideration. This will be most noticeable in two lines. The first is the classical languages. The slight attention paid to Latin and the elimination of Greek are made necessary by the importance of other subjects which must, in view of immediate needs, be emphasized. While in the United States we depend, in our training of the youth, upon Latin and Greek for giving breadth of mind and depth of intellectual and moral insight, here in the Philippines we must depend upon English literature for these same purposes. It is believed that English is adequate to impart these essentials of education, both in disciplinary and spiritual aspects. The other notable difference is in the teaching of higher mathematics. There can be found place in such a course as this for hardly more than the briefest elements of algebra and geometry. Advanced work in these branches, in trigonometry, and the higher mathematics must necessarily be left to be pursued in special courses leading up to professional training. The course has been drawn to emphasize the subjects of education which have heretofore been much neglected in the Philippines, and these appear to be literature, history, and the modern sciences.

This course will doubtless receive modification as it is put to the test of actual trial, but a provisional outline of the subjects of study follows:

English literature.—The first two years' work will deal with minor prose and poetical selections, including at least two complete works or poems. Irving's *Alhambra* and Longfellow's *Evangeline* are suggested for the first year. The work in the first half of the third year will be devoted largely to the English drama. The pupils will read *Julius Cæsar*, *the Merchant of Venice*, and other plays. In the second half of the third year the study will be English fiction, and several standard novels will be read. In the fourth year a study will be made of the essay and the oration. In this last year of work, as a part of the study of argumentative literature, attention will be given to the elements of logic, the pupils seeking their illustrations in the works which they are studying, and constant effort will be made to strengthen the reasoning faculties of the pupils.

Composition, themes, and the preparation of rhetorical parts to be read or delivered before the school assembly will be a feature of the work throughout the four years.

History.—The study of history will be carried through the four years. It will commence with the study of Philippine history, the first half year being devoted to the general outlines of the social and

political history of the islands, and the second half year to the study of the history and status of Philippine industry and commerce. In the second year the pupils will take up general European history, covering the history of Greece and Rome and the early Middle Ages. In the third year the pupils will study the modern history of Europe and European colonies, and in the fourth year the work will be devoted entirely to the political history and institutions of the United States.

The sciences.—In the first year the science work will be a systematic treatment of botany; in the second year the anatomy and physiology of animals; in the third year physiography, paleontology, and meteorology, with some attention to general anthropology. In the fourth year the work will consist entirely of physics, with individual laboratory work and experimentation for the pupils.

Mathematics.—In the first year the elements of algebra, and in the second year the elements of plane and solid geometry will be studied.

Language.—The student may elect either Latin, Spanish, or French and the work may be carried through the four years. Probably the best plan for the students to pursue will be to take Latin for two years and Spanish or French for two years, and such courses in language can be arranged for those who desire to take the language work.

II.—THE COURSE IN TEACHING.

This course will cover only two years in the provincial schools. Students who desire to follow the training for teachers further should, after the completion of this two years' work, be admitted into the Philippine Normal School at Manila for two years of final instruction. In the first two years of the course in teaching the study of literature, history, mathematics, and the sciences are identical with the course in literature, history, and the sciences.

Theory and practice of teaching.—In place of languages the pupil enrolled for the course for teaching will be given daily instruction in methods of teaching. In the second year he will study the school systems of the United States and European countries; the progress of education in the Far East, particularly in Japan, will receive attention, and all students in this course will receive careful instruction in matters of the school law and school organization in the Philippine Islands. In addition to this work, all pupils in the course for teaching will be given daily training in a primary practice class, which will be made up of little children, and conducted in connection with the provincial school.

III.—THE COURSE IN COMMERCE.

English.—The English work in the first two years of this course will follow in the main that of the course in literature, history, and the sciences, and in addition the pupils will receive a large amount of drill in copying from dictation and in orthography.

Mathematics.—Bookkeeping, to include journalizing, single and double entry, posting to ledger, submission of accounts, bank accounts, trial balances, balancing of books, expediting of accounts, and auditing. Business accounts, to include mensuration, weights and measures, systems of currency in use in oriental trade, metric system, percentage, commission, commercial discount, computation

of taxes, duties and customs, insurance, interest, promissory notes, bank accounts, saving-bank accounts, exchange, etc.

Commercial geography.—This subject will be given in the first year of the course in commerce. It should include the study of staple products of international commerce, with the conditions of their production, their markets, and factors determining their prices. A text on commercial geography will be read. Study of United States Consular Reports and similar literature will be made.

Modern languages.—The study of Spanish, French, or some other modern language should be carried through the two years of this course, special attention being paid to the commercial use of these languages.

Commercial law.—In the second year a text-book on business law will be read, and a special study will be made of the Philippine commercial code and the acts of the Philippine Commission which modify its provisions.

History.—In the first year's work history will conform to the course in history of the Philippines prescribed in the course in literature, history, and the sciences. The second half of the first year's work will take up the study of the history of Philippine industry and commerce, and, in the absence of text-books, will require considerable preparation on the part of the teacher. The following topics are suggested for this subject of study: The old Acapulco trade and the restrictive measures of the Spanish Government for the protection of the interests of the peninsula; the Government's attempts to foster special industries, beginning with the governorship of Arandia; the tobacco monopoly; the economic society "Amigos del Pais;" the opening of the port of Manila to foreign commerce in 1835; American trade with the Philippines between 1835 and the civil war in the United States; the compilation of statistics upon Philippine trade since the opening of the port of Manila in 1835; the hemp industry; the sugar industry, including the development of the sugar "haciendas;" special study of the markets for the staple Philippine products; effect upon the industries of the Philippines of the protective systems of Europe and the United States; the students, under the direction of the teacher, to pursue original investigations into data concerning Philippine commerce.

Stenography and telegraphy.—In the second year of the course in commerce the pupil may elect to pursue either stenography or telegraphy. One year's work in either of these subjects, if entered upon with proper qualifications, will prepare the student fairly well for a position as stenographer or telegrapher. The work in the second year is so arranged as to allow two daily periods for practice work in either of these subjects.

Throughout the two years of the course the student should have constant practice in the use of the typewriter. Machines can be employed in connection with the work in English and other branches.

IV.—THE COURSE IN AGRICULTURE.

Literature.—The first two years in English will conform to the work in the course in literature, history, and the sciences. In the third year of this course the pupil may take either the third or fourth year work in literature, as he may elect.

History.—The work in history will likewise conform with that in the course in literature, history, and the sciences. The student may, if he choose, elect the fourth-year history work in place of the third year.

Science.—The science required will follow the prescribed subjects of study in the first three years of the course in literature, history, and the sciences: Botany in the first year, anatomy and physiology of animals in the second, physiography, etc., in the third year.

Agriculture.—One period of work each day will be devoted to agriculture, as a class subject, and one period each day to field work, which should be considerably extended by work in field and garden outside of the regular school hours. No detailed requirements for this work in agriculture are here given. They will be the subject of general experiment and will be prescribed at some future time. It may be stated, however, that the subjects to be taken up should include tropical plant crops, their selection, propagation, cultivation, and care, including the use of fertilizers, protection from injurious insects, etc. Study should be made of plant diseases and the economic treatment of plants or plant technology. Consideration may also be given, if time permits, to trees of economic value of the Philippines, their preservation and propagation, although the general subject of forestry will have to be added as a post-graduate course to the general course in agriculture. Provision is made in other branches of the cognate sciences covered in this course for general instruction in the elements of botany, the elements of entomology, and meteorology.

The breeding and care of domestic animals, with veterinary science, will have to be treated somewhat differently in different schools, as local conditions determine. Work in agricultural and physiological chemistry and agricultural geology can not be directly pursued as a subject of instruction by the pupils, but in many schools, in connection with the agricultural instruction, it may ultimately be possible to establish a small laboratory for investigation into soils and fertilizers and for the analysis of farm products, and for other investigations into the resources of the islands, such as dyewoods, medicinal plants, fungi, new food products, etc.

In connection with the work of the courses in arts and crafts, the agricultural classes can make investigation into local arts and industries, such as dyeing, weaving, pottery manufacture, etc. It has been found in the agricultural schools in Japan that a considerable impetus has been given to the native industries of the country by such work as is here outlined.

V.—THE COURSES IN ARTS AND CRAFTS.

The two lines of work at present are woodworking and ironworking. Two years of this work should be done in the provincial schools, and pupils desiring further instruction should be admitted into the Philippine School of Arts and Trades, where they may elect to follow any one of the courses given in that institution, and which will ordinarily require two years of further work.

English.—In these courses for provincial schools the English will require two years and will be the same as that prescribed for the other courses.

Mathematics.—The mathematical work will be algebra in the first year, and plane and solid geometry in the second year.

Mechanical drawing (will extend through both years).—First year: Care and use of materials; orthographic projection (elementary); drawing from models; practical applications; inking; free-hand drawing. Second year: Orthographic projection (advanced); development of surfaces; intersection of solids; isometric projection; cabinet projection; practical applications; tracing; blueprinting; detail and working drawings of simple pieces of machinery, patterns, carpentry work, etc.

Woodworking (choice to be made between this subject and metal working).—Two years of hand work covering the following subjects: First year—Carpentry; reading of working drawings; use of rule and square; sawing to gauge; truing up working faces and edges; gauging to width and thickness; boring and chiseling; care and use of tools; names of tools and operations of work. Second year—Reading of plans; grinding, setting, and mending tools; elementary joinery; rabbeting; dadoing; paneling; mitering; gluing; varnishing, shellac-ing; wood turning (elementary); construction of furniture, cabinets, desks, tables, etc., house framing—construction of doors, windows, stairways, etc.

Metal working.—First year: Vise work; chipping cast iron; filing to a gauge or dimensions; chipping wrought iron and steel; fitting keys in chipped key ways; scraping to surface; making small tools. Second year: Vise work; chipping oil ways; making small tools and instruments and other advanced work; blacksmithing; welding; brazing; forging; tempering of tools; use of stocks and dyes; babbitting; drilling.

The courses in the Philippine School of Arts and Trades in which the graduate of the provincial high school in a course in arts and crafts may secure advanced standing, are as follows: Architecture, cabinetmaking, carriage building, wheelwrighting, wood turning and pattern making, blacksmithing and tool making, course for machinists, steam engineering.

SCHOOL BUILDINGS.

The previous discussion of school finances shows that with the contemplated gains and additions, the revenues, for the coming year will be sufficient to provide for 5,000 Filipino teachers, or what is believed to be an adequate native force properly paid. There remains, as the most serious problem confronting the bureau of education, the question of adequate school buildings and furniture. After the payment of Filipino teachers, very little remains from the municipal school funds for the repair of old buildings or the erection of new. These funds promise to be sufficient in the immediate future for no more than teachers' salaries, and in order to maintain a properly paid and competent force of Filipino teachers no effort should be made to divert them to other uses.

School buildings which were erected by the Spanish Government are still standing, and to some degree serviceable, in at least 374 municipalities. Their total number summarized from recent reports is 534. These buildings, though usually substantially built of stone or brick, are as a rule poorly lighted and seldom of a type that conforms to good schoolhouse designs. During the military occupation,

many of these buildings were occupied as army storehouses or offices. In some cases they were destroyed in the course of war. Others have been rendered unfit for use by decay. In most cases, however, where the expense was justified, these buildings have now been reconstructed or repaired.

Building has been exceedingly expensive in the islands ever since the American occupation, and, while less so now than at any time during the past five years, is still costly. Furthermore, school buildings were never erected by the Spaniards in the numerous hamlets of which each municipality is composed. The public school building was always located on the plaza and was never built large enough to house more than a fraction of the children of the pueblo who are now presenting themselves for instruction.

Thus the narrow sites or poor construction of the Spanish school-houses, their inadequate size even where they still stand, the absence of buildings in the barrios, and the fact that no buildings whatever for secondary instruction were erected by the Spanish Government, have compelled the bureau of education to begin practically at the bottom and plan an entirely new system of public school buildings for the islands. The plan adopted contemplates three kinds of school buildings—the barrio school, the municipal school, and the group of high school buildings.

Municipal school buildings should be erected in the town center for the teaching of the primary classes as well as those who will take the intermediate course. These buildings should be of durable materials, well constructed, and should be surrounded, as the present buildings are not, by playgrounds and room for school gardening, a "model Filipino house," and shops for elementary instruction in tool work. There should be one of these for each organized municipality in the islands. In some cases, where two municipalities have lately been consolidated, such a school building should stand in the center of each of the old municipalities, and for the entire archipelago probably not less than 300 new structures are needed. Where the old buildings are still serviceable an immediate effort should be made to secure as large a school ground as possible, and no expensive improvements should be made where such land is not obtainable.

For the instruction of the population scattered through the barrios of the municipality there is needed a number of barrio schools in each school district. For the present these will have to be for the most part of cheap construction. Use should be made of native thatch and bamboo, which are known in the Philippines as "light materials." An effort is now being made to have set apart in every barrio a suitable piece of land for school grounds, embracing from one to two acres, and to have this piece of land deeded to the municipal government as a permanent site of the school, cleared, improved, and inclosed with a fence. A piece of land of this size will permit of recreation grounds, ball field, and school garden. A suggestive plan of such grounds and buildings, which has been widely circulated among the division superintendents and in numerous cases is being followed, is attached to this report.

In the third place, there are the buildings necessary for the provincial schools. The plan of instruction for the several departments requires, rather than a single building, a group of buildings with an attractive campus on the pattern of a small American college. These

buildings should include a central recitation hall with, in some cases, a separate auditorium and library building, dormitory cottages for both young men and young women, a building with four science laboratories, shops for wood and iron working, agricultural buildings, and, when possible, a gymnasium. Such a group of buildings necessitates a campus of at least eight to ten acres of land. The idea of a secondary school which previously has prevailed in these islands has been a large cloister-like structure situated in the heart of some municipality, and with no grounds or gardens except an interior court. It has taken a little effort to educate the public mind away from this type of school building. Early in the school year attention was called to the desirability of securing large grounds for future groups of buildings, and this was followed by the preparation of plans of a suggestive character which have been widely circulated among division superintendents and provincial boards. The result has been a gradual enlargement of the conception of a provincial school in the minds of the people and of the teaching force.

The work of school building, then, follows these three main lines:

First. The acquisition of suitable sites and buildings for the provincial schools.

Second. The repair, enlargement, or new construction of the municipal schoolhouses in the town centers.

Third. The construction of barrio schoolhouses in as many of the surrounding hamlets of a town as justify the opening of a school.

A splendid response has been given, especially to the first part of this programme, as will be seen by the following recapitulation of the steps taken by the provincial boards in the different provinces to this end:

Ilocos Norte.—The high school is at present accommodated in a temporary building in the town of Laoag. This building is partly of light material, but it is of excellent construction. The frame, floors, and exterior walls are of hard wood and the roof is of iron. The building is inadequate for the present attendance, and permanent provision will have to be made at an early date for a suitable site and new buildings. The school will not, however, be removed from Laoag.

Ilocos Sur.—In this case the province secured by grant from the insular government an unfinished building, begun in Spanish times as a quartel for the guardia civil. This building stands in the center of the town of Vigan and unfortunately its location does not permit of extended grounds or campus. The advantage of possessing a building already in large part erected counterbalanced the disadvantage of location. To complete the building the province secured a loan from the insular government of ₱20,000 (Act No. 1076) and work was begun some months ago. It promises to be in satisfactory state for occupancy by January 1 ensuing.

Abra.—A loan of ₱6,000 was also procured from the insular government by the province of Abra for a high school building. The utilization of this money has not yet been fully determined. It is probable that the province will turn over to the provincial school the former provincial building and that the money will be spent in the improvement and repair of this structure.

Union.—The site which has been selected adjoins the town of San Fernando, and comprises about 8 acres of land. The provincial

board has signified its intention to procure as soon as possible funds for commencing work on the most needed buildings.

Nueva Vizcaya.—The provincial board has secured a site in the town of Bayombong where the school is at present established and has plans to erect two buildings, one a central recitation hall, and the other a shop for elementary work in wood and iron. Tentative plans for these two buildings have been prepared by the architectural draftsman of this bureau, and attention is invited to the appended illustrations.

Cagayan.—The high school here has been in operation for nearly two years and has attracted a very desirable class of students. The provincial board in the month of October last purchased at an expense of P17,000 a very large private building from the Tabacalera Company with surrounding grounds which amount in all to 16½ acres. The provincial board has been exceedingly active in supporting this institution and is preparing now to build shops for wood and iron working along the lines and plans prepared by this bureau. The board is also erecting a "model Filipino house" for teaching house-keeping, and is seeking a loan from the insular government in order to complete as rapidly as possible the series of buildings necessary for the full equipment of the high school.

Isabela.—A provincial high school was opened in this province last month. Previously there had been but one high school for the division and that was at Tuguegarao, the capital of Cagayan. The provincial board has not yet made any permanent provision for the erection of buildings or the securing of a site, owing to the recent date on which the institution was opened.

Pangasinan.—The high school of Pangasinan is located at Lingayen and is at present accommodated in five large buildings rented by the provincial board. Propositions have been submitted to the four towns of Lingayen, Dagupan, Calasiao, and San Carlos for offers of lands and endowment for securing the provincial school. The proposition of Lingayen is to give a part of the municipal plaza, a tract now covered by a temporary market, and a bonus of P5,000. This offer will probably be accepted by the provincial board and the construction of permanent school buildings begun at an early date.

Tarlac.—The province of Tarlac was the first to erect of its own effort a building for a provincial high school. The present structure faces the plaza, and, while the area of land at present owned is small a larger amount can be obtained adjoining the present site. The building is of wood and of American type. It was completed last December. The province has also rented a building for a girls' dormitory in order to enable young women from surrounding towns to enter the provincial school and find a suitable home at the provincial capital.

Pampanga.—The provincial capital has been recently moved from the town of Bacolor to San Fernando, which has, from the time of its opening, been the site of the provincial school. The town of Bacolor has offered to donate to the province for the purpose of a provincial school a very excellent structure erected in Spanish times as an "Escuela de Artes y Oficios." The town of San Fernando has responded with a proposition to donate a considerable tract of land in that town as a campus and site for the provincial school and will probably also offer a considerable sum of money.

Bulacan.—In Bulacan there was great rivalry between the town of Baliuag, the present site of the provincial school, and Malolos, which has this year been made the provincial capital. Both towns offered sites of land and large bonuses of money. The offer of Malolos was accepted.

Manila.—In the city of Manila two high schools were opened in June a year ago and have made excellent progress. These schools are housed in rented buildings, one in the district of Tondo, the other in the district of Sampaloc. Owing to the great difficulty in obtaining suitable sites of land in the city of Manila, no permanent buildings for these schools have yet been erected, but a large new schoolhouse will soon be commenced in the district of Trozo, and other large school-houses are planned for other parts of the city.

Nueva Ecija.—There was keen rivalry here between the two towns of San Isidro and Gapan to gain the provincial school. Both towns offered admirable tracts of land. Gapan, which is an excellent school town, offered a wide choice to the provincial board. The town of San Isidro, however, has been finally selected by the board as the site for the high school, and the work of leveling and otherwise improving the site, which was donated by the acting governor, is already in progress. The province of Nueva Ecija secured a loan from the insular government of \$7,500 United States currency for the purpose of erecting the most needed buildings, and the corner stone of the principal building has been laid. It is expected to be ready for occupancy by January 1, 1905.

Batangas.—The provincial board of Batangas purposes to secure an admirable site of land embracing about 8 acres adjoining the town of Batangas. They have also secured an appropriation from the war emergency rice fund of ₱50,000 (Act No. 775), and plans for the central recitation building were prepared some time ago by the insular architect. Work will soon be undertaken. Of the above amount, ₱5,000 has already been expended for the construction of a manual training school building.

Bataan.—The provincial school of Bataan, the little province across the bay from Manila, was opened only last June. About 80 pupils are in attendance. The governor of the province has been exceedingly solicitous for the establishment of this institution, and has offered to the provincial board all necessary lands from his own private estate in the town of Balanga. The school is at present occupying a portion of the provincial government building.

Zambales.—The site for the provincial school has been selected by the provincial board. It lies between Iba, the provincial capital, and Botolan. Provisional plans have been drawn for the main building.

Laguna.—The provincial high school in this province has been transferred this year from Santa Cruz to Pagsanjan. It is at present housed in several excellent buildings rented by the provincial board. The town of Pagsanjan is ready to donate a considerable tract of land and to give other assistance to the school if the provincial board decides to make this the permanent site.

Rizal.—The site for the provincial school is not yet decided upon. The capital of this province has been transferred within recent months from Pasig to San Felipe Neri. The high school is at present at Pasig. It will probably be possible to secure an excellent tract of land in one of these two towns. The town of Malabon, which is situ-

ated in the part of Rizal north of Manila, has also secured an excellent piece of ground for an intermediate school, with provisions for shop work, boat building, and agriculture. This piece of land comprises about 300 by 225 meters, and is the gift of the insular government. It was formerly a tobacco factory, "La Princesa," built years ago by the Spanish Government when it held a monopoly of tobacco manufacture. The stone walls of the buildings then erected are still standing, and can in several cases be repaired and will make excellent school buildings. The wood and iron work of the minor buildings, with the exception of floors and roofs, the ornamental wrought-iron gates, arbors, etc., can be done by student work in the wood and iron working shops. The sash and doors of most of the buildings will be made by the woodworking shops as soon as same are in operation.

Cavite.—The provincial school is at present located in the town of Cavite, but as there is no site of suitable extent within the town, situated as it is upon a narrow isthmus, it will probably be necessary to make the permanent site of the high school elsewhere. At the present time the provincial institution is housed in a building formerly used as a Spanish hospital. Although in possession of the municipality, the title to these buildings is in dispute.

Tayabas.—The high school is at present located at Lucena, the capital, but a strong effort is being made on the part of the town of Luchan to secure its transfer to that town, and there appears to be little doubt but that a free gift of land can be secured from either town.

Camarines.—The provincial school is located in Nueva Caceres in a building rented by the provincial board. Negotiations are now under way whereby a large tract of land adjoining the town will be given to the province by the municipality as a permanent site.

Albay.—The provincial school is at present located in Guinobatan. The permanent site of the institution has not yet been decided upon by the provincial board. The sum of ₱35,000 of captured insurgent funds was donated to this province for school construction. The provincial board has requested authority to apply this sum toward high school buildings.

Sorsogon.—A fine tract of land adjoining the town was donated to the province, which also secured from the insular government an appropriation of ₱10,021.23 from captured insurgent funds (see Act No. 858) for the erection of buildings for this purpose. Plans for the main building are now under consideration.

Romblon.—An excellent tract of land, embracing about 8 acres, and lying on a slope immediately above the town of Romblon, was secured by the provincial board from the municipality and forms an admirable school site. A loan of ₱8,000 was secured by the provincial board from the insular government (see Act No. 1076) and plans for the first building have been prepared by the bureau of architecture. Construction is about to begin. Several thousand dollars' worth of lumber, stone, lime, and labor are being contributed by the municipalities of the province. This, in addition to the modest sum borrowed by the province, will make possible the construction of a central recitation hall. Temporary provision will also be made for workshops, for a tool house for agricultural implements, etc.

Mindoro.—A provincial high school is about to be opened at Calapan. It will be housed in the excellent municipal school building erected by the municipality last year.

Masbate.—The municipality of Masbate has donated a tract of land, embracing a dozen or fifteen acres, adjoining the town of Masbate, and the provincial board is seeking an insular loan to erect the necessary buildings. These will consist of a central recitation building, dormitory, and shops.

Capiz.—The provincial school here is housed in the provincial government building. The province has so far been unable to make provision for either land or buildings.

Antique.—The provincial school is located at San Jose de Buena Vista, the capital town of the province. In spite of the poverty of this province the provincial board has requested a loan from the insular government of ₱6,000 in order to purchase a private dwelling house and grounds which are offered for sale and which will make an excellent edifice.

Iloilo.—The provincial school here, which has an enrollment of 550 pupils, is housed in two buildings rented by the provincial board. A loan of ₱100,000 was requested by the provincial board of Iloilo from the insular government for the purpose of securing a site of land and erecting the necessary buildings. Owing to the state of the insular treasury this request had to be refused. The growth of this school and the great importance of Iloilo as an educational center demand some large and prompt provision for its permanent accommodation.

Occidental Negros.—A beautiful tract of land in the town of Bacolod was purchased outright by the municipality and given to the provincial board for a permanent site for the high school. This tract of land embraces about 8 acres and extends from the main street of the municipality to the beach. The municipality further made a large donation to the province of building stone to be used in the construction of the first building to be erected. The province secured from the insular government a loan of ₱20,000 (see Act No. 904). Plans have been prepared by the insular architect, and the first edifice is now in course of construction. The provincial board also plans to put up at once a large shop building for iron and wood working, and will add the other buildings as their circumstances permit. This excellent provincial institution is at present housed in three buildings rented by the province, one used as a central recitation hall, and the other two as dormitories for young women and young men.

Oriental Negros.—The municipality of Dumaguete has donated to the province a tract of land extending from the town plaza to the sea and embracing about 6 acres. The provincial board has secured a loan of ₱20,000 from the insular government for erecting a central recitation building and two dormitory cottages. During the coming year the high school will be housed in a large rented building provided by the province.

Cebu.—The high school here is temporarily accommodated in a large rented building which barely suffices for the 400 pupils attending. Adjoining the town of Cebu is a broad tract of land which the

provincial board is willing and anxious to purchase as a permanent site as soon as they can secure the necessary funds. The provincial board by resolution requested the sum of ₱100,000 as a loan from the insular government for the purpose of putting up the necessary buildings, but the Commission was obliged to refuse this loan for the present.

Bohol.—The high school is at present located in Tagbilaran in a building which was formerly a municipal school building, with some classes in the provincial government building. A tract of land adjoining Tagbilaran was offered the province as a site for the school, but owing to the rocky nature of the soil at Tagbilaran, which is partly disintegrated coral limestone, it has been judged better to seek another situation in order that instruction in agriculture may be given. The permanent site for the provincial school has, then, not been settled by the provincial board.

Leyte.—The high school is at present located in Palo and is accommodated in three buildings, one of which is used as a recitation hall, one as a dormitory for young women, and the other as a dormitory for young men. A tract of land in the town of Palo was offered by the municipality as a permanent site for the high school, but it seems probable that the provincial board will decide upon Tacloban, the provincial capital, as a more advantageous site. In case the change is made to the town of Tacloban assurance is given that the municipality or private citizens will furnish an adequate tract of land.

Samar.—The high school here was opened last October and has proved a very successful undertaking. The provincial board has given it excellent support, securing the best building obtainable in the town for its accommodation. The board is now seeking to secure a suitable tract of land as a permanent site.

Surigao.—The high school is located at present in a rented building. The province has, however, requested of the insular government a loan of ₱40,000 for the erection of a suitable building, and has procured from the municipality of Surigao a desirable tract of land. The matter of the loan is now pending before the Commission.

Misamis.—A provincial school is about to be opened in Cagayan de Misamis. The teachers are now en route from Manila to their stations and the provincial board has promised full support. The division superintendent of Surigao, who is acting division superintendent of Misamis, has recently investigated conditions and conferred with the provincial officials and advises this office that an excellent tract of land will be donated, and that the provincial board will make all possible provision for building. A rather unique idea was submitted to the Commission by the municipalities of the province of Misamis. It was to contribute a certain amount from the general municipal funds to the support and maintenance of the provincial school. Action upon their request for authorization has not yet been definitely taken.

Paragua.—This province has had no high school up to the present time. Pupils have, however, become sufficiently advanced to be in need of intermediate instruction, and the very small size of the municipalities of the province necessitates centralization of instruction in a few places where the pupils of the different towns of the province can be brought together. It is probable that the province

will make provision for the establishment of a high school at Cuyo and of a school of intermediate grade at Puerta Princesa on the island of Paragua.

Moro Province.—A high school has been established in Zamboanga especially for the training of Moro and pagan teachers for the numerous nonpagan villages of the towns of its jurisdiction. Request has been made on this office for plans for school buildings, and the Moro provincial council is definitely planning for the erection of necessary buildings.

The above summary shows a notable interest on the part of the provincial boards in securing permanent grounds and buildings for the high schools, especially when it is considered that the work so far accomplished in securing permanent sites was, with a single exception, commenced less than a year ago.

Turning next to municipal school buildings, reports have been secured from all but two divisions with nearly complete data. As stated above, the 534 or more buildings left by the Spanish Government have, almost without exception, been put into a fair condition of repair. Roofs which generally were destroyed during the progress of war have been replaced, new floors laid, and in many cases new windows and doors opened, allowing larger admission of light and air.

Under American rule up to December, 1903, there had been constructed 369 new school buildings. The greater part of these were built in the year 1903. These figures do not distinguish between schoolhouses built of stone or hard woods, and of consequent durability, and those built of light materials with grass or nipa thatched roofs; but about 40 are of the former class.

A comparatively large amount of school building has been accomplished within the seven months of the present calendar year. Most of these are barrio schoolhouses, built of hard-wood frames, nipa or grass roofs, bamboo walls, and usually bamboo floors, although in some cases these are of hard wood. Between January and July, 1904, 395 schoolhouses were built or were under construction. A considerable number not included in this figure have been contracted for or are under construction. These buildings give opportunity for the opening of schools in the barrios in line with the policy of the bureau to extend primary instruction. Many of these buildings were put up by means of aid from the insular government under the Congressional relief act through the issue of rice for labor and materials. "Relief rice," for schoolhouse building, was assigned by the civil governor to the following provinces: Capiz, Ilocos Norte, Batangas, Rizal, Laguna, Cebu, and Zambales.

The provinces making the greatest use of this rice were Ilocos Norte, which has built or has under contract for construction 77 barrio schools; Batangas, which by use of "relief rice" and other means has erected 70 barrio schools, and Cebu, where 40 schoolhouses have been built or the contracts made for them. The type of construction of these schools in Cebu is interesting. The walls are of lime plaster laid on bamboo framework.

Summarizing these figures, we have the following total of municipal and barrio school buildings:

Serviceable schoolhouses of Spanish construction.....	534
Built under American rule in the period ending December, 1903.....	369
Already built or under contract for erection in the calendar year 1904.....	600

Total..... 1, 503

Those left from the Spanish period which were of light materials and are no longer truly serviceable are not here included. Of these 395 are practically completed.

This leaves approximately 712 schools for which there are no public schoolhouses. According to reports, 333 of these were housed last year in buildings rented by municipalities. In the number of houses rented the school divisions show great differences. Camarines and Tarlac, both large divisions, rent none. The city of Manila rents 35 buildings, owning only 4, 1 of which is not serviceable, 2 are not of good construction, and only 1 of thoroughly good type. There is no Christian division in the archipelago which is, in fact, so poor in public school buildings as the city of Manila. Bulacan owns 23 school buildings, but rents 65. Cebu owns 108 buildings and rents 36. Ilocos Norte owns 90 buildings, with a considerable additional number under construction, and rents but 1, at a rental of ₱2 per month. Ilocos Sur owns 116 and rents 13. Pangasinan owns 41 and rents 30. Union owns 34 and rents 22. Laguna owns 53 and rents 15. Tarlac, as previously stated, rents none and owns 65.

The order of divisions in point of ownership is Ilocos Sur, 116; Cebu, 108; Ilocos Norte, 90, with 8 more under construction; Batangas, 93; Tarlac, 63; Iloilo, 65; Leyte, 62; Negros Oriental, 58; Laguna, 53; Negros Occidental, 48; Tayabas, 44; Pangasinan, 41; Capiz, 41; Samar, 34; Union, 34; Cavite, 33. The remainder of the divisions have less than 30.

The remaining schools, to the number of 380, are housed in private residences loaned to the municipality without rental; a considerable number in convents or parish houses where these buildings are in the hands of the municipality and have been offered by the municipality for occupancy by school; and a still large number are held in the town halls or presidencias. A few small schools are held in the houses of the teachers.

The above discussion shows to how many sources the bureau has been obliged to turn in order to secure housing for the constantly increasing number of children who are seeking primary instruction. As previously stated, municipal revenue, at present the only source for the construction of new buildings, are adequate for little more than the payment of municipal teachers. It would seem that the cost of permanent improvements such as school buildings, which should be of a better type and more durable construction than those already existing, should not fall upon current school revenues. In the United States provision is usually made for schoolhouse construction by bonds or deferred payments of some character distributed over a term of years. Some provision similar to this is what is greatly needed by municipalities of the islands in order to provide adequate and sanitary accommodations.

There is equally inadequate provision for school furniture. A comparatively large amount of money has been spent in the last year by municipalities in the construction of school benches and desks. The plan now generally adopted is to make a desk with seat attached that will accommodate two pupils, leaving aisles on each side. Such a

will make provision for the establishment of a high school at C and of a school of intermediate grade at Puerta Princesa on island of Paragua.

Moro Province.—A high school has been established in Zamboanga especially for the training of Moro and pagan teachers for the numerous nonpagan villages of the towns of its jurisdiction. Requests have been made on this office for plans for school buildings, and the Moro provincial council is definitely planning for the erection of necessary buildings.

The above summary shows a notable interest on the part of the provincial boards in securing permanent grounds and buildings for the high schools, especially when it is considered that the work so far accomplished in securing permanent sites was, with a single exception, commenced less than a year ago.

Turning next to municipal school buildings, reports have been secured from all but two divisions with nearly complete data. As stated above, the 534 or more buildings left by the Spanish Government have, almost without exception, been put into a fair condition of repair. Roofs which generally were destroyed during the progress of war have been replaced, new floors laid, and in many cases new windows and doors opened, allowing larger admission of light and air.

Between January and July, 1904, 395 schoolhouses were built or were under construction. A considerable number not included in this figure have been contracted for or are under construction. These buildings give opportunity for the opening of schools in the barrios in line with the policy of the bureau to extend primary instruction. Many of these buildings were put up by means of aid from the insular government under the Congressional relief act through the issue of rice for labor and materials. "Relief rice," for schoolhouse building, was assigned by the civil governor to the following provinces: Capiz, Ilocos Norte, Batangas, Rizal, Laguna, Cebu, and Zamboanga.

The provinces making the greatest use of this rice were Ilocos Norte, which has built or has under contract for construction 77 barrio schools; Batangas, which by use of "relief rice" and other means has erected 70 barrio schools, and Cebu, where 40 schoolhouses have been built or the contracts made for construction. The type of construction of these schools in Cebu is of concrete. The type of construction of these schools in Ilocos Norte is of concrete. The type of construction of these schools in Batangas is of concrete. The type of construction of these schools in Rizal is of concrete. The type of construction of these schools in Laguna is of concrete. The type of construction of these schools in Cebu is of concrete. The type of construction of these schools in Zamboanga is of concrete.

Summarizing these figures, we have the following for the year 1904 and barrio school buildings:

Serviceable schoolhouses of Spanish construction.....	534
Built under American rule in the period ending December, 1903.....	369
Already built or under contract for erection in the calendar year 1904.....	600
Total.....	1,503

Those left from the Spanish period which were of light materials and are no longer truly serviceable are not here included. Of these 395 are practically completed.

This leaves approximately 712 schools for which there are no public schoolhouses. According to reports, 333 of these were housed last year in buildings rented by municipalities. In the number of houses rented the school divisions show great differences. Camarines and Tarlac, both large divisions, rent none. The city of Manila rents 35 buildings, owning only 4, 1 of which is not serviceable, 2 are not of good construction, and only 1 of thoroughly good type. There is no Christian division in the archipelago which is, in fact, so poor in public school buildings as the city of Manila. Bulacan owns 23 school buildings, but rents 65. Cebu owns 108 buildings and rents 36. Ilocos Norte owns 90 buildings, with a considerable additional number under construction, and rents but 1, at a rental of ₱2 per month. Ilocos Sur owns 116 and rents 13. Pangasinan owns 41 and rents 30. Union owns 34 and rents 22. Laguna owns 53 and rents 15. Tarlac, as previously stated, rents none and owns 65.

The order of divisions in point of ownership is Ilocos Sur, 116; Cebu, 108; Ilocos Norte, 90, with 8 more under construction; Batangas, 93; Tarlac, 63; Iloilo, 65; Leyte, 62; Negros Oriental, 58; Laguna, 53; Negros Occidental, 48; Tayabas, 44; Pangasinan, 41; Capiz, 41; Samar, 34; Union, 34; Cavite, 33. The remainder of the divisions have less than 30.

The remaining schools, to the number of 380, are housed in private residences loaned to the municipality without rental; a considerable number in convents or parish houses where these buildings are in the hands of the municipality and have been offered by the municipality for occupancy by school; and a still large number are held in the town halls or presidencias. A few small schools are held in the houses of the teachers.

The above discussion shows to how many sources the bureau has been obliged to turn in order to secure housing for the constantly increasing number of children who are seeking primary instruction. As previously stated, municipal revenue, at present the only source for the construction of new buildings, are adequate for little more than the payment of municipal teachers. It would seem that the cost of permanent improvements such as school buildings, which should be of a better type and more durable construction than those already existing, should not fall upon current school revenues. In the United States provision is usually made for schoolhouse construction by long or deferred payments of some character distributed over a number of years. Some provision similar to this is what is great for the municipalities of the islands in order to provide accommodations.

adequate provision for school furniture. A considerable amount of money has been spent in the last year by the construction of school benches and desks. The method is to make a desk with seat attached that accommodates two pupils, leaving aisles on each side. Such a

desk, built of native hard wood, costs from 4 to 5 pesos. Twenty thousand individual desks of American make were purchased two and a half years ago by the bureau of education and distributed to the municipalities. These are at present mostly used in the provincial high schools or in the central municipal schools. They accommodate, however, only a small fraction of the children in attendance. The school furniture used under the Spanish Government suffered during the war, being scattered, consumed, and lost in many ways. The limited amount which was saved is heavy and unsuitable. In nearly every case each bench is made to accommodate at least six children, who are compelled to climb over one another in passing to or from class or in and out of the schoolroom, to the detriment of order and discipline.

Outside of Manila the absence of suitable contractors for making school furniture has occasioned considerable embarrassment to division superintendents, even where there were funds in the municipal treasuries that could be devoted to this end. In a good many cases orders have been placed in Manila through this office, the desks being constructed according to plans furnished by this bureau, and shipped out to the provinces "knocked down." In a number of cases, however, the provincial supervisor has assisted by having school furniture made in his shops or by prisoners under his supervision.

THE TECHNICAL SCHOOLS AT MANILA.

Schools maintained by the Philippines for the direct preparation for a profession or trade are three: The Philippine Normal School, established in 1901; the Philippine School of Arts and Trades, established in 1901; and the Philippine Nautical School, established in 1839 by the board of commerce of Manila, and reopened soon after American occupation.

The Philippine Normal School.—During the past year this institution has made gratifying progress. The attendance has increased by one-third, and the requirements for entrance have been raised very materially. A corresponding improvement in the quality of students entering has been noted. The work of the high schools throughout the provinces has shown itself not only in the better preparation of those entering the lower classes, but has also given a considerable number of desirable students for the more advanced classes. All of the fifteen members of last year's graduating class are now teaching in the public schools.

A departure was made this year in the admission of advanced students who do not expect to become teachers. Courses in advance of those offered in the provincial high schools have been announced. These are adapted to prepare students for entering American colleges or the future University of the Philippines.

The school has excellent facilities for work in the sciences, and the students have proved their ability in the close and accurate observation and reasoning required in these courses. The scientific equipment has been greatly increased during the past year.

The course of study has been rearranged to conform to the courses prescribed by the general superintendent, and the relation between the provincial high schools and the normal school is now so close that students may transfer from one to the other without break.

The dormitory for girls has been most satisfactory in its working. More than fifty girls from the provinces are living there. By supplying such a home many representatives of the best families throughout the islands have been secured for training as teachers. These girls manifest a keen interest in American social customs and manner of conducting a home. Many of them have voluntarily restricted themselves to the use of the English language.

More attention is now being paid to the physical development of the students. The boys are being given military drill, while careful gymnastic training is provided for the girls. This feature of their work seems to appeal strongly to the entire body of students. The boys are participating more freely in voluntary athletic sports now than formerly.

The following statistics are taken from the normal school report for the month of July, 1904:

	Boys.	Girls.	Total.
Enrollment.....	560	167	527
Average attendance.....	304	117	451

The Philippine School of Arts and Trades.—In the past year there has been great increase in interest in the work of this school. This is especially gratifying, inasmuch as a year ago there was some difficulty in securing the attendance of desirable students sufficient to fully use the accommodations provided. In the current year it has been necessary to decline fully 75 applicants. The present equipment of the school is adequate for about 150 pupils. By conducting both day classes and night classes 270 pupils in all are now receiving instruction. The following table indicates the increase or decrease in the present year in the day classes:

	September.		Increase or decrease.
	1903.	1904.	
English branches.....	110	150	+ 40
Drawing.....	67	120	+ 53
Metal work.....	11	44	+ 33
Woodwork.....	51	70	+ 19
Telegraphy.....	37	30	- 7

There is no difficulty in keeping the attendance up to the limit of accommodation. It has been found that if a pupil drops out there are now many applicants for his place. Interest is by no means confined to Manila. Of the total enrollment at the close of last school year more than half were from 21 of the outside provinces, Bulacan and Rizal being most largely represented. The class of pupils in attendance is also of better quality than formerly. There is greater willingness on the part of pupils to take up the harder kinds of manual work, a point which is significant of the possibility of development of industrial work in the Philippine Islands.

The following additions to equipment have recently been made: For the iron-working shop: One 16-inch by 6-foot engine lathe, one 12-inch by 6-foot engine lathe, one 10-inch by 4½-foot lathe, one 14-inch shaper, one milling machine, one upright drill, one sensitive

drill, one cutter and reamer grinder, one twist-drill grinder, one wet-tool grinder, and a good assortment of hand tools for those taking the course in mechanics. For the wood-working shops: One surface-planing machine, one circular-sawing machine, one band-sawing machine, one 18-inch pattern-maker's lathe, six 11-inch wood-turning lathes, with the necessary chisels and gouges, etc.; one power grindstone. An assortment of bench tools sufficient for a class of 24, and a similar equipment for wood carving have also been added. Two kerosene engines of 6 and 8 horsepower, respectively, furnish power for the machines.

The city of Manila has recently appropriated ₱50,000 for the erection of buildings which are to be loaned for the use of the school. The site in view comprises a block of land containing 7,787.50 square meters. It is in the Santa Cruz district, near the center of the Filipino population of Manila, and on the line of the new electric railway. This site gives ample room for future development and growth.

The school has furnished 40 telegraph operators to the Philippine constabulary. These young men have done their work satisfactorily and many have been promoted. The drawing department has furnished 6 men for work, 4 being teachers and 2 draftsmen. This department has also assisted the office of the general superintendent by making charts and drawings for bulletins of the bureau and various drawings for school buildings.

In the output of the carpentry and ironworking departments of the school, the following are noted: Drawing and kindergarten tables for the Manila schools, cabinets and typewriter tables for the trade school, drawing boards for the provincial high schools, sketching boards for the normal school, sample desks, etc., besides the laying of pipes and making water connections with the trade school shops, building stands for sinks in shops and blueprinting rooms, repairing faucets and plumbing in the normal school, and making many small tools and models for use in shops and drawing classes.

The Philippine Nautical School, the oldest educational institution in the islands under the supervision of the bureau of education, was established by the board of commerce of Manila in the year 1839. The school was begun in a building on Calle Cabildo, Intramuros, the exact location of which is not certainly known, and was conducted in this place until the year 1863, when the building was totally destroyed by an earthquake. The friends of the institution, unwilling that it should cease to exist, secured a site on Calle San Juan de Letran. About 1884 the school was removed to Calle Palacio and in 1898 to its present site on Calle Santa Elena, in the district of Binondo.

The study of mathematics has always been made the strongest feature of the course, and from time to time a considerable sum of money, amounting in all to something over \$10,000, was provided by the board of commerce and expended for equipment by the educational officials of the Spanish Government, some of the apparatus being yet in the possession of the school and in use in its work.

Several additions to the school equipment have recently been made, including a valuable chronometer and four 10-oar 28-foot boats.

Before the end of the Spanish rule the school had been placed under the direction of the civil government of the islands, and at the time of the American occupation of Manila it was under the superintendence of Senor José Gamero.

Political changes have not affected the workings of the school except to introduce English text-books and American methods of instruction. The American authorities, recognizing the value and merit of the institution, made immediate provision for its continuance; and, under a new and vigorous administration by American directors, the scope of its work has been widened, the attendance increased, and the standard of work raised.

The present school building accommodates 150 students. It is proposed to obtain a better building, or to transfer the entire student body to a large vessel. In the latter case there would be no need for a school on land.

All necessary nautical instruments are provided for the department of navigation, and equally adequate equipment made for the department of seamanship.

Next year a small gymnasium will be fitted up. At the present time, with the exception of work in small boats and on large vessels during the vacation, the physical exercises are confined to setting-up drills, infantry drill, seamanship drill, boxing, fencing, singlesticks, baseball, and football.

The physics laboratory is located on the first floor and has been newly equipped with up-to-date apparatus and supplies, the demonstration outfit being somewhat better than the average high school or normal school equipment in the United States.

The departments of geography and astronomy are provided with a good telescope, tellurians, celestial, and terrestrial globes, maps, and various other supplies.

Enrollment, September 1, 1904, 121; average attendance, 115.

MUSIC, DRAWING, AND KINDERGARTEN.

Work in these lines has been conducted in the city schools of Manila during the past year. Owing to the necessity for special teachers for these lines of work this instruction while in the experimental stage has been limited with a few exceptions to the city of Manila. The effort has been to discover what class of instruction and what rate of progress would be made by the pupils in these special branches before organizing systematic work for the entire archipelago, and the city of Manila naturally furnishes the field for these experimental undertakings.

These branches appear from the experience of the past year to be abundantly justified. The effort is now being made to organize systematic instruction in music in all provincial high schools and from these to extend it to the municipal schools. Similarly the teaching of drawing in Manila affords encouragement for making this study a prescribed part of both the primary and intermediate work. These three branches, no less than any others, demand the training of a sufficient number of Filipino men and women in order to extend instruction throughout the islands. The work so far conducted has had as one of its largest aims the shaping of a course of training for teachers of these branches. A more specific account of the work of the past year follows.

Music.—The study of music was introduced in the city schools of Manila in September, 1903, under the direction of a supervising expert. Model lessons were given for the benefit of the teachers and

general directions issued to each school as a basis for daily musical instruction. Subsequently, normal classes for the training of Filipino teachers were successfully organized.

The Filipinos are naturally a musical people, and the children hail with delight the music lesson. It has been found difficult to subdue the voices and improve the quality, but much has been accomplished by means of voice exercises and individual instruction, and it has been found that the development of a soft, mellow quality in the singing voice has beneficial effects on the speaking voice. Sight reading has been made an important feature, but without overlooking the fact that song singing and sight reading devoid of a musical voice quality is very injurious to young voices. The subjects of time and accent have received careful attention and emphasis. The improvement in tone perception has been very gratifying. In many instances the classes have shown ability to hear quickly and correctly, to grasp, retain, and reproduce groups of three, four, and five tones sung consecutively. The musical interest is also strong in the provinces, and a course in music was arranged in February, 1904, and a copy of the same placed in the hands of every teacher throughout the islands.

In June, 1904, the general superintendent called together from several provinces representative teachers qualified to direct the music in the divisions, and these teachers met in a conservatory of music at Manila June 13, 1904, for instruction by the supervisor of music. Each branch of the subject was discussed, and practical instruction given in tune, time, reading, voice, quality, and range. The convention lasted one week. A new course of study is now in preparation which will aid greatly in systematic carrying on of music work in these schools.

Drawing.—This subject was introduced into the Manila schools upon a systematic basis in January, 1903. Enough has been done to demonstrate that the Filipino pupil is exceedingly interested in the work and has unusual ability in this direction. He has shown much talent in original conception and artistic execution. The work is carried on by a staff of nine Filipino drawing teachers, one American teacher for the secondary and American schools, and a supervisor. These teachers are brought together each week for instruction in the work to be done during the succeeding week. During the past year a pamphlet has been prepared by the supervisor and has been sent to all teachers of drawing with a view to unifying the work throughout the archipelago.

A course of study is being prepared in the form of books for the pupils and a manual of instructions for the teachers. For the future work in the provinces it is proposed to establish in Manila a small training school for Filipino drawing teachers. Under competent instruction the Filipino drawing teacher becomes thoroughly qualified to do this work. He is not so transient as the American teacher and is equally competent in this subject.

Kindergarten.—This work has been rapidly developed in the past year. Seven kindergartens are maintained, one being for English-speaking children. Seven American teachers are engaged in this work in Manila under the direction of a highly qualified supervisor. There are 12 Filipino assistants. The attendance has been good and the interest excellent. In many cases there have been applications for membership far exceeding the capacity of the schools. Mothers'

meetings have been held with exhibits of the work of the children, and these seem to have been enthusiastically received, the attendance often running as high as 50.

As stated above, the work has as one of its objects the training of young women to give kindergarten instruction in the provinces. The desire is to have a successful kindergarten established in each provincial capital, not only for value to the children attending, but also as an exhibit to the public of correct teaching principles, and as a feature of the training of the primary teacher.

SCHOOLS FOR PAGAN TRIBES.

In the preceding portion of the report figures relating to population, taxation, school attendance, etc., have embraced only the Christian population of the islands. Very little teaching has yet been done among the pagan tribes. These peoples are found in considerable numbers, yet it will be some time before anything more than tentative experiments for their education can be undertaken. There are a few wild inhabitants in Panay and Negros (the Bukitnon), and a similar but more numerous element in Misamis and Surigao. Eventually, of course, these people should have instruction at public expense and be assisted toward civilization. No schools have been started for the Mangyan, of Mindoro, but even the Christian towns of this island have received so little in the way of public instruction in the past that the work of the bureau in this province will probably be entirely devoted to them for some time to come. On the islands of Busuanga and Paragua there is a small, scattered pagan element, and in the south of Paragua a Mohammedan-Malay element. No schools have as yet been established for these people. The only practical plan in view is to secure a few bright representatives of each settlement or band and educate them at some provincial school to become instructors and leaders of their own people. In the province of Zambales one school has been established in the barrio of Botolan for Negrito children, the only effort being made at present to educate these little blacks. The experiment has not yet proceeded far enough to indicate anything. In northern Luzon, however, in the Cordillera Central, the pagan element is numerous and relatively very important. Here is the great stock of primitive Malayan tribes known as the Igorot. These people number something over 200,000, being most numerous in the old Spanish politico-comandancias of Bontoc, Quiangan, Lepanto, and Benguet, and in the province of Abra. Schools were established among the Igorot of Benguet three years ago, but there have been few results proportionate to the effort made. It is desirable, however, that a few young men in each of the strong and powerful towns which cover the steep mountain sides of the cordillera should receive the rudiments of an English education, and thereby be able to serve as interpreters and local officials among their own people. The Spanish system was to place an *Ilocano* with the title of "directorcillo" in each of these towns as soon as they were conquered or subdued. These officers, as representing Spanish authority, practically governed the towns. Their presence was and is distasteful to the Igorot, who are beginning to appreciate the advantages that would accrue to them through having members of their own tribe competent to represent the government. With this

object in view, training schools have been established for Igorot boys at Baguio, Benguet, Cervantes, Lepanto-Bontoc in Quiangan, at the site of the old Spanish cuartel and mission station, and at Alilem, Amburayan. These schools have not yet progressed very far. The one at Baguio is the oldest and most fully organized. Appropriation was made by the insular government for school buildings, and a central recitation building, with several other buildings for the accommodation of the boys, have been built. These buildings are, however, of poor type. Something over 100 boys were in attendance at this school last year. At Bontoc a school building has been erected and is now complete, costing ₱560.39 to the government. Some 60 boys have received profitable instruction at this school in the past year. At Cervantes a site has been chosen and a preliminary appropriation of ₱4,000 made by the government. At Quiangan, which is the very heart of the head-hunting region, occupied by a fierce but industrious people numbering altogether about 40,000, very interesting work has been begun under a teacher of large experience in Indian schools in the United States. School gardening and elementary tool work have been started here. An appropriation is needed for the construction of buildings.

A provisional course of study covering about four years has been outlined for these Igorot schools. It provides for instruction in the English language to a point where a child can speak, read, and write it readily, for elementary arithmetic; for enough geography to give the child an idea of the world existing outside of his own wild mountains, and some study of the plant and animal life of his own mountain region. Industrial work is planned to cover agriculture, elementary carpentry work, and elementary iron work. In a few Igorot towns skillful iron work is done by the people. This industry being altogether localized, the hammers and anvils are of stone and the bellows are of the rude cylindrical style common throughout Malaysia. Yet with these tools the Igorot produces very carefully made bolos, axes, and spears. He is naturally interested in improving his iron work and the tools with which he conducts it, and there promises to be no difficulty in securing a large attendance of boys for this kind of instruction. In iron work, as well as in carpentry, the instruction will be simple in character and limited to teaching dexterity in the use of a few useful American tools. On the other hand, the teaching of agriculture must be advanced and scientific in character. The Igorot is already the best and practically the only scientific agriculturist in the Philippines. At enormous labor, extending over many generations, these mountain people have built up astounding terraces covering the mountains mile after mile. These terraces are usually under irrigation. They are carefully fertilized and tended. The crops are camotes, rice, tobacco, taro, several vegetables, and cotton. His agriculture can, however, be benefited by the introduction of improved seeds, by the destruction of noxious insects, and by making more general the cultivation of certain products which are now localized.

For the girls, industrial work will center around the teaching of spinning and weaving. As stated above, cotton is raised, but only in a few localities. Most of the cloths which circulate among these wild people are obtained from the Ilocano population of the valleys. They bring very high prices. In some localities the Igorot do beautiful spin-

ning and weaving, but on a very limited scale. The plan is to introduce the large family loom of the Ilocano, thereby affording an industry for the women that will relieve them from agricultural toil and be of benefit to the people. An appropriation of ₱3,000 was made by the Commission for the establishment of a school for girls at Bua, Benguet, where, in addition to English and housekeeping, this improved way of spinning and weaving cotton will be taught.

SCHOOLS IN THE MORO PROVINCE.

Since the organization of the Moro Province under special form of government in September, 1903, the schools of southern Mindanao and the Sulu Archipelago have been administered separately from this bureau. The school superintendent for this region is one of the five members of the provincial council.

The school problem presented here is an exceedingly difficult one. The population is of three kinds: A small Christian population which followed the Spanish soldiers and missionaries into southern Mindanao and formed settlements in the vicinity of the Spanish forts; the Mohammedan population, which comprises the large majority of the inhabitants, and the pagan tribes living in the hilly interior of the mainland of Mindanao. By none of these three classes are public schools thoroughly welcomed. The Christian population is devotedly attached to their own parochial schools, which are supervised by Jesuit missionaries who have returned to their parishes. The Moros retain all the conservatism of the Mohammedan devotee everywhere, and have been unable to decide whether the American is to be accepted or resisted. The pagan tribes are in a state of barbarism in which it is impossible for them to understand the reason or advantages of schools.

In spite of these difficulties, public education, especially in the last year, has made encouraging progress in this part of the archipelago. The organization of the government of the Moro Province led to a marked change in the management of the public schools. Their administration was centralized and sufficient funds secured for their support. By Act No. 1, of the Moro legislative council, all schools of the Moro region were made provincial institutions. During the past year 52 such schools were in operation, 10 of which had been newly established. The majority of these are among the Christian tribes and attended for the most part only by Christians, but there are 7 which are attended by Moros and 2 by pagan Bagobos in the gulf of Davao. There are on duty in this province 15 American teachers and 54 native teachers, 9 of whom are Mohammedans. These are all paid from provincial funds. The total enrollment of these 52 schools was 2,114, of whom the boys numbered 1,289 and the girls 825. About 240 of these pupils were Moros, 110 Bagobos, and the balance of Christian parantage.

A four years' course of primary instruction has been put into effect by the school superintendent of the province. It covers much the same ground as the primary course prescribed by this office for the archipelago. The study of English has had foremost attention, but the Moro Province, unlike other parts of the archipelago, requires some attention paid to the native languages. The Christian population of southern Mindanao, and especially that of Zamboanga, speak

a corrupt Spanish, the native dialects having disappeared. The Moros speak a number of different dialects, nearly all of which have been reduced to writing by means of Arabic characters. The number of Moros who can read and write in the native character is estimated by the superintendent of schools as 8 per cent, 4 per cent among the Sulus, less than 2 per cent among the Samals.

A very successful vacation institute was held in Zamboanga for four weeks during the month of April. The total attendance was 88. A secondary school at Zamboanga has also been established within the last few months. Its aim is to train young men and women for the government service, and especially for the vocation of teaching. Special efforts are being made to secure the attendance at this school of young Mohammedan Malays.

The Moro Province appropriated ₱85,230.85 for educational purposes for the nine months ending July, 1904, and the expenditures were ₱46,898.17, leaving an unexpended balance of ₱38,341.68. As the Moro and pagan districts become organized and conditions become thoroughly peaceful there promises to be a greater demand for schools. At least ten new schools, it is expected, will be established in the near future.

THE WORK OF THE OFFICE OF THE GENERAL SUPERINTENDENT.

The office of the general superintendent is at present organized in the following divisions:

The assistant to the general superintendent, with 2 stenographers.

The division of records, with 1 record clerk and 6 clerks.

The division of statistics, with 1 head, 1 stenographer, and 1 clerk.

The disbursing division, with disbursing officer, and 4 clerks.

The property division, with the property clerk, 1 stenographer, and 4 clerks.

In addition there is a special-order clerk, with one assistant, an architectural draftsman, with 1 assistant, and the stenographer to the general superintendent, who report directly to the general superintendent. This makes a total force of 29, 21 of whom are Americans and 8 Filipinos.

The work of this force during the past year has been exceedingly heavy. The closer organization effected between the general office and the offices of the division superintendents; the very large amount of correspondence carried on with teachers; the heavy correspondence incident to the passing of the teaching force under the civil-service regulations; the radical changes which have been made in the character of the teachers' work, in the courses of instruction, in plans for school buildings, etc., have increased the amount of correspondence 520 per cent over the previous fiscal year. This fact may be evidenced in another way by stating that the files in the record division from the organization of the bureau to July, 1903, fill 37 cases, while for the year July 1, 1903, to July 1, 1904, they fill 90 cases. The number of original communications in the office has averaged, since the 1st of July of the present year, 105 per day, besides an average of 20 indorsements and 15 telegrams. In addition to this, the record system has been entirely changed to correspond with that used by the office of the executive secretary for the Philippine Archipelago. Every communication is now cross-referenced with an average of four index cards.

This increase in the office work has been accomplished, although with great difficulty, with the addition, previous to July 1, of only one

American clerk. In the appropriation bill for the current year two American clerks were dispensed with and six additional Filipino clerks provided for, with the slight reduction of the total amount appropriated for the general superintendent's office over the appropriation of last year. The work continues to be, however, too heavy. Every employee in the office each month reports an overtime service, which in several cases has exceeded sixty hours in a single month.

Moreover the necessary absence of the general superintendent in the field a considerable proportion of the time urgently demands the appointment of a deputy general superintendent. The position of assistant to the general superintendent, most excellently filled though this position has been during the past year, comprises also that of a chief clerk, with general charge of the office. What is needed is the creation of the position of a deputy general superintendent, who can, in a large degree, share with the general superintendent the very important work of school inspection in the provinces, and who, by reason of qualifications and emolument, will command the respect and consideration of the very able force of division superintendents.

The routine work, despite the repeated efforts that have been made to effect a change, continues to fall far too heavily upon the general superintendent. The school conditions throughout the islands demand constant and careful personal attention, which the general superintendent is, to a large extent, unable to give under the present organization of work. The matter of visits by the general superintendent or a representative is of extreme importance. Since September, 1903, the general superintendent has visited the schools in 26 provinces, but there still remain in the archipelago 8 provinces which have never received a visit from a general superintendent. It has been impossible to visit them the past year. As a result, this office finds itself imperfectly informed and somewhat out of touch with the school work in these divisions, and unable to assist as intelligently and wisely as is to be desired. There are 40 provinces in the archipelago. Each of these should receive at least one annual visit by a general superintendent or his representative. Considering the traveling conditions, a week to a province is not too much to allow, and even this permits the visiting of only a limited number of towns. Forty weeks is, however, the entire school year. It is manifest that, if the general superintendent is to visit each province each year, there is no time left him for the conduct of other business.

THE DIVISION SUPERINTENDENTS.

The division superintendent holds the pivotal position in the bureau of education. He is the immediate head of all school work conducted in his province or division. All teachers and principals report to him and are immediately subject to his direction. He appoints all municipal teachers. His recommendations are very largely considered in the promotion of American teachers and insular native teachers. He has under his immediate direction in some instances as many as 50 American teachers and 200 Filipinos. He is the representative of the school work before the provincial board, and in eleven cases is a member of the provincial board, the governing body of the province. All correspondence from or to teachers passes through his office. He distributes school supplies, and is accountable for the

school property of the division to the auditor of the archipelago. He has daily business relations with the provincial board, the presidentes, and other municipal officers of every town, with the American teachers, the Filipino teachers, and close personal relations with the entire Filipino population of his province. With him rests to a very large extent the good discipline of the force, the attitude of the teachers toward their duties, and the general efficiency and success of the school work. A large part of his time is spent in travel from town to town, a work not only onerous, but frequently accompanied by danger from storms, high water, dangerous seas, ladrones, and epidemic disease. The work makes demands upon every high quality a man may possess. It calls for courage, judgment, tact, and sympathy. It is the opinion of the general superintendent that this body of men is to-day one of the most respected and influential forces in the archipelago. Their qualities, physical, mental, and moral, are exceptionally high.

It is with extreme pleasure that the general superintendent is able to report that the Commission in its last appropriation bill provided for an increase in the salaries of division superintendents. This is as follows, the increases being confined to the lower ranks of salary: One division superintendent, at \$3,000 per annum; 3 division superintendents, at \$2,500 per annum each; 6 division superintendents, at \$2,250 per annum each; 5 division superintendents, at \$2,000 per annum each; 8 division superintendents, at \$1,800 per annum each; 8 division superintendents, at \$1,600 per annum each.

Another change effected by this bill (Act 1225) was the separation of division superintendents from any specific division, making it possible to assign a school superintendent to duty in any part of the islands without reference to the salary he is receiving, and with sole consideration of the work for which he is most needed. By decision of the honorable the secretary of public instruction, the division superintendents are now, in the matters of vacation leave and accrued leave, upon the same footing and subject to the same conditions as govern other employees in supervisory capacities. Attention is invited to Appendix F for the enumeration of the men who have filled these positions in the last year.

RECOMMENDATIONS FOR THE ESTABLISHMENT OF A UNIVERSITY.

It is recommended that action be taken at an early date looking toward the establishment of a university of the Philippines. Such action need not call for immediate appropriation. The present would not justify the organization of this university on an expensive scale, but it is believed that the time has now arrived when definite steps should be taken looking to the opening of courses for professional training commencing in June, 1905, and for the opening of undergraduate courses in June, 1906.

It is not anticipated that there will be more than a very few pupils prepared by the public schools for admission to an undergraduate course leading to a bachelor's degree before June of 1906. Those who will present themselves a year earlier have been trained either in Spanish institutions of Manila or in high schools of the United States. It is believed, however, that there is a very considerable number of young men, graduates of Spanish colleges in the Philippines, and, in

some cases, of professional schools, who are desirous of taking up professional studies in medicine, law, engineering, or applied sciences. Almost every province in the islands has a few of these young men who are not sufficiently trained to undertake regular professional work and who are largely unoccupied and without occupations because of the lack of schools for such instruction. It is believed that if lectures and seminars in the above professional subjects were organized to commence June, 1905, a very respectable attendance of young men from all parts of the islands could be secured and that the establishment of such work would encourage and inspire the Filipino people in a very considerable degree. It would, moreover, provide for the continuance of the system of public instruction beyond the primary and intermediate grades and the high schools to undergraduate and professional courses.

It has been already recommended by the general superintendent to the Commission that provision be made by law for the immediate appointment of a board of trustees, to whom should be intrusted the conduct of the university, and for the appointment of a chancellor, to serve for the present without compensation. An examiner and registrar of the university would be the only salaried employee immediately necessary for the preliminary work of organization and the opening of professional courses. The lectures, seminars, and personal direction of the students could be accomplished through the utilization of the very large number of trained specialists who are already serving the Philippine government in various capacities.

Very respectfully submitted.

DAVID P. BARROWS,
General Superintendent of Education.

THE SECRETARY OF PUBLIC INSTRUCTION,
Manila.

APPENDIX A.

Total.....	7,163,499	1,432,701	477,567	263,538	183,146	200,076	19	14

^a The basis of this estimate, as indicated in the body of the report, is one-third of the total number of children between the ages of 6 and 14.

It will be seen from column 5 that in several of the provinces primary school facilities have already been provided for more than one-third of the school population.

The wide difference between enrollment and attendance in some divisions is indicated by comparing columns 5 and 6.

APPENDIX E.

TEXT-BOOKS AND SUPPLIES.

Experience has shown from the first the great desirability of elementary schoolbooks specially prepared for the Philippines. American publishers have eagerly entered this field with the result that there now exists an excellent series of primary books prepared from Philippine material and thoroughly well adapted to their purpose. The great bulk of the books purchased by the bureau are of primary grade and this will continue to be the case for years to come. Books, as well as all supplies, are provided for the pupils free of charge.

In the intermediate course there is not such great need for special texts, aside from the science studies, and it is expected that the work of the secondary courses will be conducted with slight use, for some years at least, of special Philippine texts.

Text-books either written or especially adapted for use in the Philippines.

- The Arnold Primer: Stepping Stones to Literature Series. Written by Sarah Louise Arnold. Published by Silver, Burdett & Co. Ordered in 1903.
- A First Reader: Stepping Stones to Literature Series. Written by Sarah Louise Arnold and Charles W. Gilbert. Published by Silver, Burdett & Co. Ordered in 1903.
- The Story of the Philippines. Written by Adeline Knapp. Published by Silver, Burdett & Co. Ordered in 1903.
- Civil Government in the Philippines. Written by Dudley O. McGovney. Published by Scott, Foresman & Co. Ordered in 1903.
- A Natural Number Primer. Written by David Gibbs. Published by American Book Company. Ordered in 1904.
- The Concrete Arithmetic. Written by Guy Clinton and John T. Miller. Published by Van Buskirk, Crook & Co. Ordered in 1904.
- Philippine Geography. Written by Alexis Everett Frye. Published by Ginn & Co. Ordered in 1904.
- Philippine School Geography. Written by Roddy and revised by David Gibbs. Published by American Book Company. Ordered in 1904.
- Philippine Geographical Reader. Written by Samuel MacClintock. Published by American Book Company. Ordered in 1904.
- Philippine Folk Lore. Written by John Maurice Miller. Published by Ginn & Co. Ordered in 1904.
- Suggestions for Drawing. Written by W. H. Hilts. Published by Ginn & Co. Ordered in 1904.
- A Nature Study Reader. Written by John G. Coulter, Ph. D. Published by D. Appleton & Co. Ordered in 1904.
- Short History of the Philippines. Written by Prescott F. Jernegan. Published by D. Appleton & Co. Ordered in 1904.

Text-books adapted for use in the Philippines but whose material is not exclusively for use here.

- Elements of Arithmetic. Written by William H. Milne. Published by American Book Company. Ordered in 1903.
- Elementary Hygiene for the Tropics. Written by Azel Ames, M. D. Published by D. C. Heath & Co. Ordered in 1903.

Of school supplies other than books the demand is for exactly the same equipment as that provided for American schools. Paper, pencils, slates, blackboard material, material for "busy work," etc., are carried in stock in large quantities. There is great need for a good school map of the Philippines, and an effort is being made to secure data for this purpose from the supervising teachers, as well as from other bureaus of the government.

APPENDIX F.

Superintending and supervising force, bureau of education, for the year ending September 15, 1904.

DAVID P. BARROWS, *General Superintendent.*

FRANK R. WHITE, *Assistant to General Superintendent.*

(Mr. G. N. Brink has been acting as assistant to general superintendent since July 1, 1904, the date Mr. White went on leave of absence.)

Division.	Superintendent.	Headquarters.
Manila.....	G. A. O'Reilly.....	Manila.
Camarines.....	W. B. Freer.....	Nueva Caceres.
Albay and Sorsogon...	E. E. Fisher.....	Albay, Albay.
Batangas.....	H. H. Buck.....	Batangas.
	(Mr. M. A. Colton was superintendent for this division to date of resignation, Nov. 28, 1903, when he was relieved by Mr. H. H. Buck.)	
Bohol.....	L. T. Gibbens.....	Tagbilaran.
	(Mr. Gibbens has been on leave in the United States since July 1, 1904 and Mr. H. L. Noble was appointed as acting division superintendent for this province July 20, 1904, and is at present serving in this capacity.)	
Cagayan and Isabela...	H. E. Bard.....	Tuguegarao, Cagayan.

APPENDIX F.—*Superintending and supervising force, bureau of education, for the year ending September 15, 1904—Continued.*

Division.	Superintendent.	Headquarters.
Bulacan.....	H. A. Bordner..... (Mr. E. G. Turner was the superintendent of this division to and including Feb. 29, 1904, and on Mar. 1, 1904, was transferred to the division of Pangasinan. Mr. Opha C. Lewis was acting superintendent for this division from Mar. 1, 1904, to July 1, 1904, when he was relieved from this duty by the appointment of Mr. H. A. Bordner.)	Baliuag.
Capiz.....	E. A. Coddington.....	Capiz.
Cebu.....	Samuel MacIntock.....	Cebu.
Cavite.....	S. A. Campbell..... (Mr. H. H. Buck was superintendent of this division to and including Nov. 28, 1903, and was transferred to the division of Batangas on Nov. 29, 1903. Mr. Campbell has been superintendent of Cavite from and including Jan. 5, 1904.)	Cavite.
Ilocos Norte.....	Guy Van Schaick..... Mr. J. M. Kniseley was superintendent of this division to and including Mar. 31, 1901, and from Apr. 1 to Aug. 23, 1904, was supervising the construction of school buildings, said construction being paid from the Congressional relief fund, and from and including Aug. 24, 1904, he has been on special duty in the office of the general superintendent of education. Mr. Van Schaick was acting superintendent for this division from Apr. 1 to Aug. 31, 1904, and was appointed division superintendent on Sept. 1, 1904.	Laoag.
Ilocos Sur and Abra.....	W. W. Rodwell..... Mr. Rodwell has been on leave in the United States since May 15, 1904. Mr. P. S. O'Reilly was appointed acting superintendent for this division on May 20, 1904, and is at present serving in that capacity.	Vigan.
Iloilo and Antique.....	G. N. Brink..... Mr. Brink has been on special duty as acting assistant to the general superintendent of education since July 1, 1904, and Mr. J. A. Gammill is acting as superintendent of this division, and has been serving in such capacity since Mr. Brink left Iloilo. Mr. Charles R. Cameron served as head teacher for Antique to July 8, 1904. Mr. J. D. De Huff has served as head teacher for Antique since Aug. 1, 1904.	Iloilo.
Laguna.....	W. E. Lutz.....	Pagsanjan.
Union.....	C. H. Magee.....	San Fernando.
Leyte.....	Vacant..... Mr. B. B. Sherman was the superintendent of this division to and including Mar. 31, 1904, and then resigned, effective as of June 7, 1904, the end of the accrued leave due him for service rendered, on account of ill health. Mr. Sherman died shortly after his arrival in the United States. Mr. J. L. Fiske is acting superintendent for this division, and has served in such capacity since Feb. 1, 1904.	Tacloban.
Masbate.....	H. G. Lamson..... Mr. Lamson has been on leave in the United States since Mar. 4, 1904, and Mr. C. H. Hanlin was appointed as acting superintendent for this division on May 14, 1904, and is at present serving in that capacity.	Masbate.
Samar.....	H. S. Townsend.....	Catbalogan.
Misamis.....	Vacant..... Mr. Guy Van Schaick was the superintendent of this division until Dec., 1903, when the teachers were withdrawn on account of the lack of support from the province. From Dec., 1903, to Mar. 31, 1904, Mr. Van Schaick was on special duty in the office of the general superintendent of education, and on Apr. 1 was assigned as acting division superintendent for Ilocos Norte. Teachers have recently been returned to duty in this division, and Mr. G. N. Briggs, division superintendent for Surigao, is acting as superintendent for the division of Misamis in addition to his duties in Surigao.	Cagayan.
Nueva Ecija.....	T. W. Thomson.....	San Isidro.
Nueva Vizcaya.....	J. J. Coleman..... Mr. William Abel was serving as head teacher for this division from Sept. 19, 1903, to Jan. 5, 1904, when he was relieved by Mr. Coleman, who was appointed division superintendent Jan. 6, 1904. Mr. Coleman has been on leave of absence in the United States since July, 1904, and Mr. Norman G. Connor is acting as division superintendent during the absence of Mr. Coleman.	Bayombong.
Occidental Negros.....	Charles E. Putnam..... Mr. Putnam has been on leave of absence in the United States since June 18, 1904, and Mr. W. K. Beehelder has been acting superintendent for this division since the departure of Mr. Putnam from his division.	Bacolod.

APPENDIX F.—*Superintending and supervising force, bureau of education, for the year ending September 15, 1904—Continued.*

Division.	Superintendent.	Headquarters.
Oriental Negros.....	Vacant. Mr. Samuel T. Lee was superintendent of this division to and including Mar. 31, 1904, when he was detailed on special duty in the office of the general superintendent of education. He resigned from the service, and Mr. W. S. Dakin is at present acting superintendent for this division and has served in such capacity since the departure of Mr. Lee from his division.	Dumaguete.
Pampanga and Bataan.....	William E. Prentiss. Mr. J. M. Gambill was acting superintendent for this division from Mar. 24, to Sept. 6, 1904, during the absence of Mr. Prentiss, who was on leave of absence in the United States.	San Fernando.
Pangasinan.....	E. G. Turner. Mr. S. A. Newsom was superintendent of this division to and including date of resignation, Dec. 11, 1903. Mr. F. D. Anglemeyer was acting superintendent from Dec. 11, 1903, to Feb. 29, 1904, when he was relieved from this duty by the appointment of Mr. Turner as division superintendent on Mar. 1, 1904.	Lingayen.
Rizal.....	B. G. Bleasdale. Mr. Bleasdale has been on leave in the United States since June 23, 1904. Mr. R. H. Neely has been serving as acting superintendent for this division since July 11, 1904.	Pasig.
Romblon.....	G. E. Walk.	Romblon.
Surigao.....	G. N. Briggs.	Surigao.
Tarlac.....	Vacant. Mr. O. S. Reimold was superintendent of this division to date of resignation, May 5, 1904. Mr. A. V. Dalrymple was acting superintendent from date Mr. Reimold left his division to July 10, 1904. Mr. W. A. Wedgworth has been acting superintendent of this division since July 11, 1904.	Tarlac.
Tayabas.....	J. C. Muerman.	Lucena.
Zambales.....	Otho Atkin.	Iba.
Mindoro.....	Gov. R. S. Offley.	Calapan.
Benguet.....	Gov. E. Octaviano.	Baguio.
Lepanto-Bontoc.....	Gov. W. A. Reed. Governor William Dinwiddie was ex-officio superintendent of schools for this division to the date of his resignation, Feb., 1904.	Cervantes.
Paragua.....	The acting governor.	Cuyo.
The Moro Province.....	N. M. Salsoby.	Zamboanga.
Philippine Normal School.....	G. W. Beattie.	Manila.
Philippine School of Arts and Trades.....	Ronald P. Gleason.	Do.
Nautical School.....	Vacant. Mr. William J. Colbert was acting superintendent of this school to date of his resignation, Aug. 29, 1904. Mr. Thomas L. Jenkins has been acting as superintendent for the Nautical School since the departure of Mr. Colbert.	Do.
Supervising introduction of uniform courses and science work.....	John G. Coulter.	Do.
Supervisor of music.....	Mrs. M. E. Gordon-Dunster.	Do.
Supervisor of drawing.....	W. H. Hilts.	Do.
Supervisor of kindergarten work.....	Kate L. Bassett.	Do.

Principals of high schools.

Province.	Town.	Name of principal.
Manila.....	Manila.....	F. R. Lutz. E. W. Oliver. Guy Clinton.
Camarines.....	(Nueva Caceres.....)	F. L. Cronc.
Albay.....	(Daet.....)	Maud L. Johnson, acting.
Sorsogon.....	Guinobatan.....	C. J. Pierson.
Batangas.....	Sorsogon.....	S. W. Ford.
Bohol.....	Batangas.....	I. R. Wellington, acting.
Cagayan.....	Tagbilaran.....	H. C. Theobald.
Bulacan.....	Turnegarrao.....	L. W. Cureton, acting.
	Baliuag.....	A. L. Burnell.
		Opha C. Lewis.

Principals of high schools—Continued.

APPENDIX G.

SOME OF THE CIRCULARS SENT BY THE GENERAL SUPERINTENDENT TO DIVISION SUPERINTENDENTS, SEPTEMBER 15, 1903, TO SEPTEMBER 15, 1904.

No. 26, Series 1903.]

MANILA, November 11, 1903.

Corporal punishment.

Corporal punishment of pupils in the secondary schools of the Philippines is hereby forbidden. By this is included not only whipping, but especially blows upon the face with the hand. Pupils in attendance at the secondary schools are presumed to be no longer children, but young men and women and able to choose between conducting themselves properly or leaving the school.

Hereafter, a pupil of a secondary school who conducts himself unworthily or refuses to submit himself to the regulations of the school shall be suspended or expelled by the principal, with the approval of the division superintendent, and in cases of flagrant misconduct the expulsion may be made publicly in the presence of the school.

No. 29, Series 1903.]

MANILA, November 14, 1903.

Department assistant examination.

I have the honor to call attention to the fact that the passing of the department assistant examination will be accepted by this bureau and the civil-service board as the equivalent of the teacher's examination, so that one who has eligibility in the department assistant examination is not required to take any other civil-service test for promotion in the teaching service. This information is promulgated for the benefit of those who are already eligible as department assistants, and further to encourage qualified teachers to take the department assistant examination in place of that particularly designed for teachers.

This is the only substitute which will be accepted in lieu of the teacher's examination. In this connection see page 18, section 14, of the Manual of Information of the Civil-Service Board.

No. 31, Series 1903.]

MANILA, November 30, 1903.

Insular Normal School.

I have the honor to call the attention of division superintendents and teachers generally to the following minute, which has been adopted by the Philippine civil-service board:

"Ordered, That future graduates of the Insular Normal School at Manila shall be eligible to appointment to the classified teaching service of the Philippine Islands without examination by the civil-service board.

"W. S. WASHBURN, *Chairman.*"

No. 37, Series 1903.]

MANILA, December 18, 1903.

Method of handling school funds.

In consultation with different division superintendents, I have met with many statements of the difficulties in securing an economical and proper appropriation of the school funds by the towns. In many cases in the last year, school funds were not appropriated for school purposes but were spent for other ends not authorized by law. For this reason I urge attention to the inclosed statement of the plan followed in the province of Bulacan.

The essential feature of this plan is that the provincial treasurer instructs the municipalities that school funds are to be appropriated under the direction of the division superintendent of schools, who thereupon undertakes to furnish a report to the treasurer of the expenditures of these moneys. This plan has unquestionably succeeded in the division of Bulacan. I see no reason why it should not be adopted in many other divisions, provided it commends itself to the attention of the provincial treasurers. It has received the indorsement of the insular treasurer, who recommends it for universal establishment in the letter a copy of which is inclosed.

The success of this plan depends, as does the success of so much of our school work, upon a clear business understanding between the provincial treasurer and the division superintendent of schools. The plan, of course, can not be adopted except by the approval of the provincial treasurer, inasmuch as it involves the delegation of a portion of his responsibilities to the division superintendent as agent.

I respectfully urge upon the division superintendents to present this matter, with inclosed letters, to the provincial treasurer or treasurers of each division, and see whether it is not advisable to adopt this same plan in the division generally.

[Inclosures.]

A successful method of handling school funds.

Act 82 states that "the proceeds of at least one-fourth of 1 per cent of all the lands and improvements (buildings) as assessed shall be devoted exclusively to the support of free primary schools and the providing and erection of suitable school buildings." (The municipal council can, with the consent of the provincial treasurer, appropriate for school purposes any amount from one-fourth per cent to one-half per cent of the assessed value of the lands.) The same law provides that the municipal council shall submit to the provincial treasurer for his approval within the month of January each year a presupuesto or estimate of expenses for the year. These presupuestos have heretofore set apart so much money for carting books, so much for repairs, rent, etc. The council or presidente, usually the presidente, can have two hours' work done as repairs on the schoolhouse, and collect 10 or 20 pesos for it, or any amount he desires, providing he does not go beyond the appropriation. He has the power to issue a warrant for the full appropriation for carting school supplies even though he has but one box of supplies carted 50 yards.

To avoid this evil, change the form of the presupuesto. Find in the provincial treasurer's books the amount school funds on hand January 1; add to this sum the amount of one-fourth per cent, or the fractional per cent voted, of the assessed value of the land and buildings; this gives the estimated school funds for the year. State it as such. On the same page state "Salarios de los maestros y maestras y gastos de muebles, alquiler de edificios, reparaciones y todos los demas gastos designados para escuelas publicas," to be the total amount of school funds for the year. (See inclosed presupuesto.) Request the council to approve this presupuesto in triplicate and submit it to the provincial treasurer for his approval; then the superintendent approves the same, retains one copy, returns one to the council and the other to the provincial treasurer.

The provincial treasurer then writes a circular letter to all the municipal treasurers, stating that the expenditure of the school fund for the year is under the direction of the division superintendent of schools, and in case any municipal treasurer pays from the school funds an account not approved by the division superintendent of schools, said municipal treasurer becomes personally and officially responsible for the amount paid, and the same will be charged to his bond when his accounts are audited.

The superintendent then issues an approved monthly pay roll (Form B) in triplicate for each municipality and sends it to the municipal treasurer. State in this pay roll the itemized statements of the amounts to be paid, of salaries, for repairs, etc. (to whom, for what purpose, etc.), from the school funds. When these payees receive their pay they sign the pay roll, which then becomes a receipt. On the reverse side of the pay roll is a complete account of the school funds on hand at the beginning of the month, the amount of land tax as school funds paid in during the month, the expenses for the month, and the amount on hand at the close of the month. One copy of this pay roll is retained by the municipal treasurer, one is sent to the division superintendent of schools, and the other is attached to the municipal treasurer's monthly account to the provincial treasurer.

The provincial treasurer makes a monthly statement to the superintendent's office showing the amount of school funds paid over to each municipal treasurer in the province.

The superintendent will then compare the accounts of the municipal treasurers and the provincial treasurer, and if an error occurs will call it to the attention of the municipal treasurer, who will readily correct it.

This method works to perfection. Not a penny of school funds of Bulacan Province has been misappropriated this year. The schools have received the worth of every cent that has been spent for them.

This method of procedure greatly lightens the work of the provincial treasurer. He is not compelled to go from town to town to guard the school funds and see that they are properly expended; he leaves this work entirely in the hands of the division superintendent of schools. The provincial treasurer looks after the general funds, but the superintendent guards the school funds. This method has been worked out in this province. It can be used successfully in all provinces providing the proper relations exist between the provincial treasurer and the division superintendent of schools.

(This form will be supplied from the general office upon request.)

MALOLOS, P. I., October 29, 1903.

Mr. F. G. TURNER,

Division Superintendent of Schools, Province of Bulacan, Baliuag, P. I.

SIR: In reply to your communication of the 19th instant, in which you request me to furnish you with a statement relative to the system of appropriating municipal school funds as pursued in this province and the accounting for such funds as required of municipal treasurers, I have the honor to make the following statement:

The system of appropriating school funds by municipal councils is as followed in this province, i. e., providing for school expenses by the appropriation of all school funds in a separate annual estimate at the beginning of each year, such funds to be expended by and under the supervision of the division superintendent of schools as explained in your statement herewith, has been productive of most satisfactory results, not only in simplifying the handling of such funds and protecting them against misappropriation, but also in relieving this office of much of the great volume of work necessarily imposed upon it.

The legality of such a system is unquestionable in the opinion of this office, in view of the initiative action which a municipal council must necessarily take in the matter.

All native teachers must be employed, and their salaries fixed by the division superintendent of schools in accordance with section 9 of Act 71 of U. S. P. C., and the subsequent approval by the division superintendent of miscellaneous expense accounts, such as rents, repairs to buildings, etc., as provided in this system, is for the purpose of complying with section 1, subsection C, of Act 132 of the U. S. P. C., besides establishing an excellent check on such expenditures as made from school funds by municipal treasurers.

This system especially simplifies accounting by municipal treasurers and reduces the work of auditing municipal school fund accounts to a minimum.

In conclusion, I would state that I most heartily indorse and recommend this system of handling municipal school funds, and am fully convinced that it is the most satisfactory and practical method for treating such funds.

Very respectfully,

RICHARD GOODHART,
Treasurer, Province of Bulacan.

MANILA, November 9, 1903.

Mr. E. G. TURNER.

Division Superintendent of Schools, Baliuag, Bulacan, P. I.

SIR: Acknowledging receipt of your favor of the 31st ultimo relative to the present mode of handling school funds in the province of Bulacan, I have the honor, after careful investigation of your system, to express my concurrence in the indorsement of Treasurer Goodhart.

The multiplicity of duties devolving upon a provincial treasurer renders his personal attention to various details impossible and a harmonious cooperation of the treasurer and division superintendent in this particular instance could be productive of nothing short of success.

I take pleasure, therefore, in recommending the universal establishment of the system as proposed in your communication.

Very respectfully,

FRANK A. BRANAGAN,
Treasurer, Philippine Islands.

No. 38, Series 1903.]

MANILA, December 28, 1903.

New series of report forms.

A new series of report blanks for use in the public schools throughout the islands has been prepared and will be distributed for general use beginning January 1, 1904. The blanks are seven in number, as follows:

Record Form No. I. Class-room register. This register is designed for use in every class room whether in the central or barrio school. Copies have not yet been received from the public printer, but at the earliest possible moment a supply will be forwarded to the division superintendents, who are requested to put the register promptly into general use.

Record Form No. II. Class-room teachers' report to supervising teacher. This report will, as a rule, be prepared by the Filipino teacher to be submitted on the last day of the month to the supervising teacher of the town. In the absence of a supervising teacher the report goes direct to the division superintendent. This form appears at first sight somewhat difficult of preparation. It has been given thorough test, however, in at least one division. With some slight help the native teacher will learn to prepare it properly with few mistakes.

Record Form No. III. Day school report of supervising teacher to division superintendent. This report is to be prepared chiefly from the data presented in Form No. II.

Record Form No. IV. Teachers' class report of supervising teacher to division superintendent.

Record Form No. V. Report of night-school teacher to division superintendent.

Record Form No. VI. General report of division superintendent to general superintendent. It will be noted that this report embodies a detailed statement on school conditions in every town in the division as well as a statement as to the work of each individual teacher, insular and municipal. The plan will entail considerable additional work in the office of the division superintendent, but this information should be in permanent form and easily accessible in the local office as well in the office of the general superintendent.

Report on Form No. VI will be required of division superintendents about four times a year: the first statement will cover the month of January, 1904; the second, the month of March. Reports from the teachers to the division superintendents will, however, be made monthly, and it is desired that the local office be at any time prepared, upon request, to communicate to the general office statistics and statement on school conditions for the preceding month for any town in his division, even though a general report covering that period is not required.

Record Form No. VII. Absence report on insular teachers, submitted by division superintendent to general superintendent. This report should be accompanied by evidence of illness or other papers explaining cause of absence.

It is absolutely essential that the utmost promptness be observed by all teachers in submitting reports to local superintendents. There should be no deviation from the rule that these statements shall be placed in the mails upon the last day of each calendar month. The report of the division superintendent to the general superintendent should be forwarded in any case not later than the 15th of the month following the period covered by the report. If municipal reports are for any reason delayed beyond that date in reaching the division superintendent, he will make mention of the delinquent teachers. Supplementary report should in such cases be submitted later. It is understood that in some instances the poor mail service prevents prompt communication from isolated towns.

No. 2, Series 1904.]

MANILA, January 15, 1904.

Character and efficiency report.

Attention is called to a new record form, Character and efficiency report on insular teachers, a copy of which is inclosed. Copies of this form, in duplicate, have been mailed this week to all teachers on insular salary. Its purpose is to obtain a more accurate and complete record of the services and character of the teachers employed in this bureau.

Division superintendents are directed to fill in the lower portion of this form as fast as copies are received from teachers, and to forward one of the duplicates in each case to this office. The information requested in this form is needed at once and the division superintendents can not exercise too great diligence in complying with these instructions.

No. 5, Series 1904.]

MANILA, January 16, 1904.

Limits of the school day.

By the provisions of Act No. 1040, a minimum of five hours' work daily in school is required of all teachers. The provision of the law is as follows:

"The number of hours for the daily sessions of the public schools shall be fixed by the secretary of public instruction, but they shall not be less than five hours a day."

My interpretation of this law would allow within this five hours, time spent by teachers instructing either pupils or native teachers and also time spent by a supervising teacher in visiting barrio schools and supervising or inspecting class-room instruction by American or Filipino teachers, but it clearly requires a minimum of five hours' school work from every teacher.

No. 6, Series 1904.]

MANILA, January 21, 1904.

Traveling expenses of supervising teachers.

An appropriation has been made by the Philippine Commission to pay the traveling expenses of teachers, who may be directed by the division superintendent to supervise school work and give instruction in towns adjacent to those in which they are stationed or in remote barrios of their respective towns.

In cases where division superintendents deem it advisable for teachers to make regular trips weekly or more often, for the above purposes, they will arrange definite schedules of routes to be followed and submit same to this office for approval by the general superintendent.

The traveling expenses of teachers, exclusive of subsistence, can be paid in all cases where they follow instructions of the division superintendent. Their expenses should be submitted on the regular expense voucher, supported by receipts, and should be accompanied by copy of letter of instructions from the division superintendent to the teacher, in addition to note from the former approving the expenditure.

No. 7, Series 1904.]

MANILA, P. I., February 4, 1904.

Appropriation of general funds for school purposes.

The attention of this office has been drawn to the fact that in several provinces municipal councils have made appropriations for the erection and repair of school buildings and payment of teachers' salaries out of the general funds of the municipal treasury and have later returned this money thus appropriated from the school to the general fund. The attorney-general and the insular treasurer state that this practice is illegal. The council may make a loan to the school fund with the understanding that the treasury shall be reimbursed from that at a later date; but the transaction, if it is to be considered in the nature of a loan must be distinctly so characterized on the municipal records. Otherwise the money must be considered to have been permanently appropriated for school purposes and can not be reassigned for other uses. The following is an extract from an indorsement of January 6, of the treasurer of the Philippine Islands:

"Respectfully returned to the honorable the secretary of finance and justice, inviting attention to the opinion rendered by the honorable the attorney-general, under date of December 23, 1903, to the effect 'That amounts advanced for school purposes in the year

1902 out of the fund of any municipality can not be abstracted from a part of the taxes now collected, now set aside for school purposes. Act No. 82 of the Philippine Commission, section 43 *b*, provides that the proceeds of at least one-fourth of 1 per cent of the lands and improvements as assessed shall be devoted exclusively to the support of free public primary schools and the repairing or erection of suitable school buildings. The municipal council shall have discretion to expend the remaining one-fourth of 1 per cent or as much thereof as they shall deem wise to levy for any lawful municipal purpose herein provided.

"From the foregoing opinion and quotation from the Municipal Code, it is presumed by this office that the same would apply in the present instance and as there is no provision by which an amount thus appropriated can be later abstracted from the special school funds unless such appropriation is made and specified as a loan, the same should stand in the nature of a gift or donation rather than be reimbursed to the general funds.

"FRANK A. BRANAGAN.

"*Treasurer, Philippine Islands.*"

No. 9, Series 1904.]

MANILA, February 5, 1904.

Resignations and leaves of absence of teachers.

In accordance with the provisions of Act No. 1040, recently enacted by the United States Philippine Commission, and executive order No. 9 of the civil governor, a memorandum has been drawn for the benefit of teachers, stating the conditions under which their resignations will be accepted and leaves of absence granted them, in accordance with the length of time which they have served in these islands. A copy of this memorandum is inclosed for your information, and a copy is being mailed to every teacher in the bureau of education. A copy of Act 1040 is also inclosed and copies sent to each teacher, and these will be followed by copies of executive order No. 9 as soon as they can be obtained from the public printer.

It is desired that division superintendents familiarize themselves with every provision of this memorandum and advise teachers relative to their going home. In this connection a report is desired from each division superintendent to be submitted as soon as the required data can be secured, relative to the number of teachers in each division who expect this year to permanently sever their connection with the bureau of education. The period of three school years of service expires for so considerable a number within the next few months that it has been anticipated that the engagement of a large number of new teachers in the United States to fill vacancies made by separations will be necessary. The last appropriation bill fixes the total number of teaching positions in this bureau at 873; there are at the present time in service in the archipelago 788 teachers. It is very desirable that for the coming year the full number of teachers authorized by law be engaged. These teachers will be supplied through civil service examinations in the United States and appointment from this office. It is not believed that there will be any difficulty in filling our ranks with desirable men, but it is necessary that the intention of every teacher who intends to resign at the end of this year be understood before the beginning of vacation in order that arrangements may be made to fill the vacancies so occasioned.

Attention in this connection is invited to Circular No. 8, setting forth the revised salary list effective since the 1st of January.

Application for leave of absence to visit the United States should be submitted to this office on civil-service Form No. 55, through the office of the division superintendent of schools. Copies of this form will be sent to division superintendents at an early date.

No. 10, Series 1904.]

MANILA, February 20, 1904.

Local school boards.

I wish to invite the attention of division superintendents to sections 10, 11, and 12 of Act No. 74, relative to local school boards. It is believed that in many divisions the organization of school boards has been largely neglected. The law, however, is quite explicit perhaps even mandatory in its provision for their establishment, and it is believed that the growing interest of the Filipinos in public education demands our immediate attention to the reconstitution of this local advisory body.

Especially in connection with the selection of sites and the procuring of means for building new schoolhouses, as provided in paragraph (d) of section 12, do I believe that the assistance of Filipino citizens of the municipality, acting in their official capacity on a local school board, may be of decided importance.

A report is desired from all division superintendents as to the state of the local school boards in each division. Wherever such are in existence the names of the members are

A report is desired from all division superintendents as to the state of the local school boards in each division. Wherever such are in existence the names of the members are

requested. This bureau will cooperate in an effort to increase the interests of the members of the local school boards by sending them copies of all school publications and circulars containing general information, and will try to answer promptly any communications sent by such boards direct to this office in accordance with paragraph (c) of section 12.

It is desired that division superintendents express themselves freely upon the question of what help can be expected from a reorganization of the local school boards, and suggest matters which can be referred to them in their advisory capacity.

No. 11, Series 1904.]

MANILA, February 17, 1904.

American teachers' institutes.

The division superintendent of schools for Cebu has submitted plans, which meet with my full approval, for an American teachers' institute to be held at the end of the present school year, in order to discuss, especially with the new teachers in the division, matters of school work and common interest.

Inasmuch as nearly every division contains teachers who have recently arrived from the United States, this plan is recommended to division superintendents generally. Time spent in this way, if not in excess of three days, may be credited to the teachers' service.

No. 15, Series 1904.]

MANILA, P. I., February 29, 1904.

On schoolhouse construction.

The coming year promises to be notable in the history of this bureau for building and construction. Not only are a great many barrio schools in progress of erection, but a number of municipalities are undertaking permanent school buildings, while the provincial boards in many provinces have either appropriated or provided for by loans for buildings for the provincial school.

It is exceedingly desirable in the case of all school buildings to be erected that the construction should be of an improved type and character. The bureau of architecture, upon the request of municipal councils or provincial boards, will prepare plans and specifications and will assist us in other ways, but it is desirable that all preliminary plans and data be carefully scrutinized and completed before submission to the bureau of architecture for final draft. For this work Mr. J. J. Eaton, of the Philippine School of Arts and Trades, has been given a desk in this office with instructions to correspond with division superintendents relative to proposed school buildings and to assist in every possible way in the preparation of preliminary plans. A pamphlet will be published which will contain full information upon these matters as well as suggestive plans and illustrations for all classes of school buildings.

I wish to call attention to the importance of securing suitable sites for every kind of public school. The necessity of an adequate campus for provincial schools has been dwelt upon in a previous circular, but there is equal reason for having spacious grounds and healthful surroundings for municipal and barrio schools. Wherever possible, permanent sites for schools should be secured. They should be a little removed from the noise and confusion of traffic and dwellings, and they must be dry, healthful, and, where possible, shaded. The action of provinces and municipalities should be sought, dedicating such sites permanently for school purposes, and in this connection I urge the reorganization of the local school boards for assistance in this work of procuring school grounds. Where a municipality is unable at the present time to erect a school building it will be able in many cases to set aside a suitable piece of ground for future building.

It is desired that all division superintendents report the number and kind of school buildings which it is proposed to build in each division. In addition to this a full report is wanted upon all school construction which has taken place in each division since the organization of the bureau of education. The names, locations, and cost of such buildings should be given. Wherever possible, sketches, ground plans, or illustrations should also be furnished.

In order to have necessary data for the improvement of the present condition of school buildings and the making of proper provision for future structures, it is desired that copies of the inclosed circular, properly filled out, be returned to this office whenever application is made for the preparation of plans for school buildings.

No. 17, Series 1901.]

MANILA, P. I., March 3, 1904.

Government scholarships in the United States.

Act No. 854, providing for the education of Filipino students in the United States, reads as follows:

"In each of the school divisions of the archipelago examinations to secure a list of students best qualified to receive and profit by a course of instruction and education in the United States shall be held under the direction of the division superintendents on or before the thirty-first of March in each year hereafter. Candidates for examination must be students of the public schools and natives of the Philippine Islands, of good moral character, sound physical condition, and not less than sixteen nor more than twenty-one years of age. Full report of such examinations shall be made by division superintendents to the general superintendent of education, who shall certify to the civil governor, through the secretary of public instruction, as eligible for appointment as government students to be educated in the United States, all candidates receiving a percentage of not less than seventy-five in in each subject of examination."

In accordance with the above provisions of law, an examination of candidates for government scholarships is hereby announced for the 31st of March ensuing and you are directed to post a copy of the inclosed notice in each municipality of your division. Examinations may be held during hours and places designated by division superintendents, but they must all be held upon the same day and it is believed by the undersigned that they should be uniform for all divisions. For this purpose examination papers will be sent out to all divisions superintendents upon the subjects to be required for examination. These examination papers are now being prepared in this office. They will cover the subjects requisite to admission into high schools in the United States, and the aim will be to make them of a sufficiently high standard to exclude all students who are not qualified to enter upon such a course. The relatively high character of the examination should be understood and pupils whose chances of obtaining an eligible rating are small should not be urged to compete in the examination.

The examinations will be conducted entirely in English and, in accordance with the provisions of the law, all applicants must be students of the public schools of the islands, and the division superintendent will certify to this fact as well as to the moral character and reputation of the applicant.

The applicants may be of either sex.

Sample questions from the first examination of candidates for the government scholarships in America.

English grammar.—1. Write the plurals of the following words: Knife, cargo, lady, valley, Englishman, brother-in-law, woman, mouse, radius, and church.

2. Give the three degrees of comparison of the adjective "good," and use each degree in a sentence.

3. Write a sentence using the verb "study" in (a) the active voice; (b) the passive voice; (c) in the present tense, third person, singular number; (d) in the future tense; (e) as an intransitive verb.

4. Write sentences using the word "that" as an adjective, as a relative pronoun, and as a conjunction.

5. Tell the part of speech of each word in the following sentence: "Benjamin Franklin, who was once a poor printer in the city of Philadelphia, became a great and wise man."

6. Write: (a) A simple sentence; (b) a complex sentence containing an adverb clause; (c) a complex sentence containing a relative clause; (d) a compound sentence.

7. What is the active voice of a verb? The passive voice? What is a transitive verb? An intransitive verb?

8. Tell the case of each noun and pronoun in the following sentences, giving the reason in each case: (a) John gave his sister a book. (b) His brother, the captain, is a large man.

Geography.—1. What is the earth's size? What are its movements? What are the effects of these movements on the distribution of light and heat?

2. Define and explain winds: trade winds. What are the prevailing winds of the Torrid Zone?

3. What is climate? Compare the climate of western Europe with that of eastern North America. Why is there a difference?

4. Define commerce: foreign commerce: domestic commerce.

5. What are the most important articles exported from the Philippine Islands? What are the most important imports?

6. Give three differences between young rivers and old rivers.

7. What form of government has the United States? Great Britain? Russia? Australia? France?

8. Locate the following cities: Havana; New York; St. Petersburg; Berlin; Melbourne; Cape Town; Liverpool.

9. Locate the following countries: Brazil; Russia; France; Turkey; New South Wales; Bulgaria.

10. Locate the Carayan River; Mississippi; Amazon; Danube; Yellow River.

United States history.—1. Name three prominent early North American discoverers. Describe discoveries made by each. Name three prominent early North American explorers. Describe explorations of each.

2. Name and describe three early and successful North American settlements.

3. Give causes of Revolutionary war. Name three prominent American generals in that war.

4. Describe the Constitution of the United States. When was it adopted? Why was it necessary?

5. From what countries were the following States obtained? Florida; California; Texas; Louisiana.

6. What was the Emancipation Proclamation? By whom was it issued? Why was it necessary? What was its effect?

7. For what were the following men noted? Washington; Jefferson; Lincoln; Grant.

8. Give cause and effects of the Spanish-American war.

- Arithmetic.*—1. At \$75 per hectare, what will be the value of a lot 200 meters long and 80 meters wide?
 2. Find the simple interest on \$2,475 at 7 per cent for two years and six months.
 3. The circumference of a wheel is 47 124 decimeters. Find its diameter.
 4. Divide 1.443 by 8473.
 5. The difference in longitude between two places is $9^{\circ} 34' 25''$. What is their difference in time?
 6. A ladder 35 feet long is so planted as to reach a window 20 feet from the ground. Find the distance from the foot of the ladder to the house.
 7. A Chino gains 50 per cent by selling 6 boxes of matches for 10 cents. What per cent would he gain by selling 2 boxes for 5 cents?
Physiology.—1. What is a "cell" in animals?
 2. Give the size, position, and purpose of the stomach. Make a diagram of it.
 3. What is the gastric juice for? Where secreted? What is the bile for? Where is it secreted?
 4. What is the purpose of the heart? Describe its structure.
 5. Define arteries, veins, lungs.
 6. What gas is taken into the body when we breathe? What gas is given out? Give two reasons why it is better to breathe through the nose than through the mouth.
 7. Why is it important to drink pure water? In what places is water likely to be impure? Why is it very dangerous to have decaying material and stagnant water near our houses? How may impure water be made pure?

No. 31, Series 1904.]

MANILA, P. I., April 1, 1904.

The attention of division superintendents is invited to the following communication addressed to this office:

DEPARTMENT OF THE INTERIOR,
 BOARD OF HEALTH FOR PHILIPPINE ISLANDS,
 OFFICE OF THE COMMISSIONER,
 Manila, March 24, 1904.

GENERAL SUPERINTENDENT OF EDUCATION,
 Manila, P. I.

SIR: I have the honor to transmit herewith 200 copies of Health Bulletin No. 3, on the care of infants. This bulletin is a translation of a circular in the various native languages for the information of native mothers, and is intended for the reduction of the excessive mortality among young children, which mortality is largely due to ignorance, improper feeding, exposure, and neglect. The copies above mentioned are sent to you for distribution among English-reading teachers, so that they may be able to intelligently advise parents in respect to matters treated of in this bulletin and which may come under their notice as a result of their necessarily close official relations with the people.

Very respectfully,

E. C. CARTER,
 Major and Surgeon, U. S. Army, Commissioner of Public Health.

Copies of the bulletin mentioned in above letter are forwarded for distribution to Filipino teachers.

No. 38, Series 1904.]

MANILA, P. I., May 23, 1904.

Reports on public school buildings and school finances.

A blank form for report on public school buildings has been prepared in this office and copies will be forwarded to division superintendents as soon as they can be obtained from the public printer. A copy of this form is to be filled out for every town in your division supporting a public school. Information will be required in each case upon the following headings:

1. Name of school (central or barrio).
2. Character of building (stone, wood, or nipa); walls; floor; roof.
3. Size of building; dimensions; number of rooms.
4. If leased, what is monthly rental paid.
5. If owned by government: When built; under whose supervision. Original cost of construction: In money; in contributed labor. Repairs or additions: When made; cost. Present valuation. Present condition. From what fund was cost of construction paid.
6. Remarks as to adequacy of present building, etc.

This report will be submitted by division superintendents to the general superintendent on July 1, 1904. Each individual town will be considered in its present status as consolidated under recent act of the Commission. If municipal school is not in session at the time of submitting this report, statistics on buildings rented or loaned to municipalities for school purposes should cover the last month of the preceding year. Separate detailed report is required on every case involving loan from insular government to province or municipality, indicating the amount of funds so made available and progress to date on construction of buildings. If assignment has been made to the province of government relief rice for school purposes, give date and amount of such assignment and submit special report as to method of utilizing rice and number and character of buildings erected.

Pictures of school buildings of each division will be valuable in illustration of prevailing conditions and will be inserted in the annual report of this office now in preparation.

Detailed report will also be due on July 15 from division superintendents on school finances, covering the fiscal year ending June 30, 1904. This will entail a statement of all receipts and expenditures of school money during the past year in each municipality.

1. Total receipts of school fund are recognized as coming from the following possible sources: Regular school land tax; appropriation from general municipal fund; loan from general municipal fund; receipts from other sources.

2. Expenditures should be detailed under the following headings: Schoolhouse construction; repairs on school buildings; purchase, construction, or repair of school furniture; teachers' salaries; transportation of supplies; incidentals.

3. A further statement will be submitted on undischarged obligations in the nature of teachers' salaries and miscellaneous items.

It is understood that it may be found difficult or impossible to submit this information in accurate detail in many cases. The law contemplates, however, that all such expenditures shall be made under the direct supervision of the division superintendent of schools and that no expense for school purposes shall be incurred by a municipality except upon his approval and authorization. (See Act No. 74, sec. 9, and Act No. 82, sec. 3, ff., as amended by Act No. 132, sec. 1.) Unless the information essential to the above statement is available the division superintendent can not satisfactorily discharge his official obligations. Experience in past months has shown it to be absolutely necessary that municipal school finances be most carefully supervised.

Conference with provincial treasurers will doubtless be necessary in order to provide a complete record. Every effort must be made to supply this information as requested, but if the facts now desired can not be given with accuracy the nearest possible approximation thereto will necessarily have to answer our present purpose.

No. 40, Series 1904.]

MANILA, P. I., June 20, 1904.

Memorandum on teaching of agriculture.

To meet the growing necessity and demand for agricultural instruction in our schools the courses of study at present in preparation and which will be shortly issued provide for this teaching in the following manner:

In the intermediate courses (Grades IV, V, and VI) plants of the Philippines are studied in the first year, animals of Malaysia in the second, and human physiology and hygiene in the third; while, alternating twice each week, instruction is to be given in gardening, elementary agriculture, and work with carpentry tools.

In connection with the agricultural work and extending through the three years the little book *Agriculture for Beginners* will be read, and the pupils, under the direction of the teacher, will make experiments in the preparation and fertilization of soils, in watering plants, in studying the destruction of injurious insects, and in planting and raising new garden and staple products.

Among the secondary courses the three years' course in agriculture, it is believed, will attract a considerable number of pupils. Few, however, for this coming year will be fully prepared to enter upon this course without some additional preparatory instruction in general agriculture, which will hereafter be supplied by the work above outlined for the intermediate course. For the preparation of these students and also for the benefit of adult farmers who may care to take up agricultural study, a provisional preparatory year in agriculture may be offered during the school year 1904-5. This year's work will be based upon the text-book *Agriculture for Beginners*, adapted, so far as is necessary, to the tropical products and conditions found in the Philippines.

The year's work should cover the study of soils, their formation, soil replenishment, both by fertilizers and by irrigation; climate, including rainfall, seasonal changes, storms, etc.; plant physiology; agronomy, or the study of tropical crops; plant diseases; injurious insects; beneficial insects and animals; domestic animals, etc.

The work in this course can be considerably assisted by a study of the bulletins of the bureau of agriculture. A special bulletin is to be prepared giving account of agricultural work already done in the schools of the islands and with suggestive outlines for instruction this coming year.

A useful little book, Hemmenway's *How to Make School Gardens*, has been ordered and will shortly be distributed.

No. 42, Series 1904.]

MANILA, P. I., July 1, 1904.

Industrial teaching.

A standing committee on industrial teaching has been appointed by the general superintendent for the purpose of assisting in the organization of the industrial work provided by the new courses of study in the primary, intermediate, and secondary courses. Pamphlets explaining these different courses of industrial teaching are in process of preparation. They will deal with school gardening, elementary agriculture, housekeeping and sewing for the primary and intermediate courses, with mechanical drawing, carpentry, and iron-working in the secondary course. The bulletin on mechanical drawing and wood and iron working in the secondary course is already in the press. It includes lists of tools and equipment necessary, with suggested plans for ships and buildings.

The Philippine School of Arts and Trades will be able to supply blue prints of detailed courses of study, also of various articles of furniture for work of this nature, such as drawing stands, carpenter benches, and cabinets.

In order to arrange these courses of work intelligently it is necessary to secure data regarding existing conditions and the individual needs of each province, as well as the ideas of those in the field.

The committee would like to receive samples and photographs of work done by the pupils.

Answers to the following questions are desired:

1. Give names of American teachers who have shown good judgment in regard to industrial work, and state specifically in what lines you consider them capable of teaching it.

2. What are the native industries of your division and in what particular locality is the best work being done.

3. Give full data as to the amount and value of local manufactories in regard to the maintenance of the people, and also where the finished product is sold.

4. Are many of the houses in your division made of wood? Are the vehicles, furniture, and other articles of wood of local manufacture? If not, where are they made?

5. What local industries should be fostered and augmented by industrial schools, and what new industries would you suggest?

6. What support can be expected from the province, both material and moral, to further industrial work? The government will supply a competent teacher as well as tools, instruments, and such material as can not be obtained locally, after the province has furnished land, buildings, and furniture necessary.

7. Are the native teachers capable of doing industrial teaching? If so, state qualifications.

8. What attempts, if any, have been made to teach industrial work? Describe fully when work was started, outfit, and by whom furnished, subject taught, number of pupils instructed, character, and quality of work done, and time devoted to it.

9. What class of pupils attend your higher schools? Do you think industrial work will attract pupils?

The general superintendent expects to secure through this committee for publication, detailed descriptions of the special industries throughout the archipelago.

Please distribute and collect and return to this office the inclosed supplementary letters.

No. 43, Series 1904.]

MANILA, P. I., July 1, 1904.

Directions for the submission of official correspondence.

Beginning this date the following regulations for the conduct of business of the offices of the general superintendent and division superintendents of the bureau of education will be effective.

1. All correspondence relating to official business from division superintendents and teachers will be directed to the general superintendent of education, Manila, P. I. This applies to business affecting any division of the general superintendent's office.

2. A circular of required forms for official correspondence is issued together with this circular, for the information of division superintendents, their clerks, and all teachers of this bureau.

3. Beginning this date the record division of the bureau of education will be reorganized and a cross-reference system of filing will be instituted. In order to lighten the work of this branch of the general superintendent's office, division superintendents and other members of this bureau are requested to confine the matter of each communication to one single subject.

4. The special attention of division superintendents is invited to the records of the offices of division superintendents, with a view of making these as complete as possible, and to the proper indexing and filing of all official correspondence.

No. 45, Series 1904.]

MANILA, P. I., July 30, 1904.

Publications.

Your attention is hereby called to the following publications of the bureau of education, either already issued or soon to be issued:

(1) The Philippine Normal School (prospectus for the year 1903-4). (2) A Course of Study in Vocal Music for Vacation Normal Institutes. (3) The Philippine School of Arts and Trades (prospectus for the year 1903-4). (4) The Philippine Nautical School (prospectus for the year 1903-4). (5) The Treatment of Smallpox. (6) Industrial Exhibits of Philippine Schools at the Louisiana Purchase Exhibition. (7) Courses of Instruction for the Public Schools for the Philippine Islands. (8) Cursos de Enseñanza para las Escuelas Publicas de las Islas Filipinas (Spanish Translation of Bulletin No. 7). (9) Philippine Baptismal Names with English Equivalents. (10) Government in the United States. Prepared for use in the Philippine Public Schools. (11) Courses in Mechanical Drawing. Wood Working and Iron Working for Provincial Secondary Schools. (12) Advanced Courses in the Philippine Normal School. (13) Colonial Governments of European States. Prepared for use in the Public Schools. (14) Codified School Law of the Philippine Islands, with Regulations of the General Superintendent. (15) American Politics and Parliamentary Law. Explained for Filipino Students. (16) Agricultural Teaching in Primary and Intermediate Schools. (17) Ethical Teaching in the Public Schools. (18) Course in Housekeeping for Intermediate Schools. (19) Teaching of Phonics to Filipino Children. (20) Games and Athletic Training in the Public Schools.

Single copies of these can be obtained by writing this office. If they are desired in considerable numbers, they should be requisitioned for on our regular requisition blanks.

Your attention is also called to the inclosed circular of the executive bureau in relation to publications for sale at that office.

No. 51, Series 1904.]

MANILA, P. I., August 10, 1904.

School holidays.

The following holidays are authorized for the public schools of these islands:

School holidays which are also legal holidays.—New Year's Day, January 1; Washington's Birthday, February 22; Holy Thursday; Good Friday; Decoration Day, May 30; Independence Day, July 4; Occupation Day, August 13; Thanksgiving Day; Christmas, December 25; Rizal Day, December 30.

School holidays which are not also legal holidays.—Epiphany or Three Kings, January 6; Purification of the Blessed Virgin, February 2; Ascension Day, May 1; Corpus Christi; Assumption Day, August 15; All Saints' Day, November 1; Patron Saint of the Pueblo, one day only.

Instruct all teachers to close their schools on the days above listed.

Absences of teachers on any of the above listed days will not be included by the division superintendents in their monthly reports of absences to this office.

No. 52, Series 1904.]

MANILA, P. I., August 10, 1904.

Salary changes.

Your attention is called to the following changes made in the current appropriation bill relative to the salaries of division superintendents and their clerks.

Superintendents of schools will all be appointed at large and will be assigned to such duty as is directed by the general superintendent of education. The same remarks apply to clerks of the school superintendents.

The following places are authorized by the act of the Commission:

	Per annum.
1 division superintendent.....	\$3,000
3 division superintendents.....	2,500
6 division superintendents.....	2,250
5 division superintendents.....	2,000
8 division superintendents.....	1,800
8 division superintendents.....	1,600
6 clerks, class 9.....	1,200
6 clerks, class A.....	900
6 clerks, class D.....	600
3 clerks, class E.....	540
3 clerks, class F.....	480
3 clerks, class H.....	360

In addition to the above there are 1 superintendent of the Philippine Normal School, at \$3,000; 1 superintendent of the Philippine School of Arts and Trades, at \$2,400.

It will be noticed that the minimum salary for a division superintendent of schools has been raised to \$1,600 per annum and that specific salaries are no longer attached to the different school divisions. Hereafter vacancies in any of the high grades will be filled by promotion regardless of the division to which the superintendent may be assigned to duty, and without necessitating a change of divisions.

Your attention is also called to the new schedule of salaries for American teachers:

	Per annum.
3 teachers, class 5.....	\$2,000
8 teachers, class 6.....	1,800
10 teachers, class 7.....	1,600
50 teachers, class 8.....	1,500
80 teachers, class 8.....	1,400
60 teachers, class 9.....	1,300
350 teachers, class 9.....	1,200
50 teachers, class 10.....	1,100
137 teachers, class 10.....	1,000
113 teachers, class A.....	900

Provision is also made in this new appropriation bill for the payment of the actual and necessary subsistence (not exceeding 3 pesos per diem) of division superintendents, while traveling on official business. Such accounts may hereafter be submitted.

No. 55, Series 1904.]

MANILA, P. I., August 16, 1904.

Instruction in housekeeping.

Three years of instruction in housekeeping is prescribed for all girls in the intermediate course. A bulletin covering this work in detail is in preparation, and in order to secure the collaboration of teachers in its preparation, a provisional table of contents and copy of the introduction are included herewith for general information.

A blueprint of the model Filipino house is also inclosed. Where carpenter work has already been organized, the necessary furniture for this house should be built by the students in carpentry and plans for durable and artistic pieces of furniture are being prepared in this office and will shortly be supplied on request of the division superintendent.

It will probably be impossible for the bureau of education to assist in the expense of construction of these model houses or of their equipment and these expenses should be provided for by local funds.

CONTENTS OF BULLETIN.

- I. Introduction.
- II. The model Filipino house and its furniture.
- III. Notes on drainage and sanitation.
- IV. Household pests and their destruction.
- V. Care of the house, floors, lamps, beds, furniture, etc.
- VI. Simple recipes and menus.
- VII. Fruit preserves and jellies.
- VIII. The garden; treatment of front yard; flowers and ornamental trees and shrubs; the kitchen garden; mushroom culture.
- IX. Sick diet.
- X. The sick room and its furnishings.
- XI. Care and dressing of infants.

Instruction in housekeeping in intermediate schools.

Introduction.—Regular instruction in housekeeping for all girls in the intermediate course has been prescribed in the courses of instruction published as Bulletin No. 7 of this bureau. The plan contemplates instruction twice a week for the three years of the intermediate course, as follows:

In the first intermediate year (Grade IV) the young girls will be taught—
 (1) The care of a house and its surroundings, cleaning, ventilation, and sanitation; use of disinfectants and deodorizers; the destruction of household pests; the care of drains, sinks, and closets.
 (2) The tasteful furnishing and arrangement of a house, the sala or living room, the bedroom, the guest chamber, etc.; the use and care of bed linen, washing of linen, soaps, washing powders, ironing, starching, the preparation and care of table linen.
 (3) The setting and decoration of a dining table. Sewing should be pursued by the girls, both at school and at their homes and should have to do largely with the making of bed and table linen, the embroidery of doilies, table mats, and articles for use in the home.

In the second intermediate year (Grade V) the girls will be taught the cooking and serving of meals. The recipes and simple menus to be included in this bulletin are planned of materials that usually can be found in the market of any Filipino town. Where addition of foreign materials is made these are such as it is believed can be easily secured by importation and are of such nature as to distinctly benefit the people by improvement of their diet and standard of living.

To carry out this instruction the plan of the bureau contemplates the erection of a "model Filipino house" in connection with each school, either intermediate or secondary. This house should have a sala, bedroom, kitchen, bath, and closet. It should be suitably furnished and equipped with furniture, cooking utensils, china, glassware, and linen. In this building all the practical work should be done. A class of about twelve can be instructed by the teacher at one time. On another page will be found plans and designs for such a building.

Sufficient space should be allowed around the building for an artistic treatment of a small yard at the front and a kitchen garden at the rear, work to be done in connection with the gardening by the boys.

The remaining matter of this bulletin has been supplied by various teachers in this bureau and in nearly all cases the suggestions have received the test of actual experiment.

No. 56, Series 1904.]

MANILA, P. I., August 17, 1904.

Plans for barrio schoolhouses and grounds.

There is transmitted under separate cover to each division superintendent a suggested plan of barrio schoolhouse and grounds, which has been prepared by the architectural draftsman of this bureau. The plan contemplates a site of an acre or more on which may be planted trees and shrubs and which may also contain a school garden and ample playground. It is suggested that the side of the grounds facing the road upon which the school is located be planted with one species of trees, while the trees at the sides and rear of the land may be varied in character and be representative or typical of Philippine forestry and also of foreign trees advisable to introduce.

Attention is again invited to a previous circular urging upon division superintendents the advisability, at this time, of having suitable pieces of land deeded as permanent sites for schoolhouses.

There is inclosed with the plan of the barrio school and grounds a blueprint of the suggested plan for shops for wood and iron work in provincial high schools, and also a plan for school grounds and buildings for the Rizal Institute, the provincial school of Occidental Negros at Bacolod. This last plan may be of interest as showing a good arrangement of buildings and grounds for a provincial school.

No. 64, Series 1904.]

MANILA, P. I., September 13, 1904.

Organization of intermediate and secondary schools.

I.

Nomenclature.—Attention is called to the following system of nomenclature for classes indicated in Bulletin No. 7 of this bureau—the bulletin entitled "Courses of Instruction."

The six grades of work which constitute the primary and intermediate courses are to be uniformly designated by the Roman numerals I to VI, I being the lowest class, and each numeral representing a full school year of instruction. Classes approximately one-half year apart should be indicated as I-A, I-B, II-A, II-B, etc., A indicating the second half year of the work, B the first half. Classes whose size require a division into sections doing equivalent work should be indicated as I-1, I-2, II-1, etc.

II.

Difference between grades.—The limited number of teachers available in proportion to the work to be done requires that classes shall be kept one year and not one-half year apart. Further divisions should not be made except in cases of classes whose size necessitates dividing them into sections, independently of their comparative advancement.

III.

Allotment of time.—These schools will be organized and teachers assigned to them on the following time basis: The amount of daily instruction received by each class shall be no more than 220 minutes per day. This amount is to be divided into five periods of 40 minutes each and one of 20 minutes for music or physical-culture exercises. Inasmuch as 300 minutes of class work per day are required of each teacher, this requirement, taken in conjunction with the 220 minutes for each class, gives us a basis of 11/15 (200/300) of each teacher's time for one class, or 11 teachers for 15 classes. It is expected that this organization will relieve a number of teachers from work in the provincial schools and make them available for municipal and supervisory work. You are requested to report on this point.

IV.

Required membership for classes.—Twelve students is set as the required minimum for whole-year grades and 21 the required minimum for half-year grades. Classes should not be divided into sections except when the number of students belonging exceeds 42.

V.

Geography and civil government.—Attention is called to the fact that geography is not prescribed for Grade VI. Classes of this grade already at work in geography may so continue until the mid year, after which civil government should be substituted.

VI.

Plant study and hygiene.—Under conditions which do not permit the organization of work in housekeeping, gardening, etc., in the intermediate course during the current year (see pp. 12-13, Bulletin No. 7) plant studies or hygiene and human physiology may be given five times per week instead of three or other disposition be made of these two periods per week at the discretion of the principal of the school and with the approval of the division superintendent.

VII.

Plan for school year 1905-6.—Work should be conducted with a view to opening the school year of 1905-6 with even work in all grades. For example, a class which might be graded for the current year as III-A and IV-B should be conducted with a view to carrying Grade IV work throughout 1905-6.

A report is requested showing by pueblos the number of pupils in your division to be classified this year in Grades IV, V, and VI. This report should also indicate the number of pupils in your division now prepared to take up secondary work and a statement as to which, if any, of the secondary courses as outlined (Bulletin No. 7, p. 20) your provincial high school is prepared to offer.

No. 65, Series 1904.]

MANILA, P. I., September 14, 1904.

Corporal punishment.

Division superintendents are directed to advise their teachers that corporal punishment in the public schools can not be permitted except with the written permission and upon the request of both parents and guardians of the child.

In lieu of corporal punishment, when severe disciplinary punishment is necessary, a teacher may suspend a pupil for a period not to exceed one week, and shall in each case, where such action is taken, send notice through the presidente to the local school board.

In extreme cases when a pupil has frequently been corrected, and his influence is bad in the school, and his reformation seems hopeless, a teacher may suspend such pupil without limiting the suspension, but shall immediately in such case make report to the local school board as above directed, and shall, in addition, report his action to the division superintendent forwarding with such report a statement of the cause for which suspension is made. The division superintendent shall then fix the period during which the suspension shall remain in force.

When a definitive expulsion is thought necessary by the division superintendent, the case shall be forwarded to the general superintendent for review and direction.

EXHIBIT B.

REPORT OF THE SUPERINTENDENT OF FILIPINO STUDENTS IN THE UNITED STATES COVERING THE FILIPINO STUDENT MOVEMENT, FROM ITS INCEPTION TO JUNE 30, 1904.

SANTA BARBARA, CAL., *July 1, 1904.*

SIR: The plan of sending students from one country to another for education is an old one, and has been employed by many countries, especially by those having colonial possessions, as well as by others desirous of the wider progress of their own citizens. Most of such enterprises, however, have been upon a small scale, for never before has any reached the proportions of the Filipino student movement, and usually they are backed by private enterprise. The most recent and notable example of the latter case is that of the Cecil Rhodes scholarships. From time to time England has sent young Hindus from among the inhabitants of India to Europe, but with comparatively little success. It is claimed that the mistake made in these cases has been that the education gained has been either solely of a professional character or of a character tending to prepare the student solely for clerical labor of some sort. Such results, while valuable, should not be the sole aim, nor indeed the chief aim. There can be no question that a very important factor, I believe the most important factor, in the success of Japan in her advance along the highway of modern civilization, has been her whole-souled adoption and practice of foreign, chiefly American, ways of thought and action. These have been introduced mainly by her young men who have been educated in whole or in part in some great civilized country. Japan has even now representatives among the student bodies of virtually all of the leading American institutions of learning. She has gone further, and for education has had foreign instructors in her schools, work shops, and governmental offices. The world to-day stands amazed at the result.

Even greater results are to be expected from the Philippines. Not to mention the numberless enterprises of every character, scientific, administrative, and judicial, inaugurated and continued by the American Government in the Philippines, to acquaint oneself with the past accomplishments and present purposes of the American educational authorities in the Philippines, is to know of the most inspiring and unselfish governmental enterprise ever undertaken in behalf of one nation by the government of another. The plan to send students from the Philippines for education, even complete Americanization, to the United States, has been the purpose of the educational authorities since soon after the implantation of civil government in the archipelago by the Americans. It took definite form with the passage of Act No. 854 by the Philippine Commission on August 26, 1903.

The appointment of the undersigned as superintendent of the Filipino students in the United States was made upon August 28,

by Civil Governor Taft, and I entered forthwith upon the performance of the duties connected with the selection and embarkation of students for America. It was necessary to accomplish this selection as soon as possible, because of the lateness of the season and the approach of cold weather in the United States, as well as because of the fact that further delay would place the students at the disadvantage of entering their schools in America after the beginning of the term. To accomplish this, all correspondence relative to selection of students was carried on by telegraph, and in this way, and with the hearty cooperation of all the educational authorities, it was possible to embark for the United States on October 10 this first expedition, 100 strong, and the most numerous body of students that ever left one country for a full four years' course of education in another.

A resolution of the Commission fixed the number for the first year at 100 students, 75 of whom were to be appointed from throughout the archipelago under the following apportionment:

Abra.....	1	Ilocos Norte.....	3	Pampanga.....	2
Albay.....	2	Ilocos Sur.....	4	Pangasinan.....	4
Antique.....	1	Iloilo.....	5	Paragua.....	1
Laguna.....	2	Tarlac.....	3	Cebu.....	4
Capiz.....	2	Masbate.....	1	Zambales.....	1
Cavite.....	3	Bataan.....	1	Oriental Negros.....	2
Manila.....	5	Union.....	3	Cagayan.....	1
Sorsogon.....	2	Rizal.....	2	Surigao.....	1
Batangas.....	3	Tayabas.....	2	Nueva Ecija.....	2
Isabela.....	1	Camarines.....	2	Bohol.....	1
Leyte.....	2	Occidental Negros.....	3	Bulacan.....	3

This apportionment was based roughly upon the school population and the importance in industrial lines of the respective provinces.

For the purpose of selecting the students in the various provinces the provincial governor and the division superintendent of schools were instructed to propose candidates for appointment, under the conditions mentioned in the telegram hereinafter quoted. With very few exceptions the provincial governors are Filipinos, the exceptions being Americans. The division superintendents of schools are all Americans. These two officials of course possessed a complete knowledge of local conditions, the governor being acquainted with the character and social standing of the individual applicants, while the division superintendent, personally and through his teachers, had a complete knowledge of the educational qualifications of the students. The concurrence of both of these officials was necessary, and they were guided wholly by the terms of the following telegram, which was sent to each of the provincial governors:

[Telegram.]

After conference with the division superintendent of schools, select for appointment as students in the United States at the expense of the government, — Filipino students of the public schools between 16 and 21 years of age. Each candidate is subject to examination in Manila, and in case of rejection his expenses to Manila and return home will be paid by government. Each student must be of unquestionable moral and physical qualifications, weight being given to social status. He must be well advanced in English, mathematics, history, geography, and of exceptional general intelligence. We must have the best boys in your province. Appointees must sign agreement to conform to reasonable regulations and to enter the Philippines civil service upon return to islands for a period equal to that spent in the United States at government expense. Every qualification mentioned is imperative. Expenses of appointees will be paid by the government after embarkation at Manila for the United States. Telegraph selections immediately in the

name of yourself and division superintendent, and hold candidates in readiness to proceed at once, upon telegraphic orders, to Manila and the United States. Certify immediately this telegram to division superintendent of schools. Prompt action is desired.

TAFT, *Civil Governor*.

Practically all of these provinces held competitive examinations, and those students securing the highest averages, who presented the other qualifications necessary, were certified to the civil governor by the officials named. Upon these certifications the appointments of the 75 students were made, and they were directed to proceed to Manila in season to embark.

The other 25 of the first hundred were chosen from a large number of applicants, and were proposed after examination by a committee composed of Dr. T. H. Pardo de Tavera, Philippine Commissioner; Hon. A. W. Fergusson, executive secretary, and the superintendent of the Filipino students. This selection was made without reference to attendance upon public schools, as was necessary in the case of the 75. Natural ability, together with special mental and physical fitness and promise, moral character, and general availability, determined the selection. The following provinces are represented in these 25: Cebu, 1; Ilocos Norte, 1; Laguna, 2; Batangas, 1; Cavite, 1; Iloilo, 1; and the city of Manila, 18.

Every student before appointment was required to sign the agreement referred to in the telegram above cited, as well as to undergo a thorough physical examination. For those students who were in need of the same, clothing suitable for the voyage and two heavy blue flannel army shirts were provided at government expense before leaving Manila, and in Hongkong two suits of exceedingly heavy woolen underclothing were bought for each student. It is sure that no student suffered for lack of warm clothing.

The inhabitants of the Philippines appreciated, as they have no other undertaking by the government in their behalf, the sending of these students to America, and the greatest enthusiasm was aroused throughout the islands. Numberless pleasing attentions in the nature of farewell entertainments were showered upon them before leaving their home towns and also after reaching Manila. A special operatic performance was given in their honor at the largest theater in Manila by a native troupe, and a great rally was held upon the morning of their departure at the headquarters of the Federal party, at which addresses were delivered by Governor Taft, Commissioners Smith and Tavera, and prominent Filipinos. The students were accompanied to the wharf by half a dozen brass bands, numerous civic organizations, and thousands of citizens and pupils from the various schools.

The students were embarked on the *Rohilla Maru*, all her accommodations having been reserved for them, and reached Hongkong in due season. Very few students were allowed to land at Hongkong, because of the shortness of the time spent there. The next day at noon transfer was made to the steamship *Korea*, of the Pacific Mail Company, upon which first-class reservations had been made for the entire party. Successively, one day was spent at Shanghai, one day at Nagasaki, two days at Kobe, two days at Yokohama, and one and a half days at Honolulu. Entire freedom was allowed the students for sightseeing at all these ports, and they availed themselves of the privileges to the utmost, for it was the regular programme upon reaching a port to secure 'rickshas, carriages, and

other conveyances, and to scatter to the four winds. No indiscretions of any sort were reported during these stops, nor indeed at any time during the voyage. The month on board was productive of much entertainment and considerable benefit to all the students. The chief occupation between ports was letter writing (I mailed over a thousand letters for the students before reaching San Francisco), and every kind of ship's games (for which the splendid ship furnishes the most ample facilities) and music were enjoyed. Some studying was done, and much instruction and advice was given by the superintendent relative to the matters of personal conduct at and away from the table, and what was to be reasonably expected from them upon landing and during their stay in America. The students were given military drill once or twice a day in good weather during the voyage. This proved to be of considerable physical benefit and it was certainly of material assistance in handling this body of youths, bewildered and confused by the hurry and bustle of a large American city for the first time, upon their arrival at San Francisco. By this drill the moving from the wharf to the custom-house, to the stores, about town, and to the railway station was made comparatively easy. It is pleasant to record in passing that the only comment from passengers and ship officers alike throughout the voyage concerning the conduct and bearing of the Filipino students was to the effect that they were thoroughly well-bred, gentlemanly young men, and surprisingly bright and well behaved.

Prior to the students' departure from the Philippines Governor Taft had cabled ex-Philippine Commissioner Moses at Berkeley requesting that he communicate with the county superintendents of schools in the seven southern counties of California, with a view to placing the students in their schools during the first winter. With the meager details possible to be communicated by cable complete arrangements were of course impossible, but a great deal of confusion and considerable delay were avoided by the arrangements made through Professor Moses.

Sufficient stop only was made in San Francisco to procure a complete outfit of suitable clothing for the students, and on November 11 the entire party left for southern California in special cars. The students were distributed from Los Angeles on the 12th and 13th of November and were located as follows: At Santa Barbara, 7 students; at Ventura, 6; at Ilueneme, 4; at Santa Paula, 4; at Claremont, in the public schools, 4, and in the Pomona College, 8; at San Diego, in the high school, 5, and in the State Normal School, 9; in National City, 5; at Compton, 4; at Whittier, 6; at Redlands, 6; at Riverside, 16. Two students already in the United States at the time of their appointment were located, 1 at Berkeley, Cal., and 1 at Ann Arbor, Mich.

Several reasons induced me to bring them to southern California at that time, the climate of course furnishing the most potent. The schools of California are of a superior grade, and they were freely offered for our purposes. Half tuition was granted at Pomona College, no tuition being paid elsewhere. A warm and hospitable reception was awaiting the students in the homes of the people of the communities where they were placed, and they will be in every respect better fitted for a change to a different climate and entrance into new schools next fall. Again, it made possible a visit by the

students to the Louisiana Purchase Exposition at St. Louis at no additional cost above the regular allowance made to the students by the government. This visit has been arranged for, and departure for St. Louis will be made August 1.

The health of the students has been good—far beyond expectation—since leaving the Philippines, an average expenditure of only \$2.50 per student having been necessary during the time covered by this report. This good showing is of course due mainly to the equable climate which they have experienced, though the care, in the first place, with which they were selected, from a physical standpoint, should not be overlooked. At each of my periodical visits to the students I have noted an increasing improvement in their physical condition, without a single exception. There is not a boy among them who has not gained considerably in weight, and many of them in height as well. Not a serious case of sickness has as yet befallen any student. Several accidents have occurred, however, one student having broken his arm by a fall in alighting from a street car, while another suffered a similar accident while attempting, after dark, to learn to ride a bicycle. Some dentistry work has also become necessary.

In accordance with my recommendation, made and repeated in former reports, the Commission has seen fit generously to provide in Act 1133, amendatory to Act 854, that the necessary expenses of medical attendance upon the Filipino students shall be paid in addition to, and not deducted from, the regular annual allowance of \$500 for each student. The importance of this measure is seen from the case of a young Filipino student who is being educated in the United States under my care at the expense of Judge William H. Pope, of the supreme court of New Mexico, formerly a judge of first instance in the Philippines. This student, Roman Valenteros, fell sick with typhoid fever, and though it proved a comparatively light case the expenses of his illness reached more than \$300.

During the period covered by this report (from October 10, 1903, to June 30, 1904) the students have expended for education and maintenance an average sum, approximately, of \$295 each. This shows an average saving of \$65 each. Of course some of the students have spent considerably more than the sum stated as an average, though only one of the hundred students has exceeded the \$360.60 which would have been the proportionate amount with \$500 per annum as the basis. Again, some of the students have spent considerably less than their allowance, the one who has spent less having saved somewhat over a hundred dollars in the period specified. In authorizing expenditures I have exercised the utmost care, and a truly commendable spirit of economy has been shown by nearly all the students during this first year, with a special view to enabling the students to visit the Louisiana Purchase Exposition without requiring any further appropriation than that of their regular annual allowance. These efforts have been successful, and full arrangements have been made through the cooperation of the chief of the bureau of insular affairs and the Philippine exposition authorities. Arrangements have been made so that this visit will become possible and no further expenditure occasioned than that permissible under the regular allowance for education and maintenance. Six weeks, approximately, will be spent at St. Louis by all of the students.

During the stay of the students in the towns of southern California, I have made numerous visits to each of the towns where they were located. These visits were made at intervals of about a month, and investigation was made at each one of the progress, welfare, health, and general condition of each of the students, and their expenses paid. For convenience, but at the cost of great labor to me, the business of disbursing the funds of the students has been added to my duties during the present year. Interviews were held with the teachers and principals of their schools, with the families in whose homes they boarded, and with townspeople in general regarding student matters. After investigation some few changes in boarding places and in schools were made, but changes of every sort were discouraged where sufficient reason was not seen for such changes. No student was changed from one town to another during the year.

At Santa Barbara three students attended grammar schools, two completing the eighth and one the seventh grades. The other four in this town attended the high school, being classified in the first year. Five of the students located at Ventura completed the grammar school course this year and were given their certificates, the other one at this place completing the sixth grade. Three students at Hueneme completed the grammar school, and the other the sixth grade. At Santa Paula two students were graduated from the grammar school with certificates, and the other two finished the first year of the high school. At Whittier the six students completed the first year of the high school, while the four students at Compton were graduated from the high school with diplomas. Four students at Claremont completed the grammar school course and were given their certificates this year, completing in eight months two full grades. Eight students were placed in Claremont at Pomona College, the larger number of their studies being in the collegiate department. At Redlands four of the six completed the grammar school with certificates, the other two finishing the sixth grade, several of the students taking two grades in less than one full year. The entire number of students at Riverside took the first year of the high school and completed the same. In Santa Ana six students were in the high school, and eight in the seventh and eighth grades of the grammar school. All of the fourteen were promoted at the end of the year. Nine students were in attendance at the State normal school, located at San Diego, while four attended the high school in the same city. The five students at National City completed the first year of the high school this year.

In every town students have been given private instruction. In some cases this special tuition has been paid for, but in the majority of cases it has been furnished by the regular teachers outside of school hours, and solely on account of the personal interest felt by the teachers in the students. Not one of the hundred students comprising the first expedition to the United States failed of promotion at the close of the first year, and many were promoted during the year as well. This is an exceedingly gratifying report to make, and shows a commendable spirit of industry and a seriousness of purpose quite beyond what one would have expected. The students were handicapped by a lack of precise knowledge of English, by the loss of one or two months at the beginning of the year, and generally by the entire newness of their surroundings. But despite these drawbacks they entered

upon their work immediately with diligence and kept it up throughout the year with perseverance; and the record they have made is certainly one of credit to themselves and to their race. They have kept pace nearly always on equal terms with, and often a little ahead of, their American schoolmates, and not only in studiousness and seriousness are they often cited to their American companions as desirable examples, but many teachers have stated to me that they have been a very noticeable influence for gentleness, courtesy, and neatness upon their American fellow students. Not the least of the many beneficial results of this Filipino student movement has been this effect upon the American students and others with whom they have associated. It has amounted in many cases to a conversion from prejudice and antagonism to real friendship for and interest in the Filipino people and their government.

It would be too much to say that there has been no instance of any unfavorable treatment of my charges, nor was entire immunity expected. There were of course some few narrow ones to make them believe that they were unwelcome in the community. But while these few instances have of course been painful, no single case has been serious enough to demand any formal notice. On the other hand, it has been surprising to see in every town in which students were located how kindly has been the feeling displayed by the school bodies, the teaching force, and the townspeople of the better class in general. That the students have always acted so as to merit the treatment of gentlemen has of course contributed largely to their sympathetic reception. The most that could be asked would be that no more race or other prejudice be shown them during their stay in America than has been experienced so far.

They have been received into the best families and into the best social circles in practically all of the towns in which they have been located. Indeed, it has been necessary in several cases for me to request the students to abstain from accepting invitations to social functions except on Friday evenings and Saturdays. Of course there is danger in too much social attention, but in reason their social life is quite as important as any other. It is interesting to note that at a number of places the students have taken part, always in English, in public entertainments connected for the most part with their schools. One student made an interesting address before his County Teachers' Institute on the life and death of Dr. Jose Rizal. After reading what he had prepared, having still further ideas to advance, he continued *ex tempore* for some six or eight minutes on the same theme. Another whom I considered as backward as any in his English when we left Manila, delivered before a teachers' institute with expression and clearness Lincoln's address on the Gettysburg battlefield, which the student had begun to memorize three days previous. Another student took the leading part in a two-act play at the close of the school year, and in my opinion his performance was much more creditable than that of any other of the participants, by reason of his self-possession and grace. On the night of December 30, 1903, the sixteen students located at Riverside entertained their friends with a programme rendered in Spanish and in English, commemorative of Doctor Rizal. All were obliged to take part, and some of their addresses were printed in full and received favorable mention in the press. At several of the towns the students have been depended

upon to fill out musical numbers on many a school programme. Many of the students at various localities joined the school literary organizations, and at some of the towns the Filipinos themselves organized literary societies in which all exercises were carried on in English, and a fine imposed upon any one using any other language. While of course nothing of any great brilliancy, either in a literary or in a musical line, has been produced by the students, the general average of their performances in such matters has been really high in merit, and interesting to the audience. Naturally the fact of their being Filipinos has added considerably to the popular interest in their efforts.

The schools of southern California have in many ways proven of exceptional adaptability to the Filipino student's needs. Many of the schools, especially high schools, in southern California have new buildings and the latest equipment in all departments, while the teaching force of all the schools, whether in small or large towns, is of a standard scarcely excelled in any other State. There are many Spanish speaking people, Mexicans, in this region, remnants of Mexican domination, or immigrants from our neighboring Republic. Many of these have attended the same schools with the Filipinos, and the Filipino is in many respects more like the Mexican than he is like any other race I know of. The sectional or race issues are unknown, and the typical western hospitality has been extended to the visitors. It is much to the credit of this people's generosity that in every town almost the students were received, not only as visitors, but as boarders into the families of the best people. These families of course took them greatly on faith, for they knew not whether a student would require so-called civilized food or whether he was used to association with people of gentle not to say unsavage habits. Moreover, the impression before the students came was that they were "children"—that is to say, between the ages of 12 and 16. Again, they were not supposed to know any English to speak of, nor to possess any appreciable number of cleanly habits. Had these impressions proven true ones the entertainment of the students would have been a matter of serious concern and of no little inconvenience to any family taking them.

I feel heavily indebted to the seven county superintendents of schools of southern California for their vouching for the students with nothing but their own kindly natures to guide them, and for many other efforts and influences expended in their behalf, prior and subsequent to their coming. There was no lack of homes when the students arrived; and to their credit I may add that I have had numerous applications from every town in which students have been located since it was known that more students will come from year to year. Whether others will be brought to southern California to spend a part of their stay in the United States remains for future conditions to determine. But it is very pleasing to feel that should this become desirable the students will be received in this section with hospitality and helpfulness.

One student said to me the other day, "Mr. Sutherland, I feel now two homesicknesses—one for Riverside and one for my native town."

The selection of permanent schools, that is, schools for the students to attend during the remainder of their stay in America, has been a matter of serious study and careful investigation. Before my appointment as superintendent, and several months before the passage of Act

854, providing for the education of Filipino students in America, I took it upon myself to enter into correspondence from Manila with nearly a hundred different institutions of learning throughout the United States. The conditions upon which Filipino students would be admitted, the terms for tuition, board, books, and general expenses, the scope of the curricula, and the adaptability of the schools for the purposes sought, were all accurately determined and later carefully condensed. Naturally in this matter was determined also, almost unconsciously, the spirit with which these students would be received by the faculties and school authorities, and by reflection also the manner in which the members of the student bodies of the respective schools would receive the Filipinos. Our fears regarding those schools in States where a large part of the population is composed of negroes, I am sorry to record, were found justified. Not the school but the sentiment is at fault. And while for reasons of climate, system of education, and other cogent ones, this section should have been the one logically to receive the students in their major part, in order to avoid all possibility of unpleasantness or mistreatment, no students are to be placed at any point where they will be thus exposed. Furthermore, with this first expedition the section in which they were to be placed was reduced to that east of St. Louis. This was due to my desire to have the students avail themselves of the splendid opportunities to visit the Louisiana Purchase Exposition en route eastward. So that, avoiding the cold as far as possible of the extreme northern portion, the States in which most of the students will be placed are those of Massachusetts, Connecticut, New York, Pennsylvania, Ohio, Illinois, Indiana, Michigan; a few in Maryland, West Virginia, Tennessee, and Missouri.

For the purpose of visiting the schools in which students could be satisfactorily placed, I made a personal visit to the States mentioned, as well as to a number of others. In order not to be without communication with the Filipino students any longer than was absolutely necessary, I made this visit as quickly as practicable, and while I was away from May 4 until June 7, no two nights were passed in the same town except while consulting the department officials at Washington, where I spent two nights. One day going and one day coming I spent at St. Louis looking into the conditions upon which the students could make their visit to the World's Fair, and another day was spent in consultation with Dr. E. B. Bryan, of the University of Indiana, formerly general superintendent of education in the Philippines. The assistance so secured was of great benefit to me, particularly in the selection of those normal schools of the highest grade for the students desiring to become teachers. Upon leaving Washington I visited Philadelphia and secured admission for four students into the Pennsylvania School of Industrial Art. I have recommended that the two students who were originally appointed mainly for their natural and phenomenal talent in art be placed here, together with one who desires architecture, and another, lithography. The State Normal and Training School at West Chester, Pa., was visited next, and recommendations have been made for four students to be located here, with two more, should it become desirable later. A great number of Cuban teachers have attended this institution from time to time, so many, in fact, finding the school so appropriate for their own and their country's needs, that too many applications were received,

and their number has been necessarily restricted. The State Normal and Training School at Trenton, N. J., agreed to take four or six students, and I have recommended that they be placed at this school. This school and the one preceding have exceptionally fine equipment in all departments, and give strong courses in manual training, which is considered so important in the education of the Filipino.

Some of the students not having decided upon any definite course to follow, and desirous of taking another year of work in English and in general branches before specializing, I had to select certain high schools and preparatory schools for this class. The first one selected was the high school at Meriden, Conn., and here I have recommended that four students be placed. After thorough consultation with Dr. Henry S. Pritchett, president of the Massachusetts Institute of Technology, four scholarships were offered to Filipino students in this institution. Three engineering students were recommended. The next school selected was the State normal at Oswego, N. Y., and four or six students will be located here. Every branch is well equipped, especially the manual training. Cornell University, through its president, Dr. J. G. Schurman, offered four scholarships, and the four best prepared students for engineering courses were recommended for Cornell. Four other students were recommended to be placed at the Ithaca High School, some of whom are desirous of taking the splendid commercial course offered here. Having to pass through Pittsburg, I stopped off and visited the director of the Carnegie School of Technology, Mr. A. A. Hamerschlag, formerly of the New York Trade School. When it shall be completed, I believe that possibly no school in the United States will offer so nearly just the sort of education that the Filipino student and his country need. Courses varying in length from six months to several years, in every occupation and every trade of an industrial character, will be given, under the best and most practical specialists that can be secured. The enormous amount of funds for disposal in this work, as well as the location of the institute at Pittsburg, will make it possible to provide opportunities quite unparalleled elsewhere. When this school is completed I shall make an effort to secure for it a large number of Filipino students, government and private. The next school selected was the high school at Cumberland, Md., for which school four students not desiring special courses at present were recommended. Then the high school at Parkersburg, W. Va., was recommended for four more. Three students desirous of commercial courses were recommended for the commercial college of the Kentucky University at Lexington, Ky. The high school at Chattanooga, Tenn., besides offering the ordinary high school courses, is the only high school in the country providing a complete course in meteorology, and I have recommended that four students be placed here. This recommendation may be varied later. The University of Tennessee, at Knoxville, offers the best opportunity for those students who not being prepared for regular university work are still desirous of taking a law course in the United States. A two years' law course is offered here with the privilege of taking enough other work to complete the high school course which is requisite for graduation, at the same time as pursuing the professional course. The Filipino students, having three more full years, should be able, I think, to complete this course acceptably. So I have recom-

mended five students for the law department of this institution. Being the southernmost school in which I feel safe in locating my charges, those students who desire to take an agricultural course have also been recommended for this place. They are two, and probably two more will be added. One student has also been recommended for the department of education, which contains special agricultural features not found elsewhere. Dr. Charles W. Dabney, for many years president of this university, this year called to the University of Cincinnati, assured me that no unfavorable sentiment exists among the students here, and I can well believe it from investigation and from the many years' propaganda in behalf of a reasonable view of the race problem carried on by Doctor Dabney, and reflected by the popular sentiment of the university.

The preparatory technical school of the University of Cincinnati furnishes especially appropriate opportunities for the grade of work required by a large number of the 1903 Filipino students. That is, they desire a technical course in engineering branches, and are yet not prepared for university engineering work. It would be a grave disappointment should they have to spend their whole stay in America in getting prepared to begin the work they came over here to do. But fortunately there are an increasing number of schools that meet their needs; manual training and technical, high and preparatory schools. After a three years' course in such a school, with whatever suitable work can be covered during the summer, the student should be prepared to enter, upon his return to the Philippines, into work of an engineering character that would, in the course of a few years' experience, fit him for most of the problems that will present themselves for his solution in the development of his country. Such a school is the one last mentioned, and I have recommended six students for it. Four students were recommended for the grammar and high schools at Lima, Ohio; these students not having decided upon special courses. Four students were recommended for the academic or preparatory department of Oberlin College, at Oberlin, Ohio. One student is recommended for the engineering course at Michigan University, Ann Arbor, Mich. Four or six students can be located at the State Normal School, Dekalb, Ill., and I have so recommended. A like number have been recommended for the parent institution, the State Normal University at Normal, near Bloomington, Ill. These two schools are particularly strong in manual training work. Purdue University, one of our best technical schools, was visited, and generously offered me four scholarships, but through lack of preparation of the students none was recommended for this institution.

The Manual Training High School at Louisville, Ky., was visited and application made for the admission of four engineering students, since the school quite meets their requirements. Four students were recommended for this institution, but I have since seen in the press dispatches (though I have not been directly informed) that the State board refused to admit them. These students will of course be located elsewhere. Three students were recommended for the law department of the University of Indiana, and, being of the more advanced students, will probably complete the law course in the three years remaining to them. Six students desirous of taking

a medical course have been recommended for the University of Missouri at Columbia, which institution affords facilities in this department peculiarly adapted to individual instruction and attention. This will certainly be of great value in the case of the Filipino students.

During the time intervening between the date of this report and that of the opening of the schools further consideration will be given the subject, and with the authority of the chief of the bureau of insular affairs, to whom authority for definite action has been confided by the civil governor, certain variations in the matter of students and schools will possibly be made. These changes, if any, will be reported promptly.

The close of this report leaves the hundred students at the charming city of Santa Barbara, busily engaged in attending a summer school and enjoying their reunion after the year's work. It was necessary to congregate the students in one place prior to their departure for the East, and so they were brought here during the closing days of the month of June. Four teachers especially strong in their particular branches have been employed and classes are held during the forenoon only, instruction being given in English in five classes; in algebra, four classes; in history, civics, and geometry, two classes each; in arithmetic and trigonometry, one class each; and in vocal music one class, which all attend. The afternoon is left for recreation and the evenings are spent in great part in literary and musical entertainments, such as debates, addresses and the like. The students have formed baseball, tennis, basketball, and "sipa" games, and compete with town teams and among each other. They have also a large orchestra and a chorus which includes the hundred voices, as well as special quartets, etc. Further report will be made opportunely of this summer school.

Except in that part referring to the months of April, May, and June, this report embodies the record of the student movement since its beginning. No special report will be made for the said months of April, May, and June, this report being presented in lieu of the third quarterly report as required by law.

Viewing from every standpoint the progress of the Filipino student movement from its inception to date, we feel that the Government can not but be congratulated upon its splendid work, and the success, so far, of this enterprise. The students have proven themselves well-bred gentlemen, fit representatives of a race aspiring to national and individual advancement; their health has been almost perfect and they are improving physically in stature and in strength; they have lived considerably within their allowances, so much so as to make possible a month of summer school and a six weeks' visit to the World's Fair. The good influence of people of strong character and upright morals has become increasingly noticeable, and the seriousness, intelligence, and patriotic ambition of the Filipino students give promise to-day of a brighter future for their race and a record of honor for their protectors, the American people.

Respectfully,

WM. ALEX SUTHERLAND,
Superintendent Filipino Students.

HON. JAMES F. SMITH,
Secretary of Public Instruction, Philippine Islands.

EXHIBIT C.

REPORT OF THE CHIEF OF THE BUREAU OF ARCHITECTURE AND CONSTRUCTION OF PUBLIC BUILDINGS FOR THE FISCAL YEAR JULY 1, 1903, TO JUNE 30, 1904.

MANILA, P. I., *September 15, 1904.*

HON. JAMES F. SMITH,

Secretary of Public Instruction, Manila, P. I.

SIR: In compliance with instructions conveyed in your communication dated July 27, 1904, I have the honor to submit the following report on the operations of this bureau for the fiscal year ending June 30, 1904:

The personnel of the bureau has, until the passage of Act No. 1049, remained the same as the previous year. Act No. 1049 provided for one additional clerk, class 9, who was assigned to duty as bookkeeper. The personnel on the last day of the fiscal year was as follows:

Chief of bureau; 1 master builder; 1 superintendent of construction, class 6; 1 electrical engineer, class 6; 1 disbursing officer, class 6; 1 clerk, class 7; 1 draftsman, class 7; 2 draftsmen, class 8; 1 mechanical engineer, class 8; 2 clerks, class 8; 1 clerk, class 9; 2 stenographers, class 9; 1 storekeeper, class 9; 2 junior draftsmen, class F; 2 junior draftsmen, class G; 1 clerk, class I; 1 employee at \$210, and 1 employee at \$150.

There have been the usual number of transfers, separations, and promotions.

The volume of work handled directly by the bureau has increased so as to require, during most of the year, the services of 4 American foremen, 1 Spanish foreman, and skilled and unskilled laborers averaging 650 per month. It is still found necessary to employ Japanese or Chinese carpenters and masons for all of the finer parts of the work, but, nevertheless, it has been found that the native "capataz" or foreman of 10 or 12 workmen has demonstrated in many instances intelligence, regularity, and interest in his work. The master builder has instructed these men in proper methods of building construction, and it is believed his work on these lines is beginning to show good results. The native still continues to hold a superior position on all points touching interior decorations with paint and brush.

With the largely increased working force of labor very much more has been accomplished than during the preceding year. This refers to work done directly by the bureau. With the exception of the new laboratory, this has consisted of a multitude of repairs and alterations to existing buildings, as well as a number of new buildings of minor importance.

The drafting-room records show that the number of jobs for which drawings were made was 111, necessitating 411 sheets of drawings and a like number of tracings, from which 1,350 sheets of blueprints were made. By far the larger part of the year's work, however, consisted of jobs for which no drawings were required.

The following comparative figures show the amounts of the various kinds of material mentioned used during the fiscal years 1903 and 1904, the same proportion of increase being true of the great variety of other supplies and materials used during the periods specified:

Description of item.	1903.	1904.
Property invoiced to the bureau by the insular purchasing agent on vouchers (representing the value of ₱ 166,500.86 in 1903 and ₱ 374,530.26 in 1904) . . .	382	329
Cement expended on the various jobs barrels . . .	3,189	4,629
Window glass panes . . .	2,164	7,595
Corrugated iron sheets . . .	1,302	4,615
Flat galvanized iron do . . .	667	4,372
Locks of various descriptions and sizes do . . .	445	650
Oregon pine and California redwood board feet . . .	635,940	1,079,438
Nails pounds . . .	18,172.5	48,660
Paint:		
Gallons	748	1,007.5
Pounds	14,341	23,321
Cast-iron pipe linear feet . . .	4,365	6,890
Galvanized-iron pipe do . . .	4,265	32,949
Wood screws dozen . . .	1,577	2,644
Solder pounds . . .	878	1,966.5
Turpentine gallons . . .	62	500.75
Varnish do . . .	65	245

The foregoing represent only a few of the 800 varieties of building materials carried on the property books of this bureau. All these materials, except the lumber, were issued from the bureau's storehouse or from the Nozaleda yard, on about 3,000 separate orders, and was all used in work done directly by the bureau. The majority of the lumber used was delivered directly by the insular purchasing agent from his own yard to the various jobs, the practice being to make out a blanket requisition of about 200,000 feet for delivery as needed.

The office equipment has been increased by the addition of an excellent photographing outfit, which has been of the greatest value. Accurate records of the progress of work can thus be obtained and valuable details of construction preserved.

The government has been put to no expense in this regard beyond the cost of plates, paper, and chemicals, as excellent results have been obtained by one of the bureau clerks skilled in the art, who, in addition to his regular duties, takes charge of this branch of the work.

BUREAU OF GOVERNMENT LABORATORIES.

Photographs of the new laboratory for the bureau of government laboratories are attached hereto, showing the character of its construction and stage of completion on the various dates mentioned. A description of this building was outlined in the first annual report and the same has been closely followed in its construction. With the exception of the machinery equipment, the building is practically complete. Floor plans of the building as actually constructed are herewith presented, together with photographs of some of the interior desks and fittings.

The style of construction adopted being in the way of an innovation in Manila, the work has progressed very slowly, none of the masons

ever having before worked in three coats of plastering. It took months of instruction to get the men used to running the plaster to lines that were plumb and true, as well as to instruct them how to work to the plaster screeds. Both the exterior and interior are plastered with three coats of lime and cement mortar, which had to be shielded from the direct sunlight for many months to prevent undue cracking of the mortar.

In addition to the slow progress of the plastering work, as mentioned above, were delays incident to the delivery of building material ordered from the United States—the metal lath, for instance, which took over ten months to deliver after the order was placed. Delays of this kind, however, in Manila must be expected for some time to come on buildings involving such an amount of imported material.

It might be interesting to state that although the materials entering into the construction of the building are plain and without much variety, yet they came from widely different points. The cement came from Macao, China, and from Japan; the timber from Australia; the gas machine from Madras, India; the fire brick from Shanghai, China; the metal lath from New York; the circular stairs from Singapore; certain of the finishing woods of the interior from Oregon and California, and all of the machinery equipment from various parts of the Eastern States.

The working desks for both the biological and chemical divisions are somewhat of a modification from the usual design and are pronounced by the superintendent of government laboratories as especially well adapted to laboratory needs. Photographs of the drawings from which these desks were built are attached hereto, together with photographs of the completed desks.

The hoods are built on the same general plan as the desks, so far as the construction applies.

The general library room is fitted with patent metallic book-shelf standards, with adjustable shelves of wood.

The greater part of the woodwork was worked out by hand. The columns forming a part of the interior finish were built up and turned in a crude lathe built on the premises. All of the exterior moldings were run by hand. Attempts were made several times to contract for those parts of the finish as are usually mill-worked, but after one or two such trials, in which the work had to be done all over again by hand, it was decided to get out all the remaining finish with hand labor at the job.

The cast cement ornaments on exterior were made from forms carved on the premises. The entire building, in fact, has been constructed by hand labor of the bureau's skilled workmen, with the exception of the sash and window frames, circular iron staircases, and iron frames for desks and hoods, for which items contracts were entered into.

Experience derived from building the laboratory demonstrates the absolute necessity for a small plant fitted with a few woodworking machine tools, with power to run them, and a large general workshop. A fully equipped mill is not desired, as the character and design of new buildings will not usually entail the use of elaborate machinery.

Numerous repairs have been made from time to time to the premises on Calle Alix, rented for the use of the biological laboratory, and to the buildings on Calle Iris used by the chemical laboratory. Num-

The drafting-room records show that the number of jobs for which drawings were made was 111, necessitating 411 sheets of drawings and a like number of tracings, from which 1,350 sheets of blueprints were made. By far the larger part of the year's work, however, consisted of jobs for which no drawings were required.

The following comparative figures show the amounts of the various kinds of material mentioned used during the fiscal years 1903 and 1904, the same proportion of increase being true of the great variety of other supplies and materials used during the periods specified:

Description of item.	1903.	1904.
Property invoiced to the bureau by the insular purchasing agent on vouchers (representing the value of P 166,500.86 in 1903 and P 374,530.26 in 1904) . . .	382	329
Cement expended on the various jobs barrels . . .	3,189	4,629
Window glass panes	2,164	7,595
Corrugated iron sheets	1,302	4,615
Flat galvanized iron do	667	4,372
Locks of various descriptions and sizes	445	690
Oregon pine and California redwood board feet . . .	635,940	1,079,438
Nails pounds	18,172.5	48,660
Paint:		
Gallons	748	1,007.5
Pounds	14,341	23,321
Cast-iron pipe linear feet	4,365	6,890
Galvanized-iron pipe do	4,265	32,949
Wood screws dozen	1,577	2,644
Solder pounds	878	1,966.5
Turpentine gallons	62	500.75
Varnish do	65	245

The foregoing represent only a few of the 800 varieties of building materials carried on the property books of this bureau. All these materials, except the lumber, were issued from the bureau's storehouse or from the Nozaleda yard, on about 3,000 separate orders, and was all used in work done directly by the bureau. The majority of the lumber used was delivered directly by the insular purchasing agent from his own yard to the various jobs, the practice being to make out a blanket requisition of about 200,000 feet for delivery as needed.

The office equipment has been increased by the addition of an excellent photographing outfit, which has been of the greatest value. Accurate records of the progress of work can thus be obtained and valuable details of construction preserved.

The government has been put to no expense in this regard beyond the cost of plates, paper, and chemicals, as excellent results have been obtained by one of the bureau clerks skilled in the art, who, in addition to his regular duties, takes charge of this branch of the work.

BUREAU OF GOVERNMENT LABORATORIES.

Photographs of the new laboratory for the bureau of government laboratories are attached hereto, showing the character of its construction and stage of completion on the various dates mentioned. A description of this building was outlined in the first annual report and the same has been closely followed in its construction. With the exception of the machinery equipment, the building is practically complete. Floor plans of the building as actually constructed are herewith presented, together with photographs of some of the interior desks and fittings.

The style of construction adopted being in the way of an innovation in Manila, the work has progressed very slowly, none of the masons

ever having before worked in three coats of plastering. It took months of instruction to get the men used to running the plaster to lines that were plumb and true, as well as to instruct them how to work to the plaster screeds. Both the exterior and interior are plastered with three coats of lime and cement mortar, which had to be shielded from the direct sunlight for many months to prevent undue cracking of the mortar.

In addition to the slow progress of the plastering work, as mentioned above, were delays incident to the delivery of building material ordered from the United States—the metal lath, for instance, which took over ten months to deliver after the order was placed. Delays of this kind, however, in Manila must be expected for some time to come on buildings involving such an amount of imported material.

It might be interesting to state that although the materials entering into the construction of the building are plain and without much variety, yet they came from widely different points. The cement came from Macao, China, and from Japan; the timber from Australia; the gas machine from Madras, India; the fire brick from Shanghai, China; the metal lath from New York; the circular stairs from Singapore; certain of the finishing woods of the interior from Oregon and California, and all of the machinery equipment from various parts of the Eastern States.

The working desks for both the biological and chemical divisions are somewhat of a modification from the usual design and are pronounced by the superintendent of government laboratories as especially well adapted to laboratory needs. Photographs of the drawings from which these desks were built are attached hereto, together with photographs of the completed desks.

The hoods are built on the same general plan as the desks, so far as the construction applies.

The general library room is fitted with patent metallic book-shelf standards, with adjustable shelves of wood.

The greater part of the woodwork was worked out by hand. The columns forming a part of the interior finish were built up and turned in a crude lathe built on the premises. All of the exterior moldings were run by hand. Attempts were made several times to contract for those parts of the finish as are usually mill-worked, but after one or two such trials, in which the work had to be done all over again by hand, it was decided to get out all the remaining finish with hand labor at the job.

The cast cement ornaments on exterior were made from forms carved on the premises. The entire building, in fact, has been constructed by hand labor of the bureau's skilled workmen, with the exception of the sash and window frames, circular iron staircases, and iron frames for desks and hoods, for which items contracts were entered into.

Experience derived from building the laboratory demonstrates the absolute necessity for a small plant fitted with a few woodworking machine tools, with power to run them, and a large general workshop. A fully equipped mill is not desired, as the character and design of new buildings will not usually entail the use of elaborate machinery.

Numerous repairs have been made from time to time to the premises on Calle Alix, rented for the use of the biological laboratory, and to the buildings on Calle Iris used by the chemical laboratory. Num-

erous repairs and minor structures for housing small animals have also been made for the serum laboratory at San Lazaro.

BOARD OF HEALTH.

A crematory has been constructed adjoining the morgue built last year, plans and photographs of which are attached hereto. The stack is of sufficient capacity to admit of the construction of another unit if the same shall become necessary.

A contract has been let for new water mains from the storage tanks to the men's and women's toilet rooms in the leper hospital. Branch connections are provided for fire hose. New range closets with large flushing tanks have been provided, and the whole system connected to new concrete cesspools provided with overflow septic tank draining into the adjoining estero. A new cesspool and septic tank has also been built to receive the soil and waste lines from the main hospital, with overflow pipe also draining into the estero. Minor drains have been installed for taking the surface water, so that the entire system of water supply and drainage for this building is now in excellent shape.

ORIENTE BUILDING.

The Oriente office building and bodega has been remodeled and is now occupied by six bureaus of the insular government, the court of customs appeals, offices of The Official Gazette, the American Circulating Library, and the Commercial Museum.

BUREAU OF POSTS.

The westerly part of the building, known as the Cuartel Fortin, recently transferred from the army for the use of the insular government, has been renovated and fitted up for the uses of the bureau of posts and the Manila post-office. The transfer of these offices from their old location on the Escolta, with all the furnishings, hard-wood partitions, lock boxes, etc., took place on Saturday, June 25, 1904, in the midst of a severe typhoon, and the post-office was open and ready for business the following Monday morning, June 27, 1904.

This building is directly on the water front and has a fine wharf where mail is delivered directly from launches and lighters, thus doing away with the heavy wagon transportation formerly required in handling mail from the United States. The new post-office is very much more conveniently located for the public and gives ample working space for handling the mail.

BUREAU OF THE INSULAR PURCHASING AGENT.

The new stable, wagon sheds, men's quarters, etc., have been completed for this bureau at San Lazaro and are now occupied. Plans for this improvement were published in the last annual report, together with a description of the same. Photographs of the completed work are herewith attached.

Construction of coal sheds at various coastwise ports in the islands for which appropriation was made last year has been postponed until very recently, pending decision as to their location. By recommen-

dation of the insular purchasing agent the number of these coaling stations has been reduced from thirteen to seven, and the capacity of most of them increased, the original appropriation being made still available. Plans are being prepared and contracts for the sheds at Iloilo and Cebu will be let in the near future.

BUREAU OF PRISONS.

The workshop at Bilibid Prison, 60 by 600 feet, constructed of stone taken from a portion of the old city wall now being demolished and structural steel obtained by contract, is approaching completion.

The warehouse, 60 by 200 feet, is completed.

A steel corridor connecting the latter with the prison inclosure is now being constructed.

MUNICIPAL BUILDING.

Plans for this building were published in the previous report. It was completed on March 7, 1904, and the various departments of the city government promptly assumed occupancy. A photograph of the completed building is attached hereto.

Although this office had full charge of the preparation of the plans and construction of the building the fact that it was built with city funds prevents what otherwise would be a legitimate addition to the volume of business done by this bureau, as appears in the financial statement attached hereto.

BUREAU OF CUSTOMS AND IMMIGRATION.

The remodeling of the interior of the old wing of the customs building has been completed. The offices of the appraiser's division have been moved to bodega A, which has been remodeled and refitted for their special needs.

A telephone system, embracing 40 instruments of the desk and wall patterns, has been installed, operated by a manual switch-board, which in addition to providing complete intercommunication throughout the building, also permits any of the telephones to be connected to either the commercial or the military telephone exchanges.

The old wing has also been completely rewired for incandescent lights and electric fans. Numerous minor repairs have been made to the bodegas and other buildings within the customs inclosure.

The immigrant quarantine station on Engineer Island has been repaired and refitted. Ventilators have been installed in the roof, a women's room built, proper arrangements made for toilets and lavatories, and a new cement floor laid.

A small two-story building has been erected at Balabac, Balabac Island, for use as a customs-house. In the lower part is a small office and bodega, and upstairs are quarters for the resident customs inspector. Although this is one of the extreme southern ports of the archipelago, building material and laborers were sent down by coast-guard boat from Manila and the work of construction promptly completed.

CIVIL SANITARIUM, BAGUIO, BENGUET.

Additional rooms have been built on some of the cottages and kitchen extensions provided for all of them. A two-story building, 28 by 43 feet, has been built, the first story of which will be used by the Commission as a sessions hall during their stay at Baguio and for the requisite quota of clerks and stenographers. The second story will be used for a telegraph office and a room for additional clerks.

A building, 25 by 70 feet, has also been constructed for quarters for household servants, sanitarium servants, and laborers employed by the government at Baguio. On the first floor is a large dormitory, kitchen, and mess hall, and the second story is divided into seven rooms for segregating the various classes and nationalities of servants.

All of the cottages have been repainted and numerous repairs attended to. A new galvanized-iron roof has been placed on the provincial governor's house, replacing the old grass roof.

A small sawmill has been built in the neighborhood of Baguio by private enterprise, and the opportunity to purchase lumber already sawed to dimensions and lengths required has greatly facilitated the work of construction.

A larger storehouse for this bureau will probably be needed in the near future for storing material and tools. Provision therein should be made for living quarters for the superintendent in charge of construction.

Transportation of material and supplies from San Fernando de Union to Naguilian and thence to Baguio has always been a source of delay and trouble in one way or another, particularly during the season when the Igorrotes are engaged in planting and harvesting rice, and it has been effectually demonstrated that building material should be shipped for Baguio during the dry season when polistas are obtainable.

THE AYUNTAMIENTO.

A modern and thoroughly sanitary toilet room and lavatory has been installed in the southeast wing. The governor's anteroom and the rooms of three of the commissioners have been re clothed and repainted. The old sessions hall has been subdivided with hard-wood screen partitions about 9 feet high, forming an office and anteroom for the vice-governor. The offices of four of the commissioners are now in process of renovation.

BUREAU OF AGRICULTURE.

A stable, 30 by 102 feet, has been built for the bureau of agriculture at Singalon, containing stalls for 17 American horses; seed, tool, and feed rooms, and quarters for hostler. At Murcia, province of Tarlac, nipa buildings have been constructed for housing the agricultural implements and horses used on the rice farm at that place. A cottage for the superintendent has also been built, containing quarters for himself and family and for official visitors.

BUREAU OF COAST GUARD AND TRANSPORTATION.

The machine shop, 80 by 160 feet and the warehouse, 80 by 92 feet, now being constructed on Engineer Island are approaching completion. The old stone quadrangle on the same island has been rebuilt and now forms the storehouse for the light-house division.

The city water supply has been extended from its terminus at the Anda Monument, to, and across the canal to Engineer Island, discharging into two new storage tanks each of 10,000 gallons capacity. Water will be piped from the tanks to the various buildings on the island and along the sea wall for supplying the coast-guard cutters.

MALACAÑANG PALACE.

The annex to the palace has been thoroughly renovated and repaired. The ground under this building was found to be lower than the surrounding grade, forming a catch-basin for surface water. The old floor being badly decayed in consequence, the entire area occupied by the building was filled in and a new floor constructed, well raised above the ground for ventilation.

A new toilet room and lavatory has been installed, and the building repainted and rewired for electric incandescent lighting.

The palace itself has had many repairs of a minor character.

CIVIL HOSPITAL.

Only minor repairs, such as new plumbing fixtures, repainting, etc., have been made during the year.

BUREAU OF THE INSULAR TREASURY.

Another steel vault has been built in the office of the insular treasurer, making the third large vault of this description. The vault has 480 square feet of floor space, with double vault doors, a time lock, Bessemer steel lining on floors, walls, and ceilings, surrounded with a grillage of steel beams and concrete.

The cash room has been enlarged and cashier's and teller's windows of modern design installed, with a special inclosure for the use of provincial treasurers.

BUREAU OF INSULAR COLD STORAGE AND ICE PLANT.

An extension to the stable for the ice plant has been built, with accommodations for 18 horses. A two-story storage shed has been built on the river front, with a second-story corridor connection to the main building. This shed is used for the storage of ammonia and other materials, as well as furnishing space for the small workshops of the plant.

COAST AND GEODETIC SURVEY.

The southerly entrance to the Intendencia Building and patio corridor, adjoining the offices of the United States Coast and Geodetic Survey, formerly unused, have been floored over and inclosed, and now form a valuable part of the offices of that bureau. A staircase has been built from these offices up to the entresuelo floor, used as a storeroom.

PUBLIC PRINTING OFFICE.

The printing office building, being a new one, only minor repairs incident to wear and tear of buildings of this kind have been necessary. On the recommendation of the public printer that such was necessary, the Commission appropriated funds for the construction of an additional wing to the building, to be used as a storage warehouse for paper. Plans and specifications were prepared by this bureau for a skeleton steel and brick building, upon which satisfactory estimates were received; but, warehouse room having been obtained elsewhere in existing storehouses owned by the government, the project was abandoned.

SCHOOLHOUSES.

Working plans, details, and specifications were prepared for school buildings at Bulan, Batangas, San Isidro, Romblon, Sorsogon, Bacolod, and La Carlota. Preliminary studies were furnished for schools located at Dingros, Pagsanjan, Juban, Casiguran, Vigan, and Surigao.

It is believed uniformity in schoolhouse construction would result in vastly simplifying the work, not only of this bureau, but also that of the bureau of education, as well as that of the division superintendents and provincial boards. Reference is made more particularly to uniformity of plan and arrangement, and constructive materials must necessarily be limited in a degree to local conditions. Opportunity for personal observation as to conditions and requirements of schoolhouse architecture throughout the islands has, thus far, not been presented, and plans are prepared for them from the data presented by division superintendents, through the bureau of education, with the latter's modifications, to this office. Sketch plans are then prepared embodying, as near as possible, the features called for, with such modifications as might be suggested from considerations of cost and construction.

Plans are requested for schoolhouses of a given number of rooms, with preferences for a one-story or two-story building, as the case might be. As conditions must be very generally the same throughout the islands, so far as schoolhouse construction is concerned, it follows that either the one-story or the two-story building is the better one, and, in order to arrive at some definite procedure as to this and many other points involved, it might conserve to the interests of all to have a frank and thorough exchange of ideas and experiences on these points. An interchange of views by a convention of division superintendents would be of great value and probably would fix upon a uniform type of schoolhouse, not only as to its plan and arrangement, but also as to the materials entering into its construction.

PRELIMINARY STUDIES FOR WORK NOT EXECUTED.

No little amount of study has been expended on preliminary plans and estimates for government buildings of importance which for various reasons have remained in statu quo.

The first of these was for projected buildings of a permanent character for Baguio, Benguet. The present structures are, of course, temporary affairs in a way, and such must be the character

of all future construction there until adequate communication is opened to the seacoast or by means of the new Benguet road to Dagupan and Manila. The plans in question consisted of residences for the governor and members of the Commission and a large administration building.

In accordance with the directions of the Commission, the bureau prepared plans and estimates for a capitol building at Manila, the site chosen for the building being the same as was selected by the Spanish Government for the palace of the governor-general, just west of McKinley square in the walled city, and contemplated using the existing foundation of that building.

Extensive preliminary studies, with plans and estimates, were also made for a general hospital, to be conducted by the insular government. These plans were submitted to a general committee composed of resident physicians in Manila and of the insular government, as well as prominent citizens, of which the honorable the secretary of the interior was chairman. The general committee submitted the plans and estimates to a subtechnical committee, of which the chief of this bureau is a member, with comment and directions for revision of same. Revised plans and estimates have accordingly been prepared and are now ready for submission to the technical committee, who will forward the same to the honorable the secretary of the interior at an early date.

Preliminary plans, with estimates, have been prepared for extensions to the new laboratory for use as offices for the forestry, mining, and other bureaus of the insular government.

Some months previous to the removal of the bureau of posts and the Manila post-office to their present quarters, it appeared probable that their then quarters might have to be vacated, and, by direction of the Commission, plans for a temporary post-office building were prepared, together with estimates of cost.

Believing that it might be of some interest to the Commission, this bureau submitted to Governor Taft, just previous to his departure from the islands, a scheme for the improvement of the land lying within the limits bounded by the walled city, Bagumbayan drive, the Bridge of Spain, and the Luneta. A photograph of this strip of land is attached hereto, together with photographs of the scheme for improvement above referred to.

Attached hereto is a statement of the financial operations of the bureau for the fiscal year 1904.

Respectfully submitted.

SUPPLEMENTAL REPORT OF THE CHIEF OF THE BUREAU OF ARCHITECTURE AND CONSTRUCTION OF PUBLIC BUILDINGS, JULY 1 TO AUGUST 31, 1904.MANILA, P. I., *September 15, 1904.*

SIR: In compliance with instructions conveyed in your communication dated July 27, 1904, I have the honor to submit the supplemental report on the operations of this bureau for the period July 1, 1904, to August 31, 1904.

The office and general bureau equipment remains the same as on June 30, less one clerk class 9, as provided in Act 1225.

No work of great importance has been started since the previous report. Probably the most interesting event since that date, touching the repair and maintenance of public buildings, was the phenomenal flood of water during the week of July 11, when the greater part of the city was inundated. The water, however, did not rise above the street level within the walled city. At Malacanang palace the water was over 3 feet deep in the main foyer; at the new San Lazaro corral it rose about 8 inches above the stall floors; the new

MALACAÑANG PALACE.

walls on the exterior have been repainted and the other parts of the building touched up—all being the results of the July inundations.

Proposals concerning this building contained in the first are again respectfully submitted, viz, that a new be constructed for the use of the civil governor in some of the city. The neighborhood of the present palace is low level and the frequency with which water floods the property is situated so that it receives the full swift river in time of flood, and the water is noticeably higher grounds than it is in other parts of the city where it to spread out and is away from the swift current of the

In connection, the stone in the old foundation for the presence of the Spanish governor-general could be used in a new residence for the civil governor, and would probably for all the main walls of the building.

BUREAU OF PHILIPPINES CONSTABULARY.

It has been made by the chief supply officer, Philippines Bureau, that this bureau take charge of the construction of new buildings and repairs to old buildings throughout the Philippines. The request did not include buildings in remote portions of the country, but only such as are within working distance of the coast where supplies and materials can be delivered.

Plans have been prepared and submitted to the Commission and thereto.

The bureau has been requested by the chief supply officer to take charge of all repairs and new buildings for the bureau of Philippines Constabulary in the city of Manila, which include, in the immediate future, the construction of a new horse stable and repairs to the Santa Rosa barracks. A bluing furnace has just been completed in the main bodega for the ordnance division of the constabulary, plans and specifications for which, as well as the supervision thereof, were made by this bureau.

A supplementary statement of the financial operations of the bureau to August 31 is hereto attached.

An explanation of the apparent discrepancy in the value of payments made during the two months covered by said statement and the statement covering the whole of the fiscal year 1904, submitted in the previous report, it may be said that the greater part of the expenditures during said period involved payments to contractors on completed contracts which happened to fall due within the period mentioned. During this period, also, the books showed additional charges against the various subheads, due to the fact that certain materials, which were used on the jobs during the fiscal year 1904, were not charged to the subheads until statement furnished the disbursing officer, July 31, 1904.

Respectfully submitted.

EDGAR K. BOURNE,
*Chief Bureau of Architecture and
Construction of Public Buildings.*

Hon. JAMES F. SMITH,
Secretary of Public Instruction, Manila, P. I.

PUBLIC PRINTING OFFICE.

The printing office building, being a new one, only minor repairs incident to wear and tear of buildings of this kind have been necessary. On the recommendation of the public printer that such was necessary, the Commission appropriated funds for the construction of an additional wing to the building, to be used as a storage warehouse for paper. Plans and specifications were prepared by this bureau for a skeleton steel and brick building, upon which satisfactory estimates were received; but, warehouse room having been obtained elsewhere in existing storehouses owned by the government, the project was abandoned.

SCHOOLHOUSES.

Working plans, details, and specifications were prepared for school buildings at Bulan, Batangas, San Isidro, Romblon, Sorsogon, Bacolod, and La Carlota. Preliminary studies were furnished for schools located at Dingros, Pagsanjan, Juban, Casiguran, Vigan, and Surigao.

It is believed uniformity in schoolhouse construction would result in vastly simplifying the work, not only of this bureau, but also that of the bureau of education, as well as that of the division superintendents and provincial boards. Reference is made more particularly to uniformity of plan and arrangement, and constructive materials must necessarily be limited in a degree to local conditions. Opportunity for personal observation as to conditions and requirements of schoolhouse architecture throughout the islands has, thus far, not been presented, and plans are prepared for them from the data presented by division superintendents, through the bureau of education, with the latter's modifications, to this office. Sketch plans are then prepared embodying, as near as possible, the features called for, with such modifications as might be suggested from considerations of cost and construction.

Plans are requested for schoolhouses of a given number of rooms, with preferences for a one-story or two-story building, as the case might be. As conditions must be very generally the same throughout the islands, so far as schoolhouse construction is concerned, it follows that either the one-story or the two-story building is the better one, and, in order to arrive at some definite procedure as to this and many other points involved, it might conserve to the interests of all to have a frank and thorough exchange of ideas and experiences on these points. An interchange of views by a convention of division superintendents would be of great value and probably would fix upon a uniform type of schoolhouse, not only as to its plan and arrangement, but also as to the materials entering into its construction.

PRELIMINARY STUDIES FOR WORK NOT EXECUTED.

No little amount of study has been expended on preliminary plans and estimates for government buildings of importance which for various reasons have remained in statu quo.

The first of these was for projected buildings of a permanent character for Baguio, Benguet. The present structures are, of course, temporary affairs in a way, and such must be the character

of all future construction there until adequate communication is opened to the seacoast or by means of the new Benguet road to Dagupan and Manila. The plans in question consisted of residences for the governor and members of the Commission and a large administration building.

In accordance with the directions of the Commission, the bureau prepared plans and estimates for a capitol building at Manila, the site chosen for the building being the same as was selected by the Spanish Government for the palace of the governor-general, just west of McKinley square in the walled city, and contemplated using the existing foundation of that building.

Extensive preliminary studies, with plans and estimates, were also made for a general hospital, to be conducted by the insular government. These plans were submitted to a general committee composed of resident physicians in Manila and of the insular government, as well as prominent citizens, of which the honorable the secretary of the interior was chairman. The general committee submitted the plans and estimates to a subtechnical committee, of which the chief of this bureau is a member, with comment and directions for revision of same. Revised plans and estimates have accordingly been prepared and are now ready for submission to the technical committee, who will forward the same to the honorable the secretary of the interior at an early date.

Preliminary plans, with estimates, have been prepared for extensions to the new laboratory for use as offices for the forestry, mining, and other bureaus of the insular government.

Some months previous to the removal of the bureau of posts and the Manila post-office to their present quarters, it appeared probable that their then quarters might have to be vacated, and, by direction of the Commission, plans for a temporary post-office building were prepared, together with estimates of cost.

Believing that it might be of some interest to the Commission, this bureau submitted to Governor Taft, just previous to his departure from the islands, a scheme for the improvement of the land lying within the limits bounded by the walled city, Bagumbayan drive, the Bridge of Spain, and the Luneta. A photograph of this strip of land is attached hereto, together with photographs of the scheme for improvement above referred to.

Attached hereto is a statement of the financial operations of the bureau for the fiscal year 1904.

Respectfully submitted.

SUPPLEMENTAL REPORT OF THE CHIEF OF THE BUREAU OF ARCHITECTURE AND CONSTRUCTION OF PUBLIC BUILDINGS, JULY 1 TO AUGUST 31, 1904.MANILA, P. I., *September 15, 1904.*

SIR: In compliance with instructions conveyed in your communication dated July 27, 1904, I have the honor to submit the supplemental report on the operations of this bureau for the period July 1, 1904, to August 31, 1904.

The office and general bureau equipment remains the same as on June 30, less one clerk class 9, as provided in Act 1225.

No work of great importance has been started since the previous report. Probably the most interesting event since that date, touching the repair and maintenance of public buildings, was the phenomenal flood of water during the week of July 11, when the greater part of the city was inundated. The water, however, did not rise above the street level within the walled city. At Malacanang palace the water was over 3 feet deep in the main foyer; at the new San Lazaro corral it rose about 8 inches above the stall floors; the new

post-office at cuartel Fortin was dry; the storehouse floor, bureau of architecture, was dry; at the civil hospital there was over 3 feet of water; the public printing office, first story, was dry, as was also the first floor of the new municipal building, although the water was 2 feet deep on the premises; the finished grade level at the new laboratory was dry, but the old levels were flooded.

BUREAU OF GOVERNMENT LABORATORIES.

Delivery of the machinery for this building is progressing and it is being set up as fast as received. The gas generator was put in commission the last day of August and is satisfactory in every way, the gas mains all having been tested out previously.

The biological laboratory moved into the new building during the latter part of August and has the use of the major portion of the biological desks.

The donkey pump is now in commission for the present purpose of keeping an even pressure on the water service throughout the building. The main boilers have been satisfactorily tested to a pressure of 260 pounds per square inch.

AUDIENCIA BUILDING.

A new railing has been placed in the chamber occupied by the supreme court, and the room has been entirely repainted and decorated. The floors of the rooms holding a large number of court records have shown signs of weakness recently and new trusses and girders of modern construction are being placed under same.

SANTA POTENCIANA BUILDING.

The plumbing of this building has been radically remodeled and is now in a sanitary condition. These renovations consist of the building of a new water-tight cesspool and septic tank overflowing into the street sewer, connected with the new soil and waste lines from the new toilets and lavatories on both floors of the building. The old cesspool has been cleaned out and filled in.

BUREAU OF CUSTOMS AND IMMIGRATION.

A fire-alarm system has been installed throughout the building and bodegas, with direct connection to the San Fernando station of the city fire department. A standpipe system has also been installed in the main building.

BUREAU OF POSTS.

Plans for a post-office screen, lock boxes, stamp window, etc., have been prepared by this bureau for the post-office at Cebu, Cebu. The work was all finished and put together in Manila, then knocked down, crated, and shipped to Cebu where it is being erected.

PUBLIC PRINTING OFFICE.

The stereotyping and electrotyping divisions are being moved from the second to the first story, giving more space for the bindery in the second floor. These divisions will occupy the space on the first floor formerly used as a paper storehouse, the paper being now stored in one of the custom-house bodegas.

MALACAÑANG PALACE.

The first story walls on the exterior have been repainted and the main foyer and other parts of the building touched up—all being necessitated by the results of the July inundations.

Recommendations concerning this building contained in the first annual report are again respectfully submitted, viz, that a new residence be constructed for the use of the civil governor in some other portion of the city. The neighborhood of the present palace is famous for its low level and the frequency with which water floods the grounds. The property is situated so that it receives the full swift current of the river in time of flood, and the water is noticeably higher on the palace grounds than it is in other parts of the city where it gets a chance to spread out and is away from the swift current of the river.

In this connection, the stone in the old foundation for the proposed residence of the Spanish governor-general could be used in building a new residence for the civil governor, and would probably be sufficient for all the main walls of the building.

BUREAU OF PHILIPPINES CONSTABULARY.

Request has been made by the chief supply officer, Philippines constabulary, that this bureau take charge of the construction of necessary new buildings and repairs to old buildings throughout the islands. The request did not include buildings in remote portions of the interior, but only such as are within working distance of the coast towns, where supplies and materials can be delivered.

Estimates have been prepared and submitted to the Commission in regard thereto.

The bureau has been requested by the chief supply officer to take charge of all repairs and new buildings for the bureau of Philippines constabulary in the city of Manila, which include, in the immediate future, the construction of a new horse stable and repairs to the Santa Lucia barracks. A bluing furnace has just been completed in the Oriente bodega for the ordnance division of the constabulary, plans and specifications for which, as well as the supervision thereof, were done by this bureau.

A supplementary statement of the financial operations of the bureau to August 31 is hereto attached.

In explanation of the apparent discrepancy in the value of payments made during the two months covered by said statement and the statement covering the whole of the fiscal year 1904, submitted in previous report, it may be said that the greater part of the expenditures during said period involved payments to contractors on completed contracts which happened to fall due within the period mentioned. During this period, also, the books showed additional charges against the various subheads, due to the fact that certain materials, which were used on the jobs during the fiscal year 1904, were not charged to the subheads until statement furnished the disbursing officer, July 31, 1904.

Respectfully submitted.

EDGAR K. BOURNE,
*Chief Bureau of Architecture and
Construction of Public Buildings.*

HON. JAMES F. SMITH,
Secretary of Public Instruction, Manila, P. I.

EXHIBIT D.

REPORT OF THE PUBLIC PRINTER.

BUREAU OF PUBLIC PRINTING,
OFFICE OF THE PUBLIC PRINTER,
Manila, September 10, 1904.

SIR: I present the following report of the operations of this bureau for the period from July 1, 1903, to June 30, 1904, with certain additional statistics to date of report.

A comparison of Table 1 with that submitted in the last annual report shows an increased total product to the value of \$61,953.74 for the year, or 28 per cent. Excess product over all cost is \$59,641.01, as compared with \$24,236.64 for the fiscal year 1903, or over 146 per cent increase. There was some modification in the scale of prices during the year, and the results indicate that a further material modification may be made during this fiscal year.

Act 807 of the Philippine Commission provided that no printing furnished upon requisition approved by the civil governor or head of a department for any department, bureau, or office of the insular government should be collected for in cash as in previous years, but that a detailed report of all such printing be submitted to the secretary of public instruction and the auditor at the close of the year, together with a full statement of all printing for provincial or municipal governments or others who were required to pay in cash. For the insular government printing to the value of \$211,192.58 was executed, and for provincial and municipal governments and outside parties, \$69,359.08 United States currency. Inasmuch as the actual cost of the operation of the plant (salaries paid and supplies used) was \$195,435.92, and the collectible printing and miscellaneous revenues amounted to \$70,046.04, the cost to the insular government proper for its printing was only \$125,389.88 for the year.

Tabular statements show in detail the work executed and the cost of operation. Table 5 is a consolidation of several previous tables.

There have been installed during the year six new linotype machines, two of them being the latest pattern double magazines; three Pony Miehle presses, No. 1; Brown & Carver 50-inch cutter; rotary planing, and book plate and job shaving machines; Quimby screw pump, and a duplication of the power plant. Many of these were ordered to provide adequate facilities for the instruction of native employees.

During the year 13,197 requisitions for printing were completed, 4,619 of which were for provincial printing, 686 for the city of Manila, and 524 for outside work.

Cost of various supplies was materially increased by the addition of customs duties. Freight, lighterage, insurance, duty, and the 10 per cent to the insular purchasing agent (Act 231) adds about 35 per cent to the cost of all material entering into the product of the plant, not considering the damage to supplies in transit and by repeated handling.

Owing to the state of the finances it was decided to postpone the erection of a steel-frame warehouse adjoining the present building, and arrangements were made for the use of one of the custom-house bodegas for storage purposes. Increased space facilities being needed in the composing room and bindery, preparations are being made to remove the electrotype and stereotype foundry from its present quarters to the first floor. For that purpose the paper stock now stored there is being gradually removed to bodega K, custom-house. Work of fitting the floor for the foundry will be commenced in the near future.

Form No. 79 of this bureau, a copy of which is attached as Exhibit A, contains a list of all the printed forms and books carried in stock, and is a convenient reference in making out requisitions for the ordinary auditor, municipal, provincial, and judicial forms.

Plans are now in preparation for the treatment of the grounds in front of the bureau, with a view to being made a part of the parking of the botanical gardens and the new city building. The iron fence will be removed and turned over to the city authorities. The improvement will add to the attractiveness of this part of the city.

On July 13 and 14 of this year the grounds were under about 2 feet of water, due to the excessive rains, and for a while threatened to rise up to the stock on the first floor. It flooded the oil house and stables. Fortunately it receded without doing much damage. Oats were the only supplies which suffered deterioration.

The personnel of the bureau is constantly changing, and the force of American instructors is decreasing, as is shown by the following table:

PROBATIONARY.

	Appoint-ments.	Separations.			
		Re-signed.	Trans-ferred.	Dis-charged.	Total.
Americans:					
Instructors, from U. S. civil service	8	10	1	3	11

Craftsmen.....	1	3
Junior craftsmen.....	25	21
Total.....	33	30

Progress in instruction of native craftsmen and apprentices is noted for the year. A full report of this branch of the work is made by the superintendent of instruction, as follows:

SEPTEMBER 1, 1904.

SIR: I have the honor to submit the following report upon the instruction of the native craftsmen and apprentices of this bureau during the fiscal year 1904:

During the year the work of instructing the native craftsmen and apprentices in the various trades specialties has been carried along the same lines as formerly. All American employees are classed as instructors and it is their duty to impart of their knowledge to the native craftsmen and apprentices.

In reviewing the work of the past twelve months progress is apparent. The foremen of the various divisions have cooperated with this office, and it is largely due to their efforts and interest that such good results were obtained. Due credit must also be given the employees, who, with but few exceptions, have shown aptitude and adaptiveness, their habits, character, and conduct being very good.

COMPOSING ROOM.

Gratifying progress has resulted from instruction in the composing room. At the close of last year four additional linotype machines were installed, permitting the assignment of two natives as regular operators. A class in linotype operation was started at the beginning of this year, two hours per day being assigned to practice and instruction. As a result eight of the ten linotype machines (two being added in May, 1904) are now being operated by natives. While the product of the native operator is not as much as that of the American, the additional facilities have made it possible to supply the demand for machine composition.

About 25 per cent of the machine composition on Volume I of the annotated edition of the acts of the Philippine Commission, Spanish (over 1,200 quarto pages); 50 per cent of Volume II, English (686 quarto pages), same publication, and all of Volume II, Spanish, same publication, including both columns of side notes, was performed by native linotype operators. Volume I, English and Spanish, of the reports of the supreme court, comprising approximately 800 pages each, is also the product of the native linotype operator.

In regard to hand composition, particularly tabular matter, the Civil Service Roster is the product of native compositors exclusively, about one-half of which was set by apprentices.

All make-up and imposition work is being done by junior craftsmen, under the guidance and instruction of an American. Attention is invited to the make-up and imposition of the publications mentioned above as being done by natives.

One year ago the preparation of all job copy was done by an American. At present a native marks practically all job copy.

Native job compositors performed about 25 per cent of the job work one year ago; now it is all being done by them, including four apprentices.

The distribution of all job and body type, taking care of electrotypes plates, running the dumping bank, etc., are all done by Filipinos.

The apprenticeship of three years has been arranged so that one year's time is devoted to straight and tabular composition, one year to job composition, and one year to making-up and imposition. Upon completion of three years at these branches they should be well fitted to proceed with the more advanced specialties, as linotype operation, preparation of copy, etc.

Following are the number of employees in the composing room on July 1, 1903, and July 1, 1904:

	Ameri- cans.	Filipinos.		
		Junior crafts- men.	Appren- tices.	Helpers.
July 1, 1903.....	23	15	5	4
July 1, 1904.....	11	34	10	6

On this date (September 1, 1904) there are only 7 Americans in this division.

ELECTROTYPING AND STEREOTYPING DIVISION.

The installation of this branch of the plant was the first, and is still the only one of the kind in the islands. For this reason a review of the year's instruction will perhaps better demonstrate what has been accomplished than any of the other trades, the principles of which were known to the Filipino. The first two apprentices were assigned April 1, 1903. During the past year six more have been assigned. Wholly unacquainted with any of the work or machinery at their assignment, under the guidance of American instructors they are demonstrating the ability to become proficient. One of the two assigned April 1, 1903, is at present able to finish all ordinary work in a skillful manner, and is specially proficient in making corrections in plates. All the apprentices have shown considerable aptitude in molding and building and battery and casting work and at present are performing all such work, under supervision.

But a small quantity of stereotyping work has been done during the year, and the instruction in this specialty, therefore, has been limited. However, all apprentices are taught the principle, and when there is stereotyping work they are allowed to do it under guidance of an instructor.

BINDERY.

Comparing the various trades which comprise the bureau of public printing there is no doubt but that the work of the bindery is more to the liking of the Filipino and their capability than any of the others. In quality their product compares quite favorably with that of American craftsmen. They manifest an eagerness to become acquainted with modern methods. Especially is this true in the operation of the machinery. Automatic folding machine, book-sewing machines, automatic paper-cutting machines, wire-stitching machines, ruling machines are all operated by natives with satisfactory results. Employees of the bindery are classified as craftsmen, junior craftsmen, apprentices, and helpers. Junior craftsmen are advanced to the grade of craftsmen when they demonstrate their ability in certain specialties. Apprentices are advanced systematically, from handling paper to finishing blank and printed books. At present 3 are detailed on ruling machines, 2 on finishing, 8 on blank and printed forwarding, and 2 on quarter-bound work. Three American instructors (including foreman and assistant foreman) are employed in the bindery.

Your attention is respectfully invited to the volumes of the "Annotated editions of the acts of the Philippine Commission," the "Quarterly volumes of acts of the Commission," "Opinions of the attorney-general," and "Executive orders," bound in full law sheep, as being the product of Filipino bookbinders. During the year the bindery has executed practically every kind of work known to the trade.

PHOTO-ENGRAVING ROOM.

The progress resulting from the year's instruction in photo-engraving work has been exceptionally pleasing. Apprentices, under guidance, are preparing, exposing, and developing plates. The work of coating, stripping, and printing is performed by apprentices. They also etch, route, bevel, and block. While excellent progress has been made in the actual work, it will require considerable study and experience to secure the required knowledge of chemicals and formulas. Six apprentices are assigned to this division.

PRESS ROOM.

But one cylinder press was in the hands of a native craftsman one year ago. During the year four more have been given presses and they are executing ordinary book and job work from type and plates satisfactorily. Attention is invited to the presswork on Volume II,

both English and Spanish, of the acts of the Philippine Commission, and also the opinions of the attorney-general. It was performed entirely by natives, the forms being of linotype slugs. Appreciable progress has also been made by the Filipinos working on the platen presses.

Fourteen apprentices are assigned to the press room. Their instruction includes all branches of the trade, from feeding the press to its operation on all classes of work. There are several of these boys who show promising signs of developing into good junior craftsmen.

POWER PLANT AND MACHINE SHOP.

During the past year apprentices were assigned to this department. Instruction of two of them has been confined to electrical work, with such machinist's work as properly belongs to that trade. The third is assigned chiefly to machinist's work. The progress of all has been pleasing. Two junior machinists are performing very good work on lathe and shaper, and doing many little odd jobs of repairs.

The following table shows the assignment of apprentices and the number of the respective classes:

Division.	Class.				
	6.	5.	4.	3.	Total.
Composing room.....	4	4	5		13
Bindery.....	2	2	9	1	14
Electrotyping and stereotyping division.....		2	6		8
Photo-engraving division.....	1	1	4		6
Press room.....	1	2	11		14
Machine shop.....			3		3
Total.....	8	11	38	1	58

Attendance has been good. A few of those assigned quit because they did not like the work. During the year 34 appointments were canceled. Segundo Hipolito and José Xeres, who were assigned to the bindery and composing room, respectively, were selected by the Philippine Commission to study in the United States at the expense of the government; they resigned their apprenticeship.

On Monday of each week apprentices who have been absent (sick, excused, absent, or tardy) during the preceding week are officially notified of such absences, in order to bring their attendance record constantly to their attention. The period in each class is extended until full time is made up.

For a specimen of the work performed by apprentices under instruction, attention is invited to the bureau of public printing calendar for 1904. The work was performed entirely by natives, even to the half-tone and presswork.

It is apparent that one of the most effective factors in the scheme or system of instruction has been the attendance of the native employees at night schools. Your unceasing efforts in prevailing upon them to attend these schools and study the English language have brought gratifying results. Nearly all understand instructions in English, while a few speak it quite readily.

Respectfully,

J. A. HOGGETTE,
Acting Superintendent of Instruction.

The ACTING PUBLIC PRINTER.

On May 16, 1904, Mr. John S. Leech, the public printer, commenced a vacation of some months in the United States, having completed three years of service for the insular government. With what zeal he prosecuted his duties, and how the interests of the government were constantly guarded, is perhaps better known to those of us who have labored close to him during that period than to others. Ever mindful of the purposes of the establishment and the objects sought to be attained by the Commission in the education of natives in the trades, he has also been considerate of the welfare of the employees. In his two annual reports he has submitted recommendations looking toward an amelioration of living conditions in Manila. Quick to recognize and appreciate ability in employees, he demands of them faithful and intelligent services and hearty

cooperation. The result of his labors has been very gratifying, as attested by the product of the plant and the progress shown by the native employees.

SUPPLEMENTAL REPORT.

In accordance with request contained in your letter of July 27, 1904, there is appended to the report proper tables showing the operations of the bureau for the months of July and August, 1904. July printing is valued at \$24,084.80, and August printing at \$27,267.08.

There are at present in course of publication two volumes of supreme court reports (one English and one Spanish), a volume of treasury records index, three quarto volumes on the Bontoc Igorrotes, Zambales Negritos, and the Augustinian relations (the first two largely illustrated with half-tones); the annual report of the weather bureau, the third volume of the annotated laws of the Commission in English and Spanish, sixteenth quarterly volume of laws, bulletin on Amebiasis, and a constabulary orders index, besides numerous small pamphlets and a large quantity of job work.

Very respectfully,

EDWIN C. JONES,
Acting Public Printer.

Hon. JAMES F. SMITH,
Secretary of Public Instruction.

EXHIBIT E.

REPORT OF THE CHIEF OF THE BUREAU OF ARCHIVES FOR THE FISCAL YEAR ENDING JUNE 30, 1904.

MANILA, P. I., *September 13, 1904.*

HON. JAMES F. SMITH,
Secretary of Public Instruction.

SIR: Having assumed the charge of this office, as ordered by your department on April 11 of present year, in the absence of the proper chief, Mr. M. de Iriarte, who left for America as one of the members of the Philippine Commission appointed by the government to visit the St. Louis Exposition, it is my duty to submit the annual report regarding the work carried out by this office during the fiscal year ending on June 30, 1904.

Since the notarial protocols of the islands were transferred to these archives according to the new notarial law, and since the trade-marks office was annexed to this bureau, the accumulated work pressing upon this office rendered necessary on several occasions to establish extraordinary hours of labor, in order to avoid any delay in delivering the copies of documents contained in said protocols, urgently needed by the interested parties on account of the peremptory orders from the judges of the primary courts, and also to prevent any delay in issuing the trade-marks certificates, which should be furnished at once to avoid the damages that might result either to manufactures or to the treasury.

As stated in the report issued last year, the larger part of the office force was devoted to the preparation and verification of the aforesaid copies, having been necessary to add for that purpose one clerk more to the other three previously working as typewriter operators, and two others for verification.

CLASSIFICATION AND ARRANGEMENT OF DOCUMENTS.

Only three clerks are at present engaged in the classification and filing of documents and papers, and with such a small number the progress made is very creditable, because, in spite of the overturn caused by the last removal of this office, finished in November of last year, in which the laborious toil of a careful organization carried out during four years was completely undone. The following records and documents have been, however, recently classified and filed

again, viz: 2,686 records pertaining to the public works department, relating to bridge construction and repairs, and projects of railway lines construction; 6,200 records, memoranda, and other loose official documents referring to sanitary affairs, public instruction, provincial governments, municipalities, ways and means, and all other sources constituting the local revenues; and 4,600 records pertaining to the finance department, regarding urban and industrial taxes, opium, stamped paper, custom-house dues, personal certificates, and Chinese poll tax.

FORMATION OF INDEX FOR ROYAL CEDULAS AND OFFICIAL LETTERS
ADDRESSED TO THE MADRID GOVERNMENT.

A chronological index of the loose royal cédulas, kept in tin boxes from 1660 to 1696, has been carefully made out, such work requiring a special accuracy on account of the old orthography of such royal cédulas, so different from that now used by Spaniards, and also for their age, which makes the writing quite unintelligible. Another chronological index was also prepared of the official letters addressed to Madrid by the governor-general of these islands, either in reply or in compliance with the foregoing royal cédulas, or making reference to different affairs concerning insular administration from 1678 to 1732.

If it is true that a temporary employee was appointed for this office, that employee was only three months in service, during which 287 records pertaining to the civil government of Manila Province were classified by him, the larger part of the records and other documents remaining yet unclassified.

INFORMATION FURNISHED.

From July 1, 1903, to June 30 of present year the memoranda and data detailed at the end of this report have been furnished by this office.

COPIES OF INSTRUMENTS AND OTHER DOCUMENTS ISSUED, WITH AMOUNT
OF FEES COLLECTED.

Five hundred and seventeen copies of public instruments have been issued, comprising 3,236 sheets and 893,433 words, for which fees amounted to ₱898.58. For searching fees of said instruments the amount of ₱573.30 was collected, and ₱258.50 for certificate fees, making a total of ₱1,730.38.

Sixty-nine copies requested by different chiefs and authorities have also been furnished, comprising 519 sheets and 155,603 words, for which no charge is made according to law.

FORMATION OF INVENTORIES OF PROTOCOLS.

As the provinces of Cebu, Mindoro, Iloilo, Ilocos Sur, Nueva Vizcaya, Negros Oriental, and Negros Occidental remitted their protocols without the proper inventories remitted by the others, such inventories for 322 volumes of protocols received from the aforesaid provinces have been necessarily made out.

**CERTIFICATES OF TRADE-MARKS ISSUED AND PATENTS FILED WITH
AMOUNT OF FEES THEREON.**

Referring to the patents, copyrights, and trade-marks office, the following amounts have been collected, viz: For 117 certificates of cigars and cigarettes trade-mark, ₱5,850; for 134 certificates of sundry goods trade-marks, ₱6,700; for 12 copyrights certificates, ₱12; for 72 patents registered in the United States and filed in this office at the rate of \$1 gold each, ₱144; for 4 certified copies of trade-mark registration, ₱7.86; for 5 trade-marks certificates, ₱2.50; and for 6 certificates of assignments of patents registered in the United States, ₱12; making a total of ₱12,728.36.

INFORMATION FURNISHED BY THE TRADE-MARKS OFFICE.

This office also furnished the required information regarding the trade-mark filed by the attorneys of Messrs. Mason, Fenwick & Lawrence. So far reregistration in accordance with the new law of March 6, 1903, numbered 666, enacted by the Civil Commission for these islands. Referring to the patents obtained by Mr. William Painter, under the Spanish laws, it has been stated that it devolves upon the courts to decide whether the nonpayment of the fees required by such laws, and provided for by circular No. 10 of the military government of these islands on August 30, 1899, may annul the right acquired by said patents.

**ESTABLISHMENT OF A GENERAL REGISTER FOR BRANDS OF LARGE
CATTLE.**

A short time after the undersigned took charge of this office the Act No. 1147 of May 3, 1904, providing for the registration of brands for cattle and branding same, was enacted by the Civil Commission and took effect the 1st of July last.

In compliance with this act, and in order that its operation might commence at once, the undersigned prepared immediately the necessary designs for the printing of the registration books required for this office and for the provincial and municipal treasuries.

Although the registration of brands pertaining to owners of cattle and the work of branding same is commended by this act to the respective municipalities, this office is charged with the duty of keeping a general register of all the brands pertaining to the 40 provinces constituting the population of these islands, with a thousand municipalities, and 250,000 owners of cattle comprised therein, as per data existing in these archives, apart from those belonging to the insular and provincial governments and the non-Christian tribes not considered as municipalities, which represents a considerable increase of work over the unlimited labor already burdening this office since the concentration of the notarial protocols and the annexation of the patents, copyrights, and trade-marks office, as stated above.

SERVICES RENDERED BY THE CLERKS OF THIS BUREAU.

In spite of the progressive increase of work experienced by this office it was not deemed necessary, however, to solicit that the office

force be also increased, and this must not be attributed to the needlessness of such increase, but to the own will of the clerks, who, impulsed by a laudable zeal quite worthy of commendation, continue their work without interruption till 5 o'clock p. m. This represents a workday of seven and a half hours, from 8 o'clock a. m., deducting one and a half hours for lunch.

With reference to said employees, I consider as worthy of special mention D. Rosauro de Guzman and D. José Torres, in the first place, for the intelligent and diligent manner in which they perform their duties, the first named being in charge of the classification and arrangement of all papers on file in these archives and the furnishing of reports and information therefrom, and also looks after the register of the branding of cattle and other animals; Señor Torres is in charge of the trade-marks, patents, and copyrights.

I also wish to mention Señor Simeon Magpantay, Señor Francisco Tolentino, Señor Catalino Tuason, Señor Domingo Aguirre, and Señor Manuel Alveyra, who all perform their duties diligently and cheerfully help each other and do all necessary typewriting, although, with the exception of the first named, they are not regular typewriters nor are they paid to work as such.

Before closing I wish to express my most sincere acknowledgment to all the employees in this bureau, as without their zeal and devotion, as well as their intelligence and diligence, it would not have been possible to overcome the difficulties attending the concentration of the protocols and establishment of the division of trade-marks without any expense whatever to the government.

Very respectfully,

MANUEL M. MIRANDA,
*Acting Chief Bureau of Archives, Patents,
Copyrights, and Trade-Marks.*

Statement of information and data furnished by this bureau during the fiscal year ending June 30, 1904.

1. To the attorney-general, information about the commonable league granted by the Spanish Government to the municipality of Surigao.

2. To the executive secretary, information about the ownership of the thermal springs at Los Baños, province of La Laguna.

3. To same, information about the Mariveles commonable league.

4. To General Sanger, director of census bureau, report and list of newspapers published in these islands.

5. To the bureau of agriculture, information about the ownership of the Sagpon ground at Albay for an agronomical station.

6. To the executive secretary, information about the ground at Iloilo desired by Messrs. Strachan & MacMurray to erect a marine slip.

7. To same, report and copy of the stamp law and the mercantile codes solicited by the provincial treasurer of Samar.

8. To same, information about the ownership of the building called "Beaterio de la Compañia de Jesus."

9. To the attorney-general, report and copies of the laws and regulations governing the concession of the Manila and Dagupan Railway Company.

10. To same, report, plans, and copies of the status and right by which the Manila company "El Varadero de Manila" maintains its works at Cañacao upon the naval reservation.

11. To the executive secretary, information about the ownership of the ground and two buildings occupied by United States forces at Nueva Ecija.

12. To the attorney-general, report and copy of the royal decree about the concession of Manila and Dagupan Railway Company.

13. To the secretary of public instruction, information about the data and papers referring to the creation of the town of Paco (San Fernando de Dilao), requested by Mr. Modesto Reyes, city attorney.

14. To the court of land registration, information about the ownership of the "Isla de Cauti," province of Cebu.

15. To the secretary of finance and justice, information about the amount of the Filipino coin that was issued and put in circulation by the mint during Spanish régime.

16. To the secretary of public instruction, information about literary rights.

17. To the general superintendent of education, information about the names of contractors who sold school furniture to Spanish Government during 1897-98, as well as a number of desks and blackboards furnished to Cavite Province.

18. To the attorney-general, information about the last will of Francisco Serratos, executed by Notary Abraham Garcia y Garcia.

19. To the judge of fourth judicial district, report and certified copy of the last will of D. a Maria Tuason Ortiz.

20. To the secretary of public instruction, report and copy of the original application of Mr. Daniel Earnshaw to construct a marine railway at Cañacao.

21. To the auditor of the Philippine Archipelago, information about the ownership of the building occupied by the guardia civil during the Spanish régime at Maasim, province of Leyte.

22. To the secretary of public instruction, information about the petition made by the division superintendent of schools of the province of Rizal asking for the establishment of two new schools at Malabon, utilizing the ruins of the old cigar factory called "Fábrica de la Princesa."

23. To the general superintendent of education, information about the ownership of school desks at the province of Misamis, as requested by the division superintendent of schools of that province.

24. To Capt. Charles H. Paine, Twenty-ninth Infantry, at Iloilo, information about the ownership of lands occupied by the Agustinos Convent at that province.

25. To the secretary of public instruction, information about the ownership of a ground plot and unfinished building in the province of Ilocos Sur for the establishment of a provincial high school.

26. To the governor of the Philippine Islands, report and copies of documents about the ownership of the island of Paragua.

27. To the bureau of agriculture, information regarding the title to a tract of land at Singalong on which the experimental station is located.

28. To the captain and superintendent division of information, Philippines Constabulary, report and certified copy of a royal order dated August 19, 1892, upon regulations for branding, selling, and slaughtering cattle.

29. To the secretary of the interior, report and copies of plans concerning the boundary lines of San Ramon farm.

30. To the secretary of finance and justice, information about the share of the relief fund for the 1863 earthquake claimed by Ventura Pablo é Isidora.

31. To the attorney-general, information about the ownership of land formerly occupied by the old military hospital on the north side of Ayuntamiento Building.

32. To the secretary of public instruction, information about the ownership of building now used as provincial school at Cavite Province.

33. To the court of land registration, information of the lands at Daraga, province of Albay, purchased by the Spanish Government from Paciano Imperial.

34. To Mr. C. W. Calvin, recorder Philippine Commission, information about the meaning and derivation of certain Philippine place names.

35. To the executive secretary, information about the boundary of Benguet, Pangasinan, and Union provinces.

36. To the chief division of currency, treasury bureau, report and copies of the various laws and executive orders of the Spanish Government about currency in the islands.

37. To the secretary of public instruction, information about the exact boundaries of the provinces of Ambos Camarines and Tayabas, and particularly of the municipalities of Capalonga, Ambos Camarines, and Calauag, Tayabas.

38. To the executive secretary, information about the claim of Mr. G. Girault, amounting to \$22,160 and \$7,352.30, for stones furnished by him for the reconstruction of the "Palacio."

39. To same, information about the jurisdiction of Spanish naval authorities at Isabela de Basilan and Pollok.

40. To same, information about the official spelling of "Maragondong" municipality, Cavite Province.

41. To same, an historical report of the Manila walls.

42. To same, information about the correct spelling of "Calauang" and "Nagcarlang" municipalities of La Laguna Province.

43. To the secretary of public instruction, information about the ownership of building and ground where the provincial building of Bataan Province was formerly located.

44. To the commissioner of public health, information about the ownership of school and tribunal of Culion at the province of Calamianes.

45. To the secretary of public instruction, information about the ownership of "Fábrica de Talipapa," located at Malabon.

46. To the provincial inspector of Lingayen, Pangasinan, information about the ownership of a certain house in the town of Sual.

47. To the executive secretary, a statement of mortgage indebtedness in the provinces of Abra, Nueva Vizcaya, and Negros Oriental.

48. To the executive secretary, information about the property of a certain land on Cabras Island.

49. To the provincial fiscal of Bulacan, report and statement of public buildings.

50. To the attorney-general, information and plan of the land on which the "Casa Real" of Bulacan was located.

51. To the consulting engineer to the Commission, report and copies of Spanish legislation about the "Prestacion Personal."

52. To the attorney-general, information about the property of certain lands at Navotas and Marikina, Rizal Province.

53. To the general superintendent of education, information about the ownership of school building at Camiling, province of Tarlac.

54. To the commissioner of public health, report and copy of the plan showing the government and the city grounds near the railway central station.

55. To the attorney-general, remission of the original documents relating to the government tracts of land at the district of San Fernando de Dilao, requested by same.

56. To the superintendent of education, information about the ownership of Nueva Vizcaya school.

SUPPLEMENTARY REPORT.

MANILA, P. I., *September 13, 1904.*

The Hon. JAMES F. SMITH,
Secretary of Public Instruction.

SIR: As a supplement to the report rendered by this bureau for the year ending on 30th June, ultimo, I have the honor to mention the following work performed by this office during the last two months of July and August:

COPIES OF INSTRUMENTS AND OTHER DOCUMENTS ISSUED, AND FEES THEREON.

Seventy-eight copies of public instruments have been furnished to private individuals, comprising 401 sheets and 108,009 words, fees for which amount to ₱108.14; searching fees on account of the antiquity of documents referred to amount to ₱117.90; and for certification fees, ₱39.

Nine copies have also been furnished to different authorities, comprising 83 sheets and 35,500 words, for which no charge is made, according to law.

CLASSIFICATION AND ARRANGEMENT OF RECORDS.

Eight hundred records of the public works department, referring to construction and repairs of insular, municipal, and provincial buildings; 696 records about sanitary purposes, public-land concessions and public instruction, and 704 records relating to urban and industrial taxes and stamped paper have been properly ordered and classified.

PROTOCOLS RECEIVED.

Two hundred volumes of protocols have been received from the provinces of Abra and Albay, which inventories are not yet made out, for lack of time for their examination and verification.

CERTIFICATES OF TRADE-MARKS ISSUED AND PATENTS FILED, WITH AMOUNT OF FEES THEREON.

During this latter period the following revenue has been collected by the patents, copyrights, and trade-marks office, viz:

For four certificates of cigar and cigarette trade-marks	P 200. 00
For five certificates of miscellaneous trade-marks.....	250. 00
For five copyrights certificates.....	5. 00
For filing fees on four certificates of patents registered in the United States.....	8. 00
For one certified copy of trade-mark registration.....	1. 54
For one certified copy of cigar and cigarette trade-mark.....	. 50
For filing fees on five certificates of assignments of patents registered in the United States.....	10. 00
Total fees collected.....	475. 04

REGISTRATION OF BRANDS OF LARGE CATTLE.

Since the general register for cattle brands was opened the municipal brands of Santa Rosa and Santa Cruz, of La Laguna, Malolos, Baliuag, Paombong, Quingua, Angat, San Miguel and Hagonoy of Bulacan, Taytay of Rizal, San Miguel of Ilocos Norte, and Manapla of Negros Occidental have been registered.

A private brand pertaining to Leoncio Dato, a resident of Malolos municipality, has also been registered.

The municipal brands of Majayjay (La Laguna) and Pantabangan (Nueva Ecija), as well as the private brands remitted by the last municipality, have been returned on account of certain deficiencies thereon, with the necessary instruction for them to be made out according to law.

Very respectfully,

MANUEL M. MIRANDA,
*Acting Chief, Bureau of Archives,
Patents, Copyrights, and Trade-Marks.*

Statement of information and data furnished by this bureau from July 1 to August 31, 1904.

1. To the president of San Miguel de Mayumo, report and certified copy of a plan made by the Spanish Government referring to the Sibul ward at the municipality of San Miguel, Bulacan.
2. To the executive secretary, information about the ownership of building occupied by the "cuartel de la guardia civil" in Zamboanga.
3. To same, information about the ownership of building formerly occupied by the "tercio civil" throughout Mindanao and Sulu.
4. To the president of San Miguel de Mayumo, report and various copies relating to the "Balneario de Sibul."
5. To the secretary of public instruction, information about the ownership of the building known as Pasig "tribunal de naturales."

EXHIBIT F.

REPORT OF THE TRUSTEE OF THE AMERICAN CIRCULATING LIBRARY, COVERING THE PERIOD FROM SEPTEMBER 30, 1903, TO AUGUST 9, 1904.

MANILA, August 5, 1904.

The BOARD OF TRUSTEES,
American Circulating Library, Manila, P. I.

GENTLEMEN: I have the honor to submit my report for the period from the date of my appointment as disbursing officer (September 30, 1903) to present date:

There are two funds to be disbursed: One received from various sources, such as fines, fees, donations, and collections, and is collected and deposited by the librarian monthly with the insular treasurer. The other is the fund received through the regular appropriation acts.

The appropriation act No. 807, July 27, 1903, provides the following funds for the first half of the fiscal year 1904:

Salaries and wages, American Circulating Library of Manila, nineteen hundred and four: Librarian, at one thousand two hundred dollars per annum; assistant librarian, at nine hundred dollars per annum; two employees, at one hundred and twenty dollars per annum each; one thousand one hundred and seventy dollars.

Contingent expenses, American Circulating Library of Manila, nineteen hundred and four: For contingent expenses, including the purchase of ice, coolie hire, rent of library building, installation of electric lights, electric lighting, water tax, and other incidental expenses, eight hundred dollars.

In all, for the American Circulating Library of Manila, one thousand, nine hundred and seventy dollars: *Provided*, That all receipts on every account of the American Circulating Library of Manila shall be duly accounted for to the auditor and deposited by the librarian in the insular treasury: *And provided further*, That a permanent appropriation of all receipts deposited under the preceding provision is hereby made for the purchase of books and pamphlets for the library, such funds to be withdrawn upon requisition of the chairman of the board of trustees.

The permanent fund deposited and on hand September 30, 1903, amounted to ₱1,726.04. The subsequent receipts for this fund, added to this sum, amounted to, on July 31, 1904, ₱4,486.79.

No purchases of books were made until June, 1904, due to the fact that a change of quarters for the library was contemplated. The library was moved from Calle Rosario to the Oriente Building on May 25. On June 5 the last of the books and furniture were in the new quarters.

The present quarters consist of two rooms on the second floor of the Oriente Building, one of which is the general reading room and is a large, commodious, and well-lighted room; the other, somewhat smaller, is used as an office for the librarian and contains the more valuable reference books.

New book stacks were constructed, as the old stacks were found not suitable to transfer to the new building. The library furniture was made in the workshop of the bureau of forestry, such as the library table, newspaper rack, magazine desk and rack, four reading shelves along the windows, Century Dictionary stand, and large book-case for valuable bound periodicals and reference books.

The number of books on hand June 30, 1904, amounted to 21,575. These books have been gifts from persons in the United States who have been interested in the library, mainly through the efforts of Mrs. N. Y. Egbert, the present librarian, who has so ably administered the affairs of the library since its organization, and Mrs. Charles R. Greenleaf, the originator of the library and the first director. A large number of books have been received from the Daughters of the American Revolution and the Army and Navy League.

After the library was moved into its new quarters efforts were made to secure additions to the books and periodicals. Two complete bound sets of the Spanish Manila periodical *Oceania* were secured, dating from its first number in 1877 to May, 1899, when the paper changed hands and became known as *El Progreso*. Two complete sets of this latter publication were received. Lately *El Progreso* has changed its name to *Adelanto*. Bound volumes of other Manila periodicals were received, such as the *Manila Gaceta*, dating from 1868 to —; a complete set of the *Manila Freedom*, and an incomplete set of the *Manila Times*.

An effort is being made to devote a section of the library to books in the Spanish language, in which section shall be contained books by the best Spanish authors, and also translations in Spanish of some of our best American histories, biographical, scientific, and other works of literary merit.

The library has room for at least 10,000 additional volumes, and by the time this additional number is secured it is to be hoped that a suitable library building will be provided. Two very beautiful sites for such a building have been partly promised by the Manila municipal board.

The books and library furniture have been insured for ₱40,000.

The number of books taken out by the patrons of the library during the year amounted to 14,732.

The appropriations and expenditures for the fiscal year 1904 were as follows:

	Salaries and wages	Contingent expenses.	Total.
Appropriation, July 1 to Dec. 31, 1903.....	₱2,340.00	₱1,600.00	₱3,940.00
Expended.....	2,299.00	1,077.57	3,376.57
Balance.....	41.00	522.43	563.43
Appropriation, Jan. to June 30, 1904.....	2,300.00	1,200.00	3,500.00
Expended.....	2,155.00	1,706.19	3,861.19

Of the previous balance, ₱522.43, ₱506.19 was used during the second half of the fiscal year to meet obligations incurred during the first half of the year. This left a balance unexpended June 30, 1904, of ₱16.24. The printing and binding for the fiscal year amounted to ₱69.

The books purchased during June and July were as follows:

45 volumes Oceania, 1877 to 1899.....	P 455.00
6 volumes El Progreso, 1399 to 1504.....	300.00
5 volumes Diccionario Barcia.....	8.00
40 volumes Gaceta de Manila.....	175.00
9 volumes Spanish books.....	22.30
22 volumes Spanish books.....	6.00
Total.....	1,006.30

The bound sets of the American periodicals were presented to the library without charge.

The duties of disbursing officer for the library will in future be attended to by Mr. Louis Lang, whose office is in the ayuntamiento. The first property return for the library was rendered to the auditor June 30, 1904. The employees of the library made their first civil-service reports of services rendered June 30, 1904.

Two complete sets of the text-books used in the Philippine schools have been ordered sent to the library by the superintendent of public instruction of the Philippine Islands.

Lists of books for purchase in the United States are being prepared and will be ordered in the near future.

Very respectfully,

GEORGE P. AIERN,
Disbursing Officer American Circulating Library of Manila,

EXHIBIT G.

REPORT OF THE EDITOR OF THE OFFICIAL GAZETTE, COVERING THE PERIOD FROM JUNE 30, 1903, TO AUGUST 31, 1904.

DEPARTMENT OF PUBLIC INSTRUCTION,
OFFICE OF THE OFFICIAL GAZETTE,
Manila, P. I., September 10, 1904.

SIR: In compliance with your communication of July 27, 1904, I have the honor to submit herewith a report of this office for the fiscal year ending June 30, 1904, with supplementary statement bringing the same up to August 31, 1904.

CHARACTER OF THE GAZETTE.

The Official Gazette is the official organ of the insular government, authorized by Act No. 453 of the Philippine Commission, enacted September 2, 1902. This act was subsequently amended by Act No. 664 of March 4, 1903, and by Act No. 971 of November 2, 1903, making additional provisions relative to the material to be published and providing for a more extensive free distribution of the Gazette.

The Gazette is published weekly in two parts, one part in English and the other in Spanish. Each part is issued separately, and is intended to be a complete record of government action, legislative, executive, and judicial; differing in this respect from all other gazettes which the undersigned has thus far had occasion to examine. Files of the gazettes of most of the British colonies in the Orient are on file in this office, and an examination of their contents shows them to be merely publications of the executive branch of the government. This feature of our Gazette is believed to be a distinct improvement on the methods of other lands. While involving an additional expense at the present time, this will steadily lessen as the volume of legislative and executive changes diminish with time and the passage of the civil government of these islands from the formative stage.

The Gazette contains the acts and public resolutions of the Commission, proclamations of the Secretary of War and of the civil governor, general orders of the War Department bearing on the Philippines, executive orders of the civil governor, such decisions of the supreme court, court of customs appeals, and the court of land registrations as are deemed of sufficient importance to be published, the opinions of the attorney-general, and such other material as may be designated for publication by the secretary of public instruction, or recommended for publication by the editor and approved by the secretary of public instruction.

In addition to the laws enacted by the Commission, its resolutions of a public nature, the executive orders of the civil governor, decisions of the supreme court and opinions of the attorney-general, which are published as soon as issued from the several offices and appear as a rule in each number, a vast amount of other matter has been published during the year. First and foremost is the statistical matter. The first number of each month is made a statistical number. In it will be found monthly reports on vital statistics by the insular board of health, the meteorological report of the weather bureau, monthly financial statements of the Banco Español-Filipino, monthly reports of the police and fire departments of the city of Manila, and a great deal of statistical data from almost every bureau of the government.

Another feature of the Gazette is the publication of the administrative orders and circulars of the various bureaus. From the beginning the administrative orders, tariff decision circulars, Chinese and immigration circulars, and other orders and rulings of the bureau of customs and immigration, have been published weekly. During the year the plan has been extended so as to include all administrative circulars issued by the bureaus of coast guard and transportation, internal revenue, constabulary, and education. The inclusion of the publications of the two latter is most important, since American teachers and constabulary officers will for some years to come constitute by far the most important elements in the English subscription list.

The latter part of each number contains notices of civil-service examinations, weekly lists of appointments by the civil governor and by the heads of bureaus and offices, resignations and removals. The number closes with a directory of government offices. This directory gives the office locations of all departments, bureaus, and offices of the insular, provincial, and military governments, followed by the names of their heads or acting heads. Through recent arrangements with the civil-service board this directory is kept corrected weekly, and is the only strictly up-to-date list published in the islands.

HEADNOTES AND FOOTNOTES.

What is believed to be a distinct improvement in style of publication has lately been inaugurated by the introduction of headnotes and footnotes. Titles or headnotes have always been prefixed to the acts of the Commission and decisions of the supreme court. This plan has been extended to include the preparation of syllabi or headnotes to all matters published, thus enabling the reader to ascertain at a glance the gist of each opinion, resolution, circular, etc., and also reducing by one-half the labor of indexing. At the same time the convenience of the Gazette as a work for reference has been further increased by the introduction of footnotes. Early in June this office began the annotation of amendatory acts, indicating by means of footnotes the page of the Gazette at which the act amended might be found. This system has been extended so as to include the annotation of all opinions, executive orders, resolutions, decisions, circulars, and in fact everything published, so that the reader is never left in ignorance as to the exact page of a former Gazette at which may be found any act, resolution, executive order, or decision mentioned in the current number.

INDICES.

Act No. 453 provided for the publication of semiannual indices, or two indices for each volume of the Gazette, and in the case of volume 1 a third index was prepared for the first 16 numbers from September 10, 1902, to the end of the year. As a volume is paged consecutively throughout, and generally will be included in one binding, this method of indexing would prove decidedly inconvenient to those having occasion to consult its pages. For this reason arrangements have been made with the approval of the secretary of public instruction looking to the preparation of a general index for each volume, so that in future, beginning with the current volume, a special index will be published for the first six months of each volume, and at the end of the calendar year a general index covering the whole volume.

The index for the last six months of the year 1903 was published in June, 1904, and that for the first semester of 1904 has been sent to press and will be forwarded to subscribers within the next three weeks. Besides the semiannual indices prepared by the editor, this office has recently published an index to the decisions of the supreme court contained in volume 1, the work of Justice E. Finley Johnson of the supreme court. This excellent work is exhaustive of the subject and a most valuable contribution to the legal literature of these islands. Justice Johnson has kindly consented to prepare a like index for the current volume.

TRANSFER OF OFFICE.

During the first part of May the office was transferred from its former location in the Santa Potenciana Building, Intramuros, to its present quarters on the third floor of the Oriente Building, Plaza Calderon de la Barca, Binondo. For want of suitable accommodations in this building the back files of the Gazette remained stored in the Potenciana Building until the latter part of August, when they were transferred to the bodega connected with this building. The office consists of four comfortable rooms, ample for all present needs. The present personnel includes the editor, one clerk class 8, in charge of the statistical division, and four native clerks at small salaries. In April, 1904, the undersigned was recommended by the general superintendent of schools to relieve Editor Max L. McCollough, about to depart for the United States upon leave of absence, and was thereupon detailed to that duty by the secretary of public instruction. Mr. McCollough departed May 7, when the undersigned assumed entire charge of this office. Dr. Xerez-Burgos, chief of the statistical division and practically assistant editor, also departed on leave August 1, thus leaving the office for the present very poorly equipped. The office force, even when all are on duty, is hardly adequate to properly perform the necessary work. Doctor Burgos has supervision of the Gazette in Spanish, one clerk attends to the correspondence, another keeps the subscription accounts, while the remaining two attend to the mailing list. These duties are alone sufficient to properly occupy their time. There is, however, a large amount of incidental work, such as translating matter for publication, preparing the semiannual indices, reading proof,

carrying copy, proof, or belated matter to the public printing office, etc., which make such demands on the force as to seriously interfere with its regular duties and render an increase of personnel desirable. Doctor Burgos, as chief of the division of statistics, has nearly completed the labors incident to that position. Fairly complete data have been collected of the population of all barrios in the islands, with their distances from pueblo centers. An index is now in course of preparation which will when completed render this material available to the public.

PRINTING.

The Official Gazette is printed at the bureau of public printing in Manila. Seven hundred copies of each number are printed in English and 2,000 in Spanish. The circulation, aside from such copies as are mailed to government offices, is at present confined mainly to business houses, American attorneys, and constabulary officers. Two circulars have recently been prepared—the one to Filipino attorneys, directing their attention to the necessity of keeping informed of the latest action of government, legislative, executive, and judicial, and the other to American teachers in the pueblos and to municipal authorities, pressing the advisability of subscription to the English edition. The circular to attorneys was mailed but a short time since, so that its full effects are not yet apparent, but the increased subscription already acquired by this means has been very gratifying.

The circular to teachers and municipalities has not yet been issued, but will certainly result in a largely increased circulation. In most of the municipalities the officers, still as a rule unacquainted with the English language, are beginning to depend for clerical assistance upon the native schoolmasters and other young men educated in the public schools and who as a rule prefer English to Spanish. Within a short time the Gazette, in both languages, will be required at all presidencias, and then will come a demand for all back files of the English Gazette. Municipal officers are beginning to realize that it will be more convenient and equally cheap to subscribe at once for the English edition.

The material designed for publication, after being collected, translated, and edited, is sent to the bureau of public printing. This material is received by the public printer on Wednesday of each week, the proof is returned to the office of the Gazette where it is read and corrected, and the Gazettes are ready for mailing by the following Tuesday, unless the printing is delayed by some special order from the civil governor or a member of the Commission, such special order taking precedence over all other work.

DISTRIBUTION.

Immediately upon receipt of the Gazette from the public printer copies of the same are mailed to the subscribers. These subscribers are divided into the following classes: (1) Those who, by provision of Acts Nos. 453, 664, and 971, receive the Gazette free, including the President of the United States and each member of his Cabinet; the Civil Service Commission; the Superintendent of Documents,

Washington, D. C.; the commanding general of the army in the Philippines; the commanding general of each department and the judge-advocate of the Division of the Philippines; the admiral on this station; the commandant of the naval station; the civil governor; members of the Philippine Commission; justices of the supreme court; judges of other courts of record; justices of the peace; the heads of the various bureaus and offices under the insular government, and such other officers in said bureaus and offices as may be designated by the civil governor or the secretary of the executive department under which the particular bureau or office is established. (2) Those who, by provision of law, are subscribers to the Gazette, paying for the same out of public funds, including all provincial and municipal governments throughout the islands. (3) Those who voluntarily subscribe to the Gazette. (4) Exchanges authorized by the secretary of public instruction.

The total number of subscribers to the Gazette on June 30, 1904, was 1,944. Of this number 964 were on the free list, 721 from provincial and municipal governments, and 251 from private subscribers.

By far the largest proportion of Gazettes sent to subscribers of the above-mentioned first class—namely, 638 copies—are sent to justices of the peace, every justice within the islands receiving them regularly, so that there is sent to each municipal center at least two copies weekly, one to the municipal presidencia and the other to the resident justice. With few exceptions the Gazette sent to justices and municipalities are in Spanish, the present generation of municipal office holders having been educated under the Spanish régime. But there are already indications that English copies will shortly be required in the more progressive pueblos.

COLLECTIONS.

It was provided by Act No. 453 that each provincial and municipal government should subscribe to the Official Gazette and should pay for same out of the provincial or municipal funds. Remittances from municipalities direct to this office proving unsatisfactory, a system was, during the fiscal year 1903, proposed and approved by the secretary of public instruction and the treasurer of the Philippine Islands whereby each provincial treasurer was directed to collect the subscriptions from the municipalities in his province and remit the same to the editor. Receipts to each municipal treasurer, with stubs for provincial treasurer attached, together with vouchers and warrants, are then signed by the latter and sent to the provincial treasurer, who, after detaching the receipt stubs, forwards the remaining papers to the proper pueblos.

EXCHANGES.

Act No. 664 provides for an exchange of the Official Gazette with similar publications of other lands. The editor, with the approval of the secretary of public instruction, during the fiscal year ending June 30, 1903, communicated with the editor of various official and semiofficial gazettes and periodicals published in the Orient and in Australia. As a result exchanges were effected with four of these publications. During the past fiscal year the number of exchanges has been increased to thirteen. There are now received, indexed, and kept on

file in this office copies of the Straits Budget, Singapore; the Englishman, Calcutta, India; Capital, Calcutta, India; the Indian Municipal Journal and Sanitary Record, Bombay, India; the Queensland Gazette, Brisbane, Australia; the Assam Gazette; the Burma Gazette; the Chamber of Commerce Journal, London, England; the Monthly Bulletin of the International Bureau of American Republics; the Harvard Law Review; the Calcutta Gazette; the Central Provinces Gazette, Nagpur, India, and the Bombay Gazette, Bombay, India.

In these periodicals of the British colonial possessions appear numerous articles from the pens of men of sound judgment and ripe experience on questions similar to those now confronting the American administrator in the Philippines. These articles are indexed and kept available for reference. In other ways there is much to be learned from a perusal of these exchanges. The British colonial gazettes do not publish decisions of the judiciary nor opinions of the attorney-general, but on the other hand contain several classes of matter not to be found in the Official Gazette. All sorts of legal notices are published, the income from which must be considerable. The descriptions of notices differ with the different gazettes. It is, however, noticed that the publication of bankruptcy and insolvency notices, certificates of incorporation, and (in the case of corporations possessing franchises) articles of incorporation is common to all of them. This is a feature which might with profit be adopted by the Official Gazette.

CONCLUSION.

The Gazette is received weekly by officers and employees in every part of the islands. It is the organ by which the insular government announces its laws, orders, proclamations, and decisions. Files of the Gazette are a part of the official property of every government office of importance and are turned over by each retiring incumbent to his successor. It is subscribed to by 19 city and college libraries in the United States, and is received in China, the Straits Settlements, Australia, India, Spain, and England. Additional exchanges should be established with other European colonies in the Orient.

It is believed that certain amendments to Act No. 453, as amended, are essential to a proper increase in the circulation of the Gazette. It is recommended that provision be made for (1) a reduced rate to municipalities subscribing to the Gazette in both languages; (2) the discontinuance of the publication of the Spanish translation of the laws in pamphlet and quarterly form; (3) bureau bulletins should be published in the Gazette and the publication in other form strictly limited; (4) the same provision with respect to the serial orders, circulars, etc., of bureaus.

The time is rapidly approaching when the number of English-reading persons engaged in the various presidencias throughout the islands will outnumber the Spanish-reading element. If the rate for both editions were placed at ₱20 per annum it is believed that an increase of from 30 to 50 per cent in the revenues from municipalities would result. And again, even those who do not read English realize that from January 1, 1906, the date on which English becomes the legal language, they will require the English Gazette, and the back volumes of the Spanish edition would be no longer convenient for reference.

The publication of the laws in advance sheets and quarterly form materially affects the circulation of the Gazette, the laws being generally issued in advance-sheet form prior to the appearance of the same in the Gazette.

The enforced publication of all bureau circulars, general orders, etc., in the Gazette would result in a large subscription on the part of government employees, they being generally more interested in the doings of their own bureaus than in the more general transactions of government.

CONTINUATION TO AUGUST 31, 1904.

From June 30, 1904, to August 31, 1904, the total number of subscribers to the Gazette advanced from 1,944 to 1,967, and the net increase in paid subscriptions by private persons was 23, an advance of 9½ per cent upon the number upon the list on June 30.

Annexed hereto is a statement of subscriptions and collections for the fiscal year ending June 30, 1904, with continuation to August 31, 1904.

Very respectfully,

NORTON F. BRAND,
Acting Editor Official Gazette.

Hon. JAMES F. SMITH,
Secretary of Public Instruction, Manila, P. I.

Acting Editor of Official Gazette.

REPORT
OF THE
CHIEF OF THE BUREAU OF INSULAR AFFAIRS
TO THE
SECRETARY OF WAR.

WAR DEPARTMENT,
BUREAU OF INSULAR AFFAIRS,
Washington, October 31, 1904.

SIR: I have the honor to submit the following report of the Bureau of Insular Affairs for the year ended October 31, 1904.

My last annual report set forth the Philippine legislation enacted by Congress up to the close of that report, the results of the operation of such legislation, and epitomized the work accomplished in the Bureau during the year.

**PHILIPPINE LEGISLATION ENACTED BY AND AWAITING THE
ACTION OF CONGRESS.**

Attention has been called in the last year's report to the Philippine tariff act; the act to provide for the administration of civil government in the Philippine Islands; the act to establish a standard of value and to provide for a currency system, and the act to provide for the detail of regular officers to command the Philippines constabulary, and the combined use of the native Philippine scouts with the constabulary. All of these were far reaching and beneficent in their operation and steps in the right direction and have already permitted the establishment of good government in the Archipelago.

Something more is necessary. Secretary Root has often tersely pointed out that to create a good government and insure prosperity in the Philippine Islands under the conditions then existing, it was necessary for the United States to build this government from the very ground up. It has been done, but there are two important things left for Congress to do to complete this building up and to make the Philippine Islands self-supporting and prosperous.

The first is the reduction of the Dingley tariff rates on Philippine products coming into the United States; the second, the granting of the charter authority to the Philippine government to insure the inauguration and maintenance of adequate transportation facilities throughout the islands.

The last report of the Philippine Commission recommended that Congress enact legislation for the benefit of the Philippine Islands in the following language:

First. Legislation which shall reduce the tariff on sugar and tobacco imported from the Philippine Islands to not more than 25 per cent of the present Dingley rates on tobacco and sugar imported from foreign countries.

Second. Legislation authorizing the Philippine Commission, with the approval of the President and the Secretary of War, to issue bonds from time to time, which shall not in the aggregate sum exceed \$5,000,000, for the making of future permanent improvements.

Third. An amendment to section 66 of an act entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," by which the consent of Congress to issue the bonds therein provided for may not be required.

Fourth. Legislation providing that all bonds authorized to be issued by the Philippine government or any provincial or municipal government thereof by act of Congress shall be made exempt not only from Federal and Philippine taxation, but from State, county, and municipal taxation in the United States.

Fifth. That control over the shipping in the trade between the islands shall be left wholly to the discretion of the Philippine Commission, subject to the approval of the President and the Secretary of War.

Sixth. That the application of the United States coastwise navigation laws to the trade between the Philippine Islands and the mainland of the United States be postponed by Congressional action until July 1, 1909; or, in the alternative, that the coastwise laws of the United States be not made applicable to the trade between the islands and the mainland of the United States, except with a proviso or condition that the rates upon imports from the Philippine Islands into the United States shall not pay duty in excess of 25 per cent of the rates on such merchandise imposed by the Dingley tariff.

Seventh. That authority be given by Congressional act to the Philippine Commission, with the approval of the President and the Secretary of War, to encourage the investment of capital in the construction of railroads for the Philippine Islands by accompanying the grants of franchises to build railroads, in cases where it is deemed necessary, with a guaranty by the Philippine government of income on the amount of the investment, to be fixed in advance in the act of guaranty, the amount of income guaranteed not to exceed annually 4 per cent of the fixed principal.

Eighth. That the amount of land which may be acquired, owned, and used for agricultural purposes in the Philippines by any individual or corporation shall be extended to 25,000 acres.

Ninth. That the clause which forbids the filing of more than one mining claim by the same individual or association upon a lode or deposit be repealed.

Tenth. That the provisions of the Philippine act entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," which apply to mining claims, and the procedure in filing them, shall be so amended that only the metric system of distances shall be used, and shall also be so amended that mining claims shall be filed, whether properly executed according to law or not, the effect of their execution and record to be left to future adjudication.

The purpose of the first of these recommendations is to gain a market for Philippine products, which are at present suffering as a result of change of sovereignty and the rise of tariff duties in the neighboring oriental countries which used to buy largely from the Philippines. The Filipino naturally looks to the country to which he belongs for the same relief as was granted to the inhabitants of Hawaii and Porto Rico on their acquisition.

It is believed that such legislation would harm no competitive industries in the United States. However, there has been and is apprehension on the part of the sugar and tobacco interests that free trade between the islands and the United States would result to the detriment of these interests.

In the last Congress this reiterated leading recommendation of the Philippine Commission, which had twice received the earnest indorsement of the Secretary of War and two Presidents, gained favorable consideration in that it passed the House, and in the Senate was

amended so as to provide for free entry of all products of the Philippine Islands into the United States, except sugar and tobacco, on which there was to be collected 50 per cent of the original Dingley tariff duties. This bill failed to reach a vote in the Senate, due only to the peculiar legislative condition existing at the end of the last session of Congress, which prevented its consideration on account of the prior claim, under the rules, of the statehood act. This bill was called the "Lodge bill."

Twenty-five per cent of the Dingley tariff duties in itself will furnish, it is believed, the full protection demanded by the apprehensive interests. But in addition to that protection should be considered the fact that by recent act of Congress after July 1, 1906, trade between the islands and the United States will be confined to American bottoms, with the resultant increase of freight rates to the Philippines, which will probably absorb or equal any amount conceded in tariff reduction, not to mention the cost of the long haul between the Philippines and the United States.

With the exception of the first and eighth recommendations of the Philippine Commission, these foregoing recommendations have all been provided for in the bill which has passed the House, been reported favorably by the Senate Committee on the Philippine Islands, and is on the Senate Calendar as unfinished business. (See Appendix.)

The necessity for the second recommendation is self-evident. The Philippines are undeveloped, and the current revenues of the government are not sufficient to build roads, light-houses, improve ports, and otherwise make available the rich resources of the islands. Already some \$6,000,000 have been appropriated for these purposes, the burden of which should have been divided among two, three, or four generations, yet needed improvements must wait for years unless authority be granted to borrow money for these purposes. The increased revenues that will result from the improvements contemplated will probably pay the interest on the bonds and provide a sinking fund with which to redeem them at maturity.

As to the third recommendation, section 66 of the act of Congress of July 1, 1902, reads as follows:

That for the purpose of providing funds to construct sewers, to provide adequate sewer and drainage facilities, to secure a sufficient supply of water, and to provide all kinds of municipal betterments and improvements in municipalities, the government of the Philippine Islands, under such limitations, terms, and conditions as it may prescribe, with the consent and approval of the President and Congress of the United States, may permit any municipality of said islands to incur indebtedness, borrow money, and to issue and sell (at not less than par value in gold coin of the United States, registered or coupon bonds in such amount and payable at such time as may be determined by the government of said islands, with interest thereon not to exceed five per centum per annum: *Provided*, That the entire indebtedness of any municipality under this section shall not exceed five per centum of the assessed valuation of the property in said municipality, and any obligation in excess of such limit shall be null and void.

It will be noticed that no municipality (none of which now in the Philippines have any bonded indebtedness such as obtains in all cities throughout the United States) could issue bonds for needed improvements without in each case gaining the consent of Congress. This would involve long delay and neglect of important matters, the detail of which will be understood by the Philippine Commission.

The experience of other nations in the development of distant possessions has shown that the best results are obtained by selecting the

best possible men for the government of said possessions, bestowing upon them a large measure of authority, and then holding them to a strict accountability for the manner in which they exercise the same.

The fourth recommendation, asking that all kinds of Philippine bonds be exempt from taxation, both Federal and Philippine, as well as State, county, and municipal in the United States, is for the self-evident purpose of issuing Philippine bonds at the best rate of interest. It is pertinent to quote an extract from the report of the Senate Committee on the Philippines accompanying the before-mentioned pending Senate bill (see Appendix):

It is entirely competent and proper, therefore, for Congress to exempt these bonds from State, county, and city taxation in the United States. This exemption will secure to the Philippine government a much lower rate of interest than if the bonds were taxable, and the exemption will in effect deprive no State or county of any additional income from taxation, because if the bonds were purchased by private persons in whose hands they would be subject to taxation, experience shows that they would not be returned for taxation. If they were exempt, however, they may be purchased by companies who are obliged to make public their assets and who can not hold taxable personal property without paying tax on it. This makes a very good market for bonds among trust companies, administrators, and other persons whose securities are constantly open to public and official inspection for the purpose of taxation. As such trust companies, administrators, and other persons control large capital they greatly increase the demand for the bonds and necessarily reduce the interest thereon.

The fifth and sixth recommendations have been given full consideration by Congress, and have resulted in the following acts:

[PUBLIC—No. 114.]

AN ACT To regulate shipping in trade between ports of the United States and ports or places in the Philippine Archipelago, between ports or places in the Philippine Archipelago, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That on and after July first, nineteen hundred and six, no merchandise except supplies for the Army or Navy shall be transported by sea, under penalty of forfeiture thereof, between ports of the United States and ports or places in the Philippine Archipelago, directly or via a foreign port, or for any part of the voyage, in any other vessel than a vessel of the United States. But this section shall not be construed to prohibit the sailing of any foreign vessel between any port of the United States and any port or place in the Philippine Archipelago: *Provided*, That no merchandise other than that imported in such vessel from some foreign port which has been specified on the manifest as for another port, and which shall not have been unloaded, shall be carried between a port of the United States and a port or place in the Philippine Archipelago.

SEC. 2. That on and after July first, nineteen hundred and six, no foreign vessel shall transport passengers between ports of the United States and ports or places in the Philippine Archipelago, either directly or by way of a foreign port, under a penalty of two hundred dollars for each passenger so transported and landed.

SEC. 3. That sections one and two of this act shall not apply to the transportation of merchandise or passengers between ports or places in the Philippine Archipelago. Until Congress shall have authorized the registry as vessels of the United States of vessels owned in the Philippine Archipelago the government of the Philippine Islands is hereby authorized to adopt, from time to time, and enforce regulations governing the transportation of merchandise and passengers between ports or places in the Philippine Archipelago.

SEC. 4. That sections one and two of this act shall not apply to the voyage of a vessel between a port of the United States and a port or place in the Philippine Archipelago begun before July first, nineteen hundred and six.

SEC. 5. That sections one and two of this act shall not apply to vessels owned by the United States.

SEC. 6. That on and after the passage of this act the same tonnage taxes shall be levied, collected, and paid upon all foreign vessels coming into the United States from the Philippine Archipelago which are required by law to be levied, collected, and paid upon vessels coming into the United States from foreign countries: *Provided, however*, That until July first, nineteen hundred and six, the provisions of law restricting to vessels of the United States the transportation of passengers and merchandise directly or indirectly from one

port of the United States to another port of the United States shall not be applicable to foreign vessels engaging in trade between the Philippine Archipelago and the United States: *And provided further*, That the Philippine Commission shall be authorized and empowered to issue licenses to engage in lighterage or other exclusively harbor business to vessels or other craft actually engaged in such business at the date of the passage of this act, and to vessels or other craft built in the Philippine Islands or in the United States and owned by citizens of the United States or by inhabitants of the Philippine Islands.

SEC. 7. That this act shall not be construed to impair or affect any privilege guaranteed to Spanish ships and merchandise by the treaty of peace between the United States and Spain signed at the city of Paris on December tenth, eighteen hundred and ninety-eight, and ratified April eleventh, eighteen hundred and ninety-nine.

SEC. 8. That the Secretary of Commerce and Labor shall, from time to time, issue regulations for the enforcement of this act, except as otherwise provided in section three: *Provided*, That such of the navigation laws of the United States as are in force in the Philippine Archipelago in regard to vessels arriving in the Philippine Islands from the mainland territory and other insular possessions of the United States shall continue to be administered by the proper officials of the government of the Philippine Islands.

Approved, April 15, 1904.

[PUBLIC—No. 198.]

AN ACT To require the employment of vessels of the United States for public purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That vessels of the United States, or belonging to the United States, and no others, shall be employed in the transportation by sea of coal, provisions, fodder, or supplies of any description, purchased pursuant to law, for the use of the Army or Navy unless the President shall find that the rates of freight charges by said vessels are excessive and unreasonable, in which case contracts shall be made under the law as it now exists: *Provided*, That no greater charges be made by such vessels for transportation of articles for the use of the said Army and Navy than are made by such vessels for transportation of like goods for private parties or companies.

SEC. 2. That this act shall take effect sixty days after its passage.

Approved, April 28, 1904.

RAILROADS.

The seventh recommendation has taken shape in section 4 of the pending Senate bill (see Appendix) as follows:

SEC. 4. That for the purpose of aiding in the construction, equipment, operation, and maintenance of railroads using steam, electricity, or other power, in the Philippine Islands, the general government thereof is authorized to guarantee an income of not exceeding five per centum upon cash capital actually invested in the construction and equipment of such railroads, or any part thereof, the guaranty to be in such form and under such provisions requiring repayment of any sum paid thereunder as said government shall deem to be to the public interest, and the act making the guaranty shall declare the proper rules for ascertaining clearly the cash capital actually invested in said railroads and the net income actually received on said capital so invested, and shall set forth the limit of invested capital to which said guaranty shall apply, and shall provide for supervision by said government of the conduct of the finances of the road and its location, construction, and maintenance, as well as by the presence in the board of directors of two or more government directors, the number and manner of their selection to be determined by law, as also by such further supervision, through the auditing, engineering, and railroad bureaus of said government, as the public interest shall require. The said guaranty may be made in the form of a guaranty of interest on bonds or of income on preferred or common stock, or in such other form as may be determined by said government, and shall be made on such other terms and conditions as said government shall approve: *Provided, however*, That the total annual contingent liability of said government under the guaranties authorized by this section shall not at any time exceed the sum of one million five hundred thousand dollars, and that no such guaranty shall continue for a longer period than thirty years.

The report made by the House Committee on Insular Affairs discusses the above section as follows:

There are two ways in which the Philippine government might aid in the building of railroads, namely, one by the grant of lands, the other by a guaranty upon capital invested.

Your committee believe, with the Secretary of War and the Commission, that for the Philippine Islands it will be much better to have the railroads constructed under a guaranty upon actual investment, and to have the lands held for the people of the archipelago.

Your committee believe that the building of railroads is the most important improvement possible for the Philippine Islands. The Secretary of War testified before your committee that he knew nothing else which in importance is to be compared with it. More than all other influences combined, a comprehensive railroad system will do away with the embarrassing variety of dialects and tribes in the islands and bring about an early unification of the inhabitants—a condition absolutely essential to their highest prosperity and development. Railroads would greatly enhance the value of the lands and other property in the islands, enlarge their trade, and increase the intelligence of the people.

The history of railroads in the English and the Spanish possessions shows clearly that capital will not be invested in their construction without some special inducement in the way of a guaranteed income. One-third of the total 27,000 miles of railroads in India are guaranteed roads; the remaining two-thirds are railroads directly constructed by the government.

In India there was no exact limit of the amount of investment to be guaranteed, and questions arose as to the capital actually invested and as to the net income. Such questions will be avoided in the Philippines under the provisions of the present section, because of the limitation in the amount of income guaranteed, and the consequent limitation of the amount of capital invested. Under this section both the government and the investor will know exactly what the government must pay.

* * * * *

The Secretary gives it as his opinion, based upon his experience as governor of the islands, that in order to secure the construction of railroads in the islands the provisions of the present section must be enacted into law, or else the government of the Philippine Islands itself must be authorized to undertake their construction. The Secretary does not favor the construction of railroads by the Philippine government, and informed your committee that he suggested it only as a possible alternative.

It is gratifying to report that much interest has been shown on the part of serious American capital in the possibility of railroads in the Philippine Islands. This interest is undoubtedly predicated upon the assumption of the passage of this bill.

There is no doubt but what the Secretary of War and the Philippine government, if this bill does pass in its present shape, will have a chance to choose the most advantageous proposition of competing American capital to finance, build, and operate the railroad system that is at present essential for the practical development of the Philippines.

It has been authoritatively reported that a New York financial concern has acquired in the last few months the control from English owners of the Manila-Dagupan Railroad, which should form part of the proposed railway system in the islands.

The eighth recommendation asks for a modification of the act of July 1, 1902, which limits the amount of land which any corporation or association of persons may hold to 1,024 hectares (2,529.29 acres), so that the amount may be increased to 25,000 acres, as the former amount, upon trial, has been found to be insufficient to induce capital to invest and devote itself to agriculture on a large scale. This would tend to develop the large unsettled areas that exist, for instance, in Mindanao.

The small amount of land prescribed in the act is not sufficient to justify the importation and installation of modern machinery and methods, and the same reasons apply to the ninth recommendation, which would increase the area of mining claims that may be acquired.

The tenth recommendation is intended simply to unify the system of land measurements as prescribed in the act of July 1, 1902, as both acres and hectares, feet and meters are employed in the language of

the act. The chief of the bureau of public lands and mining bureau earnestly recommends this change, which is only one of form and convenience.

PHILIPPINES CURRENCY.

At the date of my last annual report, October 31, 1903, it was shown that a total in pesos, subsidiary and minor coinage, of ₱17,881,650 had been coined and shipped to the islands; that the purchase of silver bullion had been suspended, and that the Philippine Commission had determined that this amount of pesos, supplemented by the recoinage of Spanish-Filipino coins, which they estimated was some 12,000,000 pesos, would be adequate for the inauguration of the coinage circulation in the Philippines. Experience in the past year has proved the accuracy of the Commission's estimate, especially as to the amount of Spanish-Filipino coins.

There have already been withdrawn from circulation, shipped to the United States, recoined into the new currency, and reshipped to the islands and there entered into circulation, or in transit or awaiting shipment, a total of 11,723,000 Spanish-Filipino pesos, as follows:

Date.	Invoice.	Face value in Spanish-Filipino currency.	Value in Philippine currency at prevailing ratio date of shipment.	Value in United States currency.

April 14, 1904.....	1,230,000.00	965,313.85	556,911.85
May 12, 1904.....	1,810,000.00	1,420,125.90	819,303.40
Total.....	6,686,000.00	5,227,060.26	3,015,611.71

From the foregoing statement it will appear the expectation has been realized that the Spanish-Filipino coins would contain so much pure silver as to make their recoining profitable, because the value of the silver contained in these coins would be equal or slightly above the market value of bullion.

The same methods of shipment as described in detail in the last annual report have been followed without the loss of a centavo. The small shipment of minor coinage was corroded by water, due to an accident in the carrying ship. This slight damage was covered by insurance, which paid the cost of reburnishing the metal.

There has been recoined and returned to Manila from the Spanish-Filipino coins sent to the San Francisco mint an aggregate of ₱7,276,016 in denominations as shown by statement following, representing shipments to October 31, 1904:

Denomination.	Amount coined in pesos.	Standard ounces.	Approximate cost.
Pesos.....	₱6,558,000.00	5,683,600.00	\$3,279,000.00
50 centavos.....	264,000.00	228,800.00	132,000.00
20 centavos.....	232,016.00	200,838.85	115,868.57
10 centavos.....	222,000.00	192,168.75	110,866.58
Total.....	7,276,016.00	6,305,407.60	3,637,735.15

Under authority of United States law the civil governor, on the 23d day of October, 1903, issued a proclamation "that Mexican silver dollars shall be receivable for public dues, at a rate to be fixed from time to time by the proclamation of the civil governor, until the first day of January, nineteen hundred and four, and that on and after that date such coins shall cease to be so receivable." Steps were taken to get in and retire from circulation the Spanish-Filipino coinage by fixing the ratio from time to time. On June 21, 1904, an executive order was issued providing that "no Mexican pesos will be received in payment of public dues, and neither Mexican pesos nor Spanish-Filipino coins will be purchased by the government between June thirtieth and September thirtieth, nineteen hundred and four, and after the last-named date they will be purchased only at their bullion value." On January 1, 1904, the Mexican peso was demonetized and

their further importation prohibited. On January 7 drastic legislation was passed, effective October 1, discouraging the further circulation of anything but the new Philippines and United States currency. This legislation provided for a progressive tax on commercial paper and bank deposits in other than currency based upon the gold standard. Under these provisions the Mexican currency in the islands found a more favorable exchange in other near-by countries and was gradually exported from the islands. This exportation was facilitated by reason of the unusual demand for them due to abnormal conditions in north China. The Spanish-Filipino currency has been practically all recoined. The circulating currency is now, therefore, the new Philippine coinage and such moneys of the United States as find their way to the islands.

On October 30, 1904, the civil governor reported by cable on the working of the new currency system as follows:

The approach of October 1, when first currency taxing provisions became effective, caused large exports of Mexican pesos commercially and large inflow of Spanish-Filipino coins in the treasury.

In September, 1,197,500 Mexican pesos were exported, and 538,622 Spanish-Filipino pesos came into the treasury and were withdrawn from circulation. During September actual circulation of new currency increased 1,891,000 pesos. In October to date 1,682,995 pesos Mexican currency have been exported commercially, and 950,000 Spanish-Filipino pesos received by insular government for recoinage. Have on hand nearly 500,000 Spanish-Filipino pesos for recoinage. Increase of actual circulation new coins for October approximately 1,300,000 pesos.

Every bank in Manila published notices refusing to receive old currency on deposit after September 30. Railroads receive no old currency at any price. Nearly all accounts of banks throughout the islands have been reopened in the new currency. Banking business has called in its old notes; issued new ones based upon the new currency. All new contracts are being made new currency.

Business throughout the archipelago conducted now mainly on new basis, banks and large dealers cooperating with the government. Very little old currency left, and existing taxing provisions will eliminate that by January 1 next. The gold standard is an established fact, and now meets approval of the entire public. Business conditions much improved.

On the date of this report there are in the islands 24,924,520 new Philippine pesos, of which ₱15,963,043 are in actual business circulation. The balance is in the Treasury, banks, or in the hands of disbursing officers. The above ₱15,963,043 of course includes the silver certificates, of which ₱7,230,000 are in circulation.

The various steps taken by the civil government to gain this result were met by violent opposition and predictions of inevitable disaster, made to the Government officials both in Manila and Washington, but in every case, as soon as definite legislative action had been taken, the atmosphere cleared, and the business interests commended, by acquiescence and cooperation, the action of the government.

The Philippines currency act was passed by Congress April 3, 1903. The first new Philippine peso was placed in circulation July 23, 1903.

Since that time the Government has eliminated thirty or forty millions of debased currency and has substituted for it a currency based upon the gold standard without serious jar or dislocation, all accomplished within seventeen months. In the minds of financiers and bankers, this accomplishment is considered a wonderful achievement, unique in the history of the world.

SILVER CERTIFICATES.

In the last report it was shown that the following amounts of silver certificates, or paper money, with respective denominations had been shipped to the Philippines:

₱2,000,000 in 2's.
4,000,000 in 5's.
4,000,000 in 10's.

Since November 1, 1903, there have been forwarded additional silver certificates aggregating 7,980,000 pesos, making a total issue to this date of 17,980,000 pesos of denominations as follows:¹

	Pesos.
2-peso certificates.....	2,330,000
5-peso certificates.....	4,650,000
10-peso certificates.....	11,000,000

Orders have been placed with the Bureau of Engraving and Printing for an amount which, with the above total, will aggregate 20,000,000 pesos in value, and there are still due from said department for delivery to the insular treasury the following certificates:

	Pesos.
2-peso certificates.....	670,000
5-peso certificates.....	1,350,000

Such shipments of certificates have been insured in each instance, and the expenditures that have been incurred in connection with their preparation and shipment have been paid from Philippine revenues by the disbursing officer of this Bureau as follows:

Date of shipment.	Forwarded on transport—	Peso value.	Insurance.	Cost of preparing.	Total cost.
Feb. 20, 1904	Sherman.....	2,040,000	\$31.25	\$3,756.24	\$3,787.49
Apr. 30, 1904	Thomas.....	1,000,000	25.00	1,471.19	1,496.19
May 26, 1904	Sheridan.....	1,990,000	31.25	2,076.37	2,107.62
June 23, 1904	Sherman.....	2,950,000	31.25	3,078.03	3,109.28
	Total.....		118.75	10,381.83	10,500.58

The Philippine Commission has advised the War Department that at present only the largest denomination that the act of Congress authorizes—namely, 10-peso certificates—are in demand, and also that it is very desirable that Congressional authority be secured to issue larger denominations. This recommendation was brought to the attention of Congress and has resulted in the following provision in the before-mentioned bill, which is pending in the Senate:

SEC. 10. That section eight of an act of Congress approved March second, nineteen hundred and three, entitled "An act to establish a standard of value and to provide for a coinage system in the Philippine Islands," is hereby amended by striking out the word "ten" in said section and inserting in lieu thereof the words "five hundred," so that said section when amended shall read as follows:

"SEC. 8. That the treasurer of the Philippine Islands is hereby authorized, in his discretion, to receive deposits of the standard silver coins of one peso authorized by this act to be coined, at the treasury of the government of said islands or any of its branches, in sums of not less than twenty pesos, and to issue silver certificates therefor in denominations of not less than two nor more than five hundred pesos, and coin so deposited shall be retained in the treasury and held for the payment of such certificates on demand, and used for no other purpose. Such certificates shall be receivable for customs, taxes, and for all public dues in the Philippine Islands, and when so received may be reissued, and when held by any banking association in said islands may be counted as a part of its lawful reserve."

¹ Since the above was written the remainder of the 20,000,000 pesos has been shipped.

REDEMPTION OF PHILIPPINE SILVER CERTIFICATES.

In August last the Treasury Department stated they were constantly having Philippine silver certificates presented for redemption. As no provision had been made for the redemption in the United States of Philippine paper money, the civil governor was communicated with and authority obtained so that such silver certificates might be redeemed through both of the depositary banks, charging such bills against the gold-standard fund on deposit with the bank, transmitting monthly by registered mail the certificates to the insular treasurer at Manila.

TEMPORARY CERTIFICATES OF INDEBTEDNESS.

Under the provisions of section 6 of the act of Congress approved March 2, 1903—Philippines currency act—there were sold prior to November 1, 1903, two issues of temporary certificates of indebtedness amounting each to \$3,000,000. The first issue maturing May 1, 1904, was for the purpose of establishing a continuing credit for the purchase of silver bullion. The proceeds of the sale of the second issue, maturing September 1, 1904, was for the maintenance of the parity.

On October 10, 1903, the Philippine Commission passed an act constituting a gold-standard fund in the Philippine treasury, in the following language: "An act constituting a gold-standard fund in the insular treasury for the purpose of maintaining the parity of the silver Philippine peso with the gold-standard peso, and organizing a division of the currency in the bureau of the insular treasury through which such fund shall be maintained, expenditures made therefrom, and accretions made thereto, and providing regulations for the exchange of currencies and for the issue and redemption of silver certificates."

The first section of this act reads as follows:

SECTION 1. All funds in the insular treasury which are the proceeds of the certificates of indebtedness issued under and by authority of section six of an act of Congress entitled "An act to establish a standard of value and to provide for a coinage system in the Philippine Islands," approved March second, nineteen hundred and three, all profits of seigniorage made by the insular government in the purchase of bullion and the coinage therefrom, and the issue of the Philippine pesos and the subsidiary and minor coins, all profits from the sale of exchange by the insular government between the Philippine Islands and the United States made for the purpose of continuing the parity of the silver Philippine peso with the gold-standard peso, and all other receipts in the insular treasury inuring to the insular government in the exercise of its functions of furnishing a convenient currency for the islands, shall constitute a separate and trust fund in the insular treasury to be known as the "gold-standard fund," and to be used for the purpose of maintaining the parity of the silver Philippine peso with the gold-standard peso provided in the said act of Congress, approved March second, nineteen hundred and three. Such fund shall not be used to pay any expenses of the insular government or to satisfy any of the appropriations of the insular government, except only those connected with the purchase of bullion, the coinage of the same into the money of the Philippine Islands, and those which are incident to the transportation of such money to the Philippine Islands from the place of coinage, to the putting of money into circulation, including the preparation and issue of silver certificates, and to the carrying on of such financial transactions, by exchange and otherwise, as may be authorized by law to maintain the circulation of the currency provided for in the said act of Congress, approved March second, nineteen hundred and three, and the subsidiary and minor coinage provided for by said act and by an act of Congress entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," approved July first, nineteen hundred and two, and to the maintenance of the parity of value between the silver Philippine peso and the subsidiary and minor coins, the coinage of which is provided for by the acts above mentioned, and the gold peso, which by the act of March second, nineteen hundred and three, is made the standard

of value in the Philippine Islands: *Provided*, That whenever the public interest permits, there may be withdrawn from the gold-standard fund such amount as the Philippine government may deem proper to pay the principal and interest of all, or any part of, the certificates of indebtedness issued under section six of the said act of Congress of March second, nineteen hundred and three.

The proceeds of these two issues, together with the seigniorage, constituted a gold-standard fund.

In February of this year the civil governor of the Philippine Islands advised the War Department by cable that the Philippine Commission considered it advisable to take up the first issue of these certificates, which matured May 1, 1904, by a third issue of \$3,000,000. The same method as was followed in the advertisement and public sale of the other issues, and which is set forth in detail in my last annual report, was followed in the sale of this new issue. The Secretary of the Treasury authorized the following statement as to their recognition by the Treasury Department:

These certificates of indebtedness will be at once accepted at par by the Treasury Department as security for deposits of the public money of the United States in national banks in substitution for State, municipal, or Philippine bonds, and certificates of indebtedness now held to secure such deposits; and in substitution for United States bonds now held as security for deposits, on condition that the Government bonds thus released be used as security for additional circulation whenever, in the judgment of the Secretary of the Treasury, it is desirable to stimulate an increase in national-bank circulation.

Bids were opened on April 15, 1904, and it was found that the bid of the American National Bank, of Kansas City, Mo., of \$101.181 for the entire issue was the most advantageous, and the award was accordingly made. This thus puts the bond on a basis a little over 2½ per cent. This issue was oversubscribed ten times.

These certificates, like the former ones, were each for \$1,000, and numbered serially from 6001 to 9000.

The total proceeds amounted to \$3,035,430, and the first issue of certificates, numbered from 1 to 3000, maturing May 1, 1904, was paid off by the proceeds of the last sale of certificates.

On the 7th of July 1904, Governor Wright advised the War Department by cable that although the Philippine government could without embarrassment pay off and retire second issue, maturing September 1, 1904, it was thought wise to make an additional one for that purpose. The Secretary of the Treasury authorized the same statement as to their recognition as with the last preceding issue.

The same method as heretofore was followed in this sale, and in the presence of bidders on October 22, 1904, when the bids were opened it was found that the bid of \$101.410 by M. L. Turner, of Oklahoma City, Okla., was the most advantageous, which was accordingly accepted, and with interest considered, placed the bonds on nearly a 2½ per cent basis. This issue was oversubscribed nine times. These certificates were numbered from 9001 to 12000, and of the same denomination as formerly.

The proceeds of the issue, \$3,042,300, were deposited with the insular depositary in New York City and were used to pay off the second issue.

At the time of the sale of these two issues the money market was what is called "easy" or "a soft bond market." Expert financiers anticipated that the Government could expect but a very slight premium, if any, and the sale was therefore gratifying to the Philippine government and hardly to be anticipated by the state of the money

market. It was due not only to the credit of the Philippine government, but also to the recognition given by the United States Treasury Department.

PHILIPPINE LAND (FRIAR) PURCHASE BONDS.

In the past year the negotiations for the purchase of the so-called friar lands had resulted in contracts covering upward of 410,000 acres, at a price of \$7,239,000 gold.

In the act of Congress approved July 1, 1902, the following provisions for the issue of bonds for the purchase thereof appears:

SEC. 63. That the government of the Philippine Islands is hereby authorized, subject to the limitations and conditions prescribed in this act, to acquire, receive, hold, maintain, and convey title to real and personal property, and may acquire real estate for public uses by the exercise of the right of eminent domain.

SEC. 64. That the powers hereinbefore conferred in section sixty-three may also be exercised in respect of any lands, easements, appurtenances, and hereditaments which, on the thirteenth of August, eighteen hundred and ninety-eight, were owned or held by associations, corporations, communities, religious orders, or private individuals in such large tracts or parcels and in such manner as in the opinion of the Commission injuriously to affect the peace and welfare of the people of the Philippine Islands. And for the purpose of providing funds to acquire the lands mentioned in this section said government of the Philippine Islands is hereby empowered to incur indebtedness, to borrow money, and to issue, and to sell at not less than par value, in gold coin of the United States of the present standard value or the equivalent in value in money of said islands, upon such terms and conditions as it may deem best, registered or coupon bonds of said government for such amount as may be necessary, said bonds to be in denominations of fifty dollars or any multiple thereof, bearing interest at a rate not exceeding four and a half per centum per annum, payable quarterly, and to be payable at the pleasure of said government after dates named in said bonds not less than five nor more than thirty years from the date of their issue, together with interest thereon, in gold coin of the United States of the present standard value or the equivalent in value in money of said islands; and said bonds shall be exempt from the payment of all taxes or duties of said government, or any local authority therein, or of the Government of the United States, as well as from taxation in any form by or under State, municipal, or local authority in the United States or the Philippine Islands. The moneys which may be realized or received from the issue and sale of said bonds shall be applied by the government of the Philippine Islands to the acquisition of the property authorized by this section and to no other purposes.

SEC. 65. That all lands acquired by virtue of the preceding section shall constitute a part and portion of the public property of the government of the Philippine Islands, and may be held, sold, and conveyed, or leased temporarily for a period not exceeding three years after their acquisition by said government on such terms and conditions as it may prescribe, subject to the limitations and conditions provided for in this act: *Provided*, That all deferred payments and the interest thereon shall be payable in the money prescribed for the payment of principal and interest of the bonds authorized to be issued in payment of said lands by the preceding section, and said deferred payments shall bear interest at the rate borne by the bonds. All moneys realized or received from sales or other disposition of said lands or by reason thereof shall constitute a trust fund for the payment of principal and interest of said bonds, and also constitute a sinking fund for the payment of said bonds at their maturity. Actual settlers and occupants at the time said lands are acquired by the government shall have the preference over all others to lease, purchase, or acquire their holdings within such reasonable time as may be determined by said government.

About the 18th of December, 1903, the civil governor of the Philippine Islands notified the War Department of the closing of the contract, which had the approval of the Secretary of War, and the question of issuance of bonds, what kind they should be, amount, denominations, and the various details as to engraving, printing, payment, interest, and all other information necessary to their advertisement and sale was taken up by cable. Much work was necessary to make decision and work out all these details. All the experts of the various bureaus of the Treasury Department had to be consulted, and

as well as it necessary to gain practical information as to the best method of floating these bonds, which information was as kindly furnished by expert financiers of New York houses connected with bonding companies as it was by the experts of the Treasury Department.

Registered bonds were determined upon. It was believed unwise to open a separate registering office in the Bureau of Insular Affairs, if the Philippine government could make use of the expert Register Office of the Treasury Department. The Secretary of the Treasury, on the request of the Secretary of War, kindly undertook this work, as well as the payment by the Treasurer of the interest on the bonds, the method being to transfer, through the disbursing officer of this Bureau, to the Treasury Department the amount of Philippine money that was necessary to meet these payments. In coming to this conclusion it became necessary for the Secretary of the Treasury and the Secretary of War to ask the opinion of the Attorney-General as to the construction of certain language of the above section, which opinion is embodied in the appendix.

The Philippine government limited the issue to \$7,000,000, since the indications were that the premium would easily cover the additional contract amount.

Accordingly, on December 30, 1903, a circular was issued announcing that the bonds would be dated February 1, 1904, bearing interest at 4 per cent, payable quarterly, redeemable at the pleasure of the Philippine government after ten years, and payable in thirty years after date of issue in gold coin of the United States, both principal and interest being payable at the Treasury of the United States; that the bonds would be registered and transferable at the office of the Register of the Treasury; that they should be in denominations of \$10,000 and \$1,000 in proportion to suit the purchaser or purchasers; that bids would be opened January 11, 1904, and delivery of interim certificates made February 1, 1904, for which the engraved bonds would be substituted later.

The Secretary of the Treasury authorized the statement—

That the Philippine land-purchase bonds will be accepted at par as security for deposits of public money, should further deposits be made, and may be substituted for Government bonds now held as security for deposits, on condition that the Government bonds thus released be used as security for additional circulation whenever, in the judgment of the Secretary of the Treasury, it is desirable to stimulate an increase in national-bank circulation.

This circular was given the widest publicity in the United States and in Manila. When the bonds were opened on January 11, 1904, they were found to contain, in all, tenders for \$33,237,000.

The most advantageous bid was found to be the joint one of Harvey Fisk & Sons, Fisk & Robinson, and the National City Bank of New York, of \$107.577 for the entire \$7,000,000, and they were accordingly awarded the bonds. The premium realized was thus \$530,390, which more than justified the decision to limit the issue to \$7,000,000.

The money was equally divided between the two Philippine depositaries in the United States, with interest for the six-months period contemplated in the contract of purchase at the rate of $3\frac{1}{4}$ per cent. The bonds were thus floated at practically 3 per cent. But \$2,000,000 of this amount has been paid out. This \$2,000,000, at the request of the title holder, is awaiting payment in London.

The examination of the titles of all the friar lands have been concluded. The survey of the British-Manila Estates Company (Lim-

ited) has been accepted by its representative, and \$200,000 have been paid from the friar fund in New York and \$98,782.07 paid in cash in Manila.

These estates include the two haciendas of San Juan and San Nicolas, in the town of Imus (usually known as the "Imus estate"), in the province of Cavite, consisting of 18,419 hectares, 56 ares, and 12 centares, formerly the property of the Recoletos order in the Philippines.

Likewise, the survey of the estates called Sociedad Agricola de Ultramar has been accepted by its representative. This includes the former estates of the Augustinian order in the Philippines, comprising some 18 different haciendas or estates, of which the purchase price was some \$2,212,404. Two million dollars of this amount have been transferred from New York to London, in accordance with and awaiting the demand of its representative, and the balance was paid in Manila.

In the case of the Philippine Sugar Estates Development Company (Limited), comprising the lands formerly owned by the Dominican order, a joint survey of several of the haciendas, which the government survey had shown to be short to the amount of the value of several hundred thousand dollars, has been requested by the government. Again, questions have arisen as to the titles of the large haciendas of Biñan, Santa Rosa, Santa Cruz de Malabon, together with a portion of Lolomboy.

It is the opinion of the government attorney who examined the titles that the title was in a separate and independent foundation, which had never joined in the conveyance. The amount of the purchase price aggregates \$3,671,657, to be definitely determined according to the resurvey.

Pay for that part of these estates as to which there is no doubt has been offered, as well as a proposition to bring the titles in dispute before the courts. The government is anxious to gain complete possession of these lands to parcel them out, not only in order that the transaction should be completed, but also that the land may be earning legitimate revenue for the friar-land fund.

DEPOSITARIES OF PHILIPPINE FUNDS.

The Guaranty Trust Company and the International Banking Corporation remain the two depositaries of insular funds in New York. The latter bank maintains a branch office in Washington and also in Manila. The same two English corporations—the Hongkong and Shanghai Banking Corporation and the Chartered Bank of India, Australia, and China—continue as depositaries in Manila of insular funds. All such funds are secured by bonds with the American Surety Company of New York and the Fidelity and Deposit Company of Maryland. These two surety companies have also contracts for bonding all insular employees who disburse moneys.

The treasury of the Philippine Islands still remains the only depositary designated under the act of July 1, 1902, of the public moneys of the United States in the Philippine Islands.

The following statements will indicate the business with these banks

in the United States as depositaries of the funds of the civil government of the Philippine Islands:

	4,240,899.93		4,240,899.93
Balance Oct. 31, 1904.....	3,797,899.93		

Mention has already been made of the fact that the money realized from the sale of the land purchase, or friar bonds, was equally divided between the two depositaries in the United States at the rate of 3½ per cent for a period of six months, and at the end of that period, which was about June 22, 1904, the banks represented that they were not justified in paying that rate of interest thereafter on account of the large amount of ready money in the market at that time, as well as the fact that this money was virtually on call by the Philippine government. The Philippine government acquiesced and the interest was accordingly reduced.

The unpaid balance of the so-called friar money is on call with the Guaranty Trust Company at 2 per cent, and with the International

Banking Corporation at $2\frac{1}{2}$ per cent, under the condition of fifteen days' notice of withdrawal.

For the same reasons the interest on the gold standard fund with the Guaranty Trust Company was reduced from $3\frac{1}{2}$ to $2\frac{1}{2}$ per cent, the relief fund from $3\frac{1}{2}$ to $2\frac{1}{2}$ per cent, the treasurer's general account is 2 per cent with both the Guaranty Trust Company and the International Banking Corporation, being reduced from 3 per cent, and the funds to the credit of the disbursing agent of this Bureau is 2 per cent with both banks.

Interest on Philippine funds deposited with the Guaranty Trust Company of New York and the International Banking Corporation, New York (also Washington branch), October 1, 1903, to September 30, 1904.

Fund.	Guaranty Trust Co. of New York.	International Banking Corporation.	Total.
Friar land.....	\$71,043.07	\$77,262.70	\$148,305.77

Total.....	183,530.08	83,024.16	266,554.24

NOTE.—Interest on disbursing agent's funds is credited to general account of treasurer.

METHOD OF TRANSFER OF FUNDS BETWEEN THE UNITED STATES AND THE PHILIPPINE ISLANDS.

The gold-standard act provides that the insular treasury, or the Philippine depositaries in the United States, may sell on demand, in sums of not less than 10,000 pesos, or \$5,000, exchange against the gold-standard fund, charging for the same a premium of three-quarters of 1 per cent for demand drafts and $1\frac{1}{8}$ per cent for telegraphic transfers. Under the discretionary power of the same act, the secretary of finance and justice of the Philippine Islands has but recently changed these rates respectively to three-eighths of 1 per cent and three-quarters of 1 per cent, which affords a cheap method for the transfer of funds both ways without actual transportation of the money.

When the Philippine government desired to increase the money on deposit with the New York depositaries, it has been accomplished by taking advantage of the War and Navy Departments' desire to transfer United States money belonging to any of their bureaus from the United States to the Philippines. The method being followed is to notify the civil governor by cable of the bureau desiring transfer and the amount to be deposited in the treasury of the Philippine Islands as depositary of the United States. The Philippine treasurer, when that has been accomplished, informs by cable the Treasurer of the United States, who in turn transmits an equal amount to such Philippine depositary as this Bureau designates in New York, and then the amount so placed with the treasurer of the Philippine Islands is subject to the directions of the Treasurer of the United States.

PHILIPPINES CONSTABULARY.

The act of Congress approved January 30, 1903, to promote the efficiency of the Philippines constabulary, which provided for the detail from the Regular Army of five officers, one as chief of constabulary and four as assistant chiefs, with respective rank, pay, and emoluments of brigadier-general and colonels, has worked well. It has permitted of the combined use of the companies of United States Filipino Scouts, which are paid by the Federal Government, and the constabulary or police force, which is maintained by the insular government. The Philippines constabulary in the past year, with the aid of the Scouts, have put down brigandage, reduced ladronism to a minimum, and suppressed the raids of the religious fanatics, called Pulijanes, in Cebu. They are an efficient and effective force and have not been found wanting.

The Philippines constabulary band and a battalion of two companies of the constabulary have been stationed with the Philippine exposition at the World's Fair. Their appearance, discipline, and conduct throughout their six months' stay has excited only favorable comment from the thousands of Americans that have seen them.

So effective has been the work of the native soldiery in the Philippines throughout the past year that it may properly be said that life, limb, and property are safer throughout the islands than they have been since American occupancy.

The present situation of law and order has permitted the Philippine Commission to reduce the constabulary force 1,200 men—from a total of about 7,200 to 6,000.

In the past year the anticipated difficult experiment has been made of organizing a constabulary force among the Moros. It is reported that this trial has been generally successful, and will materially contribute to the betterment not only of the military but of the political situation in the solution of that difficult governmental problem.

It was believed that the combined use of scouts and constabulary as a militia force in the islands, authorized by the act of Congress, would not only be effective for the better accomplishment of the purposes for which they were both organized, but also would incidentally demonstrate the best organization for a permanent native or Filipino auxiliary force for the policing of the islands.

The year's trial is probably too short to definitely determine the solution of this question at this time. However, divided control, the difference in pay, and maintenance have produced minor questions of authority and made invidious comparisons that would be harmonized for a common end better by the merging of the two forces into a native auxiliary one.

The revenues of the Philippines to-day will not warrant the cost of maintenance of the United States Filipino Scouts to be paid out of island funds. Were the United States to appropriate an equivalent amount to that which it now costs to maintain the Filipino soldiery for the use of the insular government in the Philippines, and loan, as it does now, the use of Regular Army officers to the command and assistant command of this force, it is believed the best insular auxiliary force could be obtained. However, the definite value of a purely military organization and control available for the use of the civil government should not be ignored.

The first plan should comprehend the detail from time to time of additional Regular Army officers, with additional rank of at least one grade, to fill a proportion of the field-officer positions of this force.

Several graduates of military colleges throughout the United States have sought, upon the recommendation of the regular officer there stationed, appointments as third lieutenants in the constabulary. An unusually fine lot of young men has been appointed, whose work gives good promise for the future.

TELEGRAPH SERVICE.

The telegraph lines, which have been taken over by the civil government from the military administration in the islands, are under the control of the Philippines constabulary, and during the year some twenty telegraphers have been appointed by this Bureau in the United States and transported to the islands. It is the policy of the Philippine government, however, eventually to employ Filipinos as telegraph operators so soon as they are qualified, and for this purpose telegraph schools have been established in Manila and some of the larger cities for the purpose of training natives along this line.

UNITED STATES FILIPINO SCOUTS.

As part of the Regular Army the Filipino Scouts should possibly not be mentioned in this report. However, as has been stated, they have performed much service under the insular government, and much has been learned of their good work in the field. Again, a battalion of four companies and band, in all about 450 men, have been stationed as a part of the Philippine exhibit at the Worlds' Fair during the past six months. This is the first and only battalion organized as such, the rest of the force being divided up into separate companies or detachments, generally stationed apart from large garrisons and in no larger than one company commands, the commanding officer having no higher grade than that of first lieutenant.

This battalion at St. Louis justly deserves much praise. I have never seen in any garrison outside of West Point a better drilled, disciplined, more cleanly and sanitary or healthy command than this battalion of Filipino Scouts in the Philippine reservation at the World's Fair. It is the only battalion ever organized under the act of Congress. They have performed as hard and exacting work as ever falls to the lot in garrison of United States soldiers; they have used the United States soldier arms and equipment; they have lived on the Government ration; have eaten it all up; all of them have gained on an average of about five pounds apiece since they left the islands and were issued the full ration. The small percentage of sickness has been unusual. Frequently there would be but three or four men sick out of a total of 450. Their drill and conduct has excited the favorable comment of thousands who have seen them. In fact, no adverse comment has been heard. Much credit for this result is due to Maj. William H. Johnston, their commanding officer. I recommend this battalion be returned to the Philippines as such.

From the results gained at St. Louis, it is furthermore recommended that all the other Filipino Scout companies be organized into battalions. Under the act of Congress this would require the detail of some 12 captains of the Regular Army to serve as majors of these battalions, and some 50 captains—too great a draft from the line of the

Regular Army, which is already too much depleted by detail of trained officers away from regiments.

I understand it has been proposed to gain legislative authority to create vacancies by such details, which can be filled by promotion in the regular service similar to the vacancies created by detail from the line to the staff departments.

This method would be probably effective and wise except that it would be hardly fair to the present first lieutenant commanding officers of scout companies that have proved efficient in that capacity and have commanded companies from three to five years.

It would require these officers to become subordinate to many officers of no greater and sometimes less length of service than themselves, and few who had any experience whatever with native troops. The efficiency of scout companies serving in the field with the constabulary has been much impaired by the lack of officers. There is no doubt there should be more. Two American officers to a native scout company of a hundred men is manifestly not enough. There should be at least three. I would therefore recommend that Congressional authority be gained to fill the vacancies created by the detail of 12 captains to become majors, and that the present law be further amended to provide for the appointment to captaincies for service only with scouts of those first lieutenants of scout companies whose record and exhaustive practical examination warrant their retention, and the dropping of all not proved and found thoroughly proficient, and for the promotion of second lieutenants to first lieutenantcies if their records and abilities warrant, and the filling of the vacancies then existing by appointment of the President, preferably from uncommissioned officers of the regular service.

There is excellent material among some of these first lieutenant scout company commanders of to-day. Many of them have excellent companies, have learned the language and ways of the men they command, and have already gained their loyalty and respect. As soon as these officers and their commands become mobilized under the experienced and educated control of a major of a battalion, detailed for merit from the captains of the regular service, they will probably prove at least as efficient captains as those for whose detail present law provides.

Again, it is clear to me after reading all the reports, talking with officers, and watching the St. Louis battalion, that the Filipino Scouts performing American soldiers' duty should have the full ration of that soldier as well as the other allowances, except pay, which is at present half of that of the Regular Army soldier, and probably adequate.

Time only can determine the best auxiliary native force. The present law, as I have said, permits of the effective combined use of both native forces, but an assistant chief of constabulary, four of whom have the rank of colonel in the United States Army, has generally too large a territory properly to watch all districts and control his constabulary and scout companies serving with same.

Could a battalion of scouts instead of four companies be turned over for use with the constabulary the major of that battalion could materially assist the constabulary colonel, not only in the better military organization and service, but in the proper political aid to the civil government. The advantages of experience to be gained by such active field service to the regular officers so detailed, and therefore to the regular service, is manifest.

THE PHILIPPINE CIVIL SERVICE.

As stated in last year's report this Bureau has charge of all work necessary to be performed in the United States relative to changes in the personnel of the government of the Philippine Islands. In addition to the reforms effected in the performance of this duty, as outlined in last year's report, a further radical change has been made in the method of handling this business during this report year.

In order to expedite the making of appointments where the same must be made upon the certification of the United States Civil Service Commission, a plan has been adopted whereby all examination papers for the Philippine service immediately upon being rated by that Commission are forwarded to this office, which is now charged with making up the various registers of eligibles and making selection in accordance with the Philippine civil-service law and rules without the formality of requesting such certification from the Civil Service Commission, thus avoiding the delay of awaiting the necessary response. The responsibility for legal certification is thereby transferred to this office, which in turn is required to render a monthly accountability to the United States Civil Service Commission. This Bureau feels its obligation to the Civil Service Commission for the great amount of work which it calls upon that Commission to perform and its duty to relieve the burden to whatever extent practicable. This new plan under which all work is done without the aid of the Civil Service Commission, except the holding of the examinations and the rating of the papers, is performed in this office and is now in satisfactory operation. There is the most harmonious cooperation between this Bureau and the Civil Service Commission.

CHARACTER OF APPOINTMENTS.

Appointments still continue to be made to all classes of positions, although but few persons possessing only clerical ability without special training are appointed in the United States for service in the Philippines. The greatest difficulty was experienced in securing suitable persons for service in the scientific laboratories in the Philippines, and also in securing an adequate number of civil engineers. It is understood that the same difficulty has been experienced by all Government offices in this country, due to the great outside demand for such persons.

Beginning with September 1, 1903, the position of teacher in the Philippines became subject to the civil-service law, and all appointments subsequent to that date have been made in accordance therewith. In order to secure a sufficient number of qualified persons the Civil Service Commission has been called upon to hold seven examinations throughout the United States since that date for the position of Philippine teacher. During this report year there have been appointed and sailed, either as the result of examination, or by transfer or reinstatement, 467 persons, of which 17 were civil engineers, 45 stenographers and typewriters, and 280 were teachers.

The chairman of the Philippine civil service board, in a communication to this office, stated as follows:

The results of applying the examination system to the position of teacher are so much more satisfactory than the results obtained through appointments made prior to September 1 that there is cause for general congratulation.

In addition to the foregoing, appointments have been made during this report year to the following employments, appointments to which are not subject to civil-service requirements:

Linemen.....	2
Telegraph operators.....	18
Third lieutenants in the constabulary.....	15
Without salary to positions in the laboratory.....	2
Judges of the court of first instance.....	2
Consulting engineer.....	1
Consulting architect with an assistant.....	1

Although not by law subject to the merit system, their method of selection has been strictly in accordance with the spirit of that principle. The third lieutenants of constabulary were appointed by this bureau after medical examination and upon the recommendation of the officers of the Army detailed to the military colleges of which they were students or graduates. The telegraph operators and linemen were appointed after medical examination and upon the recommendation of an officer of the Signal Corps charged with the duty of inquiring into the capacity and fitness of such persons. The power of appointment to the position of judge of the court of first instance is vested in the civil governor of the Philippine Islands and the positions of consulting engineer and consulting architect are of a temporary character.

TRANSPORTATION OF CIVIL EMPLOYEES.

In addition to the large amount of work connected with the arranging of transportation for appointees to the Philippine civil service, it also devolves upon this office to arrange for the transportation of insular employees on leave of absence in the United States, and in most cases members of families and fiancés of insular employees.

On account of the inadequacy of the United States transport service to handle the traffic occasioned by the heavy demand on the insular government for the transportation of its employees, due to the fact that the transport service was taxed almost to its capacity by the military establishment, for which it is primarily maintained, it again became necessary to invite proposals from the transcontinental railways and Pacific Ocean steamship lines to perform this service from January 1, 1904, which resulted in the business being given to the Southern Pacific and Union Pacific railroads and their three allied steamship lines sailing out of San Francisco and to the transcontinental railway lines, operating in connection with the steamship lines from Seattle. This agreement expired on June 30 last, but prior to its expiration it was agreed to continue it until the end of the present calendar year, when it will be necessary to again invite proposals to carry this traffic. The practice is not to resort to commercial steamers when the conditions are such as will permit the transportation of insular employees on the army transports. During the past year, however, owing to the large number of appointees for whom it was necessary to provide transportation, it has been possible to secure accommodations for only a small percentage of the insular traffic on the transports.

The rate via commercial lines is a through one, including transportation from place of residence in the United States to point of embarkation and first-class steamship transportation beyond that point.

Under the law an employee returning to the United States on leave of absence, if he anticipates returning upon the expiration of his leave, is required to make application for his return transportation before his departure from the Philippines, and insular employees desiring transportation for their families are also required to make such application to the Philippine authorities. These applications are subsequently forwarded to this Office, and in this manner it is enabled to determine whether a person is entitled to the benefit of the arrangement for the transportation of insular employees.

Transportation is furnished by the transportation lines on orders issued by this Bureau, which assumes the responsibility of the payment of the accounts when rendered. As a safeguard against loss, however, each insular employee who is not entitled to have his transportation advanced by the Philippine government is required to deposit the cost of his transportation before the orders for the same are issued.

During the year the following number of persons sailed on transportation orders issued by this Bureau: 462 appointees, 163 members of families, 20 transferees, 96 insular employees returning to duty after a leave of absence in the United States, 5 to persons reinstated, and 69 unclassified, or a total of 815 persons whose transportation via commercial lines has been arranged by this Bureau. During this same period transport accommodations have been secured for 16 appointees, 61 members of families, 38 employees on leave, and 64 unclassified, or a total of 179 persons, whose transportation on army transports has been secured through this Bureau.

The demands of the insular government in the past year, therefore, necessitated the providing of first-class accommodations from the United States to Manila to the number of 994, as against 627 for the preceding year, or an increase of 367.

DECEASED EMPLOYEES OF THE INSULAR GOVERNMENT, AND ADMINISTRATION OF THEIR ESTATES.

As indicated in the last annual report of this Bureau, the treasurer of the Philippine Islands is designated to administer the estates of deceased employees of the civil government of the Philippine Islands who are citizens of the United States, where the estates are small and a regular administration is not deemed advisable. The policy inaugurated in accordance with an understanding had with the treasurer of conducting all the business relative to the settlement of these estates through this Bureau, while involving a slight increase of work, has been attended with very satisfactory results.

The civil governor of the Philippine Islands reports by cable to this Office the deaths of all American employees of the civil government of the Philippines. Upon receipt of advice of the death of an employee the nearest relative is telegraphed, and subsequently blank forms to establish proof of heirship, with information as to the manner in which they are to be executed, are sent. These forms upon their return are sent to the treasurer of the Philippine Islands, who is guided thereby in determining the heirs to the estate.

Owing to the great expense which would attach to such a policy, the Philippine Commission some time ago decided that it was not in a position to bear the expense incident to the removal of the remains of deceased employees of the insular government to the United States,

but through the courtesy of the Quartermaster's Department it has been possible to secure transportation of the remains of such deceased employees on army transports free of charge from Manila to the United States. At the present time, however, it is incumbent upon the family of a deceased employee to arrange for the transportation of his remains from the port of entry at which they arrive in the United States to place of burial, and to defray the expenses incident to their disinterment in the Philippines in the event the estate of the deceased is not sufficient for this purpose and the family wishes the removal of the remains.

In most instances where practicable, however, the courtesy of the Quartermaster's Department has been extended and the expenses incident to the disinterment of the remains of deceased employees is reduced to a minimum by permitting the burial corps to perform this work.

EXTRADITIONS.

During the year there have received consideration cases involving the extradition of fugitives from justice of four persons from the United States to the Philippines and one person from the Philippines to a foreign country.

THE PURCHASE OF SUPPLIES FOR THE PHILIPPINE GOVERNMENT IN THE UNITED STATES.

The same method, as explained in detail in last year's report, has been followed since. During the past year 341 requisitions were received from Manila and 80 by cablegram. These orders were in turn turned over for execution to the Philippine purchasing agency located in New York but attached to this Bureau. In addition to the purchasing and shipping of goods called for in these requisitions, fully two-thirds of the articles specified in the stock orders of the previous year, approximating \$300,000, were purchased, shipped, and paid for during this year.

Requisitions for supplies similar to those furnished the Department of the United States under contract prices were, through the cooperation of the various Bureau offices of this Department, bought after inspection by their experts, and at the same low prices these Bureaus have received.

The United States Post-Office Department included a clause for the fiscal year ending June 30, 1905, providing that successful bidders should furnish similar materials and at the same prices when required by the Philippine government upon requisitions issued through the War Department.

As a rule, supplies have been purchased f. o. b. New York, but in many instances it has been found to be more advantageous to the government to purchase goods at places of manufacture and ship them across the continent by rail to San Francisco and thence by steamer to Manila under contracts made with various lines for through transportation.

The merchandise is insured on dock and in transit to Manila against all loss or damage, however it may be occasioned, and all ocean freight charges are prepaid.

The New York office is maintained by Philippine funds, and as now organized consists of one purchasing agent, one clerk, one stenographer, and one typewriting and filing clerk. The system of records in use is practically the same as that in the disbursing office of this Bureau. The books show in detail every transaction and are arranged so that the duplication of purchases or excessive charges may be readily detected.

The articles called for in the requisitions transmitted to that office have been promptly purchased and forwarded, and the work of the office is up to date.

In response to an appeal made by the Manila merchants the Philippine Commission has decided that in order to encourage bona fide merchants and to make it an object for them to carry large stocks from which purchases can be made for immediate delivery, they shall be favored with the government business, provided their prices are not more than 10 or 15 per cent above the prices asked for similar goods in the United States. This experiment is now being tried, and for the time being will result in smaller purchases through this Bureau. However, a great many requisitions are being received for articles which, for various reasons, the Manila merchants can not afford to carry in stock.

The difficulty of this plan, it is believed, will be the impracticability of distinguishing between the bona fide merchant who is willing to carry a large stock and the commission merchant or inconsequent agent whose credit and knowledge of doing business is such as to preclude the confidence of important commercial houses in the United States.

DISBURSEMENTS OF PHILIPPINE REVENUES.

The total disbursements since the date of last year's report amount to \$9,230,876.49, and are in payment of 2,756 accounts, and the total disbursements from May 20, 1901, the date the disbursing office was established, to the present time, amount to \$18,027,235.52, and are in payment of 5,684 accounts, and have been made without the loss of a cent either to the government or to the disbursing agent.

More than 25,000 expense items have been verified, checked, and recorded during the year.

The method of handling requisitions, proposals, invoices, bills of lading, certificates of insurance, and vouchers, as well as the method of recording all transactions, was shown in detail in last year's report.

CATALOGUES.

A catalogue system fully indexed under the names of firms and articles has been inaugurated. More than 1,000 catalogues have been received from manufacturers and dealers, and two catalogue filing cabinets are required for their reception. They are of much value in the purchase of supplies and in the checking of accounts.

CABLEGRAMS AND TELEGRAMS.

During the past year the total number of telegraph and cable accounts received was 94 and covers a cost of sending 3,951 mes-

sages, the total charges amounting to \$16,976.55, as per the following statement:

	Telegrams.		Cablegrams.	
	Number.	Charges.	Number.	Charges.
Western Union Telegraph Co.....	2,255	\$1,270.04	94	\$4,246.45
Postal Telegraph-Cable Co.....	1,376	863.29	225	10,596.77
Total.....	3,631	2,133.33	320	14,843.22

INSULAR SALARY AND EXPENSE FUND.

During the past year there has been deposited with the disbursing agent to the credit of the insular salary and expense fund, to cover the cost of transportation to Manila, \$63,555.57.

PURCHASE OF BULLION.

All accounts for the purchase of bullion for the silver coinage, for blanks and metal for the minor coinage, for material and labor in packing the coin for shipment, for expense of coining, and for marine insurance, ocean freight charges, and miscellaneous coinage expenses have been carefully audited in the purchasing and disbursing division. The following amounts were disbursed in connection with this coinage:

For purchase of bullion at San Francisco.....	\$954,501.66
For purchase of bullion at Philadelphia.....	130,964.50
For blanks for minor coinage.....	103,135.82
For coining, Philadelphia.....	26,794.29
For coining, San Francisco.....	91,791.36
For insurance.....	13,168.01
For freight and express.....	4,369.83
For packages and packing.....	4,537.67
For miscellaneous coinage expense.....	1,503.76
	1,330,766.90
Less amount paid during the previous year for preparation of silver certificates, later being charged, upon request of the Auditor, to the appropriation for general purposes.....	10,465.88
Total.....	1,320,301.02

CUBAN ACCOUNTS.

On March 31, 1903, Lieutenant McCoy transferred his balance, amounting to \$10,710.78. Of the \$1,205.58 on hand at the time of my last report, \$236.94 has been disbursed during the year, leaving a balance on hand at the present time of \$968.64.

ACCOUNTS RELATING TO THE EDUCATION AND MAINTENANCE OF FILIPINO STUDENTS IN THE UNITED STATES.

Act No. 854 of the Philippine Commission, enacted August 26, 1903, provides as follows:

The cost of education and maintenance of said students in the United States, not exceeding the sum of five hundred dollars, in money of the United States, per student per annum, and the actual and necessary traveling expenses of said students to the educational institutions in the United States to which they have been assigned and their actual and necessary traveling expenses from such educational institutions to Manila, Philippine Islands, upon

the completion of their studies in conformity with this act and their agreement, shall be paid by the government of the Philippine Islands.

There is hereby appropriated, out of any funds in the insular treasury not otherwise appropriated, the sum of seventy-five thousand dollars, in money of the United States, or so much thereof as may be necessary to carry out the provisions of this act. Funds appropriated for the purpose of this act for expenditure in the United States shall be disbursed by the disbursing officer of insular funds, Bureau of Insular Affairs, War Department, Washington, District of Columbia, on vouchers properly signed and duly presented.

In accordance with the last section accounts have been opened with each of the 101 students, showing the amounts paid for room rent, board, clothing, laundry, tuition, books, school supplies, and incidental expenses.

Accounts for all these expenses until recently, when they were placed in educational institutions, were made by the agent in charge of the Filipino students in the United States, who is attached to this Bureau. Now, that they have been so placed, the balance of the funds in his possession were transferred to the disbursing agent of Philippine revenues for the payment of same.

INSPECTIONS.

Two inspections of the office of the disbursing agent have been made by officers detailed from the Inspector-General's Department, and everything found correct and the office commended. The following summary is a general statement of the balances, receipts, and disbursements for the year ended October 31, 1904:

General statement of balances, receipts, and disbursements for the year ended October 31, 1904.

Appropriations.	Balance on hand Oct. 31, 1903.	Received since.	Total.	Disbursed.	Transferred to disbursing officers. Philippine Exposition Board.	Total disbursed and transferred.	Balance on hand Oct. 31, 1904.
General purposes.....	\$48,900.07	\$165,392.28	\$214,352.35	\$173,278.20		\$173,278.20	\$41,074.15
Insular purchasing agent's purchases....	46,596.78	857,551.66	904,148.44	877,946.05		877,946.05	26,202.39
Philippine exhibit....	89,049.25	300,052.50	389,101.75	12,536.00	\$376,565.75	389,101.75	
Teachers' traveling expenses.....	2,267.48		2,267.48	2,267.48		2,267.48	
Philippine census.....	1,873.75	16,000.00	17,873.75	16,584.72		16,584.72	1,289.03
Certificates of indebtedness.....	30,000.00	6,240,000.00	6,270,000.00	6,240,000.00		6,240,000.00	30,000.00
Philippine coinage.....	184,871.69	1,150,000.00	1,334,871.69	1,320,301.02		1,320,301.02	14,570.67
Insular salary and expense fund.....	11,985.60	63,555.57	75,541.17	33,892.67		33,892.67	41,648.50
Education and maintenance of Filipino students.....		48,031.10	48,031.10	38,174.60		38,174.60	9,856.50
Friar lands bonds, interest.....		210,000.00	210,000.00	139,330.00		139,330.00	70,670.00
Total.....	415,604.62	9,050,583.11	9,466,187.73	8,854,310.74	376,565.75	9,230,876.49	233,311.24

LIVE STOCK SELECTED IN THE UNITED STATES FOR THE PHILIPPINE ISLANDS.

During the past year the following animals have been purchased and shipped or are on their way to the Philippines:

Horses—12 stallions and 95 mares, 30 geldings for the Manila fire department, and 28 "cow ponies" for the Philippine constabulary;

burros—17 males and 45 females; cattle—1 Holstein bull, 4 Holstein cows, 3 Jersey bulls, 65 Jersey cows, and 2 heifers; hogs—2 Chester white boars and 2 Berkshires.

During the past year the Philippine government has given active consideration to the introduction into the Philippines of domestic service animals from the United States. Several of these are for service pure and simple, and many strictly imported for breeding, and others still for the double purpose of service and breeding, as is indicated by the above list.

In the Philippine Islands there is a race of horses of wonderful endurance and serviceability, when their diminutive size is considered. These little horses will probably not average more than twelve to thirteen hands in height and the mares from eleven to twelve. Undoubtedly these animals, judging from the qualities they possess and from their appearance, have descended from Barb and Arab blood, and under a tropical climate and with the absolute neglect of the mares, which are seldom used except for breeding, the animals have deteriorated in size to their present stature; but for their inches are as good as any horses that exist. The race is probably an illustration of the law of the "survival of the fittest," uninfluenced by any care as to selection in breeding.

Horses are used only in harness and under saddle, and they are seldom gelded.

The purpose in sending the mares and stallions to the Philippines was to make an effort to grade up the Filipino ponies so as to make a general-utility horse capable of a wider range of work. In any attempt to grade up to a better size and greater carrying capacity the problem presented was to secure a definite type and not mongrels. It was therefore not deemed wise to send any stallions or brood mares out that did not belong to definitely reproducing types; otherwise the experiment was doomed to failure. In the selection of breeding stock four types only were considered to be such as would tend best to reproduce that type for the purpose in view. The types selected were Arabs, Morgans, Denmarks, and thoroughbreds.

Percheron, Clydesdale, and other draft breeds were considered unsuitable, by reason of blood and conformation. One of the first considerations in the selection of stallions was the size of their type, which, if too large, mated with native mares would (and it has been proved that it does) smother the foal and endanger the life of the mare in foaling. Again, it is admitted that great contrast in mating of types tends to produce monstrosities and abnormalities—in other words, that the size of the horse that is desired must be gradually gained through generations.

Carefully selected Arab stallions of greater size than the Filipino ponies manifestly fulfill the conditions in the Philippines.

The next type, Morgan, the horse of Vermont, also fulfills the requirements.

Next is the Denmark type of Kentucky, which in the Blue Grass region for sixty years has been bred and become a type for a family to which belong the majority of the prize winners in American horse shows to-day. Only two of these were selected—excellent specimens. They are too large for service to any but the especially large native mares, and they should be reserved for breeding to picked American mares to keep in the islands a new supply of this excellent blood.

The Denmark mares should be bred to the best Filipino stallions, and the mare progeny of this union bred back to the Denmark stallions and the stallion progeny stood to the native mares.

The last type is the Thoroughbred. Two excellent specimens only of this breed were selected. They should be put to Filipino mares and the progeny bred to Morgans and Arabs.

The native horse has in the last few years become attacked by a frightful scourge of surra; but this disease, which is a species of glanders, has been carefully studied and, while as yet no cure has been discovered, it has been found that it is preventable and that it is not likely to attack horses except in cases where the skin, especially of the mouth, is lacerated. Great loss from this cause has resulted, but it is believed that it is now under control. The Philippine government purposes to devote much attention to this subject of the betterment and increase of the various domestic animals that so well contribute to the internal economy of a country.

Experience of the past six years has proved that an imported animal, especially the mule, with the proper care remains serviceable in the Philippines.

Many of the mares selected will be used for the service of the government, and incidentally for breeding. I earnestly renew my recommendation that nothing but mares should be furnished for all work purposes, including the mounts for cavalry, in the islands whenever their service is practicable.

Experience has shown that they will certainly do as well as geldings, and when they are worn-out or condemned for such service they will bring two or three times more than the gelding will to-day in the Philippines, and can be bred and therefore contribute to the internal economy.

THE GOVERNMENT COLD-STORAGE AND ICE PLANT AT MANILA.

This plant was constructed in 1901 by the military government and paid for out of Philippine funds. It is one of the best and most complete plants in the world and excellently performs the functions for which it was built and maintained. It has always been operated, even under government control, at a large profit. The Philippine Commission have been under the impression that it is the kind of property that should be in private hands and not run by the government; that the government should not allow itself to maintain a plant in competition with private plants, where the public exigency does not so demand. They have, therefore, determined to sell the entire plant with the realty to private parties, and have authorized this Bureau to negotiate such sale in the United States.

The minimum price determined upon is \$1,000,000, which would appear fair and equitable and present a good chance to private interests for profitable investment and an assured income in Manila. There are indications that the sale will be shortly consummated.

COMMERCE.

The summary of commerce, giving in detail the import and export trade of the archipelago, has been issued by the Bureau at regular monthly intervals during the past year, the work of the statistical division.

By means of this bulletin the public is placed in touch with commercial conditions in the islands, the statistics being so arranged as to serve as a systematic and permanent record of Philippine trade during American administration. Such a record can be fully appreciated only by one who has endeavored to prepare the same covering a number of years, and has encountered here and there the numerous lapses and incongruities that exist in the records of former sovereignty. Endeavor has been made to abridge these deficiencies as far as possible by the collection of data from various sources, the preparation of comparative tables of trade during different periods, as well as the use of graphic charts illustrating important features of Philippine commerce. In addition, and with a view to giving as wide publicity as possible to opportunities for investment and business matters generally, there are published, in connection with the statistical data available, articles bearing on the resources and industries of the islands.

The following comparative table will show the imports and exports by values:

Country.	Imports.			Exports.		
	1902.	1903.	1904.	1902.	1903.	1904.
United States.....	\$1,035,243	\$3,944,098	\$4,633,216	\$7,691,743	\$13,863,059	\$11,102,775

Other countries.....	3,030,517	2,772,115	3,474,901	808,383	838,549	1,169,725
Total.....	32,141,842	32,971,882	33,220,761	23,927,679	33,119,899	30,259,627

EXPORTS AND IMPORTS.

Referring briefly to the condition of trade, official returns up to June last show a sharp decrease in the export business, the purchasing power of the islands being reduced fully \$3,000,000 as compared with the value of native products sold during the previous year. From more recent advices it is learned that the land area under cultivation for future crops is nearly as large as in ordinary years, and the effect of past conditions, such as the plague of locusts, so disastrous to agriculture, the epidemic of rinderpest, causing the death of many farm cattle, and other causes beyond the power of the government to control, is now gradually wearing off.

The imports from all countries aggregated \$33,220,761, as against \$32,971,882 in 1903. Included in this trade for the past year were: Food stuffs valued at \$15,690,910 (rice imports being worth \$11,548,814); cotton goods, \$4,919,840; metal and metal manufactures, \$3,430,334; paper and manufactures of, \$753,930; oils, \$617,179; other articles, \$7,808,568.

Since September, 1903, by act of the Commission, articles for use of the insular government have passed through the different customs-houses subject to the same duty charge as merchandise imported by private firms and are now included in monthly statements to this

Bureau. Supplies, however, for the Army and Navy come in duty free. The business referred to is quite large, and by reason of many of the purchases being made in markets of the United States our trade with the islands is much heavier than heretofore, so much so that, excluding Asiatic territory from which large shipments of rice have been received, we now rank as the leading import country in addition to holding most of the export trade.

Of the exports, hemp is valued at practically the same as last year, the larger part of the trade, while still with the United States, shows a loss during the twelve months of more than a million and a half dollars, and shipments to that amount appear to have been diverted into English channels. This is further demonstrated by the record of United States imports for periods during which hemp cargoes from Manila by way of the United Kingdom would have time to reach here, receipts for the first quarter of the present fiscal year being far below those for the same months of 1903, and made up to a greater extent by indirect shipments. In view of the provisions of section 4, act of March 8, 1902, by which American hemp buyers are entitled to a refund of the duty paid on exports to this country, the only explanation for the present drop in trade as a whole is found to be, it has been alleged, in the statement that there is much hemp of an inferior grade being offered. It is understood that consumers in this country, while awaiting an improvement in the situation, use other fiber wherever it is possible to do so, sisal, the principal substitute, showing an importation of \$16,000,000 (nearly all from Mexico), or an increase of \$3,000,000 worth over the consumption a year ago.

Copra, the product of the cocoanut palm, shows a decided falling off, its loss approximating \$2,000,000. It is alleged that the small amount of rainfall in certain sections has interfered with the crop. However, the growth and preparation of the cocoanut is a profitable industry with the natives, and there is little doubt that the setback is but temporary.

One large American cocoanut-oil manufactory has reported to the Bureau that it is in the process of moving its plant from San Francisco to Manila to convert copra into oil and supply the trade in this country, and thereby eliminate the large freight cost of the raw material to the United States, as well as to make cheaper initial purchases in the islands.

Philippine sugar trade has suffered, and although there is a slight increase in the tobacco trade over 1903, in both the crude and manufactured article, the figures are considerably below the usual average when compared with previous years.

Total exports, by articles.

PROPOSED MODIFICATION OF PHILIPPINE TARIFF.

Inasmuch as the practical application of the tariff schedules in operation since November 15, 1901, and approved by the Congress of the United States March 8, 1902, naturally developed certain inequalities, a revision thereof was deemed advisable. With this idea in view, a committee composed of customs experts and Philippine business men was appointed to take evidence of persons interested, and to make report to the Philippine Commission as to changes needed in the existing tariff law, so as to enable the latter to recommend to Congress amendments to the law in such particulars as experience has shown the said law to be defective, inconsistent with itself, or oppressive in the matter of prohibiting useful importations.

This committee sat in Manila and availed itself of every source of information. The conclusions of the committee were reached after a careful discussion, and with one or two exceptions its report represents the unanimous opinion of the committee.

This report, together with the recommendations of the Philippine Commission and the collector of customs for the Philippine Islands, was transmitted to the War Department, and the original tariff and the changes suggested have been published side by side and will be given wide publicity in the United States, and suggestions and recommendations have been invited.

The descriptive language in many paragraphs in the old tariff has been changed for the purpose of securing more exact definition and description of articles without any change in the rates of duties which have been found to be equitable, imposing no undue burden on the commerce of the islands. In some cases the rates of duties have been increased and in others the rates have been reduced, the general average appearing to be to secure for most articles, except those of luxury, a rate of approximately 20 per cent.

Perhaps the most important change has been made in the machinery schedules, which have been removed from the specific to the ad valorem basis and the rates thereon ranging from 5 per cent on agricultural machinery to 20 per cent on electrical machinery, such as dynamos and motors, recommended.

Provision has been made for samples imported by commercial travelers to the value of \$2,000 to be imported under bond free of duty. The provisions for the free entry of personal effects have been made more liberal.

After the commercial bodies and others to whom the proposed tariff has been transmitted have submitted to this Bureau such suggestions and recommendations as they may care to make, all of the same will be carefully considered by the Secretary of War, and the final revision of the tariff schedules will be undertaken and transmitted to the Congress.

**SEPARATE TARIFF FUND IN UNITED STATES TREASURY TO
CREDIT OF PHILIPPINE ISLANDS.**

The amounts collected in the United States on products of the islands and on account of tonnage dues since March 8, 1902, to and including June, 1904, are shown by the following statement, which constitutes a separate fund in the United States accruing to the Philippine Islands:

Quarterly periods.	Duties	Tonnage.	Total.
April to June, 1902 ^a	\$8,663.30	\$364.32	\$9,027.62
July to September, 1902.....	5,699.45	456.00	6,155.45
October to December, 1902.....	57,682.00	353.22	58,035.22
January to March, 1903.....	126,988.65	822.42	127,811.07
April to June, 1903.....	11,351.07	343.56	11,694.63
Total fiscal year 1903.....	201,721.17	1,975.20	203,696.37
July to September, 1903.....	185,394.30	950.58	186,344.88
October to December, 1903.....	296,264.14	953.04	297,217.18
January to March, 1904.....	11,424.84	630.06	12,054.90
April to June, 1904.....	13,544.85		13,544.85
Total fiscal year 1904.....	506,628.13	2,533.68	509,161.81

^a Includes March, 1902, figures.

The foregoing statement shows the collections under each heading made since the date of the passage of the act. The amounts collected have continued to show considerable variation, exceptional shipments of sugar arriving at ports of the United States during the months of September, October, November, and December of 1903 being largely the cause of the increase noticed in those months.

Of the funds mentioned, the Treasurer of the United States has, upon request of the Secretary of War, deposited with the Philippine depository in New York, to the credit of the treasurer of the Philippine Islands, to and including June of 1904, the sum of \$721,885.80.

Refundable export duties during the period March 8, 1902, to June 30, 1904, have amounted to.....	\$1,050,906.00
United States collections for the same period.....	721,885.80

Difference or net loss sustained by insular revenues on account of refunds.....	329,020.20
--	------------

The effect of the operation of the act of March 8, 1902, upon the revenues of the islands is far from what it is believed was the intention of that legislation. Instead of a benefit to the islands, it has resulted in a constant loss. The act provides that duties collected on imports from the Philippines into the United States shall be turned over to the insular treasury. It also provides that on goods shipped to the United States from the Philippines on which no import duty is collected in the United States, the amount of export duty collected in the Philippines shall be subject to refund from insular revenues. As shown above, under these provisions there has resulted a drain on insular revenues because of large refunds of export duty on shipments of manila hemp, which is admitted into the United States free of duty. At the same time the legislation has had the effect of diverting the hemp direct to the United States.

COASTWISE TRADE.

On page 6 is quoted the legislation passed in the last session of Congress. It will be seen that this legislation deferred until July 1,

1906, the application of the United States coastwise law to the trade between the United States and the islands, and left with the Philippine Commission the control of the interisland coastwise trade until such time as the United States should provide legislation for vessels engaged therein.

INTERISLAND TRADE.

This authority is in accord with the recommendations of the Philippine government. The trade has been carried on under the rules prescribed by the insular government, amended and modified from time to time as conditions warranted. As the regulations had been the subject of some complaint, the civil governor, under date of December 8, 1903, directed a committee, consisting of the acting collector and other officials of the insular customs service, together with representatives of the local trade, to make an investigation and report with recommendations as to alleged hardships. The committee, after thoroughly inquiring into existing conditions and considering complaints and suggestions submitted by shipping interests, made the following recommendations as to the amendment of existing laws:

The application of a uniform license fee per net ton to vessels engaged in the same class of business, instead of the discriminating charges made under acts of the Philippine Commission No. 355 and No. 1026;

Modification of conditions governing entry of closed ports;

Exclusion of foreign vessels from local trade;

That the Quartermaster's Department be prohibited from chartering foreign vessels for use in Philippine waters;

An increase in the number of inspectors of hulls and boilers;

A modification in requirements as to carrying licensed officers on different classes of vessels;

Relaxation of quarantine restrictions in so far as safety permits; and

Additional docking and unloading space on the banks of the Pasig River for coastwise vessels.

With the findings and recommendations of the committee for guidance, it is believed that a supervision and control of the local carrying trade can be maintained that will not be a burden to owners, and which will at the same time protect the interests of the trade and of the government.

Under the provisions of section 117 of the Philippine customs administrative act there had been issued on June 30, 1903, as shown in the following tables, based on statements rendered by the collector of customs at Manila, 4,125 certificates of protection. During the next twelve months 447 additional certificates were issued, making the total number issued to and including June 30 of the present year 4,572.

Vessels with certificates of protection outstanding.

ACCORDING TO CLASS.

Total.....	2,278	43,305.00	346	4,076.00	2,624	47,381.00

^a As far as available records permit, vessels previously documented have been eliminated from the above figures.

During American occupation there has been a constant increase in coastwise tonnage entered and cleared at the different ports in the archipelago, as will be seen from the following figures obtained from official reports:

Gross tonnage—coastwise vessels.

Fiscal year.	Entered.	Cleared.
1899.....	124,158	136,53
1900.....	499,255	470,684
1901.....	705,503	709,474
1902.....	833,538	829,294
1903.....	855,627	856,097
1904.....	898,469	909,246

Act No. 520 of the Philippine Commission, under authority contained in the act of Congress of March 8, 1902, permitted strictly foreign vessels to engage in the Philippine coastwise trade under special licenses until July 1, 1904. Up to December 31, 1903, twenty of these licenses had been issued to foreign vessels, but on January 1, 1904, only fourteen of them were operating. These vessels ranged from 4 to 618 tons. Although the act of Congress approved April 15, 1904, gave the Philippine Commission power to extend the privilege referred to beyond July 1, 1904, the findings of the committee appointed by the civil governor on December 8, 1903, led to the recommendation that no more licenses be issued foreign vessels after the expiration of those already granted under the terms of act 520. As the aggregate tonnage of such vessels amounted to but little more than 2,000 tons, it is believed that the influence of their removal and the elimination thereby of a source of complaint on the ground of interference with the business of local shipping will be more beneficial than otherwise.

On the whole, statistics show a continued increase in the number and tonnage of vessels available to carry on trade between ports of the archipelago; and in concluding this subject I have only to renew my suggestion in regard to the registry of such craft—that all vessels licensed by the collector of customs to a certain date and operating in the interisland trade under the American flag shall be made eligible to United States registry, and thereafter admit only such as are built in the United States or in the Philippine Islands.

OCEAN CARRYING TRADE.

The figures on the carrying trade for the fiscal year 1904, as compared with previous years, show a decided increase in the volume of business done under the American flag. Including gold and silver, the total importations into the islands during 1904 aggregated \$34,303,480, of which amount \$2,101,234, or 6 per cent, was delivered in American vessels, this being an increase from \$738,712, or 2 per cent, of the total in 1903. British vessels carried \$16,358,774, an increase of more than \$2,000,000 over 1902; German, \$6,572,958; Spanish, \$4,879,778; Norwegian, \$1,218,238, and all other flags, \$3,172,498. Of the \$34,411,623 worth of exports shipped in 1904, \$3,250,315 left the islands under the American flag, an increase of \$2,584,815 over 1903; British vessels took \$23,945,645.

Of the \$4,843,616 worth of merchandise and coin received from the United States at Philippine ports during the fiscal year 1904, \$703,125 was carried in American bottoms.

Exports to this country aggregated \$11,102,860, all but \$2,906,169 leaving in foreign vessels.

The shipping movement in American bottoms during the past two years shows the entrance and clearance at the port of Manila with cargoes from and for the United States markets to be as follows:

	1903.		1904.	
	Number.	Tonnage.	Number.	Tonnage.
Entered.....	25	57,583	27	92,824
Cleared.....	15	44,405	21	67,595

The statistics given below as to foreign shipping tonnage engaged in the commerce of the islands for a number of years may prove of interest. The annual average during American administration has been 1,025,518 tons entered and 1,025,446 cleared from ports of the islands, a healthy showing when compared with the record for former years, the average for the period 1885 to 1894 being but 326,672 tons entered and 335,127 tons cleared. This increase in tonnage movement is clearly shown, the figures relating to the former administration being obtained from statistics published by the Spanish Government, while those for the last six years are according to returns of the present customs service of the islands.

The number of vessels and the amount of tonnage during any one of the last five years are unequaled by corresponding figures pertaining to yearly periods of Spanish administration for which statistics are available.

Foreign shipping tonnage, by five-year periods, 1885 to 1894.

Years.	Entered.		Cleared.	
	Number.	Tonnage.	Number.	Tonnage.

Total.....	4,693	6,159,107	4,530	6,152,677
Annual average six years, 1899 to 1904.....	782	1,026,518	755	1,025,446

IMMIGRATION.

The official returns on immigration into the Philippines for the fiscal year 1904 show the arrival of 27,988 immigrants, an increase of 3,852 over the number entering the islands during the previous year. According to nationality 13,151 were Americans, 9,098 Chinese, 2,770 Japanese, 941 Filipinos, 688 Spaniards, 409 English, and 940 all others. The increase in American immigration over last year is approximately 20 per cent. Of the 15,355 immigrants entering the islands for the first time, practically three-fourths came direct from the United States to engage in different professions and trades; most of them did not specify the nature of their occupation, but among those who did were 333 teachers, 117 engineers, 50 physicians, 47 clergymen, 33 lawyers, 406 clerks and accountants, 186 merchant dealers and grocers, 58 mariners, and 18 miners. Many of the above were through civil-service appointments from the United States.

Of the 9,098 Chinese going into the islands, more than 8,000 possessed certificates entitling them to readmission within a certain period. The remainder of those who entered for the first time were admitted under the exemption clause of the Chinese-exclusion act and include, among others, persons belonging to any learned profession.

The insular authorities have had considerable difficulty in enforcing the registration act, in that the Chinese themselves have not been favorable to it nor has local sentiment been favorable to the detection of unregistered Chinese. The period of registration expired April 29, 1904, having run the full two years allowed by the original act of Congress, at which date 49,659 certificates of residence had been approved and about 20 Chinese were subject to deportation in accordance with the provisions of the act, although the record is not yet complete.

PHILIPPINE EXPOSITION AT THE WORLD'S FAIR, ST. LOUIS.

The Philippine exposition (for such it is rather than an exhibit) has been acknowledged by all who have visited the great World's Fair to be the most interesting feature of the Louisiana Purchase Exposition. Its purpose and the law authorizing the same were set forth in last year's report.

It covers some 50 acres of ground, upon which have been erected about 100 buildings, and nearly 1,300 natives of the Philippines have been on the ground. For this purpose the total appropriation made by the Philippine government was \$946,302.36, in addition to which was the approximate sum of \$200,000 allotted by the Louisiana Purchase Exposition Company. In round numbers, to establish, maintain, break up, distribute, and return to Manila the Philippine exposition will cost some \$1,500,000. The revenues or receipts will be some \$500,000. The probable net cost to the Philippine government will be \$1,000,000.

Some 70,000 exhibits have been contributed by 10,000 exhibitors. They represent manufactured goods, fine arts, agriculture, game and fish, Philippine woods, and educational exhibits. The exhibits and native building material collected in the Philippine Islands and brought 10,000 miles to St. Louis, weighed some 10,000 tons. It was a tremendous undertaking, and the cost of the same has been a great burden upon the Philippine government. The work was under

charge of a board of three members, representing the Philippine government, who look to this Bureau, under the Secretary of War, for guidance and determination of a thousand and one questions requiring the action of higher authority.

The expenditure of this large sum of money, together with the collection and disbursement of funds derived from the exposition, concessions, per cent on sales and gate receipts, has therefore been under the final direction of this Bureau, as the representative of the Philippine government. The work has been absorbing.

Every precaution possible to insure the honest collection and disbursement of public moneys has been taken. The vouchers and accounts for all Philippine funds go to the auditor for the Philippine Islands for final audit, under as comprehensive a system as exists in any country. The funds contributed by the Louisiana Purchase Exposition Company were paid by a disbursing agent of the United States Treasury Department on vouchers approved by the Philippine Exposition Board, and were then filed in the United States Treasury Department for audit by United States auditors. To prevent duplicate payments from these two funds, a large force of clerks from this office copied every voucher relating to these expenditures and transmitted them to the Philippine Islands.

In addition several inspections have been made by the expert accountants of this Bureau and the results of the same reported to the Secretary of War and to the Philippine Commission. I have personally made, under orders of the Secretary of War, some six visits to St. Louis to hasten a completion of the work, to coordinate and organize the establishment and maintenance, and to help work out an accounting system, and to make every retrenchment possible in expenses. Monthly maintenance expenses have been reduced from over \$100,000 at the commencement of the exposition to less than \$40,000 at its termination. In spite of all these precautions, there have been minor peculations, which fortunately were detected and the guilty parties punished and removed.

The primary object of this exposition, as has been said, was to acquaint the people of the United States with the Philippine Islands. The fullest obtainable data relating to the history, ethnology, resources—in fact everything pertaining to the islands, is there collected, collated, and made available to the student and to the investigator. Anyone desiring to know the truth about the Philippines can inform himself by a visit to this Philippine exposition.

It has been an awful task, and has cost much money, but I believe it all worth while. It has excited the serious interest of individuals and collective American capital. A few investments that will tend to bring much closer the commercial relations between the United States and the Philippine Islands have already been made, largely, I think, induced by what was shown at this exposition, and there is much promise of large investments to follow.

Even from a commercial standpoint, it is believed the Philippine Commission will feel itself justified in spending the money that it did not anticipate was necessary to do what has been done. A full and detailed report has already been made to the Secretary of War on this subject.

This brief mention of the Philippine exposition would not be complete without a reference to the efficient labors performed by Mr.

A. L. Lawshe, the auditor for the Philippine Islands, in perfecting an administrative reorganization, and an ordered retrenchment of the cost of maintenance of the exhibit. Mr. Lawshe, at the request of the Philippine government, sacrificed a portion of the leave of absence granted to him after extended Philippine service, in order to take up this work in which he has been eminently successful.

VISIT OF THE HONORARY BOARD OF FILIPINO COMMISSIONERS TO THE
WORLD'S FAIR AT ST. LOUIS.

The opportunity offered by reason of the extensive participation of the government of the Philippine Islands at the World's Fair in St. Louis suggested to the Philippine Commission the wisdom of sending as large a representation as practicable of prominent Filipinos.

The consideration of this matter resulted in legislation creating a board of honorary commissioners of 50 Filipinos. The sum of \$75,000 was appropriated for the payment of traveling expenses, to enable the honorary commissioners to visit such cities in the United States as might be selected, and to meet the expense of a month's stay at the World's Fair in St. Louis. In this way this honorary commission, composed of men prominent in professional and commercial pursuits and selected from the different provinces throughout the islands, might become acquainted with this country and its institutions, meet the people and the prominent professional and commercial element of this country and at the same time afford an opportunity for the people of the United States to become acquainted with these representative men from the Philippine Islands.

Furthermore, in making the great ethnographical exhibit of the Philippine Islands at St. Louis, the civilized population was represented by the military organizations of 450 scouts and 300 constabulary, the Visayans in village life, and certain of the Filipino officials connected with the exposition. It was also considered essential, in order to make a true ethnological exhibit, that representatives of the various wild or non-Christian tribes should be represented. The attention which was liable to be attracted to these strange and wild tribes it was feared might overshadow, or at least receive undue consideration based on the proportion of the population of the Philippine Islands which they represented, and thereby create a false impression of the intelligence and habits of the Filipino people as a whole. This consideration was a further reason for the visit of the honorary commission, which visit was peculiarly fortunate for this reason in addition to other resultant benefits.

The appropriation of \$75,000 was manifestly insufficient to permit of any extensive trip throughout the United States, and therefore, despite the special transportation rates which this Bureau secured, it was only possible for this commission to visit such cities as would receive them as guests.

With this in view, and bearing in mind the fact that the commission was obligated to be in Manila within five months of the date of its departure, a suggested itinerary was prepared. It soon developed that it was only necessary to fully present the facts to the cities selected, whereupon, after a meeting of the commercial organizations and city officials with men of prominence, a formal invitation to the board to be their guests was extended. This was followed by much

correspondence in the arrangement of all the necessary details for a successful visit.

The honorary board was in charge of the executive secretary of the Philippine Islands, accompanied by an American disbursing officer. It sailed from Manila on the Pacific Mail steamship *Siberia*, April 23, visiting Japanese ports and Honolulu en route, where they were fittingly entertained, and arrived in San Francisco May 27. Upon arrival in that city the suggested itinerary and plans for the stay of this honorary commission in the United States was presented to that body, which expressed its approbation of the arrangements made and which were subsequently successfully carried out.

The board remained in San Francisco until the morning of June 1, during which time they were elaborately entertained, and then they left for Fort Leavenworth, Kans., being the guests of the commanding general and his officers at that post, thereby affording an opportunity to see a well-appointed garrison.

They next visited Cincinnati where they were entertained by the city, and especially by some of its prominent citizens. In Washington they were the guests of the President at luncheon, followed by a card reception, and were also given an elaborate reception in the rooms of the Army and Navy Club by a temporary organization composed of army and navy officials who had served in the Philippines. Meantime the Business Men's Association and the Board of Trade of Washington cooperated in showing them the various points of interest, and the Navy Department carried the party to Mount Vernon on board one of its cruisers.

After a two days' stop-over in Philadelphia, the party reached West Point and attended the graduation exercises of the Military Academy in company with the Secretary of War.

The feature of the three-days' stay in New York was a banquet extended them by the New York Chamber of Commerce. After leaving New York the commission visited the cities of Bridgeport, Fall River, Boston, Lynn, Buffalo, Pittsburg, Cleveland, Detroit, and Chicago, in each of which a stay of from two to three days was made, reaching St. Louis on July 14.

The visits to these various cities were, without exception, characterized by elaborate preparations for their entertainment and hospitable treatment. The untiring efforts for their reception and entertainment was much appreciated by all, and the only complaint the board had to make was that they were almost killed by kindness.

The Secretary of War directed that several officers of the Army and members of the force of this Bureau, who were personally known to many members of the board and who had a speaking knowledge of Spanish, should accompany them, and they did everything possible toward making the trip a success. This was especially true of Lieutenants Van Voorhis and Young, who accompanied the commission from Leavenworth around the circle and back to St. Louis. They were untiring in the performance of the duties assigned them.

A month was spent at the St. Louis fair in their official capacity as commissioners, and advantage was taken of their presence by dividing them up as jurors of awards to the various classes of exhibits in the Philippine exposition, for which they were especially qualified and fitted. In this capacity they rendered excellent service. They were much impressed with what they saw, and expressed pardonable pride

in what had been accomplished in the representation of the Philippine Islands.

On August 16 the party left St. Louis for the Pacific coast to become the guests of Seattle and Portland, and then proceeded to San Francisco, where they arrived on August 23. After several days of much-needed rest in that city the honorary board sailed for Manila on the Pacific Mail steamship *Manchuria* August 30, with many regrets that their stay in this country could not have been longer.

Their visit was worth while, and of much good.

FILIPINO STUDENTS IN THE UNITED STATES.

In the last annual report mention is made and the Philippine law quoted relating to the education of Philippine government students in the United States and appropriating moneys for that purpose.

At present there are in the United States 112 Philippine students and 28 on the way to this country. These students have been entered in the following educational institutions:

Cincinnati University, Cincinnati, Ohio.
 Columbia University, Portland, Oreg.
 Cornell University, Ithaca, N. Y.
 Dixon Business College, Dixon, Ill.
 Drexel Institute, Philadelphia, Pa.
 Eastman Business College, Poughkeepsie, N. Y.
 Georgetown University, Washington, D. C.
 High School, Ann Arbor, Mich.
 Holy Cross College, Worcester, Mass.
 James Milliken University, Decatur, Ill.
 Manual Training High School, Indianapolis, Ind.
 Massachusetts Institute of Technology, Boston, Mass.
 Notre Dame University, Notre Dame, Ind.
 Oberlin Academy, Oberlin, Ohio.
 Pennsylvania School of Art and Design, Philadelphia, Pa.
 Purdue University, Lafayette, Ind.
 Sacred Heart College, Watertown, Wis.
 Santa Clara College, Santa Clara, Cal.
 St. Edwards College, Austin, Tex.
 St. Johns College, Fordham, N. Y.
 State Agricultural College, Ames, Iowa.
 State Agricultural College, Lansing, Mich.
 State Normal School, Dekalb, Ill.
 State Normal School, Normal, Ill.
 State Normal School, Trenton, N. J.
 State Normal School, Oswego, N. Y.
 State Normal School, West Chester, Pa.
 State University, Bloomington, Ind.
 State University, Columbia, Mo.
 State University, Knoxville, Tenn.
 Villa Nova College, Philadelphia, Pa.

Wherever practicable the student's predilection has been considered in the choice of courses, which is summed up in the following subjects: In law 8, medicine 6, art 2, normal courses 30, domestic science 2, commercial courses 10, engineering 27, agriculture 18, lithography 1, architecture 1, and general courses 7.

There are two young women among this lot, who stood at the head of some 375 in a recent competitive examination in the Philippines, and three more are en route.

These students were selected from those most advanced in fair proportion from the various provinces of the Philippine Islands, after

exhaustive examinations not only as to their educational qualifications but as to their moral and physical fitness.

A high standard was set for these students, but the difficulty was that their basic education, through the shortness of the time that they had been under the advantage of American control of the schools, had not generally been thorough or advanced enough to prepare them properly to enter university courses upon arrival in this country.

Hence under the requirements of the law allowing but four years' stay in the United States, it became necessary to give them the greatest advantages possible in that short time. This difficulty will improve year by year as American methods assert themselves, and it is only reasonable to believe that in a short time the lads will come to this country well fitted to take up university courses upon arrival.

The first lot of 100 arrived in San Francisco November 9, 1903. They were placed in schools throughout southern California on account of the favorable winter climate of that locality, with the intention in the following year to bring them East in a body that they might visit the World's Fair and afterwards be distributed throughout the eastern part of the United States.

This plan permitted of their distribution throughout the schools of the United States and made it possible without any appropriation additional to their regular allowance for them to spend a month at the World's Fair. This allowance is but \$500 a year and covers all expenses of education and maintenance, including such spending money as is allowed to students each month. It would not have been possible without exhausting this allowance to have allowed these lads to visit the World's Fair, which so contributed to their general information, and return again to the West.

It has been thought best, wherever practicable, to place these students in nice American families, where they would grow up as American lads, and where they would have the influences of the American home and be taken care of in the vacation as well as in the scholastic year.

When institutions located in small towns were found that offered suitable courses, they were selected in preference to those in larger cities. It was also thought wise to separate these lads, so that they might more rapidly improve in the English language and not clannishly associate with one another.

Their stay in California was entirely satisfactory. They all lived in private American families who had not taken boarders before and made an excellent impression. The families liked them and were sorry when they left and offered to take any others that might be brought to that section. The boys were earnest in their studies and made definite progress. The only serious complaint was that they devoted too much time to their studies and too little to outdoor exercises.

They were brought East and remained with the Philippine exposition at the World's Fair for the month of August. They all spoke English and volunteered to act as guides and hosts in the various Philippine government buildings, explaining the exhibits and the life and customs of the Philippines to the public.

At the commencement of the scholastic year they were distributed to the various schools in which they had been previously entered.

These schools had been selected according to the special courses

that they promised and according to each boy's qualifications and professional or business aspirations.

In the placing of students in the various educational institutions certain complaint was made to the Department that sufficient care had not been taken by the Philippine government in insuring to these students the same religious influences that surrounded them at home and that should be continued to them here. The Secretary of War directed that the parents and guardians of all pupils appointed by the civil governor of the Philippines, where they are under 21, or the pupils themselves, if adults, should be consulted as to the religious faith of the pupil and whether he attend a denominational institution, or if the branch of study to be pursued prevent the use of a denominational school, then he should be consulted as to whether or not he desires to be placed in a family having any particular religious faith, and that the wishes of the parent, guardian, or student should govern as far as practicable as to denominational schools and in all cases as to home influences, the position of the Department being expressed as follows:

In a system of public instruction in which the pupils are only in the school for a few hours during the day and are still subject completely to the moral and religious teaching of their parents and their home church the government may properly decline the responsibility for the religious education of the pupils, but when the government takes pupils from their homes into a new and strange country it can not properly rid itself of responsibility for the continuance of the same moral and religious surroundings that its wards had at home.

The results so far obtained at the completion of the first year of the first hundred Filipino students' stay in this country indicate the wisdom of the Philippine government's philanthropic experiment. Every promise is given that the great majority of these students appreciate the opportunities offered and will go back and spend the four years in the Philippine government service required by their contract agreement, devoting themselves then and thereafter to the best interests of the government, and exercising an enlightening influence upon their countrymen, which it is hoped will tend to the development of an intelligent public opinion.

CAPTURED INSURGENT DOCUMENTS.

Mention was made in the report of last year of a division of work in this Bureau on some 200,000 documents which were captured at different times from the insurgents in the Philippines. A scheme for their publication in five volumes was also submitted, which gained the approval of the former Secretary of War, the estimated cost of which was some \$15,000. During the past year the work of examining and arranging the papers of the Filipino insurgent leaders has been continued with a view to their reference and also to their subsequent publication.

They have all been examined and have been arranged so that those of interest—about 16,000—may be quickly referred to. These papers are in Spanish and in native languages; many of them are in bad condition, as the ink is fading and the paper originally of very poor quality.

I renew my recommendation that authority be granted for their publication. They form the material and the only material from which that chapter of the history of the United States can be written. These papers comprise many of the orders and decrees of the govern-

ment established by Emilio Aguinaldo, and they must be consulted by anyone desiring to ascertain what that government really was; and these papers compose the largest mass of data extant upon the methods, the hopes, and the aspirations of the insurgent leaders. They show what they did and what they did not do. They give a measure of their capacity for government, and in view of the completion of the Philippine census it would be well that these papers should be rendered available to readers.

These documents were captured in many different places and were selected from a great mass of similar papers by officers who had to act in haste, and who were in many cases imperfectly acquainted with the language in which they were written. It is therefore natural that there should be breaks in the continuity of the record. By publishing them now, at a time when the memory of the conditions under which they were written is still fresh, introductory notes can be added which will enable the reader who is not acquainted with the subject to ascertain those conditions. If it is delayed that knowledge will disappear, and these papers taken by themselves, without such introductory notes, would be blind.

The purpose of their publication should be to give a true picture of the Filipino insurgent government as a whole, and not in any one of its departments. It will be necessary to publish papers of many different classes; papers showing how the war was conducted; papers showing how taxes were laid and collected, and how provincial and municipal governments were conducted.

To do this it is recommended that they be published as exhibits to a narrative of the events to which they relate. Only in this manner can they be properly coordinated. Two volumes of this publication are completed, arranged, and ready for the printer.

RECEIPTS AND EXPENDITURES IN THE PHILIPPINE ISLANDS.

Compilations, in detail, of receipts and expenditures, and all other financial transactions, with resulting several balances, showing the fiscal affairs of the Philippine government from the date of American occupation, accumulatively to the current period, have been continued.

The accounting system in the Philippine Islands, built upon experience there and in Cuba and Porto Rico, in which United States accounting methods were followed as far as practicable and adequate, has been faithfully and intelligently applied. A serious problem with accounting officers was the proper adjustment of all accounts concerned with Mexican money, the currency which predominated until July 1, 1903, when it was replaced by the new Philippines currency, authorized by the Congress and the Philippine Commission. It had been determined that a single currency expression in accounting did not properly protect the government. The audit of accounts was made in respective currencies. The benefit of this method was at once apparent, as it prevented the indiscriminate, unauthorized exchange of currencies by officers handling the government's funds.

When the ratio of exchange between Mexican and United States currency was favorable to the scheme, unauthorized exchanges of currency were made without any gain to the insular government, and when the collecting and disbursing officials could show a legitimate loss in the United States values of funds held during a period of

shrinkage, it was the natural tendency to claim credit for this loss. To the amplified accounting system, therefore, is due the saving from further loss in this wise. These problems have been increased by the necessity for comprehending the Philippines currency along with United States and Spanish-Filipino currency, all of which moneys were legal tender in the islands during the past year.

July 1, 1903, the Philippines currency became the legal preferable expression of all values in the islands. The proper adjustment of the accounting system and of open running accounts to the new Philippines currency has been accomplished.

In order that this Bureau might prepare statements of the fiscal affairs of the islands in such manner as to meet the requirements of Congress and others interested, as well as for publication when desirable, the auditor of the Philippines was called upon to furnish detailed abstracts to accompany each and every account settled. It is a tribute to the system that two offices—that of the auditor in preparing compilations to meet the needs of the Commission and the various bureaus at Manila, and this Bureau in meeting inquiries in this country—have reached the same results in compilations where more than 5,000 separate certificates of settlements of accounts have been the basis of the respective reports. The system of bookkeeping in vogue at Manila permits the auditor to draw monthly balances of all accounts in the islands, making the revenue and expense tables no longer statistical compilations, but actual ledger accounts. Such a comprehensive and complete system of accounting is not often undertaken, and yet is so simple withal that the force engaged in the bookkeeping work is less by one-half than it was under the single-entry system of accounting.

A condensed statement follows of revenues and expenditures of all funds from the date of American occupation, expressed in United States currency value, showing audited figures, except for the last fiscal year, which are estimated upon the basis of the treasury transactions and such certificates of settlement by the auditor as are now at hand:

Revenues.	1899.	1900.	1901.	Total to 1901.

Under the law three-tenths (30 per cent) of the expenses of the city of Manila are borne by the insular government.

The accounting officers of the insular government undertake to show a properly authenticated voucher for every dollar collected and expended and stated balances for the difference between the receipts and disbursements of government funds.

During the fiscal year 1904 the insular government contributed to the support of the provincial governments to the amount of \$123,452.03, besides ceding to provinces the amount of all taxes collected for timber cut in the several provinces, after deducting pro rata the expense of the insular forestry bureau, the refund amounting to \$140,642.05 during the fiscal year 1904. The sum of \$100,942.50 was loaned to provinces, and under authority of act 799 the sum of \$7,824.25 was advanced to provinces to reimburse losses from defalcation or other wrongful acts of officials, pending settlement by the bond companies, when the sums were returned to the insular government.

Under the authority of act of Congress March 8, 1902, refundable customs export duties were collected during the year to the amount of \$426,916.73, and the sum of \$502,173.99 was refunded for this account. Ordinary customs duties were refunded to the amount of \$37,616.50.

The following statement shows the consolidation account current of the treasurer of the Philippine Islands for the fiscal year ended June 30, 1904, expressed in United States currency values at 2 for 1 for Philippines currency, and at the respective ratios prevailing at the close of several months during the year for Mexican and Spanish-Filipino currency:

Treasurer's actual cash balance July 1, 1903.....	{ P 3,209,000.00
Less overdraft in Mexican currency.....	{ \$9,253,803.09
	Pfs. 539,269.39

Equals expressed in United States currency..... \$10,627,219.32

Unpaid warrants outstanding.....	35, 466. 09
Total.....	16, 765, 861. 35
Less, general fund, amount appropriated in excess of available funds in treasury.....	270, 299. 76
Net total.....	<hr/> 16, 495, 561. 59

From the date of American occupation to June 30, 1903, there was a total net loss to the insular government by exchanges of currency and fluctuations in ratios of exchange of \$1,294,088.97 United States currency value. The aggregate revenues of the Philippine Islands from the date of American occupation to June 30, 1903, were \$48,228,939.41; so that the loss on account of the unstable currency was nearly 3 per cent of the total gross revenues. A gain of \$16,890.03 on the increased value of funds in the hands of the treasurer is noted for the fiscal year 1904.

No better argument in justification of the establishment of the new currency system for the islands can be advanced than the future saving from loss in this way.

A condensed statement of the gold-standard fund to June 30, 1904, expressed in United States currency value, is as follows:

Proceeds of bonds issued.....	\$9, 178, 020. 00
Philippines currency (metal) deposited (P 19,841,338.56).....	9, 920, 669. 28
Premium on transfer drafts and interest on deposits.....	34, 861. 61
	<hr/> 19, 133, 550. 89
Purchase of bullion and other expenses.....	8, 034, 567. 35
Spanish-Filipino coins for recoinage (Pfs. 7,686,000).....	3, 437, 188. 07
Retirement of first series of bonds.....	3, 000, 000. 00
Balance in treasury to the credit of the fund.....	4, 631, 795. 47
	<hr/> 19, 133, 550. 89

Greater accuracy in stated results has been achieved by the method of keeping so-called reimbursement accounts. The former custom was to treat all receipts as revenues, whether initial collections or redeposits at the treasury of the unexpended balances of appropriated moneys, or receipts from sales of supplies and other repayments. The auditor of the Philippine government, with the concurrence of the civil governor first had, and in pursuance of authority granted by Act 90 of the Philippine Commission, adopted a plan on July 1, 1903, for stating all the reimbursable appropriations as separate accounts, thus preventing inflation of revenue and expense accounts. The appropriations for the purchase of supplies are reimbursed by the amount of all sums deposited as proceeds of sales of supplies, whether made by the purchasing agent, constabulary, or other supply officers, and the proceeds of sales of rice and carabaos, distributed under the arrangement for relief of distress in the islands, are likewise returned to the appropriations furnishing the purchase money. The result of this is that the expense account is not charged with these investments, nor is the revenue account inflated by the returns.

At the request of the Auditor for the Philippine Islands, the chief accountant of this Bureau was sent to Manila last year, reporting there on May 1, 1903, and returning to his duties in this Bureau on August 1, 1904.

Under the direction of the Auditor for the Philippine Islands, new books were opened, providing a double-entry system for all accounts, including appropriations, the gold-standard fund, and the so-called statistical accounts, comprehending revenues and expenditures of all funds. Commenting upon the system recently the Auditor states:

We are now able to draw monthly balance sheets of all accounts, showing the status of the treasurer's account, other personal accounts, revenues, appropriations, and expenditures of all the funds controlled.

This chief accountant was appointed deputy insular auditor during his visit to the Philippines and sent to the Moro Province at the time of its organization to cooperate with the authorities there in creating an accounting system for that province which would meet the demands of the provincial officers and not be inconsistent with insular accounting methods. This work was accomplished with the approval of the governor of the province, and the system has been continued.

The bookkeeping and disbursing division of the bureau of the insular purchasing agent at Manila was also reorganized. The work of this bureau has been highly commended by the insular authorities.

Reports and certificates now made by the Auditor have been very comprehensive, and a great saving of correspondence and time needed for compilation has been accomplished.

LAW OFFICER.

The work of this valuable adjunct to the Bureau has continued with the same volume and interest as in previous years along the lines set forth in my last annual report. The progress of the work performed by the Bureau in connection with the purchase of supplies for the government of the Philippine Islands; the preparation, transportation, and installation of the Philippine exhibit at the Louisiana Purchase Exposition, and the ordinary routine work of the Bureau

Reports and certificates now made by the Auditor have been very comprehensive, and a great saving of correspondence and time needed for compilation has been accomplished.

LAW OFFICER.

The work of this valuable adjunct to the Bureau has continued with the same volume and interest as in previous years along the lines set forth in my last annual report. The progress of the work performed by the Bureau in connection with the purchase of supplies for the government of the Philippine Islands; the preparation, transportation, and installation of the Philippine exhibit at the Louisiana Purchase Exposition, and the ordinary routine work of the Bureau

developed many questions of law which required the consideration of the law officer.

The decisions of the courts in the United States and in the Philippine Islands have settled many of the general questions of a controversial nature, and reaffirmed general principles, that while old to us were new to the Philippines in that they were for the first time to be applied to those islands and people. The trend of events, the logic of accomplished facts, have decided in most instances as to the manner and method of applying these general principles of government where discretion was vested in the Federal authorities. As to many other questions, the rule has been established by the action of the Secretary of War and others having authority to deal with administrative questions. The precedents so made have relieved the law officer of much labor in that field, but new questions and unprecedented situations are continually arising, involving, however, special rather than general propositions.

At the time of my last report there were a number of cases pending in the United States Court of Claims and in circuit courts of the United States wherein claimants sought to recover import and export duties exacted by the military government of the Philippine Islands on commerce passing between ports in the States of the Union and the Philippine Archipelago during the time elapsing between December 10, 1898 (the date the treaty of peace was signed), and March 8, 1902, the date of the passage of the act of Congress entitled "An act temporarily to provide revenue for the Philippine Islands." The amount collected by the Philippine government on imports from the United States during this period aggregated approximately \$2,491,037.

The treaty of peace with Spain provided that for the period of ten years Spanish goods were to enter the ports of the Philippines upon the same terms and conditions as goods from the United States. The amount collected by the government of the Philippine Islands on Spanish goods coming into the islands during the period above mentioned aggregated approximately \$2,347,089, making a total of \$4,838,126.

A test case was made of the cause entitled *Warner, Barnes & Co. v. The United States*. At the request of the Department of Justice the law officer of this Bureau prepared a brief in support of the proposition that the collection of said customs duties during said period of time was justified (1) as an exercise of the lawful authority of the President, as commander in chief, to impose conditions upon the privilege of engaging in trade with territory subject to military occupancy by the military forces of the United States; (2) as an exercise of the lawful authority of the military government of territory subject to military occupancy to secure revenue to provide funds for defraying the expense of the administration of the affairs of civil government in the territory so occupied; (3) as an exercise of the legislative powers of the United States, authorized, ratified, and confirmed by the Congress of the United States. A copy of said brief is transmitted herewith.

This test case was argued by Assistant Attorney-General Pradt and the law officer of this Bureau at the January, 1904, term of the United States Court of Claims. The judgment of the court was rendered on May 5, 1904, and sustained the levy and collection of said duties

as being a lawful exercise of military authority in territory wherein prevailed the conditions of war. A copy of said opinion is herewith transmitted.

The brief prepared in this Bureau, in addition to a full discussion of the legal questions involved, contains a comprehensive review of the historical facts relating to the military operations of the Army, the administration of the military government, and the establishment of civil government of the Philippine Islands.

By order of the President, dated May 9, 1904, the Isthmian Canal Commission and the affairs subject to their jurisdiction were placed under the direction and control of the Secretary of War. By direction of the Secretary the law officer of this Bureau was assigned the work of acting as the legal adviser for that Commission, and on July 1, 1904, he was appointed general counsel for the Isthmian Canal Commission and given an indefinite leave of absence without pay, although he continues to render service to this Bureau. With reference to isthmian affairs the law officer has filed four important reports of general interest on the following subjects:

A review of the several constitutions proclaimed and recognized in New Granada, United States of Colombia, and Panama, and the causes leading to the establishment and abrogation of said constitutions; a review of the treaty between the United States of America and the Republic of New Granada, dated October 3, 1846, and the policy and purposes of the United States with reference to the Panama Canal, as shown by state papers and administrative action; a review of the treaty between the United States and the Republic of Panama, dated November 18, 1903; report on the right of the United States to exercise sovereign powers in the Canal Zone, Isthmus of Panama.

Since my last annual report the law officer of this Bureau has filed twenty-eight written opinions on matters connected with insular affairs. Attention is called to the fact that there are now on file in this Bureau a sufficient number of reports by the law officer to make a second volume, similar in character to the one already published bearing the title "The Law of Civil Government under Military Occupation," and I suggest the publication of said reports in book form.

PUBLICATIONS.

"LIBRARY OF INSULAR DOCUMENTS."

In last year's report attention was directed to a compilation of public documents issued by the Government since before the outbreak of the Spanish war to date relative to Cuba, Porto Rico, the Philippines, and other insular possessions. These documents were collected from every known and available source. They include Congressional documents and publications issued by the various Executive Departments of the Government as well as the insular governments. They have been bound together in volumes of convenient size to the number of 215, containing approximately a quarter of a million pages. That these voluminous publications might be consulted with advantage, an index was prepared containing over 13,000 references. The references in the index are not only to the compilation by volume and page, but to the identifying designations of Congressional and Executive

documents, reports, and hearings, together with the page numbers therein.

Specimen pages of this index were transmitted to Congress March 8, 1904, by the Secretary of War with the following remarks:

I believe that if this index could be printed it would be peculiarly valuable to Members of Congress as well as to Government officials, to the libraries, and to the public, and thereby make available the information contained for that period in the terra incognita of public documents.

I would therefore recommend that a concurrent resolution providing for the printing of this index be introduced, as the purposes which such publications would fulfill would hardly warrant that the expense should be borne by the small allotment for printing to the War Department.

In accordance with this recommendation the United States Senate, on March 17, 1904, passed the following concurrent resolution:

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound five hundred copies of the index to the documents now compiled in the War Department relating to affairs in Cuba, Porto Rico, the Philippines, and other insular possessions of the United States for the use of the War Department.

Owing to the shortness of the session the resolution is awaiting the concurrence of the House. The index is still in typewriting.

The compilation is still going on as publications come from the press.

"COMPILATION OF ACTS, TREATIES, AND PROCLAMATIONS."

The compilation of acts of Congress, treaties, and proclamations relating to insular and military affairs from March 4, 1897, to March 3, 1903, has been completed, indexed, and published as Senate Document No. 105, Fifty-eighth Congress, second session, and gives in convenient form all insular legislation subsequent to the outbreak of the Spanish-American war. It is a convenient and valuable reference book.

"ESTABLISHMENT OF FREE GOVERNMENT IN CUBA."

In order to meet inquiries respecting the military government of Cuba, a brief compilation of 30 pages was prepared, setting forth in detail the documentary history of the inauguration of the Cuban Republic, and also a brief but comprehensive review of the administration of the government of intervention in Cuba under military occupation.

The same was transmitted to the Senate and printed by it as a Senate document.

"GAZETTEER."

The Gazetteer of the Philippine Islands, of which two editions have been exhausted, has been revised and brought down to date, to include all available data secured both from the forthcoming census and other official sources. This Gazetteer has been in great demand. All that was claimed of it when printed was that it furnished the best then existing available information and formed a basis upon which a second edition could be made a valuable and accurate work.

That accurate work is now ready for publication. I recommend that Congress, by similar resolution that resulted in its first publication, authorize a revised edition.

“WHAT HAS BEEN DONE IN THE PHILIPPINES.”

The Bureau was daily in receipt of many inquiries asking what had been done in the Philippine Islands, what it cost the United States to maintain the government of the islands, and it became evident that the general public was not aware of the fact that the civil government of the islands was maintained by its own revenues and not by the moneys of the United States. Inquiries also indicated the ignorance of the fact that most of the official positions in the islands were occupied by Filipinos, and that the natives participated in the exercise of the powers of all branches of the government. These letters suggested the advisability of a compilation which would present the desired information in form and space adapted to the use of persons interested in the general subject or special phases thereof who lacked time or opportunity to examine all the documents involved. For these reasons the document was prepared, setting forth briefly what has been done in the Philippines. The demand for this publication, which was printed as a Senate document, has been large, and the insular government has ordered a special edition of 2,000 to be forwarded to Manila.

REPORTS OF THE PHILIPPINE COMMISSION.

During the current year the Bureau has performed the work incident to the publication, proof reading, indexing, and distribution of the fourth annual report of the Philippine Commission, for 1903, comprising three volumes; one volume of the acts of the Commission, from act No. 425 to act No. 949, inclusive. To meet the demand for reports of prior years, a compilation of the reports of the Philippine Commission, the civil governor, and the heads of the executive departments of the civil government of the Philippine Islands, from 1900 to 1903, inclusive, without appendices, has been prepared and printed.

CODIFICATION OR REVISION OF SEVERAL OF THE MORE IMPORTANT ENACTMENTS OF THE PHILIPPINE COMMISSION.

Among the early acts of the Philippine Commission were those providing a “civil-service act,” a “provincial-government act,” and the “municipal code.” As the legislation was for the purpose of providing government for a race of people who had been subjected for centuries to a form of government different from ours, the problem presented was a difficult one. These early enactments were of necessity tentative in a measure, and as the conditions cleared up and the effect of the laws in their operation was observed numerous amendments suggested themselves and were enacted from time to time. In order to place such laws and others in a succinct form there has been recently undertaken the codification or revision of the more important. Such provisions as have been repealed are eliminated from the original acts and amendment or addition inserted in their proper places.

In addition, copious notes were made of acts which, although not amendatory in terms, change in a measure the provisions of the original. “The provincial government act,” with such modifications as have been made up to July 1, 1904, is completed, and will be transmitted to the Commission for publication should such action to it be deemed desirable.

documents, reports, and hearings, together with the page numbers therein.

Specimen pages of this index were transmitted to Congress March 8, 1904, by the Secretary of War with the following remarks:

I believe that if this index could be printed it would be peculiarly valuable to Members of Congress as well as to Government officials, to the libraries, and to the public, and thereby make available the information contained for that period in the terra incognita of public documents.

I would therefore recommend that a concurrent resolution providing for the printing of this index be introduced, as the purposes which such publications would fulfill would hardly warrant that the expense should be borne by the small allotment for printing to the War Department.

In accordance with this recommendation the United States Senate, on March 17, 1904, passed the following concurrent resolution:

Resolved by the Senate (the House of Representatives concurring), That there be printed and bound five hundred copies of the index to the documents now compiled in the War Department relating to affairs in Cuba, Porto Rico, the Philippines, and other insular possessions of the United States for the use of the War Department.

Owing to the shortness of the session the resolution is awaiting the concurrence of the House. The index is still in typewriting.

The compilation is still going on as publications come from the press.

“COMPILATION OF ACTS, TREATIES, AND PROCLAMATIONS.”

The compilation of acts of Congress, treaties, and proclamations relating to insular and military affairs from March 4, 1897, to March 3, 1903, has been completed, indexed, and published as Senate Document No. 105, Fifty-eighth Congress, second session, and gives in convenient form all insular legislation subsequent to the outbreak of the Spanish-American war. It is a convenient and valuable reference book.

“ESTABLISHMENT OF FREE GOVERNMENT IN CUBA.”

In order to meet inquiries respecting the military government of Cuba, a brief compilation of 30 pages was prepared, setting forth in detail the documentary history of the inauguration of the Cuban Republic, and also a brief but comprehensive review of the administration of the government of intervention in Cuba under military occupation.

The same was transmitted to the Senate and printed by it as a Senate document.

“GAZETTEER.”

The Gazetteer of the Philippine Islands, of which two editions have been exhausted, has been revised and brought down to date, to include all available data secured both from the forthcoming census and other official sources. This Gazetteer has been in great demand. All that was claimed of it when printed was that it furnished the best then existing available information and formed a basis upon which a second edition could be made a valuable and accurate work.

For these reasons the document was prepared, setting forth briefly what has been done in the Philippines. The demand for this publication, which was printed as a Senate document, has been large, and the insular government has ordered a special edition of 2,000 to be forwarded to Manila.

REPORTS OF THE PHILIPPINE COMMISSION.

During the current year the Bureau has performed the work incident to the publication, proof reading, indexing, and distribution of the fourth annual report of the Philippine Commission, for 1903, comprising three volumes; one volume of the acts of the Commission, from act No. 425 to act No. 949, inclusive. To meet the demand for reports of prior years, a compilation of the reports of the Philippine Commission, the civil governor, and the heads of the executive departments of the civil government of the Philippine Islands, from 1900 to 1903, inclusive, without appendices, has been prepared and printed.

CODIFICATION OR REVISION OF SEVERAL OF THE MORE IMPORTANT ENACTMENTS OF THE PHILIPPINE COMMISSION.

Among the early acts of the Philippine Commission were those providing a “civil-service act,” a “provincial-government act,” and the “municipal code.” As the legislation was for the purpose of providing government for a race of people who had been subjected for centuries to a form of government different from ours, the problem presented was a difficult one. These early enactments were of necessity tentative in a measure, and as the conditions cleared up and the effect of the laws in their operation was observed numerous amendments suggested themselves and were enacted from time to time. In order to place such laws and others in a succinct form there has been recently undertaken the codification or revision of the more important. Such provisions as have been repealed are eliminated from the original acts and amendment or addition inserted in their proper places.

In addition, copious notes were made of acts which, although not amendatory in terms, change in a measure the provisions of the original. “The provincial government act,” with such modifications as have been made up to July 1, 1904, is completed, and will be transmitted to the Commission for publication should such action to it be deemed desirable.

DOCUMENTS.

In addition to the Monthly Summary of Commerce of the Philippine Islands, of which an edition of 2,000 is published, there have been mailed out 40,000 volumes of the various official annual reports of the insular authorities and multitudinous smaller publications, such as Senate and House documents, bulletins, and reports of the various bureaus and departments of the insular government. There is also forwarded to the Philippines copies of all publications issued by the Federal Government.

CUBAN RECORDS.

The Bureau is also charged with the care of civil records of the late military government of Cuba. These records include original papers of all kinds pertaining to the administration of civil affairs, original drafts of important executive orders, contracts, vouchers, paid checks and money orders, customs entries, correspondence, and other official papers and documents.

These records have been deposited in a fireproof building rented under an appropriation by Congress and are contained in 275 cases, distributed as follows:

	Cases.
Auditors' records.....	127
Collector of customs.....	36
Department of Habana.....	11
Department of posts.....	6
Engineer department.....	16
Headquarters.....	42
Miscellaneous.....	20
Treasurers.....	17
Total.....	275

These for the most part are classified and indexed with proper card references, so that the entire record is available.

Continued requests, especially from officials of the Cuban Government, for information relative to the administration of the military government, are received and answered, and certified copies of papers, if proper, are furnished.

These records have proven to be of peculiar value in suits that have been brought against the United States, and original records under the custody of an employee of the Bureau have been forwarded to the courts for use in the trial of the cause.

CORRESPONDENCE AND RECORDS.

The work connected with the correspondence and the records during the past year has been arduous, necessitating much work after office hours.

During the period covered by this report 2,694 telegrams and 347 cablegrams have been sent, and 326 cablegrams received, but it should be stated that this method of communication is only resorted to when necessary. The fixed practice of using mimeograph letters whenever similarity justifies it has been followed. At this time about 45 of such letters and circulars have been and are in current use. Not less than 30,000 letters and 3,000 indorsements have been written, and it is safe to assume that a greater number of communications have been

received; to this should be added the great amount of correspondence which has been carried on by mimeograph letters, and over 800 transportation orders which were issued.

The system of card-index records is used to handle this vast amount of correspondence, one card being allotted to each subject; and this same system is applied to the insular reports, both in print and in manuscript, and claims and acts of the Philippine Commission, as well as to circulars and orders. At this time there are over 13,000 record cards in current use, covered by about 60,000 consolidated index cards. During the year all claims which, if allowed, would be a charge against United States revenues have been withdrawn from the files of this office and sent to the Secretary of War.

ORGANIZATION AND PERSONNEL.

The work of this Bureau, other than that of the law officer, continues to be performed by an organization consisting of the following divisions: Correspondence, records, purchasing and disbursing, compilation and Cuban records, statistics, accounting, and Philippine insurgent captured records.

The present force consists of one law officer, who is also the general counsel for the Isthmian Canal Commission, and a force of 59 clerks and 11 messengers, laborers, and charwomen. With the exception of 2 clerks with compensation at the rate of \$1,800 per annum, performing the duties of chiefs of divisions and paid out of the unexpended balance on July 1, 1904, of \$6,257.28 of the appropriation of \$30,000 for the compilation of a statement of the receipts and expenditures of the Philippine Islands, the present force is specifically provided for and classified by law under the current appropriation for the Executive Departments at Washington. In the submission of estimates for the fiscal year 1906 appropriation has been requested for the existing classified force, and further that the two employees at \$1,800 now paid out of the unexpended balance above mentioned be incorporated in the regular classified force in addition to 2 clerks at \$1,000, the minimum increase necessary to properly perform the duties imposed upon this office, and to, in a measure, avoid the necessity for the continued overtime work which the force has been called upon to perform during the past year to keep abreast of the current work.

Having in mind the declared policy of the Secretary of War that estimates for the personnel should be submitted at the lowest possible minimum this Bureau did not submit estimates which, if enacted into law, would relieve it of a severe drain upon its efficient personnel. The duties of this office partake of such a varied nature that continued service is a most potent factor in its efficiency, and the loss of a clerk who has been trained and schooled in the performance of his work and his substitution by the appointment of a person from the civil service eligible list without such experience is a handicap to the work until such new appointee can acquire that familiarity which only comes from experience with the work. Since the creation of this office a few years ago the official records show that 56 employees, many of them of long experience and thoroughly grounded in insular matters, have separated themselves from the Bureau solely in order to accept appointment at higher salaries in other branches of the Government service.

CONCLUSION.

In concluding this report I desire to acknowledge, with appreciation the kindly cooperation and assistance which this Bureau has received from the representatives of the various departments, bureaus, and offices at Washington, with which its multitudinous duties have necessitated frequent conferences and exchange of correspondence; and to extend my personal thanks to them.

I also desire to make mention of the zeal and fidelity displayed by the force of this Bureau, and its willingness to respond to every call made upon it.

Respectfully submitted.

CLARENCE R. EDWARDS,
Colonel, U. S. Army, Chief of Bureau.

APPENDIX.

[58th Cong., 2d sess. In the Senate of the United States. April 15, 1904. Read twice, placed on the Calendar in lieu of S. 5328, and ordered to be printed.]

AN ACT To amend an Act approved July first, nineteen hundred and two, entitled "An Act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," and to amend an Act approved March eighth, nineteen hundred and two, entitled "An Act temporarily to provide revenue for the Philippine Islands, and for other purposes," and to amend an Act approved March second, nineteen hundred and three, entitled "An Act to establish a standard of value and to provide for a coinage system in the Philippine Islands," and to provide for the more efficient administration of civil government in the Philippine Islands, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all bonds issued by the government of the Philippine Islands, or by its authority, shall be exempt from taxation by the Government of the United States, or by the government of the Philippine Islands or of any political or municipal subdivision thereof, or by any State, or by any county, municipality, or other municipal subdivision of any State or Territory of the United States, or by the District of Columbia.

SEC. 2. That for the purpose of providing funds to construct port and harbor works, bridges, roads, buildings for provincial and municipal schools, court-houses, penal institutions, and other public improvements for the development of the Philippine Islands by the general government thereof, the said government is authorized from time to time to incur indebtedness, borrow money, and to issue and sell therefor (at not less than par value in gold coin of the United States) registered or coupon bonds of such denominations and payable at such time or times, not later than forty years after the date of the approval of this Act, as may be determined by said government, with interest thereon not to exceed four and one-half per centum per annum: *Provided*, That the entire indebtedness of said government created by the authority conferred by this section shall not exceed at any one time the sum of five million dollars: *And provided further*, That the law of said government creating the indebtedness and authorizing the issue of the bonds under this section shall be approved by the President of the United States.

SEC. 3. That section sixty-six of the Act of Congress approved July first, nineteen hundred and two, entitled "An Act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," is hereby amended to read as follows:

"SEC. 66. That for the purpose of providing funds to construct sewers, to furnish adequate sewer and drainage facilities, to secure a sufficient supply of water, and to provide all kinds of municipal betterments and improvements in municipalities, the government of the Philippine Islands, under such limitations, terms, and conditions as

it may prescribe, with the consent and approval of the President of the United States, may authorize and enable, by appropriate legislation, any municipality of said islands to incur indebtedness, borrow money, and to issue and sell (at not less than par value in gold coin of the United States) registered or coupon bonds, in such amount and payable at such time as may be determined by the government of said islands, with interest thereon not to exceed five per centum per annum: *Provided*, That the entire indebtedness of any municipality shall not exceed five per centum of the assessed valuation of the property in said municipality, and any obligation in excess of such limit shall be null and void."

SEC. 4. That for the purpose of aiding in the construction, equipment, operation, and maintenance of railroads, using steam, electricity, or other power, in the Philippine Islands, the general government thereof is authorized to guarantee an income of not exceeding five per centum upon cash capital actually invested in the construction and equipment of such railroads, or any part thereof, the guaranty to be in such form and under such provisions requiring repayment of any sum paid thereunder as said government shall deem to be to the public interest, and the act making the guaranty shall declare the proper rules for ascertaining clearly the cash capital actually invested in said railroads and the net income actually received on said capital so invested, and shall set forth the limit of invested capital to which said guaranty shall apply, and shall provide for supervision by said government of the conduct of the finances of the road and its location, construction, and maintenance, as well as by the presence in the board of directors of two or more government directors, the number and manner of their selection to be determined by law, as also by such further supervision, through the auditing, engineering, and railroad bureaus of said government, as the public interest shall require. The said guaranty may be made in the form of a guaranty of interest on bonds or of income on preferred or common stock, or in such other form as may be determined by said government, and shall be made on such other terms and conditions as said government shall approve: *Provided, however*, That the total annual contingent liability of said government under the guaranties authorized by this section shall not at any time exceed the sum of one million five hundred thousand dollars, and that no such guaranty shall continue for a longer period than thirty years.

SEC. 5. That material imported into the Philippine Islands for the construction and equipment of railroads therein may, in the discretion of the general government of said islands, under rules and regulations to be by it prescribed, be admitted free of duty.

SEC. 6. That the immigration laws of the United States in force in the Philippine Islands shall be administered by the officers of the general government thereof designated by appropriate legislation of said government, and all moneys collected under said laws as duty or head tax on alien immigrants coming into said islands shall not be covered into the general fund of the Treasury of the United States, but shall be paid into the treasury of said islands to be used and expended for the government and benefit of said islands.

SEC. 7. That the government of the Philippine Islands is hereby authorized to prescribe the compensation for the chief justice and associate justices of the supreme court of the islands, not to exceed

ten thousand five hundred dollars for the chief justice and ten thousand dollars for each associate justice per annum. Whenever, by reason of temporary disability of any judge of the supreme court or by reason of vacancies occurring therein, a quorum of the court shall not be present for business the governor-general of said islands is authorized to designate a judge or judges of the court of first instance in the islands to sit and act temporarily as a judge or judges of the supreme court in order to constitute a quorum of said supreme court for business. If a judge so designated shall not have his usual place of residence at the city of Manila he shall be allowed his traveling expenses from his usual place of residence to Manila and return and the sum of ten pesos Philippine currency a day for the period during which he is engaged in the supreme court, the period to be calculated from the time he leaves his usual place of residence until his return from Manila.

SEC. 8. That the civil governor of the Philippine Islands shall hereafter be known as the governor-general of the Philippine Islands.

SEC. 9. That sections twenty-two, twenty-three, twenty-four, twenty-five, twenty-nine, thirty-one, thirty-six, thirty-seven, thirty-nine, fifty-three, and fifty-eight of the act of Congress approved July first, nineteen hundred and two, entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," being provisions of said act respecting mineral lands, are hereby amended by reducing all measurements therein, whether of distance, area, or value, to the metric system, to wit, feet to meters, acres to hectares, miles to kilometers, and also dollars to pesos, so that said sections as amended shall read as follows:

"SEC. 22. That mining claims upon land containing veins or lodes of quartz or other rock in place-bearing gold, silver, cinnabar, lead, tin, copper, or other valuable deposits located after the passage of this act, whether located by one or more persons qualified to locate the same under the preceding section, shall be located in the following manner and under the following conditions: Any person so qualified desiring to locate a mineral claim shall, subject to the provisions of this act with respect to land which may be used for mining, enter upon the same and locate a plat of ground measuring, where possible, but not exceeding three hundred meters in length by three hundred meters in breadth, in as nearly as possible a rectangular form; that is to say, all angles shall be right angles, except in cases where a boundary line of a previously surveyed claim is adopted as common to both claims, but the lines need not necessarily be meridional. In defining the size of a mineral claim it shall be measured horizontally, irrespective of inequalities of the surface of the ground.

"SEC. 23. That a mineral claim shall be marked by two posts, placed as nearly as possible on the line of the ledge or vein, and the posts shall be numbered one and two, and the distance between posts numbered one and two shall not exceed three hundred meters, the line between posts numbered one and two to be known as the location line; and upon posts numbered one and two shall be written the name given to the mineral claim, the name of the locator, and the date of the location. Upon post numbered one there shall be written, in addition to the foregoing, 'Initial post,' the approximate compass bearing of post numbered two, and a statement of the number of

"SEC. 24. That when a claim has been located the holder shall immediately mark the line between posts numbered one and two, so that it can be distinctly seen. The locator shall also place a post at the point where he has found minerals in place, on which shall be written 'Discovery post:' *Provided*, That when the claim is surveyed the surveyor shall be guided by the records of the claim, the sketch plan on the back of the declaration made by the owner when the claim was recorded, posts numbered one and two, and the notice on number one, the initial post.

1.

2.

No. 1 post:

“SEC. 29. That no mineral claim which, at the date of its record, is known by the locator to be less than a full-sized mineral claim shall be recorded without the word ‘fraction’ being added to the name of the claim and the application being accompanied by an affidavit or solemn declaration made by the applicant or some person on his behalf cognizant of the facts: That the legal posts and notices have been put up; that mineral has been found in place on the fractional claim proposed to be recorded; that the ground applied for is unoccupied by any other person. In the said declaration shall be set out the name

of the applicant and the date of the location of the claim. The words written on the posts numbered one and two shall be set out in full and as accurate a description as possible of the position of the claim given. A sketch plan shall be drawn by the applicant on the back of the declaration, showing as near as may be the position of the adjoining mineral claims and the shape and size, expressed in meters, of the claim or fraction desired to be recorded: *Provided*, That the failure on the part of the locator of a mineral claim to comply with any of the foregoing provisions of this section shall not be deemed to invalidate such location if, upon the facts, it shall appear that such locator has actually discovered mineral in place on said location and that there has been on his part a bona fide attempt to comply with the provisions of this act, and that the nonobservance of the formalities hereinbefore referred to is not of a character calculated to mislead other persons desiring to locate claims in the vicinity.

"SEC. 31. That every person locating a mineral claim shall record the same with the provincial secretary, or such other officer as by the government of the Philippine Islands may be described as mining recorder of the district within which the same is situate, within thirty days after the location thereof. Such record shall be made in a book to be kept for the purpose in the office of the said provincial secretary or such other officer as by said government described as mining recorder, in which shall be inserted the name of the claim, the name of each locator, the locality of the mine, the direction of the location line, the length in meters, the date of location, and the date of the record. A claim which shall not have been recorded within the prescribed period shall be deemed to have been abandoned."

"SEC. 36. That the United States Philippine Commission or its successors may make regulations, not in conflict with the provisions of this Act, governing the location, manner of recording, and amount of work necessary to hold possession of a mining claim, subject to the following requirements:

"On each claim located after the passage of this Act, and until a patent has been issued therefor, not less than two hundred pesos' worth of labor shall be performed or improvements made during each year: *Provided*, That upon a failure to comply with these conditions the claim or mine upon which such failure occurred shall be open to relocation in the same manner as if no location of the same had ever been made, provided that the original locators, their heirs, assigns, or legal representatives have not resumed work upon the claim after failure and before such location. Upon the failure of any one of several coowners to contribute his proportion of the expenditures required thereby, the coowners who have performed the labor or made the improvements may, at the expiration of the year, give such delinquent coowners personal notice in writing, or notice by publication in the newspaper published nearest the claim, and in two newspapers published at Manila, one in the English language and the other in the Spanish language, to be designated by the chief of the Philippine insular bureau of public lands, for at least once a week for ninety days, and if, at the expiration of ninety days after such notice in writing or by publication, such delinquent shall fail or refuse to contribute his proportion of the expenditure required by this section, his interest in the claim shall become the property of his coowners who have made the required expenditures. The period within which

the work required to be done annually on all unpatented mineral claims shall commence on the first day of January succeeding the date of location of such claim.

"SEC. 37. That a patent for any land claimed and located for valuable mineral deposits may be obtained in the following manner: Any person, association, or corporation authorized to locate a claim under this Act, having claimed and located a piece of land for such purposes, who has or have complied with the terms of this Act, may file in the office of the provincial secretary, or such other officer as by the government of said islands may be described as mining recorder of the province wherein the land claimed is located, an application for a patent, under oath, showing such compliance, together with a plat and field notes of the claim or claims in common, made by or under the direction of the chief of the Philippine insular bureau of public lands, showing accurately the boundaries of the claim, which shall be distinctly marked by monuments on the ground, and shall post a copy of such plat, together with a notice of such application for a patent, in a conspicuous place on the land embraced in such plat previous to the filing of the application for a patent, and shall file an affidavit of at least two persons that such notice has been duly posted, and shall file a copy of the notice in such office, and shall thereupon be entitled to a patent for the lands, in the manner following: The provincial secretary, or such other officer as by the Philippine government may be described as mining recorder, upon the filing of such application, plat, field notes, notices, and affidavits, shall publish a notice that such an application has been made, once a week for the period of sixty days, in a newspaper to be by him designated as nearest to such claim, and in two newspapers published at Manila, one in the English language and one in the Spanish language, to be designated by the chief of the Philippine insular bureau of public lands; and he shall also post such notice in his office for the same period. The claimant at the time of filing this application, or at any time thereafter within the sixty days of publication, shall file with the provincial secretary, or such other officer as by the Philippine government may be described as mining recorder, a certificate of the chief of the Philippine insular bureau of public lands that one thousand pesos' worth of labor has been expended or improvements made upon the claim by himself or grantors; that the plat is correct, with such further description by such reference to natural objects or permanent monuments as shall identify the claim, and furnish an accurate description to be incorporated in the patent. At the expiration of the sixty days of publication the claimant shall file his affidavit, showing that the plat and notice have been posted in a conspicuous place on the claim during such period of publication. If no adverse claim shall have been filed with the provincial secretary, or such other officer as by the government of said islands may be described as mining recorder, at the expiration of the sixty days of publication, it shall be assumed that the applicant is entitled to a patent upon the payment to the provincial treasurer, or the collector of internal revenue, of twenty-five pesos per hectare, and that no adverse claim exists; and thereafter no objection from third parties to the issuance of a patent shall be heard, except it be shown that the applicant has failed to comply with the terms of this Act: *Provided*, That where the claimant for a patent is not a resident of or within the province wherein the land containing

the vein, ledge, or deposit sought to be patented is located, the application for patent and the affidavits required to be made in this section by the claimant for such patent may be made by his, her, or its authorized agent where said agent is conversant with the facts sought to be established by said affidavits.

"SEC. 39. That where an adverse claim is filed during the period of publication it shall be upon oath of the person or persons making the same, and shall show the nature, boundaries, and extent of such adverse claim, and all proceedings, except the publication of notice and making and filing of the affidavits thereof, shall be stayed until the controversy shall have been settled or decided by a court of competent jurisdiction or the adverse claim waived. It shall be the duty of the adverse claimant, within thirty days after filing his claim, to commence proceedings in a court of competent jurisdiction to determine the question of the right of possession and prosecute the same with reasonable diligence to final judgment, and a failure so to do shall be a waiver of his adverse claim. After such judgment shall have been rendered the party entitled to the possession of the claim, or any portion thereof, may, without giving further notice, file a certified copy of the judgment roll with the provincial secretary, or such other officer as by the government of the Philippine Islands may be described as mining recorder, together with the certificate of the chief of the Philippine insular bureau of public lands that the requisite amount of labor has been expended or improvements made thereon, and the description required in other cases, and shall pay to the provincial treasurer or the collector of internal revenue of the province in which the claim is situated, as the case may be, twenty-five pesos per hectare for his claim, together with the proper fees, whereupon the whole proceedings and the judgment roll shall be certified by the provincial secretary, or such other officer as by said government may be described as mining recorder, to the secretary of the interior of the Philippine Islands, and a patent shall issue thereon for the claim, or such portion thereof as the applicant shall appear, from the decision of the court, rightly to possess. The adverse claim may be verified by the oath of any duly authorized agent or attorney in fact of the adverse claimant cognizant of the facts stated; and the adverse claimant, if residing or at the time being beyond the limits of the province wherein the claim is situated, may make oath to the adverse claim before the clerk of any court of record, or any notary public of any province or military department of the Philippine Islands, or any other officer authorized to administer oaths where the adverse claimant may then be. If it appears from the decision of the court that several parties are entitled to separate and different portions of the claim, each party may pay for his portion of the claim, with the proper fees, and file the certificate and description by the chief of the Philippine insular bureau of public lands, whereupon the provincial secretary or such other officer as by the government of said islands may be described as mining recorder shall certify the proceedings and judgment roll to the secretary of the interior for the Philippine Islands, as in the preceding case, and patents shall issue to the several parties according to their respective rights. If, in any action brought pursuant to this section, title to the ground in controversy shall not be established by either party, the court shall so find, and judgment shall be entered accordingly. In such case costs shall not be allowed to

either party, and the claimant shall not proceed in the office of the provincial secretary or such other officer as by the government of said islands may be described as mining recorder or be entitled to a patent for the ground in controversy until he shall have perfected his title. Nothing herein contained shall be construed to prevent the alienation of a title conveyed by a patent for a mining claim to any person whatever."

"SEC. 53. That every person above the age of twenty-one years who is a citizen of the United States or of the Philippine Islands, or who has acquired the right of a native of said islands under and by virtue of the treaty of Paris, or any association of persons severally qualified as above, shall, upon application to the proper provincial treasurer, have the right to enter any quality of vacant coal lands of said islands, not otherwise appropriated or reserved by competent authority, not exceeding sixty-four hectares to such individual person, or one hundred and twenty-eight hectares to such association upon payment to the provincial treasurer or the collector of internal revenue, as the case may be, of not less than fifty pesos per hectare for such lands, where the same shall be situated more than twenty-five kilometers from any completed railroad or available harbor or navigable stream, and not less than one hundred pesos per hectare for such lands as shall be within twenty-five kilometers of such road, harbor, or stream: *Provided*, That such entries shall be taken in squares of sixteen or sixty-four hectares, in conformity with the rules and regulations governing the public-land surveys of the said islands in plotting legal subdivisions."

"SEC. 58. That whenever it shall be made to appear to the secretary of any province or the commander of any military department in the Philippine Islands that any lands within the province are saline in character, it shall be the duty of said provincial secretary or commander, under the regulations of the government of the Philippine Islands, to take testimony in reference to such lands, to ascertain their true character, and to report the same to the secretary of the interior for the Philippine Islands; and if upon such testimony the secretary of the interior shall find that such lands are saline and incapable of being purchased under any of the laws relative to the public domain, then and in such case said lands shall be offered for sale at the office of the provincial secretary, or such other officer as by the said government may be described as mining recorder of the province or department in which the same shall be situated, as the case may be, under such regulations as may be prescribed by said government and sold to the highest bidder for cash at a price of not less than six pesos per hectare; and in case such lands fail to sell when so offered, then the same shall be subject to private sale at such office, for cash, at a price not less than six pesos per hectare, in the same manner as other lands in the said islands are sold. All executive proclamations relating to the sales of public saline lands shall be published in only two newspapers, one printed in the English language and one in the Spanish language, at Manila, which shall be designated by said secretary of the interior."

SEC. 10. That section eight of an act of Congress approved March second, nineteen hundred and three, entitled "An act to establish a standard of value and to provide for a coinage system in the Philippine Islands," is hereby amended by striking out the word "ten" in

said section and inserting in lieu thereof the words "five hundred," so that said section when amended shall read as follows:

"SEC. 8. That the treasurer of the Philippine Islands is hereby authorized, in his discretion, to receive deposits of the standard silver coins of one peso authorized by this act to be coined, at the treasury of the government of said islands or any of its branches, in sums of not less than twenty pesos, and to issue silver certificates therefor in denominations of not less than two pesos nor more than five hundred pesos, and coin so deposited shall be retained in the treasury and held for the payment of such certificates on demand, and used for no other purpose. Such certificates shall be receivable for customs, taxes, and for all public dues in the Philippine Islands, and when so received may be reissued, and when held by any banking association in said islands may be counted as a part of its lawful reserve."

SEC. 11. That the government of the Philippine Islands is hereby authorized to modify, suspend, or repeal the provisions respecting tonnage dues set forth in sections fourteen and fifteen of an act entitled "An act to revise and amend the tariff laws of the Philippine Archipelago," enacted by the Philippine Commission on the seventeenth day of September, nineteen hundred and one, and confirmed by an act of Congress approved March eighth, nineteen hundred and two, entitled "An act temporarily to provide revenue for the Philippine Islands, and for other purposes."

SEC. 12. That all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

Passed the House of Representatives April 14, 1904.

Attest:

A. McDOWELL,
Clerk.

Opinions of the Acting Attorney-General on proposed bonds for the purchase of friar estates in the Philippine Islands.

1. Opinion that the issue of bonds and the form of the bond proposed by the Philippine government, for the purpose of securing funds with which to purchase the friar lands, are in strict conformity with the act of Congress authorizing bonds for that purpose, and are legal in all respects.
2. Opinion that there exists no legal objection to the Register of the Treasury of the United States registering and recording the bonds issued by the Philippine government to secure funds with which to purchase the friar lands; and also that there is no legal objection to the Treasurer of the United States receiving from the Philippine government the money due as principal and interest on said bonds, and distributing the same to the holders of the securities.

DEPARTMENT OF JUSTICE,
Washington, D. C., December 26, 1903.

THE SECRETARY OF WAR.

SIR: In your letter of December 24 you cite sections 63, 64, and 65 of the Philippine civil government act of July 1, 1902, and state that under that legislation the Philippine government has agreed to purchase certain large parcels of land owned by religious orders or other associations, and, for the purpose of providing funds to acquire such lands, is about to borrow money and to issue \$7,200,000 of registered 4 per cent bonds, redeemable at the pleasure of said government after ten years from the date of issue, and payable thirty years from said

date. You inclose a draft of the proposed bond and request an opinion upon the legality of the issue and of the form of bond.

The law in question (32 Stat., pt. 1, pp. 691, 706, 707) provides:

SEC. 63. That the government of the Philippine Islands is hereby authorized, subject to the limitations and conditions prescribed in this act, to acquire, receive, hold, maintain, and convey title to real and personal property, and may acquire real estate for public uses by the exercise of the right of eminent domain.

SEC. 64. That the powers hereinbefore conferred in section sixty-three may also be exercised in respect of any lands, easements, appurtenances, and hereditaments, which, on the thirteenth of August, eighteen hundred and ninety-eight, were owned or held by associations, corporations, communities, religious orders, or private individuals in such large tracts or parcels and in such manner as in the opinion of the Commission injuriously to affect the peace and welfare of the people of the Philippine Islands. And for the purpose of providing funds to acquire the lands mentioned in this section said government of the Philippine Islands is hereby empowered to incur indebtedness, to borrow money, and to issue and to sell at not less than par value, in gold coin of the United States of the present standard value or the equivalent in value in money of said islands, upon such terms and conditions as it may deem best, registered or coupon bonds of said government for such amount as may be necessary, said bonds to be in denominations of fifty dollars or any multiple thereof, bearing interest at a rate not exceeding four and a half per centum per annum, payable quarterly, and to be payable at the pleasure of said government after dates named in said bonds not less than five nor more than thirty years from the date of their issue, together with interest thereon, in gold coin of the United States of the present standard value or the equivalent in value in money of said islands; and said bonds shall be exempt from the payment of all taxes or duties of said government, or any local authority therein or of the Government of the United States, as well as from taxation in any form by or under State, municipal, or local authority in the United States or the Philippine Islands. The moneys which may be realized or received from the issue and sale of said bonds shall be applied by the government of the Philippine Islands to the acquisition of the property authorized by this section, and to no other purposes.

SEC. 65. That all lands acquired by virtue of the preceding section shall constitute a part and portion of the public property of the government of the Philippine Islands, and may be held, sold, and conveyed, or leased temporarily for a period not exceeding three years after their acquisition by said government on such terms and conditions as it may prescribe, subject to the limitation and conditions provided for in this act: *Provided*, That all deferred payments and the interest thereon shall be payable in the money prescribed for the payment of said lands by the preceding section and said deferred payments shall bear interest at the rate borne by the bonds. All moneys realized or received from sales or other disposition of said lands or by reason thereof shall constitute a trust fund for the payment of principal and interest of said bonds, and also constitute a sinking fund for the payment of said bonds at their maturity. Actual settlers and occupants at the time said lands are acquired by the government shall have the preference over all others to lease, purchase, or acquire their holdings within such reasonable time as may be determined by said government.

The proposed form of bond is as follows:

The government of the Philippine Islands is indebted unto _____ or assigns in the sum of one thousand dollars.

This bond is issued in accordance with the provisions of section 64 of an act of Congress entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," approved July 1, 1902, and an act of the Philippine Commission, numbered _____, enacted _____, and is redeemable at the pleasure of the Philippine government after February 1, 1914, and payable February 1, 1934, with interest from the date hereof at the rate of four per centum per annum, payable quarterly on the first days of May, August, November, and February of each year. Both principal and interest are payable at the office of the treasury, in gold coin of the United States of the present standard value, and are exempt from the payment of all taxes or duties of the government of the Philippine Islands or any local authority therein or of the Government of the United States, as well as from taxation in any form by or under State, municipal, or local authority in the United States or the Philippine Islands.

It is evident at the outset, on the face of the proposed bonds, that they will be issued in general "in accordance with the provisions of section 64." This is an assurance by the responsible authorities that the conditions of the law have been and will be fully observed. The express terms of the bond show strict compliance with all the statutory conditions which the obligation itself must or naturally would

incorporate and enumerate. And your letter states that the contract for the purchase of the lands relates to large tracts or parcels held under the defined ownership "in such manner as in the opinion of the Commission (the Philippine Commission) to seriously affect the peace and welfare of the people of the Philippine Islands."

It is to be observed that the bonds must be sold at not less than par value in gold coin of the United States of the present standard value or the equivalent in value of the money of the Philippine Islands. Conformity to this further condition is manifestly and necessarily contemplated by yourself and the authorities of the Philippine government.

It is further to be observed that the law explicitly restricts the application of the proceeds of the loan to the purpose of the acquisition of the property authorized, and creates a trust and sinking fund for the payment of the principal and interest of the bonds. As with government and municipal loans in general, similarly authorized and conditioned, the reliance of purchasers of the bonds for protection and security is upon the statutory grant of authority and upon the credit and responsibility of the governmental obligor supported by its property and assets. In this case the lands to be acquired will constitute by express enactment a portion of the public property of the Philippine government, and all moneys realized from disposition of the lands will form a sinking fund for the bonds. The pledge of the faith and credit of the Philippine government, covering the due application of the proceeds of the loan and the maintenance of the sinking fund, proceeds, then, under authority explicitly conferred by the national power; and while in the strict and legal sense the faith of the United States is not pledged as a guaranty for the payment of the loan, or for the due use of the proceeds or the observance of the sinking fund requirements, the entire transaction is to be negotiated under the auspices of the United States, and by its recognition and aid. The assumption is therefore conclusive and necessary that the terms of the statute as to the application of the moneys realized from the sale of the bonds and as to all moneys realized from disposition of the lands and as to the sinking fund so created will be strictly followed.

I have the honor thus to suggest, outside your precise query, that I see no reason for any legal doubt of the adequacy or extent of the protection and security given to the purchasers of the bonds; and on the whole case, and in response to your particular inquiry, I have the honor to say that I am clear in the opinion that the issue of bonds and the form of bond proposed are in strict conformity with the statute and are legal in all respects.

Very respectfully,

HENRY M. HOYT,
Acting Attorney-General.

DECEMBER 31, 1903.

THE SECRETARY OF THE TREASURY.

SIR: By your letter of December 29 you inquire whether there is any legal objection to the Treasurer of the United States receiving the principal and interest of the Philippine land-purchase bonds from the Philippine government and distributing the same to the holders of the securities, as provided for in the draft of the bond proposed. You also inquire whether there is any legal objection to the Register of the Treasury of the United States registering and recording said bonds.

either party, and the claimant shall not proceed in the office of the provincial secretary or such other officer as by the government of said islands may be described as mining recorder or be entitled to a patent for the ground in controversy until he shall have perfected his title. Nothing herein contained shall be construed to prevent the alienation of a title conveyed by a patent for a mining claim to any person whatever."

"SEC. 53. That every person above the age of twenty-one years who is a citizen of the United States or of the Philippine Islands, or who has acquired the right of a native of said islands under and by virtue of the treaty of Paris, or any association of persons severally qualified as above, shall, upon application to the proper provincial treasurer, have the right to enter any quality of vacant coal lands of said islands, not otherwise appropriated or reserved by competent authority, not exceeding sixty-four hectares to such individual person, or one hundred and twenty-eight hectares to such association upon payment to the provincial treasurer or the collector of internal revenue, as the case may be, of not less than fifty pesos per hectare for such lands, where the same shall be situated more than twenty-five kilometers from any completed railroad or available harbor or navigable stream, and not less than one hundred pesos per hectare for such lands as shall be within twenty-five kilometers of such road, harbor, or stream: *Provided*, That such entries shall be taken in squares of sixteen or sixty-four hectares, in conformity with the rules and regulations governing the public-land surveys of the said islands in plotting legal subdivisions."

"SEC. 58. That whenever it shall be made to appear to the secretary of any province or the commander of any military department in the Philippine Islands that any lands within the province are saline in character, it shall be the duty of said provincial secretary or commander, under the regulations of the government of the Philippine Islands, to take testimony in reference to such lands, to ascertain their true character, and to report the same to the secretary of the interior for the Philippine Islands; and if upon such testimony the secretary of the interior shall find that such lands are saline and incapable of being purchased under any of the laws relative to the public domain, then and in such case said lands shall be offered for sale at the office of the provincial secretary, or such other officer as by the said government may be described as mining recorder of the province or department in which the same shall be situated, as the case may be, under such regulations as may be prescribed by said government and sold to the highest bidder for cash at a price of not less than six pesos per hectare; and in case such lands fail to sell when so offered, then the same shall be subject to private sale at such office, for cash, at a price not less than six pesos per hectare, in the same manner as other lands in the said islands are sold. All executive proclamations relating to the sales of public saline lands shall be published in only two newspapers, one printed in the English language and one in the Spanish language, at Manila, which shall be designated by said secretary of the interior."

SEC. 10. That section eight of an act of Congress approved March second, nineteen hundred and three, entitled "An act to establish a standard of value and to provide for a coinage system in the Philippine Islands," is hereby amended by striking out the word "ten" in

said section and inserting in lieu thereof the words "five hundred," so that said section when amended shall read as follows:

"SEC. 8. That the treasurer of the Philippine Islands is hereby authorized, in his discretion, to receive deposits of the standard silver coins of one peso authorized by this act to be coined, at the treasury of the government of said islands or any of its branches, in sums of not less than twenty pesos, and to issue silver certificates therefor in denominations of not less than two pesos nor more than five hundred pesos, and coin so deposited shall be retained in the treasury and held for the payment of such certificates on demand, and used for no other purpose. Such certificates shall be receivable for customs, taxes, and for all public dues in the Philippine Islands, and when so received may be reissued, and when held by any banking association in said islands may be counted as a part of its lawful reserve."

SEC. 11. That the government of the Philippine Islands is hereby authorized to modify, suspend, or repeal the provisions respecting tonnage dues set forth in sections fourteen and fifteen of an act entitled "An act to revise and amend the tariff laws of the Philippine Archipelago," enacted by the Philippine Commission on the seventeenth day of September, nineteen hundred and one, and confirmed by an act of Congress approved March eighth, nineteen hundred and two, entitled "An act temporarily to provide revenue for the Philippine Islands, and for other purposes."

SEC. 12. That all acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

Passed the House of Representatives April 14, 1904.

Attest:

A. McDOWELL,
Clerk.

Opinions of the Acting Attorney-General on proposed bonds for the purchase of friar estates in the Philippine Islands.

1. Opinion that the issue of bonds and the form of the bond proposed by the Philippine government, for the purpose of securing funds with which to purchase the friar lands, are in strict conformity with the act of Congress authorizing bonds for that purpose, and are legal in all respects.
2. Opinion that there exists no legal objection to the Register of the Treasury of the United States registering and recording the bonds issued by the Philippine government to secure funds with which to purchase the friar lands; and also that there is no legal objection to the Treasurer of the United States receiving from the Philippine government the money due as principal and interest on said bonds, and distributing the same to the holders of the securities.

DEPARTMENT OF JUSTICE,
Washington, D. C., December 26, 1903.

THE SECRETARY OF WAR.

SIR: In your letter of December 24 you cite sections 63, 64, and 65 of the Philippine civil government act of July 1, 1902, and state that under that legislation the Philippine government has agreed to purchase certain large parcels of land owned by religious orders or other associations, and, for the purpose of providing funds to acquire such lands, is about to borrow money and to issue \$7,200,000 of registered 4 per cent bonds, redeemable at the pleasure of said government after ten years from the date of issue, and payable thirty years from said

date. You inclose a draft of the proposed bond and request an opinion upon the legality of the issue and of the form of bond.

The law in question (32 Stat., pt. 1, pp. 691, 706, 707) provides:

SEC. 63. That the government of the Philippine Islands is hereby authorized, subject to the limitations and conditions prescribed in this act, to acquire, receive, hold, maintain, and convey title to real and personal property, and may acquire real estate for public uses by the exercise of the right of eminent domain.

SEC. 64. That the powers hereinbefore conferred in section sixty-three may also be exercised in respect of any lands, easements, appurtenances, and hereditaments, which, on the thirteenth of August, eighteen hundred and ninety-eight, were owned or held by associations, corporations, communities, religious orders, or private individuals in such large tracts or parcels and in such manner as in the opinion of the Commission injuriously to affect the peace and welfare of the people of the Philippine Islands. And for the purpose of providing funds to acquire the lands mentioned in this section said government of the Philippine Islands is hereby empowered to incur indebtedness, to borrow money, and to issue and to sell at not less than par value, in gold coin of the United States of the present standard value or the equivalent in value in money of said islands, upon such terms and conditions as it may deem best, registered or coupon bonds of said government for such amount as may be necessary, said bonds to be in denominations of fifty dollars or any multiple thereof, bearing interest at a rate not exceeding four and a half per centum per annum, payable quarterly, and to be payable at the pleasure of said government after dates named in said bonds not less than five nor more than thirty years from the date of their issue, together with interest thereon, in gold coin of the United States of the present standard value or the equivalent in value in money of said islands; and said bonds shall be exempt from the payment of all taxes or duties of said government, or any local authority therein or of the Government of the United States, as well as from taxation in any form by or under State, municipal, or local authority in the United States or the Philippine Islands. The moneys which may be realized or received from the issue and sale of said bonds shall be applied by the government of the Philippine Islands to the acquisition of the property authorized by this section, and to no other purposes.

SEC. 65. That all lands acquired by virtue of the preceding section shall constitute a part and portion of the public property of the government of the Philippine Islands, and may be held, sold, and conveyed, or leased temporarily for a period not exceeding three years after their acquisition by said government on such terms and conditions as it may prescribe, subject to the limitation and conditions provided for in this act: *Provided*, That all deferred payments and the interest thereon shall be payable in the money prescribed for the payment of said lands by the preceding section and said deferred payments shall bear interest at the rate borne by the bonds. All moneys realized or received from sales or other disposition of said lands or by reason thereof shall constitute a trust fund for the payment of principal and interest of said bonds, and also constitute a sinking fund for the payment of said bonds at their maturity. Actual settlers and occupants at the time said lands are acquired by the government shall have the preference over all others to lease, purchase, or acquire their holdings within such reasonable time as may be determined by said government.

The proposed form of bond is as follows:

The government of the Philippine Islands is indebted unto ———— or assigns in the sum of one thousand dollars.

This bond is issued in accordance with the provisions of section 64 of an act of Congress entitled "An act temporarily to provide for the administration of the affairs of civil government in the Philippine Islands, and for other purposes," approved July 1, 1902, and an act of the Philippine Commission, numbered ———, enacted ———, and is redeemable at the pleasure of the Philippine government after February 1, 1914, and payable February 1, 1934, with interest from the date hereof at the rate of four per centum per annum, payable quarterly on the first days of May, August, November, and February of each year. Both principal and interest are payable at the office of the treasury, in gold coin of the United States of the present standard value, and are exempt from the payment of all taxes or duties of the government of the Philippine Islands or any local authority therein or of the Government of the United States, as well as from taxation in any form by or under State, municipal, or local authority in the United States or the Philippine Islands.

It is evident at the outset, on the face of the proposed bonds, that they will be issued in general "in accordance with the provisions of section 64." This is an assurance by the responsible authorities that the conditions of the law have been and will be fully observed. The express terms of the bond show strict compliance with all the statutory conditions which the obligation itself must or naturally would

incorporate and enumerate. And your letter states that the contract for the purchase of the lands relates to large tracts or parcels held under the defined ownership "in such manner as in the opinion of the Commission (the Philippine Commission) to seriously affect the peace and welfare of the people of the Philippine Islands."

It is to be observed that the bonds must be sold at not less than par value in gold coin of the United States of the present standard value or the equivalent in value of the money of the Philippine Islands. Conformity to this further condition is manifestly and necessarily contemplated by yourself and the authorities of the Philippine government.

It is further to be observed that the law explicitly restricts the application of the proceeds of the loan to the purpose of the acquisition of the property authorized, and creates a trust and sinking fund for the payment of the principal and interest of the bonds. As with government and municipal loans in general, similarly authorized and conditioned, the reliance of purchasers of the bonds for protection and security is upon the statutory grant of authority and upon the credit and responsibility of the governmental obligor supported by its property and assets. In this case the lands to be acquired will constitute by express enactment a portion of the public property of the Philippine government, and all moneys realized from disposition of the lands will form a sinking fund for the bonds. The pledge of the faith and credit of the Philippine government, covering the due application of the proceeds of the loan and the maintenance of the sinking fund, proceeds, then, under authority explicitly conferred by the national power; and while in the strict and legal sense the faith of the United States is not pledged as a guaranty for the payment of the loan, or for the due use of the proceeds or the observance of the sinking fund requirements, the entire transaction is to be negotiated under the auspices of the United States, and by its recognition and aid. The assumption is therefore conclusive and necessary that the terms of the statute as to the application of the moneys realized from the sale of the bonds and as to all moneys realized from disposition of the lands and as to the sinking fund so created will be strictly followed.

I have the honor thus to suggest, outside your precise query, that I see no reason for any legal doubt of the adequacy or extent of the protection and security given to the purchasers of the bonds; and on the whole case, and in response to your particular inquiry, I have the honor to say that I am clear in the opinion that the issue of bonds and the form of bond proposed are in strict conformity with the statute and are legal in all respects.

Very respectfully,

HENRY M. HOYT,
Acting Attorney-General.

DECEMBER 31, 1903.

THE SECRETARY OF THE TREASURY.

SIR: By your letter of December 29 you inquire whether there is any legal objection to the Treasurer of the United States receiving the principal and interest of the Philippine land-purchase bonds from the Philippine government and distributing the same to the holders of the securities, as provided for in the draft of the bond proposed. You also inquire whether there is any legal objection to the Register of the Treasury of the United States registering and recording said bonds.

The language of the proposed form of bond is, "both principal and interest are payable at the office of the Treasurer of the United States," but there is no specific reference on the face of the proposed form to registration.

There is no law expressly authorizing such use of the office facilities of the Treasurer of the United States and the Register of the Treasury, and the question is whether there is any law which expressly or by plain implication forbids the proposed action; and in case there is no such law, whether, in view of the relations between the Government of the United States and the Philippine government under existing legislation, and in view of certain precedents and analogies, you may legally authorize the plan suggested.

Section 243, Revised Statutes, forbids the Secretary of the Treasury, the Treasurer, and the Register, among other officers, to be concerned or interested directly or indirectly in the purchase or disposal of public securities of the United States or of any State. The obvious purpose of that law, as shown throughout the section, is to prohibit personal interest in such bond issues and certain other affairs and business and private emolument or gain in the transaction of any business in the Treasury Department. Necessarily, no such interest or emolument is contemplated in the present case; but while the spirit and purpose of that statute would control the exercise of the functions now invoked, it does not prohibit them. There is, then, in existing law neither specific authority nor prohibition; the power is neither granted nor denied by express language or by clear implication. Undoubtedly as a general rule, when it is sought to exercise any official power or function, explicit authority must be found in the law; but the application of this doctrine is not necessarily universal, and depends upon the character and relations of the particular power and all the germane circumstances.

In the nature of the case, and under the necessary and established practice, as well as by force of section 161, Revised Statutes, the Secretary of the Treasury directs all the operations of the Department, the conduct of the officers serving in it and under him, and the performance of its business. In the present matter, consequently, it is essential that the course proposed should receive your approval as head of the Department supervising all its activities. But I conceive that this novel situation is not one in which you would positively direct the Treasurer, but one calling upon him to act, because of his official capacity, it is true, yet still in a personal way *sub modo*, and subject to the exercise of his individual choice and discretion. In short, as it appears to me, if the Philippine government sees fit to commit the receipt and disbursement of the funds for the interest and the principal of the bonds to the Treasurer of the United States acting as the agent *pro hoc vice* of that government, and the Treasurer is willing, with your approval, to undertake the trust, the transaction is natural and legitimate, and I am aware of no statutory enactment or principle of law which offers an obstacle. I say the transaction in this view is natural and legitimate; that statement calls for more particular discussion of the legal relations and precedents involved.

The loan is issued by the authority of the United States for a purpose of great consequence to the Philippine Islands and to the United States as well, in its sovereign and governmental connection with the islands (secs. 63, 64, 65 of the Philippine civil government act of

July 1, 1902; 32 Stat., 691). Although the loan is not legally guaranteed by the United States, the issue is obviously made over its faith and credit and by its aid and recognition. The bonds are offered to the public under the auspices of the United States "by direction of the Secretary of War and the authority of the government of the Philippine Islands," founded upon the act of Congress.

It is pertinent to observe that all the laws of the Philippine Commission are enacted, in conformity with the first section of the act of Congress just cited "by authority of the United States;" and it seems that when an agent or representative of the Philippine government in this country is appointed, the Philippine enactment also proceeds "with the consent of the Secretary of War first had." (Public Laws and Resolutions passed by the United States Philippine Commission, 1901, *passim*; *id.*, p. 273, in re "Disbursing Agent.") This clause calls up the function and powers of the Secretary of War relative to the government of the Philippines, which rest upon the instructions of President McKinley to the Philippine Commission of April 7, 1900, directing the Commission to report to the Secretary of War, and that their action be subject to his approval and control. This direction was recognized and confirmed in the first section of the act of July 1, 1902, *supra*.

Furthermore, Congress has already established relations between the Treasury of the United States and the treasury of the Philippine Islands regarding the deposit and transfer of public moneys (act of March 8, 1902; 32 Stat., 54); and the bonds in question are to be issued by officers of the United States in execution of a specific act of Congress (*supra*). It appears also from the announcement circular of the Bureau of Insular Affairs of the War Department, inviting subscriptions to the bonds, from which I have already quoted the clause impressing the sanction and authority of the Secretary of War upon the call for bids and the entire negotiation, that by your direction the Treasury Department, under certain conditions, will accept the bonds as security for deposits of public money and in substitution for Government bonds now held as such security.

It appears further that the instructions from the Secretary of War to the civil governor of the Philippines, dated May 9, 1902, authorizing the latter to negotiate for and determine upon a sale of the lands of the religious orders in the Philippines, was transmitted to the Philippine Committee of the Senate June 6, 1902. (Senate Doc. No. 331, pt. 3, 57th Cong., 1st sess., p. 2924.) And it appears that the report of the House Committee on Insular Affairs, dated April 10, 1902, which recommended the passage of the Philippine civil government bill (now the act of July 1, 1902, *supra*), sets out the "Friars' lands" question with Governor Taft's testimony before the committee. (H. R. Report No. 1540, 57th Cong., 1st sess., p. 4; see also report No. 2496, 57th Cong., 1st sess., p. 19.)

The report of the Senate Philippine Committee of March 31, 1902, (Senate Report, No. 915, 57th Cong., 1st sess., p. 2), emphasizes the necessity of providing for the purchase of those lands under the provisions of sections 63-65 of the law as finally adopted.

Thus it appears that Congress passed the law with full knowledge of all the elements and necessities of the situation.

These facts, with similar facts and the statutes and laws cited, as

well as others (of coinage sections 76-83, act of July 1, 1902), show the close relation of the United States, its officers and instrumentalities, to this purchase of lands and issue of bonds, and to the financial situation in general in the Philippine Islands. The interest and credit of the United States are deeply and essentially concerned in these matters.

It is, however, true that when the Treasurer of the United States transacts such business as is now proposed, not covered by his original and general duties in the Treasury Department service (Secs. 301-311, Rev. Stat.), he proceeds customarily under specific authority of law. It appears that the Treasurer, by special act of Congress, now performs similar duties as agent for a number of funds. These funds are never covered into the Treasury; otherwise it would require an act of Congress to authorize the disbursement thereof. (Secs. 3593, 3620, 3675, Rev. Stat.) Thus, for example, by the acts of June 20, 1874, and February 20, 1875 (18 Stat., 116; id., 332), it was expressly provided that the 3.65 per cent bonds of the District of Columbia, for the payment of the principal and interest of which, and the creation of a sinking fund, the faith of the United States was explicitly pledged, should be registered in the office of the Register of the Treasury, and the interest thereon should be payable at the Treasury of the United States. (See also the acts of March 3, 1891, 26 Stat., 1103, and of August 13, 1894, 28 Stat., 277.)

On the other hand, there is a precedent instance in which the Treasurer performs a similar function to the one now contemplated without specific authority of law, and the exception is in the case of the fund known as the "whole cost fund" of the District of Columbia. This fund is composed of moneys received by the District to cover the cost of certain municipal work performed by it for property owners, subject to ultimate return of the difference between the amount received and the actual cost. Public considerations rendered it important that this business of the District should be transacted by the Treasury, and it seems that, with your approval, the Treasurer, at the request of the Commissioners of the District, assented to the opening of a separate account on the books of his office, known as the "whole cost funds," and thereupon received and disbursed moneys on that account, the work being undertaken rather as a service of comity than a matter of formal responsibility.

This instance seems to me to furnish a sufficient analogy and precedent for the course proposed in the present case.

It is, however, proper for me to notice various other points suggested by the foregoing review.

The bond given by the Treasurer (sec. 302, Rev. Stat.) is conditioned for the faithful performance of the duties of his office (Rev. Stat., supra, and various special acts as herein cited, with others) and for the fidelity of the persons by him employed in those duties. The service now proposed is not such a duty, and if, therefore, the Philippine government desires or needs protection, it appears to be necessary to provide through appropriate enactments of the Commission or by the proper authorities acting in their behalf, for a specific bond to cover this separate transaction and responsibility to be undertaken by the Treasurer. If for this reason or any other it should be deemed proper to grant special compensation to the Treasurer for the service, it is probable that action by Congress as well as the Philippine Commission

would be requisite in view of the statutes generally forbidding an officer of the United States to receive additional compensation or allowance for his services (sec. 1765, Rev. Stat., act of June 20, 1874, 18 Stat., 85, *inter alia*), and especially in view of sec. 243, Rev. Stat., referred to *ante*. But it must be said that the statutes prohibiting extra compensation—as distinguished from section 243 denouncing private emolument for transacting any business in the Treasury Department—contemplate additional allowances from the United States for work in its service. And it seems, accordingly, that in numerous instances a separate compensation has been given to United States officers for separate duties performed for our insular governments. By express authority of Congress, officers of the Army are acting as officers of the Philippine constabulary, and are receiving special compensation for that service (act of January 30, 1903; 32 Stat., 783). Without express authority from Congress, officers of the United States Army serving in Cuba received special compensation from the Cuban revenues; and it appears that this fact was frequently reported to Congress during a series of years, and met the approval of committees and never received dissent or disapproval from either House of Congress. An officer of the Bureau of Insular Affairs in the War Department receives at present under a law of the Philippine Commission (Public Laws and Resolutions passed by the U. S. Philippine Commission, 1901, p. 273, *ut supra*) extra compensation for performing the duties of disbursing agent for that government in the United States.

It is certain, however, that the United States can not properly be charged with any extra expense incurred by its regular departmental service because of this transaction; and since, further, there is no existing appropriation out of which the necessary clerical hire and other items of cost could legally be defrayed it seems necessary for the Philippine government to provide for defraying such items of expense. You may, for some or all of the reasons inferable from the preceding discussion, deem it judicious to seek to obtain Congressional action which shall specifically recognize and provide for the entire situation presented, or for the various features of expense, compensation to the Government or its officers, official liability for the faithful performance of the trust, etc. Legislation by Congress might take the form of conferring authority upon you or other officers of the Government in advance of any administrative action whatever upon such unsettled points, or might specifically confirm or approve the action which you may conclude to take forthwith. Of course what I have said herein with special reference to the Treasurer of the United States applies equally to the Register of the Treasury.

But however you may determine to proceed upon the collateral matters and subsidiary aspects of the case referred to—in response to your particular inquiry, which is the main and essential one, I have the honor to advise you, upon full consideration, that if the Treasurer of the United States and the Register of the Treasury are willing to undertake the respective services proposed on behalf of the Philippine government, and if you consent and approve, I am aware of no legal objection to carrying out the arrangement without specific authority of law.

Very respectfully,

HENRY M. HOYT,
Acting Attorney-General.
